Reagan, Myrdal, struggle over acid rain

ACID RAIN--President Ronald Reagan, faced with a Senate trade vote Sunday on his 24-hour energy bill, met in private with Senator by name, Reagan arranged a meeting for the Canadian capital of Ottawa for this week with Minister Myrdal. In the initial previous meeting, the two got together of the two conservative leaders in a political climate dramatically altered by scandal and on both sides of the border.

TO UNDERGO his own commitment, to the Senate, Reagan and Myrdal are meeting at the high-powered eagles of the meeting.

Appearing on NBC's "Meet the Press," Myrdal later said that he was in the process of predicting any tangible result of the meeting. "I don't expect any major breakthrough," he said, "and I don't know what this meeting is all about. I can only say that we have surplus energy."

Myrdal, however, said that the United States and Canada are working on a high-powered eagles of the meeting.

"What is required in a treaty, in an agreement, is a treaty that will last longer than a year; U.S. officials must be sure that we cannot solve the problem on an ad hoc basis," the Senator from Washington said.

Reagan, Myrdal are expected to be at the meeting at the same time as previous years.

Myrdal, however, said that his country's energy policy is not as clear as in previous years.

MIKULSKY LIGHTLY 12-4 estimation that it's illegal to burn acid rain. "I think the problem is not as big as it seems," he said. "We hope we can have a deal on this by the end of the week." The Senate has voted to require the President to report on the results of the meeting.

"What is required in a treaty, in an agreement, is a treaty that will last longer than a year. I think that is something we should be working on," the Senator from Washington said.

Myrdal, however, said that the United States and Canada are working on a high-powered eagles of the meeting.

Now Masters program to begin next fall

Starting next fall, the UI College of Business Administra-
tion will offer a "Program for Emerging Managers," a 31-month intensive course of graduate study allowing students to obtain an M.B.A. degree while working a full-time job.

One requirement for these accepted into the program is that they have a minimum of three years work experience and the ability to make the decision to enroll. Richerson said persons undertaking graduate studies need that support from their families and employers.

Drug may give hope to some MD victims

Researchers at the University of Iowa Hospital and
Veterans Affairs Hospital have developed a new drug that may aid some Multiple Sclerosis patients.

The research, funded by the Muscular Dystrophy Associ-
ation, is aimed at stopping the immune system's destruction of the spinal cord.

Multiple Sclerosis is a disorder of the immune system in which the body generates an immune attack against its own tissue. The research, the researchers believe, could stop the immune assault and provide a drug for MS patients.

Judge dismisses fake license case

By Anne Wallace
Staff Writer

The State Supreme Court on Monday threw out a $1 million lawsuit against John's Smoke Shop aboard the ship's dock in downtown Iowa City.

The lawsuit, filed by the state's attorney general, alleged that the smoke shop had sold counterfeit driver's licenses.

Judge Leonard Jepsen, who presided over the case, ruled that the plaintiff, the State of Iowa, had not provided enough evidence to support its claim.

"The evidence presented by the State was not sufficient to prove that John's Smoke Shop sold counterfeit driver's licenses," Jepsen said.

The case was撤销 in a unanimous decision by the court.

Burlington Police Department

Burlington police said they are investigating a reported explosion at a grain elevator in Burlington.

"We're still in the early stages of the investigation," said Capt. Larry Werner.

The blast occurred at a 12-story grain elevator located on the city's downtown riverfront.

"The explosion was massive," Werner said.

"We do not know the cause of the explosion at this time," he added.

The blast caused widespread damage to the elevator and surrounding buildings.

Local radio stations in Burlington were flooded with advertisements from window companies reporting low prices.

"We're still trying to figure out what caused the explosion," Werner said.

"It's hard to say for sure," he added.

"But we're investigating everything," he said.

"It's possible that the explosion was caused by a gas leak," Werner said.

"Or it could have been caused by a mechanical failure," he added.

"We're just trying to figure out what happened," he said.

"It's a sad day for Burlington," he said.

"We're trying to figure out what we can do to help the people who were affected," he said.
Equal access

Let's give the UI and the city of Iowa City a big pat on the back. Both have gone above and beyond the call of duty to ensure that those who have taken Iowa City seriously making this community accessible to the disabled. In recent years, Iowa City has developed a keen awareness about disabilities and is respected for its efforts to make its environment suitable for those who are physically challenged.

Today all university buildings are accessible to those with physical disabilities. Although some students in dentists are saying about conditions here.

Another important factor is that the Iowa City has increased that to wheelchair riders to travel independently.

Everett Koop, a bona fide conservative, because his tution, demagogues put forth their own paranoid, ideolog­

effort to save children, he is willing to tell them the problem of acquired immune deficiency syndrome.

today, the manufacturers of toxic chemicals and their insurers are trying to weaken federal and state product-liability laws under the guise of tort reform. Comment

Today, the manufacturers of toxic chemicals and their insurers are trying to weaken federal and state product-liability laws under the guise of tort reform. Among other things, they want judges from preceding cases to be barred from using expert testimony and in the courtroom, jurors from one end of the country to the other, insurers are fighting back.

We must strongly support the House bill and give states the option to keep the laws intact. This is the only way to prevent juries from awarding huge amounts and reckless expenses.

The manufacturers and their insurers are saying that we must be protected from lawsuits. They are trying to weaken our system.

But there's more bad news. Iowa City, like other communities, is recognizing that we have to fight cancer and other environmental diseases under massive assault.

This assault is being mounted against the concept of strict liability in the manufacture of toxic substances and, through their insurance carriers, in order to avoid being carried out in the Con­gress and in its various state legislatures.

Before present laws of the state of Iowa, a manufacturer is required to test its product and to guarantee that it will not pose a threat to the safety and health of those who use it or come in contact with it. If safety cannot be guaranteed by proper tests, the manufacturer must have a warning label on the product.

The case of 79-year-old Mina de Young has come to the fore.

Fire
Continued from page 1A

A spark ignited the gas mixture, which is turn ignited through a valve gasket. Presumably the escaping gas had been overheating for days, storing up enough energy to cause damage.

Firefighters from the Johnson County Fire Department responded to the fire, which destroyed the dome containing liquid propane gas. They were able to contain the fire, though it caused extensive damage to the building and surrounding areas.

The cause of the fire is under investigation, with the potential for criminal charges.

Gas fire causes mass evacuation

By James Cahoy
Staff writer

While many UI students woke up to the sound of the sirens, others were faced with the reality of being evacuated from their homes.

The accident occurred on Thursday morning, when a spark ignited the gas mixture, causing a massive explosion. The blast waves were felt for miles around, causing severe damage to nearby buildings.

Continue from page 1A

The explosion occurred when a spark ignited the gas mixture, causing a massive explosion. The blast waves were felt for miles around, causing severe damage to nearby buildings.

The event has prompted the evacuation of all students living in the affected area, with the hopes of preventing further incidents.

Firefighters, sheriff’s deputies, and police officers have been mobilized to the scene to assist in the evacuation process.

The fire and said it sounded like a train.

"It was really strange," said Johnson County Sheriff Gary Hughes. "I've never heard anything like it."

A quick phone survey of UI dormitory residents revealed that the fire destroyed the dome containing the liquid propane gas.

The blast waves were felt for miles around, causing severe damage to nearby buildings.

The evacuation process has been ongoing throughout the morning, with the hopes of preventing further incidents.

Guest dies in Philadelphia hotel fire

MALLA, Pennsylvania—Police suspected less than an hour after a fire swept through a hotel and an office building downtown late Friday night, killing at least one person, in the heart of shopping district.

A fire was reported at about 10:30 p.m. at the Holiday Inn on the northeast corner of 12th and Market streets. Police said they had received no report of injuries.

The cause of the fire was not immediately known. Police said they were checking a report that a man had died in the fire.

Separatists killed while holding bomb

TAFALLA, Spain—Twelve Basque separatists were killed and a third was wounded Tuesday when a bomb they were transporting exploded.

The bomb was a homemade device about the size of a suitcase. It was found in a car near the train station in Bilbao, the country's second-largest city.

The separatists, who are fighting for independence for the Basque region in northern Spain, have been involved in a series of bombings in the area.

Bugging reports plague U.S. as embassy troubles mount

WASHINGTON, D.C. - President Ronald Reagan, responding to a report that the embassy in Moscow is already being bugged, said Sunday that the situation cannot be remedied by "any symbolic action now being considered or any symbolic action ever being considered by the Soviet side."

Lawmakers: POW data not forwarded

WASHINGTON, D.C. - Pentagon and National Security Council officials have for months failed to forward important information to President Ronald Reagan following his visit to the Soviet Union, according to a new government study.

The National Security Council study, released Tuesday by the Senate Select Committee on Intelligence, said there is a "serious gap" in intelligence gathering about the status of Powell's POW data, and the administration's failure to provide him with the information.

The study said the administration had failed to provide Powell with the information he needed to make decisions on POW issues, and that a "serious gap" in intelligence gathering about the status of Powell's POW data had existed for several years that the problem had been going on.

The New York Times, quoting unnamed government officials, reported Sunday that secretaries of state and defense officials had told the office of the president that they did not have information on POWs because the Soviets were not sharing any information.

The study said that the administration had failed to provide Powell with the information he needed to make decisions on POW issues, and that a "serious gap" in intelligence gathering about the status of Powell's POW data had existed for several years.

Rain-flooded creek causes New York bridge collapse

FONA, N.Y. (UPI) - A 200-foot section of the New York Thruway collapsed Sunday, plunging at least two vehicles into a rain-swollen creek when two smaller bridges over the creek were considered closed.

The state mobilized three energetic search teams and 40 or more rescue workers to search for missing vehicles and victims.

The central, 200-foot-long section of the 540-foot bridge, which extends across the waters, had risen 10 feet above the flood stage.

A Thruway authority worker looks on Sunday at a section of the Interstate 90 bridge over Schoharie Creek falls into the water. A tractor-trailer and several cars plummeted into the creek.

IN WASHINGTON, Claude Voris of the National Transportation Safety Board said early that state police could not immediately confirm that the bridge had undergone extensive maintenance two years ago.

The bridge apparently had been washed out by the swift current.

Gov. Mario Cuomo, who was flown to the site by helicopter, was asked if there was any word on the cause of the collapse.

"One thing is clear," Voris said. "The force of the river is so extraordinary that it worked some power on the base of the span." Voris said state police agreed that the heavy rains appeared to have washed out the bridge.

Cuomo said the bridge, which extends across the waters, had risen 10 feet above the flood stage.

Voris said the bridge was examined earlier Sunday when two smaller bridges over the creek were closed by officials.

Joe Vanderwall said the bridge, which extends across the waters, had risen 10 feet above the flood stage.

As Cuomo watched, surrounded by emergency crews and the state commissioners, a free-standing central pier, which had undergone extensive maintenance in the past, fell into the creek from the river.

"There was no reason for the central pier to be torn away," Voris said.

Cuomo also told the bridge had undergone extraordinary maintenance two years ago.

The state mobilized three energetic search teams and 40 or more rescue workers to search for missing vehicles and victims.

Voris said the central, 200-foot-long section of the 540-foot bridge, which extends across the waters, had risen 10 feet above the flood stage.

The University of Iowa Collegiate Associations Council and Student Senate are looking for qualified students to serve on all-University committees.

These committees provide a learning experience in policy making and provide the needed student input to the Administration. Student involvement on these committees is an important way for the Administration to get feed-back which can make the difference in the successful operation of academic community affairs.

Czech visit delayed by Gorbachev cold

PRAGUE: Czechoslovakia's (USSR) President Mikhail Gorbachev said he was postponing his visit to Prague from Monday because of a "slight cold." The announcement was made after the Czech government said the Soviet leader would visit today.

The government said the postponement was related to Gorbachev's illness, but dropped references to his health in later dispatches. The Czech government said the postponed visit will take place in the second half of the week, after the agreement of the two sides. The postponement of Gorbachev's visit is expected to arrive Wednesday. The Czech government is divided on whether to reject the official invitation.

Czech officials and Gorbachev had met with each other during the Soviet leader's 1969 visit to Prague.

The newspaper, quoting sources, said the visit involving a handful of economic representatives, was postponed because the Soviet leader had the slight cold.

The Czech government said the visit was rescheduled to signal the earnestness of the Soviet leader's visit to Czechoslovakia, where the Communist government is divided on whether to accept the Soviet leader's invitation.

The Czech government had been an economic export partner for the Soviet Union, and the postponement of the visit to Czechoslovakia was expected to arrive Wednesday.

Now there's more than one way to get through college.

If you want to get ahead in college, it helps if you choose a brilliant roommate. Like a Macintosh personal computer. And now there are two models from which you can choose.

First, there's the Macintosh Plus—now widely accepted by students at colleges and universities all across the country. It comes with one 800K disk drive and a full megabyte of memory (which is expandable to four).

For those of you who need even more power, there's the Macintosh SE. It comes with all of the above, as well as a built-in 20-megabyte hard disk, for storing up to 10,000 pages. Or if you prefer, you can add a second built-in 800K floppy drive.

The SE also gives you a choice of two new keyboards, one with function keys for special applications. And it has an internal expansion slot so you can add new power without performing major surgery. Like a card that lets you share information over a campus-wide network. Or another that lets you run MS-DOS programs.

With either Macintosh, you'll be able to take advantage of the latest, most advanced software. Like idea processors that outline your thoughts. Word processors for writing, editing and checking your spelling. And communications programs that give you 24-hour access to valuable information.

So no matter which model you decide on—you'll be able to work much faster, better and smarter. No two ways about it.

The power to be your best.

Sugar Ray faces logic and Hagler

LAS VEGAS, Nev. (AP) - As the Boxing Hall of Fame inductee Sugar Ray Leonard must defy logic as well as time itself.

In his prime, Leonard, who won their 154-pound title with a seventh-round knockout of Nino Benvenuti, used to lack the right stuff to stop Minnesota's Lesley Keyton. At 49, Leonard will have a chance to show the world what he can do against 21-year-old Keyton.

"I think we definitely could have stopped (Keyton) in '82," former Heavyweight Champion Joe Frazier said. "We didn't do it. The question is, can we do it now?" Leonard, who won't say if he will box again, will have Keyton on his radar screen.

"Leonard is 49," Frazier said. "He said he's not going for it. That's a little bit of a tongue-in-cheek statement. I think Leonard will box again." Leonard briefly considered coming out of retirement in January. He said he would box if he could get a takeout deal for $7 million.

"That's the way it was," Frazier said. "I know he said he was going to box again. But he's been saying that a long time." Leonard also talked about the possibility of a comeback in 1980, 1981 and 1982.

"So I think that he's going to box again," Frazier said. "He probably needs that money. But you never know when it's going to happen." Leonard, who now lives in Fort Lauderdale, Fla., will have a chance to show the world what he can do against Keyton.

"We'll see how it goes," Frazier said. "If he can make it through the first round, he can make it through the second round. But he's got to be able to make it through the first round." Leonard, who weighed 154 pounds in 1984, says he's lost 15 pounds.

"I weigh 139 now," Leonard said. "I couldn't have cared less if I weighed 180 pounds. I'd still be able to box. But I'm going to lose 15 pounds, just to look good. But it's not going to be a problem." Leonard, who has always been a light heavyweight, will make his weight at 154 pounds.

"I'm not going to box just for the money," Frazier said. "I'm going to box because I want to win. I want to win for the sport." Leonard, who is 154 pounds, will have a chance to show what he can do against Keyton.

"I'm going to box just for the fun of it," Frazier said. "I'm going to box because I want to box. I want to box because I want to win. I want to win because I want to be the best." Leonard, who will be 49 at the end of May, has always been a light heavyweight.

"I'm not going to box just for the money," Frazier said. "I'm going to box because I want to win. I want to win for the sport." Leonard, who is 154 pounds, will have a chance to show what he can do against Keyton.

"I'm going to box just for the fun of it," Frazier said. "I'm going to box because I want to box. I want to box because I want to win. I want to win because I want to be the best." Leonard, who is 154 pounds, will have a chance to show what he can do against Keyton.

Reds-Montreal score off in 'opener'

CINCINNATI (CPI) - Baseball's traditional opener takes place Monday about 60 minutes later than its usual time.

The Cincinnati Reds, who for years owned the right to the first pitch of the season, are scheduled to play the Montreal Expos at 1:05 p.m. That's 30 minutes after the Montreal Canadians are scheduled to start in Toronto.

Nevertheless, the Reds are expected to challenge for the National League West Division title. Montreal, on the other hand, enters the season without three of its most productive players and must struggle to finish higher than fourth in the East.

Two Become. 41 years ago, we scheduled to face the Montreal Canadians. The game is a renewal.

The National Weather Service in predicting partly cloudy skies with temperatures in the mid-Minneapolis range, although Red Sox spokesman John Bredow said he has heard one forecast calling for temperatures closer to 80 degrees.

If the latter prediction holds, fans attending the game will want to keep in mind as Opening Day 1987.

On April 17 of that year, the temperature in Cleveland, 46 degrees when the first pitch was thrown, and score was falling by the third inning. Fans brought blankets wrapped and built fires in the right field bleachers.

A cloud of a different type loomed over Monday's game. The official forecast called for strong thunderstorms not over the weekend with none Phillips, allowing for the visitors, trying to avoid the fourth strike in the last 10 years. If the umpires do walk out, minor league and local umpires will work the games.

Boilermakers, Illinois dump Hawkeyes

By Robert Mann

By Robert Mann

After building a 14-3 reverse record, the Illinois State column team hit a brick wall in its Big Ten opener Saturday against Purdue, losing 8-1, and again Sunday against Illinois, losing 7-5.

Jay Roby was the only skipper to win Sunday as defeated Hector Ortiz at 13:00.

Spartans, Wolverines swept as Iowa opens Big Ten play

By Nicki Dougherty

After an eight-day layoff, the Hawkeyes moved back into the game on Saturday by playing host to the Wolverines. The match was a conference battle between two of the top teams in the conference, with the winner gaining the upper hand in the Big Ten race.

The Hawkeyes (5-1, 3-0 Big Ten) defeated the Wolverines (4-2, 1-2 Big Ten) in a thrilling match that went down to the wire. The match was filled with excitement, and both teams battled hard throughout the opening set.

The Hawkeyes took an early lead, but the Wolverines fought back to tie the match at 2-2. However, Iowa's Justin Gilbert, who was named the Big Ten Player of the Week, sealed the deal with a 6-3, 6-4, 6-3 victory in the final match, giving the Hawkeyes a 4-3 win.

The match was a hard-fought battle, with both teams displaying their best in the individual matches. The Hawkeyes won three of the six singles matches, while the Wolverines won the other three.

"We played a great match today," said Coach Bob Hansen. "The players worked hard, and we were able to put together a great team effort. I'm proud of our players, and I'm looking forward to continuing this momentum in the upcoming matches."

Purdue Invitational Golf

The two teams last met on March 23 in Chicago where the Hawkeyes again came out with a win by a 6-4 margin. "Nobody asked for the weather," Iowa head coach Steve Capel said. "I really can't control the weather. The only thing I can control is the course." The Hawkeyes fought off blustery first day weather conditions and scored the extra strokes to win a score of 299 for a 148 total. Five individuals earned All-Tournament honors.

**Women's Gymnastics**

"Iowa returns to action on Saturday against the Illinois-Chicago Flames. The meet will be held at the University of Iowa."

By Mike Trilk

"The Iowa men's golf team fought off blustery first day weather and charged back to a victory over Ohio State on Tuesday at the Purdue Invitational Golf Tournament in West Lafayette, Indiana."

"The Hawkeyes finished third-day score of 332 on their final day, 10 strokes behind Iowa. Iowa's Jennifer Potts finished first by 18 strokes on a 72 for a 144 total."

UI student's 'play at acting"

By Jeff Lauret

In the world is a stage, then what are you doing on it? That's the slogan the 20 students in the West Side Players' spring play, "The Well," are emulating. This week the group is performing their second play ever, "The Well," before they break for the summer. The play was originally written and performed by students at the University of Iowa Hospital. Admission is free.

West Side Players, composed of about 30 people, was started last year by Julie Helling and Beth Thorson, both UI students majoring in art. "All RAF's were required to do an educational program. I wanted to do a theater program," Helling said. "But I realized I had a head for it for a while since I had done lots in high school." Helling and Beth at the UI (30th) National Iowan Conference held this past weekend at the University of Iowa. The conference was organized as an educational program. "I've never heard of this before," Helling said. "I hope you can really make it off." Helling and Thorson took care of most of the organization and could really work out.

"A long time Iowan care, student-run theater group" by National program. "I was never around the Theatre Building where the conference was held. But I had some kind of a head for it for a while since I had done lots in high school," Helling and Beth at the UI (30th) National Iowan Conference held this past weekend at the University of Iowa. The conference was organized as an educational program. "I've never heard of this before," Helling said. "I hope you can really make it off." Helling and Thorson took care of most of the organization and could really work out.

"We did an educational program. I only went to the UI (30th) National Iowan Conference held this past weekend at the University of Iowa. The conference was organized as an educational program. Helling and Beth at the UI (30th) National Iowan Conference held this past weekend at the University of Iowa. The conference was organized as an educational program. "I've never heard of this before," Helling said. "I hope you can really make it off." Helling and Thorson took care of most of the organization and could really work out.

"I'm glad we have something to do in the world," Helling said. "But I realized I had a head for it for a while since I had done lots in high school."
