Democrats nominate Dukakis

by Kathleen Bill

The Daily Iowan

U.S. Senate Majority Leader George J. Mitchell 

sent a telegram supporting Massachusetts Governor Michael Dukakis, his party's candidate for President.

"We're looking forward to a strong showing in the general election," Mitchell said. "We think that an elector-ally well-prepared and well-financed campaign is in the best interests of the Democratic Party."

"Our goal is to win," Mitchell added. "We believe that the issues are clear, theanders are strong, and the American people are ready to make a change."

Dukakis has said recently that the first priority of a Dukakis Administration would be to reduce the deficit and balance the budget. He has also called for increased spending on education, health care, and the environment.

"We're looking forward to a strong showing in the general election," Mitchell said. "We think that an elector-ally well-prepared and well-financed campaign is in the best interests of the Democratic Party."

"Our goal is to win," Mitchell added. "We believe that the issues are clear, theanders are strong, and the American people are ready to make a change."

1989 officers elected for youth foundation

A youth foundation that provides scholarships for the Johnson County Youth Services Foundation was recently established by16 local businesses.

The 1989 officers will be:

President: Gilbert H. Schmitt
Vice-President: George A. Smith
Secretary: Kayne L. Knepper
Treasurer: Jane H. Smith

The foundation is headed by 16 local businesses.

Lack of funding halts courthouse recherche

By Heidi Mathews

A plan to reconstruct additional county offices and construct a three-story office building on the site of the Johnson County Courthouse was put on hold due to lack of funds.

The reconfiguration of the courthouse building involved in March, and the county plans to sell two small parcels of land to help defray the costs.

Businesses have been given the option to lease space in the new building, and the county plans to sell two small parcels of land to help defray the costs.

While the courthouse building was constructed in the 1920s, recent studies have shown that the building has reached its maximum capacity.

Killer weed

Last week the Drug Enforcement Administration announced that it was charging the head of a marijuana cartel with exporting marijuana to the United States. This is the largest drug bust in U.S. history, and it is the biggest single arrest ever in the DEA's war on drugs.

Parachute can cause serious harm if it is ingested or absorbed by the body. For animals, in 1981, a federal court decision banned the use of parachutes on national forests because of environmental concerns. In light of this decision, the DEA has vowed not to spray the chemical on public property, only on private property.

But the distinction is really unnecessary. No matter where the heroin comes from, it is illegal and has the potential to cause serious harm. For this reason, we need to treat the drug problem as a public health issue, not a war on drugs.

One way or another, the pot plants will undoubtedly make it to the United States. It is only a matter of time before they can be cultivated domestically.

So why should we worry about the DEA spraying herbicide on marijuana plants? Because it will represent a deadly threat to a large number of people.

If a million-dollar marijuana crop is sprayed with paraquat, there is a large chance that the herbicide will kill many of the plants. This could lead to a price increase in the drug market, and it could also lead to health problems for those who consume the drug.

In conclusion, the DEA's decision to spray herbicide on marijuana plants is a bad one. It is unnecessary and potentially harmful. We need to find a better way to address the drug problem.
U.S. draft escuses homeland of terror

MOOSORO (AP) — A former U.S. Army intelligence analyst who provided classified information to a Russian website pleaded guilty Thursday to providing national security information to a foreign government.

U.S. District Judge Kermit L. Bond sentenced Yukov to three years in prison and ordered him to pay $50,000 in fines. Bond said Yukov’s actions were a serious violation of the law.

U.S. Attorney John D. Garmendia said in a statement that Yukov had been an active member of the Russian military intelligence service since 1998.

Yukov then provided sensitive information about the locations of U.S. military installations and intelligence agencies throughout the world.

The information was used by the Russian government to further its efforts to undermine American military efforts.

Yukov also provided detailed descriptions of American military equipment, tactics, and strategies, giving the Russian government a significant advantage.

Yukov’s actions were part of a larger conspiracy to leak sensitive information to foreign governments.

Law enforcement officials are continuing to investigate the extent of the leak and the potential damage it may have caused.

Yukov’s guilty plea is the latest in a series of cases involving former U.S. government officials who have been accused of leaking classified information to foreign governments.

These cases highlight the ongoing threat posed by the theft of classified information and the importance of protecting national security.

Yukov’s sentence is a reminder that those who leak classified information are held accountable for their actions.

U.S. Attorney Garmendia said: “These cases are a stark reminder that those who leak classified information are held accountable for their actions.”

Brent Woods

Steroid "crackdown" lacks bite

We should define the word "guillotine", Brent woods

Next to that definition, NFL Commissioner Pete Rozelle's statement about player steroid use could have been appropriately quoted. Anarchist Roselle's name—if it could ever be regarded as significant—is a "guillotine", Brent woods, very clearly.

Rozelle's statement could have been interpreted as "We need to have a guillotine, Brent woods". Jacks bite way out of the envelope. Hasn't got enough teeth to chew its 'crackdown' good. And to top it off, some injury usually puts them out for a reasonable intelligent men feel they have to take a drug that changes, liver problems and second time could be a problem in pro football, as it is in society. The difference is when a regular junkie gets caught using cocaine, he goes to a fancy clinic and it really comes down to market. The indictments against Rozelle obviously want the public to think, as bad as the system is, that we have a lot of great athletes. Most players could not say the same thing, Brent woods.

Informant gave tip to authorities in Sistrunk case

Deborah Mathis

"I know him," my informant told authorities. "He'll be on the train tomorrow, at 11:30."

The informant, who was arrested last Thursday, gave authorities a tip about the train that Sistrunk, former defensive back for the University of Iowa, will take to the airport. The tip was significant because Sistrunk was wanted for cocaine possession.

"We need to get to him before he leaves the state," said one of the authorities.

Sistrunk was arrested after a warrant was issued for his arrest. He was charged with cocaine possession and could face up to five years in prison.

Informant gave tip to authorities in Sistrunk case

Deborah Mathis

"I know him," my informant told authorities. "He'll be on the train tomorrow, at 11:30."

The informant, who was arrested last Thursday, gave authorities a tip about the train that Sistrunk, former defensive back for the University of Iowa, will take to the airport. The tip was significant because Sistrunk was wanted for cocaine possession.

"We need to get to him before he leaves the state," said one of the authorities.

Sistrunk was arrested after a warrant was issued for his arrest. He was charged with cocaine possession and could face up to five years in prison.
