New firm offers students help in placement

By Paula Rumsey
A new Iowa City career development firm offers job search assistance and self-esteem training for people who are looking for jobs. The services are provided without charge to UI students.

"This is an excellent service," said the business' president, Rick Cullen, the legal name of the corporation, because it allows students to understand and deal with their fears about employment. The firm's services include a job search, a self-esteem program, and a self-assessment program.

Cullen said, "The self-esteem program is a major part of what we do." He added, "We believe that students need to understand their own needs before they can begin to deal with their fears about employment." The firm uses a variety of methods to help students improve their self-esteem, including role-playing, videotaping, and discussion groups.

The self-assessment program consists of a number of tests and questionnaires, which are designed to help students identify their strengths and weaknesses. The tests are administered by trained staff members, and the results are presented on a confidential basis.

The firm also offers mock interviews, which are conducted by trained staff members. These interviews are designed to help students prepare for real job interviews. The mock interviews are conducted on the firm's premises, and they are conducted in a confidential setting.

In its fourth week of business, the firm is primarily students, but also includes alumni. According to the business' president, Rick Cullen, the firm has already seen a number of students who have come to the firm for help with their job search.

The firm is located at 1500 E. Market St., and the hours are Monday through Friday, 9 a.m. to 5 p.m.

Certainly majors prosper in improved job market

By John Bartshagen

A survey of Iowa City's top employers found that the job market is improving, with more students being hired and better pay.

The survey, conducted by the University of Iowa's Bureau of Business Research, found that the number of job openings has increased significantly in recent months. The survey also found that the average starting salary for new graduates has increased by 10 percent.

The survey results are based on a sample of 500 companies, and they indicate that the job market is improving for students in all fields. The survey found that the number of job openings has increased in all industries, with the greatest increase in the finance, insurance, and real estate sectors.

The survey also found that the average starting salary for new graduates has increased in all fields, with the greatest increase in the finance, insurance, and real estate sectors. The survey found that the average starting salary for new graduates has increased by 10 percent.

**Students warn of food irradiation**

By Cathy Jackson

A University student approached a shop on the Des Moines Pedestrian Mall Thursday about finding out "what you know food irradiation is." She told students interested in the Environmental Geology course that the class needs just being held.

As a part of a class project, they researched food safety and alternative methods of food preservation, including irradiation, and were told by officials that the class needed to be aware of the potential dangers associated with it.

For irradiation, contact food such as beef, pork, and seeds, and are associated with irradiation. The class recommended the class needed to be aware of the potential dangers associated with it.

Johnson County ranks low in unemployment

Johnson County, home of the University of Iowa, ranks low in unemployment.

By Kathleen M. O'Connell

Johnson County has the second-highest proportion of jobs in the state, according to the Iowa Department of Employment

In a statement to the Daily Iowan, Johnson County would like to see the state government take steps to reduce the unemployment in the region.

"There are a lot of opportunities people may not be aware of, and we want to make sure they know about them," said County Manager Ted Johnson.

According to the state department of labor, the unemployment rate in Johnson County is 2.4 percent, which is below the state average of 3.2 percent.

"We're working hard to keep our job numbers low," said Johnson. "We want to ensure that our residents have access to good-paying jobs."

It's only 7:35, but I'm already three pages behind in the Rebel. There isn't anything that I can do. It's not that I don't want to read. I do. I've got to. It's a part of being in a business that requires the reading of countless pages of material a week. And I've been in that business for a long time, ever since I was a kid.

The Rebel is a good paper, many would say the best. But it's a pain to keep up with. The pages are thick, the typeface is tiny, and the topics are endless. It's a challenge to stay current, and I often find myself falling behind.

Nevertheless, I press on. The Rebel is a part of me, and I'll continue to read it until the day I can't anymore.

**Bijou presents “Buckaroo,” an odd, quick and quirky film**

By Leitch Peterson

The Daily Iowan

Y

By chance at the Bijou this weekend is “Buckaroo,” a film that has yet to cross the Iowa City radar. Director Steve Jones, in his first film, has taken elements of zombie films, the science fiction, the dorky wrestling films and a whole lot of other genres and mixed them together to make something that is at times funny, at times.cv thought-provoking and at times flat out weird.

"Buckaroo," which opened last weekend at the Bijou, is a parody of the adventure films of the 1980s, which featured space aliens and giant robots battling to save the Earth from some evil space monster. The film follows the adventures of Buckaroo Banzai, a man who discovers the race of Red Lectroids, an alien race who have been trying to take over the Earth for centuries. Buckaroo joins forces with the Hong Kong Connection, a group of martial artists, to save the Earth from the Lectroids.

The film is set in a world where the lines between reality and fantasy are blurred. The film features a cast of characters that are both believable and absurd, such as the Hong Kong Connection, a group of martial artists who are able to fight off the Lectroids, and the Red Lectroids themselves, who are aliens who have been trying to take over the Earth for centuries.

The film is a mixture of humor, action and sci-fi, and it is sure to be a hit with audiences who enjoy the genre. It is a film that is not for everyone, but for those who are willing to open their minds, it is a film that is sure to be a hit. **End of review**

Ul Opera premieres work: Donizetti's "Elixir of Love"

By Bill Stake
The Daily Iowan

"We have a line of cigarettes called "Elixir of Love," and we've advertised it as the best and mightiest elixir that's ever been offered..."

Brian Glass, chairman of Ul Opera Theatre, was quoted as saying, "We're going to have some heavy-smoking aromas present in the production of Donizetti's "Elixir of Love.""

There's not much of a production of "Elixir of Love" in the area, according to Glass. The series of performances is sponsored by the University of Iowa's Reader-Auditorium, the membership of which cover the entire area in a willingness to support the arts. The performances will be held in the auditorium, which is open from 11 a.m. to 11 p.m. The performances will be held every evening at 8 p.m., except for Sunday afternoon performances at 4 p.m.

Donizetti's "Elixir of Love" is a comic opera in two acts. It was first performed in Turin in 1832. The opera is based on a libretto by Giuseppe de Nittis, who is also the author of the original Italian version of "Roberto d'Inghilterra." The opera is about a man named Nemorino, who is engaged to be married to Adina, the daughter of a wealthy landowner. However, Adina is in love with another man, a rich nobleman named Dulcamara. Nemorino tries to win Adina back by giving her an elixir that will make her fall in love with him. However, the elixir has unexpected effects, and Nemorino is left alone and discouraged.

IU Opera professor receives grant

By Steve T. Donovan
The Daily Iowan

Twenty articles from the University of Iowa Art Department's collection were selected for the 1986-87 academic year by a grant from the National Endowment for the Arts. The collection includes works by many of the department's most prominent artists, including paintings, sculptures, and prints. The grant is intended to support the department's efforts to acquire and display contemporary art. The grant will also be used to provide opportunities for students and faculty to engage in art-related activities, such as exhibitions and workshops.
unbeaten on Friday. . .

...and that's how it's been, day in and day out, at the barn of his father, wild horse trainer. . .

What's that come from his heart?'" Farmer said. "I think he's got a heart for Los Angeles because that's where he was born."

And he's taken it into his own hands to make sure his son has a chance to be the best. He said "Every Smart" has a special place in his heart because he's one of the few horses he's had the chance to raise from birth.

"Every Smart" was the last horse he raised, he said, because he's too young to be ridden and too young to turn his attention to the next one.

"Every Smart" has been a great everyday horse, he said, but he's not ready to be ridden yet. He's still growing and developing and needs more time to mature.

"Every Smart" is a very special horse to me," Farmer said. "He's had a lot of love and care, and I'm sure he'll be a great horse someday."
Florida investigating possible on-campus illegal drug problems

GAINESVILLE, Fla. — The University of Florida is investigating possible on-campus illegal drug use that may involve current and former Gators players, the university has announced.

University President Marvin M. Crisler said Wednesday the probe was initiated by an anonymous investigation in Gainesville of drug sales and use in the area. The probe was also prompted, said Crisler, by "the apparent damage to the course, and Pro-Am eliminated in straight sets Wednesday by

Crisler said the university investigation will be conducted by an attorney with the cooperation of attorneys from faculty and staff.

"The university, including a university, must deal with the issue of drugs above all our many people," Crisler said. "It's deep, deep reasonably possible to eliminate drug use on the Florida Gators by university standards."

Coach Larry Neumann said the university will be located in a new location and "I'm very interested in early because of contact counseling and drug counseling," he said.

"Although the university is deeply interested in making sure that we don't have equally critical concerns for protecting students of drug use," Neumann said. "I'm very interested in the drug counseling and drug counseling, too."

Neumann's recently advised that he said Monday, a second round of drug testing for the Florida Gators in December was conducted, while the investigation was in its early stages.

"We're not sure yet," Neumann said, "whether we're going to have a second round of drug testing for the Florida Gators, while the investigation is in its early stages."
Hayes will ride for chance to make Olympic showing

By Eric Z. Hess

Thursday, January 28, 1988

Pete Hayes is 16 when he heads for the 1988 National Road Cycling Championships in Spokane, Wash., beginning Saturday.

Hayes, a member of the Capital Cycling Club from Olympia, will be one of 10 riders from the club to make the team.

The landmark will still be there, I was told by a friend, when the famous ivy-covered stadium lights up for opening night.

"I hate to admit it, I was thinking about the Chicago Cubs," said Hayes, a 4-foot 7-inch, 108-pounder.

"You just can't help being a baseball fan, especially when you're a 16-year-old kid," said Hayes.

Adding lights to Wrigley Field destroys the prestigous environment every Cub fans feel when attending a game.

The Iowa City-based bicycle racer is off to the national competition in the field for the Capital Cycling Club's April 30-31 event. Hayes will have the chance to compete in the 1988 National Road Cycling Championships and the U.S. Olympic Trials in Spokane, Wash., today.

Hayes is in his junior year at Iowa City High School and is a member of the Iowa City Police Force junior auxiliary police force.

"I'm just happy to have a chance to ride," said Hayes, who turned 16 on Thursday.

"I'm feeling good and looking forward to the trials," said Hayes.
