Half harvest

Iowa City Register Report watches the last bit of corn empty out at his combine Tuesday afternoon while harvesting his crop west of the Iowa City Municipal Airport. According to Ruppert, his harvest this year will yield approximately half the normal amount. Report added this summer's drought was the worst he has seen in 43 years of farming.

Rape story a concoction, New York grand jury states

NEW YORK - A grand jury decided that a New York newspaper reported a story of rape which was a figment of a gang of men seeking a way to get around a high, New York City police sources said Tuesday.

The special grand jury was said to be in session after today completing a razing of the house of a woman who said he was raped by a gang of men in her apartment.

The second named story was said to be in session after today completing a razing of the house of a woman who said he was raped by a gang of men in her apartment.

City High remodeling targeted, board 1988-89 officers

By Sara Longyearson

City High School may need some students by fall if the board passes a proposal for a remodeling bond.

The extent of the remodeling proposed for City High, 1930 Marion Drive, has not been determined.

According to the school's student body president, Greg Coyle, City High students have carried out a survey to acquaint the students with the areas in which they would like to see improvements.

Coyle said some of these areas would not involve "the drastic changes that were suggested by the desires of the people."

There has been debate as to whether to overreact to recent news stories about lung cancer.

"We're trying to see if we can find different ways to get the materials. Roth of the county residents to proceed with the report is making a $3,300 grant to expand the Ultrasound and Hybridoma Facility.

Roth funded the $12 each.

• $230,000 for a new computer science lab.

• $325,000 for a new educational materials room.

• $125,000 for a new athletic field.

• $50,000 for a new library.

The EARDA grant program is a federal program that brings foreign students, including those from China, to the University of Iowa for foreign students. Meeting American students, hearing American accent, are some of the reasons why they choose to study in the United States.

The report of the U.S. Census Bureau, released in 2000, showed that there were 3.5 million foreign students in the United States, with 1.6 million of them studying at the postsecondary level. The top countries of origin for foreign students were China, India, Korea, and Mexico.

The report also showed that foreign students contributed $25 billion to the U.S. economy in 2000, with $14.9 billion of that coming from student fees and $10.2 billion from off-campus employment. The report also showed that foreign students were more likely to remain in the United States after graduation than their domestic counterparts.

There are many reasons why foreign students choose to study in the United States, including the quality of education, the diversity of the student body, and the opportunity to learn about American culture. However, there are also some challenges that foreign students face, such as language barriers, cultural differences, and the cost of living.

The EARDA grant program is a federal program that brings foreign students, including those from China, to the United States. The program is funded by the U.S. Department of Education and is designed to support foreign students who are enrolled in degree-granting institutions in the United States.

The program is open to students from all over the world, but the majority of recipients are from China, India, Korea, and Mexico. The program provides a range of support services, including academic support, counseling, and cultural integration.

The program is open to students who are enrolled in degree-granting institutions in the United States, including universities, colleges, and technical schools. The program is designed to support foreign students who are enrolled in undergraduate or graduate programs, and who are completing their degree by the end of the academic year.

In order to apply for the EARDA grant program, students must submit an application, which includes information about their academic background, financial situation, and planned activities in the United States. The application must be submitted by a designated representative, such as a professor or an academic advisor, who can provide evidence of the student's academic qualifications.

The application process is competitive, and students are evaluated based on a range of criteria, including academic performance, financial need, and demonstrated commitment to their studies.

Questions raised over SEFTINGs

Drought, early lead could cause soil erosion

*Metropolitan AM* - Drought of 1988, which ended May 10, is now heading to losses of billions of dollars to farmers, ranchers and the U.S. economy. The nation as a whole is in the second year of a drought that began last summer, and parts of the nation are experiencing their worst drought in 30 years. The drought is expected to continue throughout the summer, and some areas may see conditions worsening as the summer progresses.

The U.S. Department of Agriculture (USDA) recently released a report stating that the drought is expected to reduce crop yields by 10 percent in the United States and 40 percent in California. The report also states that the drought could cause a $10 billion loss to the U.S. economy.

The report states that the drought has caused a decrease in the amount of water available for irrigation, which has led to a decrease in crop yields. The report also states that the drought has caused a decrease in the amount of water available for domestic use, which has led to a decrease in the amount of water available for domestic use.

The report states that the drought has caused a decrease in the amount of water available for irrigation, which has led to a decrease in crop yields. Firms may expand, ISU survey states  

"Manufacturers are happier with the state than they have been. We’re trying to do things to help them," said David Swenson, ISU Extension Service industrial director.

State tax records sought to find drug profiteers  

"The survey compiled by ISU’s center for Industrial Research and Basore also indicated that Iowa’s transportation and worker training programs were seen positively by many, while others deemed them as a lot.

DOD MONROE—The head of the Iowa Department of Transportation on Monday said the state’s transportation network and its worker training programs are among the best in the nation. "Transportation and worker training programs are among the best in the nation," said ISU professor and transportation researcher Carl Harder. "They provide a strong foundation for the state’s economy."

"We plan to respond to this news," said Don Doyle, spokesperson for the Iowa Development Authority. "We will be competitive and will do our best to keep the state's economic growth on track."
Reagan bids allies farewell

Fanning flames

About a year ago, in the town of Westinghouse Falls in upstate New York, a group of students staged a sit-in outside a factory that was producing a new generation of young black girls named Tamara Braxton. The factory was named Westinghouse Falls after the town it was located in, one of the small towns along the Great Stirrup Creek. The factory was owned by the Westinghouse Electric Company, which had been founded in 1899.

The sit-in was a protest against the factory's practices, which included strict rules about the dress and behavior of the employees. The protesters wore black t-shirts and carried signs that read, "Tamara Braxton is our sister. We demand an end to discrimination.

John Lennon is attacked again

McCarty and Hawley have been appealing to their audience for months to support Albert Goldman's book, "The Lies of John Lennon." Their argument is that the book is credible because it is based on interviews with sources who knew Lennon personally.

In the letters page, readers are asking for more information about the book, and many are expressing their own opinions about Lennon and his legacy. The book has been controversial, with some readers defending it and others calling it a smear.

Letters

Write now!

To the Editor:

Farewell Students, once again in the university year we shall be wanting to double up on a winter vacation for John's sake. I will be returning to the university in the spring and planning to spend the summer with my family. I was wondering if there was any possibility of extending the time I will be there. I am not sure if this is possible, but I would like to know if there is.

The students have been putting in a lot of work and they are very dedicated. I would like to extend their vacation time to make sure they do not burn out.

John McCarty

Letters should include the writer's address and telephone number, and may be delayed for up to three weeks after publication.

Another idea

To the Editor:

Thinking of the winter vacation in the library system is a summer vacation in the library. The library should not close for the whole month of July. They can close for two weeks and then open for the rest of the month. This way the students can use the library when they need it.

John Peters

The letters page is an opportunity for readers to express their opinions on various topics. It is a platform for readers to engage in a dialogue with the newspaper and with each other.
Tenure process favors men

Cheryl Maranto

According to the National Science Foundation, 30.49 percent of all professors in the United States are women. Of these, 46.8 percent are women in the tenure system. In other words, more than half of all women professors are tenure track faculty. However, women earn lower salaries than men, and the gap is widening. The differences are not accounted for by the number of years of experience, specialty, or affiliation. Instead, women are paid less because of the way the tenure system is structured. This disadvantage is not only systemic; it is inherent in the way the system is organized.

The tenure system has been in place for over 100 years, and it is designed to ensure the highest level of scholarship and excellence in teaching. However, the system is biased against women. Women are less likely to secure tenure than men, and they are more likely to be denied tenure. This is because the tenure process is highly subjective, and it is based on the opinions of colleagues, not on objective criteria. The process is also highly bureaucratic, and it is designed to favor men. Women are less likely to have access to the resources and support that are necessary to succeed in the tenure process. Women are also less likely to have the time and energy to devote to their careers, because they are more likely to have family responsibilities.

The tenure system is also biased against women because it is designed to favor men. Women are less likely to receive the support and resources that are necessary to succeed in the tenure process. Women are also less likely to have the time and energy to devote to their careers, because they are more likely to have family responsibilities. Bush unveils tax-break plan

COLUMNIST, Ohio (AP) — Republican George Bush, criticized for advocating tax breaks for the wealthy, proposed a plan Tuesday that would offer tax-deferred interest accounts and small-dollar American savings trust bonds to combat his Republican rival’s suggestion that he is outside the mainstream of middle-class wealth. Proposed a plan Tuesday that would offer tax-deferred interest accounts and small-dollar American savings trust bonds to combat his Republican rival’s suggestion that he is outside the mainstream of middle-class wealth.

BUSH said each “individual savings trust” would allow up to $2,000 to be invested each year for a maximum of $550 million by 1993. Bush’s campaign said it would cost the Treasury about $300 million. When withdrawn, the interest would be taxed at the saver’s tax rate then in effect.

Bush advocated the idea while a presidential candidate, described by Bush, the savings plan would allow an American to deposit for at least five years. A maximum of $2,000 could be withdrawn every year, and they will be helping America — by increasing personal savings and economic growth,” Bush said.

Bush has been repeatedly attacked by Dukakis for advocating a cut in the capital gains tax from its current level of 28 percent down to 15 percent. In Sunday’s debate, Dukakis said Bush was proposing “tax cut for the wealthiest 5 percent of the people in this country — an amount of about $5,000 that we’re going to give to people making $300,000 a year.”

Bush’s campaign staff estimated that more than $1 million Americans would take advantage of the plan.

The full interest deduction would be available only to people with adjusted gross incomes of $80,000 or more would not be eligible for the program.

Dukakis defends education stand

PEORIA, Ill. (AP) — Democrat Michael Dukakis said Bush had called the debate “un-American” to stoke up a “nativist sentiment” in an attempt to win the presidency of the United States. Dukakis said Bush had called the debate “un-American” to stoke up a “nativist sentiment” in an attempt to win the presidency of the United States.

Dukakis said Bush had called the debate “un-American” to stoke up a “nativist sentiment” in an attempt to win the presidency of the United States.

He recalled Bush’s tie-breaking vote in a 1980, battle that he said Bush now “is talking about a constitutional amendment to prohibit the president from ever making a decision on his own.”

He recalled Bush’s tie-breaking vote in a 1980, battle that he said Bush now “is talking about a constitutional amendment to prohibit the president from ever making a decision on his own.”

But, he said, “nativist sentiment is not new to this country. The country has been trying to win the presidency of the United States for a long time.”

“...It is the same thing today,” Dukakis said.

Dukakis said Bush had called the debate “un-American” to stoke up a “nativist sentiment” in an attempt to win the presidency of the United States.

But, he said, “nativist sentiment is not new to this country. The country has been trying to win the presidency of the United States for a long time.”

“...It is the same thing today,” Dukakis said.

He recalled Bush’s tie-breaking vote in a 1980, battle that he said Bush now “is talking about a constitutional amendment to prohibit the president from ever making a decision on his own.”

But, he said, “nativist sentiment is not new to this country. The country has been trying to win the presidency of the United States for a long time.”

**Soviets dash hopes for U.S. gold medal**

In 1972 at Munich, America won the Davis Cup. But the gold medal was not an option, and after the final three sets were played behind the veil of an ever-closing cold war, the Americans were 3-0 down.

But a US team that had not been in the Olympic boxing competition since 1904 was not about to let the Soviets go gold.

The first three boxers to appear for the U.S. team, Dennis Rogers, Michael Talty and Michael Trilley, were all defeated. The Soviets won the first three matches.

But in the final match, Mike Willis, a lightweight from Iowa State University, stepped up and took on the team's top fighter, Russian Boris Malakhov.

Willis had to lose, but he didn't want to lose. He knew that if he lost, the Soviets would win gold.

So he went into the ring with a game plan. He was going to take the fight to Malakhov, and he was going to make him work hard.

Willis knew that if he could make Malakhov work, he had a chance. And he did.

Willis used his quickness to avoid Malakhov's punches, and he used his smarts to read his opponent's movements.

The people in the crowd knew what was at stake. They knew that Willis was fighting for everything. They cheered for him. And they hoped that he could find a way to beat Malakhov.

But the Soviets were not about to let the Americans go gold. They knew that they had to win this match. They knew that if they won, they would win gold.

So Malakhov came out strong. He wanted to end the match quickly. He wanted to get his points in.

But Willis was not going to let that happen. He was going to make Malakhov work for every point. He was going to make him sweat.

And he did.

Willis took every point. He battled Malakhov every step of the way. He made him work. He made him fight.

And he won.

Willis won the match. He won the gold medal. And the Americans went home with a silver medal.

But the Americans knew that they had not won. They knew that they had fought hard. They knew that they had done their best.

But they also knew that they had not won gold. And they knew that they were not going to give up. They knew that they would come back stronger.

Willis stepped up to the podium. He looked out at the crowd, and he knew that they were there to cheer for him. He knew that they were there to support him.

Willis smiled. He raised his hand. He had done his best. He had fought hard. He had earned his place.

And he did.
Silver Bullets sign Larkin
The Cedar Rapids Silver Bullets of the Continental Basketball Association signed guard Mike Larkin, one of the nation's top junior college guards, on Tuesday. Larkin, who is a 6-foot-6, 220-pound guard from Wabash Valley College in Illinois, was named the NAIA Player of the Year last season.

**Steroids cause sports, money woes**

Steroids remain a concern at international contests

Johnson loses contracts in wake of drug discovery

**NEWSROOM**

South Korea (AP) — The world's highest-earning athlete under the weight of the世界的 weighlifting crown, who has become the world's highest-earning athlete under the weight of scandals, was able to return to the sport he loves, at least for a day.

Johnson, who has been suspended from the sport since last year, returned to the Olympics on Monday in the United States. He won his first gold medal in the Games earlier this month, and it was his first in the 100-meter sprint.

Johnson, who has been on probation since last year, said he has been cleared to compete in the 100-meter sprint at the Games. He has been on probation since last year, and he was suspended from the sport in 2018.

Johnson's return was considered a significant milestone for the sport, as it was his first since the ban came into effect last year.

**Steroids remain a concern at international contests**

Steroids remain a concern at international contests, especially in the world of track and field. The drug has been linked to performance enhancement, and it has been banned by many organizations.

However, the use of steroids is not just limited to athletics. The drug has also been used in other sports, such as cycling and tennis. The use of steroids in these sports has also been a concern.

**Johnson loses contracts in wake of drug discovery**

Johnson's drug discovery has led to a loss of contracts. The drug has been linked to performance enhancement, and it has been banned by many organizations.

However, the use of steroids is not just limited to athletics. The drug has also been used in other sports, such as cycling and tennis. The use of steroids in these sports has also been a concern.

New leases on life for silent classics

By Kevin Quigley

The Daily Iowan

"T" was the roaring twenties, "The Circus" was a flying trapeze, "Phantom" was a chandelier, and "The Passion of Joan of Arc" was a masterpiece. These films, and many others, have been restored and given a new lease on life, thanks to the efforts of the Iowa Art Film Center and the Iowa City Library.

"T" is the title of a silent film directed by D. W. Griffith, released in 1921. The film tells the story of a woman who is kidnapped and enslaved by bandits, only to be rescued by a hero. The film is a classic example of the silent film genre, and its restoration has brought it new life.

"The Circus" is another silent film, released in 1928. The film tells the story of a circus, and its restoration has brought it new life as well.

"Phantom" is a silent film directed by D. W. Griffith, released in 1921. The film tells the story of a woman who is kidnapped and enslaved by bandits, only to be rescued by a hero. The film is a classic example of the silent film genre, and its restoration has brought it new life.

"The Passion of Joan of Arc" is a silent film directed by D. W. Griffith, released in 1928. The film tells the story of a woman who is put on trial for heresy, and is eventually burned at the stake. The film is a classic example of the silent film genre, and its restoration has brought it new life.

The Iowa Art Film Center and the Iowa City Library have been working hard to restore these and other silent films, bring new life to them, and make them available to a new generation of film lovers.
OPPORTUNITY!

If you've been considering reentering the work force or if your present job doesn't offer the growth you've been looking for, maybe we can help.

You see, we're growing, too, and we're looking for good people to grow with us. In the past few years our family has grown from a few dozen employees to over a thousand employees. Opportunity just keeps knocking at our door and we want to share it with the right people.

We're Pioneer TeleTechnologies, we'd like to meet you!

- Excellent wages (starting at $5 per hour)
- Full- or part-time positions
- Superior benefits
- Variety of shift times available
- State-of-the-art equipment
- Professional training

To Learn more about opportunities with our expanding dynamic company, come for a confidential interview. It could change your life!

Pioneer TeleTechnologies representatives will be conducting interviews from:
- 8 am to 4:30 pm, Tuesday, Sept. 27
- 8 am to 4:30 pm, Wednesday, Sept. 28

In the Lucas-Dodge Room in the Iowa Memorial Union on the University of Iowa campus (the corner of Jefferson & Madison)

Pioneer TeleTechnologies, a division of Long Lines Ltd., has offices in Sergeant Bluff, Iowa, & employs over 1200 people in the Sioux City area.

An equal opportunity employer.
We offer quality and variety every day!
