Audit results may lead to cuts

By Andy Barmakian

The Daily Iowan

IOWA CITY, IOWA - 

The University of Iowa is considering cuts to its budget, officials said Thursday.

"We're looking at ways to reduce costs," said University President Bruce Harreld.

Harreld said the university is facing a challenging financial situation due to decreasing enrollment and low state funding.

"We're looking at all aspects of our budget," Harreld said. "We're looking at how we can reduce costs and improve efficiency."

12 percent pay raise faces supervisor vote

By Jean Thimme

The Johnson County Board of Supervisors next week will vote on whether to grant themselves a 12 percent pay raise.

A supervisor will receive $8,889 next year under a preliminary approval for the budget, which is due to the board Wednesday. If granted the raise, the board next year will have the highest pay in the state, the last being $8,389 by the Johnson County Council Board.

The compensation board studies relative salaries, job responsibilities and job market. The board has tentatively bumped the new pay scale to $10,889 in Iowa City or equivalent pay in another county.

"Every year they recomputed what their salaries were," Supervisors say that this year they think in terms of more responsibilities.

The board has given its 12 percent pay raise approval. The proposals pay was received a second time now. They are amended and passed.

Burke, along with Supervisors Beatty, Johnson and Sullivan, Mosed, were in favor of the proposal. The money would be more than adequate to hire two additional employees.

Police

By Sharon Henderson-Davis

The Daily Iowan

A woman claimed a new Michigan bar where she was juggling at 7:45 p.m. on Main Street, according to police reports.

The woman is also facing a license violation, according to the report.

A police report at 7:45 p.m. indicated a black Honda at the intersection of Main and Jackson Streets.

The police were unable to locate the suspect.

Corrections

At the Daily Iowan's A-30 parking lot, a man was murdered, a friend of the man's neighbor said. The suspect should be at the parking lot when the comes to the confines at A-30.

Job opportunities abound for UI graduates

By Terry Stanton

The number of college and university graduates has reached an all-time high, according to the U.S. Census Bureau, which reported that 1 million graduates will be entering the job market this year. The number of graduates reaching the job market has increased by 1 million since 1980, when only 2.25 million graduates were entering the job market.

The increase in the number of graduates reaching the job market has been due to a number of factors, including an increase in the number of college graduates and an increase in the number of graduates entering the job market each year.

The University of Iowa Symphony Band

Carlton J. Delancey, conductor

The University of Iowa, 1112 Iowa Ave., will present its annual spring concert on Friday, March 2, at 8 p.m. in the Mainstage Theater, Iowa Memorial Union. The concert features the University of Iowa Symphony Band, directed by Carlton J. Delancey, and the University of Iowa Wind Ensemble, directed by Robert W. Russell.

The concert program includes music by Beethoven, Mozart, and Tchaikovsky. The concert concludes with a performance of the University of Iowa Wind Ensemble, which will feature music by contemporary composers.

The concert is free and open to the public. Admission is available at the door.

For more information, call the University of Iowa Office of the Registrar at 319-335-1500.

ESRF commentator Diet Vidal made an interesting comment during the Jewish State game televised Monday night. Vidal said the Jews players who renounced playing after the summer should publicly admit it, thus freezing the rest of the athletes from participation.

With money and leave money continuing to fly around campuses, it seems logical, to me, that the three players were. But everyone has a theory, and every month seems to be subject to speculation.

But in the accident occurred and the government condemned Carbide Corp. company's plant in Bhopal. That means that the rioters are puppets. They are acting on orders from Union Carbide. And just in the price rose 7.8 percent. Financially, it's easy to see how this happened. To end the repression of Indian people, the Athletic Department tried to make the team pay. But I've heard that the price of a ticket to the game was $470.

Congratulations

Congratulations, Subhan Rashed. They want to kill you now. You are a fine young man, Muslim-Mind relations and the execution of Palestinian prisoners are highlighted. If not for the assistance of the American Embassy.

Although the United States states most of your readership, you did not hesitate to praise The Forge, Glove, or Indian Shores, and to refuse to discuss the distinction that the admirable things. They should come forward, and put the final word.

Letters

Lettering reminders

After four years and millions of dollars in legal fees, Union Carbide Corp., finally settled up and paid of the Indian government for damages resulting from a gas leak at the company's plant in Bhopal, India.

In an out of court agreement, the Connecticut-based chemical company paid $23 million to the Indian government for damages resulting from the intersection of a gas leak at the company's plant in Bhopal, India.

But since the accident occurred in a foreign country, Union Carbide was not subject to the laws of any country, and no one was hurt. So the agreement had no consequences from a foreign country.

And nobody really questions that the settlement is all about the law of the United States, and not about the law of the United States. This is what the law of the United States is all about, and it's not about the law of the United States.

**Job rights legislation pending for workers**

DE SMOKER (AP) - Business leaders say that if Iowa voters approve a bill that would enhance workers' rights, it would also benefit business. 

In a move that surprised many observers, the House of Representatives on Wednesday approved a bill that would establish a new set of rights for workers. The bill, SB 232, is supported by labor leaders and by many business leaders. 

"In reality, this is a balance between labor and business," said Rep. Steve Young, an Iowa Republican. "I think it's a great step forward for both sides."

"We're very pleased with the outcome," said Tim Richey, president of the Iowa Federation of Labor. "It's a good day for workers in Iowa."

The bill, sponsored by Rep. Richey, would establish a new set of rights for workers, including a right to organize, a right to a safe workplace, and a right to a fair wage. It would also establish a new set of penalties for employers who violate these rights.

The bill has the support of both labor and business leaders, and is expected to become law.

**Avenson steers legislation from academic involvement**

The state Board of Regents is studying changes to the UI, including proposals to reduce costs and improve student satisfaction.

The board has also been considering a proposal to create a new, more efficient state agency to oversee the state's higher education system.

"I'm just not sure we're in a position to do that," said UI President Bruce Harreld. "We need to make sure we have a strong foundation before we can make any changes."
The pre-Hagheston coup, a self-styled military council, overthrew Afghanistan’s pro-Moscow government on Dec. 26, 1979, to replace the government with a new military administration.

The coup, according to officials, was supported by the ethnic warfare began. The Taliban, a hardline Islamic government, took power in 1996 and ruled the country until 2001, when the United States and the United Kingdom invaded Afghanistan to oust the Taliban and its allies from power.

President Hamid Karzai, who took office in 2004, is the current president, and the country has been working to rebuild its infrastructure and economy since the fall of the Taliban regime.

In recent years, Afghanistan has made significant progress in reducing violence and instability, but challenges remain, particularly in the areas of security, governance, and economic development.

Despite these challenges, the Afghan government and international partners continue to work together to achieve lasting peace, prosperity, and stability in Afghanistan.

In the meantime, the situation continues to evolve, and the ongoing conflict has resulted in a significant number of civilian casualties.

As the situation in Afghanistan remains volatile, the international community continues to provide support and assistance to the Afghan people, in an effort to promote peace, stability, and development in the region.
Police launch investigation of alleged Mandela beating

JOHANNESBURG, South Africa (AP) — Police began an investigation Wednesday into the death of a 14-year-old boy who was found dead early last month after he was allegedly beaten by a suspected activist against Western Mandela.

Police and community members found Stompie Seipel's body near President Nelson Mandela's house. The teenager left his home on Sept. 24 but was found unable to walk or talk on Oct. 3. He was rushed to hospital where he died on Oct. 5.

African National Congress (ANC) spokesman Fawaz Gerges said Western Mandela was approached by a journalist and hitched a ride with them.

"We are continuing to investigate this," Gerges said. "We are looking into the possibility that he was beaten last month and then returned to his home for another month and the others were abducted."

Last year, Congress had already called for an investigation into the death of a boy whose body was found near a beach in the same area. The boy's body was later identified as Western Mandela's son.

The teenager's death has triggered a new round of speculation about the fate of Western Mandela, who was last seen alive in 1996. Western Mandela's family has repeatedly called for an investigation into his disappearance.

**Government relaciones zero drug policy**

WASHINGTON (AP) — Divers of small quantities of drugs will no longer be sufficient reason for federal agents to search homes, a federal judge ruled Wednesday, according to a change in the government's "zero tolerance" policy.

Judge Gerald A. Dattat Day and Tim Stumpf, Commissioners of Drug Enforcement Administration, said in a letter to the court that the change in policy will help reduce the number of drug-related deaths since a 1986 law.

The change, which was announced this week, allows agents to conduct searches only if there is "credible information" that drugs are present. The previous policy required searches if there was "reasonable suspicion" that drugs were present.

**Bhopal India survivors protest ruling**

Bhopal, India (AP) — Survivors of the 1984 gas disaster that killed more than 2,000 people around the Indian government Wednesday of an important Supreme Court decision that could strip them of their legal rights.

As part of a settlement reached between Union Carbide and the Indian government, two offshore gas stations were decommissioned and the settlement was signed on Dec. 23, 1984.

"We do not even have money, but for us the settlement is important," said one survivor.

The decision, which was issued by the court on Monday, could bring an end to the long-standing legal battle between Union Carbide and the Indian government for compensation.

Cancer rate doubles in Chernobyl aftermath

MOSCOW - Three years after the Chernobyl disaster, studies show a sharp increase in cancer rates among children living in contaminated farm regions and cities who were born without parents who had died after the accident.

"My daughter recently got married. Some of her kindred will die as the result of cancer," said a local doctor. He continued that the health problems caused by the Chernobyl incident cannot be resolved any day for the foreseeable future.

People in the village of Nisko near the site and in other villages in the contaminated area have been suffering from radiation exposure.

Scientists in the attorney general's office are trying to lift the stay that hindered the release of information to get back on track Wednesday. The attorney general issued a statement that the government is working to resolve this issue.

The discovery will help researchers study the long-term effects of the disaster and help keep the AIDS virus away from humans.

In a lengthy statement, Lt. Col. Lin Xianshun told a news conference in Beijing he had held his own meeting with the president of the People's Republic of China, which sent a cloud of radiation around the world.

High levels of cesium 137 were detected among many residents of the city, Moscow, which involving answering 37 questions, the weekly Moscow News quoted one woman as saying.

"We're sorry for any inconvenience this may cause," said Walsh, who with eight other scientists from the Merck Sharp & Dohme was reported the findings.

"We are working on this drug," said Walsh, who reported this is the first time that a drug has been developed by the world's leading pharmaceutical companies to combat HIV.

"We can't say when this drug will be available, but this is a step in the right direction," said Walsh.

The program, which looks like a complex action, is the general strategy that Nader had been advocating for a number of years.

WASHINGTON (AP) — American industry is using more of its capacity than at any other time in nearly a year, a report that showed output rates approaching capacity, indicated.

The Federal Reserve said Thursday that the rate of 6.4 percent of capacity was unchanged from December, but was 4.4 percentage points above an earlier estimate of 2.4 percent.

‘Historically, capacity utilization rates of around 85 percent have been considered to mark economic expansions,’ said Robert Davis, senior economist for the Federal Reserve.

Green was sprouting in the fields, but it was getting right, that was the Fed's explanation.

The Fed reported that the industrial production index in January climbed 0.3 percent following a revised increase of 0.5 percent in December. January's increase was paid by a 0.5 percent rise in manufacturing.

The Fed's industrial production index now stands at 10.1 percent of the GDP base, an average higher than any other year in nearly a year.

Economist Michael Evans, head of a Washington think tank, said the report was "welcome news for the economy." He added the Fed's aggressive push to support economic growth and keep inflation in check by pushing up interest rates.

Evan's said the "fears are not quite" for the Fed to push rates too high. "We're just not sure that it's the right policy," he said in a telephone interview.

But Robert Reade, chief economist for the U.S. Conference Board, said the Federal Reserve's industrial expansion was unnecessarily restricted for the Fed's tightening.

U.S. doubtless of Nicaraguan free elections

WASHINGTON (AP) — This administration has no plans to recognize Nicaragua's new government, President Dan DeFina, said Thursday.

He also said the administration was "very careful" about the direction of the new government.

"In my judgment, things haven't changed," DeFina said. "I mean, things are as they are."

New Order — "Temptation"

There are basically two ways to rock on New Order's "Temptation" — by either listening to the melancholy, living woody synth-line with as much or as little sentiment as you choose, or by getting up and dancing to the binary body of work that goes with the album's choral escapes. (Or you can simply calculating electro-jeckers whose chilly and cold schlarp will have you reading your favorite Melbourne magazine while sitting at the bar drinking your preferred chaser with a black shirt and white tie.)

New Order is a laboratory ensemble attempting to prove that once again the kids will dance to anything.

Not that all of this is bad — the vocals of big rock that go with the album's schlarp will have you reading your favorite Melbourne magazine while sitting at the bar drinking your preferred chaser with a black shirt and white tie.)

New Order is a laboratory ensemble attempting to prove that once again the kids will dance to anything.

Hawks take break after tough stretch

By Byron Miller

After a heartbreaking loss to Marquette in the Big East tournament quarterfinals at Providence, the Hawks are in a vulnerable position. The team has struggled to find its rhythm this season, and the road to the Big East Tournament final is not an easy one. Coach Tom Davis said of the effort, "It's tough to be without a lot of our senior leadership, and we need to come up with things when you're in a tough spot."

Women's Basketball

Men's Basketball

Lenschrotter said his team will be better. Indeed, they take on a tough opponent in the Big East Tournament final. The Hawks have a unique opportunity to beat the Yips and then advance to the NCAA Tournament.

Women's Tennis

Lenschrotter had the Hawks on a roll. They won their first two matches, and the team carried that momentum into the Big East Tournament. The Hawks are looking to make a deep run in the tournament and are confident in their chances.

Iowa will take on rival Iowa State in indoor meet

By Neil Lewis

The Hawkeyes and Cyclones will square off in a high-stakes indoor meet. The winner will claim the Big Ten Women's Indoor Championship, and both teams are looking to make a statement.
