Khomeini's death sheds hope

Iranian UI students speak out on demise of religious leader

James Calhoon
The Daily Iowan

"The death of the Ayatollah Ruhollah Khomeini cast a pall of uncertainty over Iran last week. UI students with ties to Iran expressed hope that the death would lead to a new beginning for that country.

Minoo Seraji, a student in the UI College of Law who left Iran just as Khomeini gained control of the country in 1979, said, "I don't believe religion and politics should ever mix. The government that Khomeini established was a religious one. I don't support what he did at all."

Seraji said that when Khomeini came to power in 1979, many people thought he would establish a secular regime like that of the Shah of Iran, the monarch who was overthrown by the Revolution led by Khomeini. But any hopes that Iran would become a more democratic country were quickly dashed as he gained control of the country, Seraji said.

"When he came in, everyone felt he was the one that would change things to the better after the Shah," Seraji said. "But it took only a couple of years to make it clear that everything was actually getting worse."

Seraji's feelings over Khomeini's death were echoed by another UI student who came to the country in 1980.

"I called my friends to congratulate them when they told me who had died. I wasn't asked to be identified because he was still a benefactor to me. I was happy because I hoped his death would cause the country to move more into democracy," Seraji added.

"I think Khomeini was a great man, in terms of his effect on Iran, but I don't think he was a good person," the student added. "I think he had a very negative effect on the country."

Seraji said he was considering going back to Iran, depending on what happened in the government now.

"If you had asked me a day before Khomeini's death, I would have heard there's no way I was going back," Seraji said. "But now I don't know."

Seraji continued to control Iran for a few years, but he has left Iran to pursue his career. The new leader of Iran does not have Khomeini's reputation.

While Seraji said he has no place to return to Iran, he still has family and friends in the country, and he remains concerned about the situation there.

"I think what will happen in the next few years," Seraji said. "There's something I would say to my people to tell them," Seraji said.

An approved 10 percent increase in salaries for full-time faculty and problems over a lack of maintenance funding and laborat­

The urban population has also begun to demand a wider role for the city council. One result was the appointment of a new city manager, who is responsible for overseeing the city's operations. The new manager is expected to work closely with the city council to develop new policies to address the city's problems.

Ethnic rioting persists in Uzbekistan

WASHINGTON (AP) - Ethnic rioting in the cotton-growing republic of President Mikhail Gorbachev's homeland that left at least 60 people dead and 700 wounded over the weekend has prompted the government to declare a state of emergency.

In a nationally televised address Sunday night, President Gorbachev described the violence that erupted Saturday as "the most terrible outburst of violence that I've ever heard of in any place in the world in the last 130 years."

Gorbachev said he had ordered the government to take all necessary steps to stop the violence and that he had personally given instructions to Interior Ministry soldiers to clear the violence was continuing.

In an interview with the Radio Free Europe station Sunday night, the president said the violence was an internal problem of the republic and that there was no threat to the soviet union as a whole.

"We are not talking about an external threat to the republic, but about an internal problem of the republic which we must resolve ourselves," Gorbachev said.

He noted that the republic of Uzbekistan was one of the most economically backward in the Soviet Union and that the government was aware of the social and economic problems in the region.
