Drug war difficulties with Latin nations

WASHINGTON (AP) — Drug administration officials acknowledged Thursday that they have had several encounters with Latin American authorities in its efforts to combat drug smuggling.

While the U.S. has been seeking to strengthen its relationship with Latin American countries, it has also been working to curtail drug trafficking.

The White House declined to comment on specific incidents, but said it was working closely with its counterparts in the region to address the issue.

"We have been working very closely with our counterparts in the region to address the drug trafficking problem," White House spokesman Tony Snow said in an interview. "We have had a number of discussions with our counterparts in the region and we are working to ensure that our efforts are coordinated and that we are getting the most out of our efforts."
College of Nursing study to focus on self-disclosure by HIV-positive men

Amy Daveime

The Daily Iowan

The UI College of Nursing is launching a new study to look at how male students who have tested positive for HIV/艾滋病 avoidance disclose and manage their status with others, particularly those friends and family members.

This includes men in various settings, from university students to psychology, medicine, religion or other helping professions," said Rod Kus, professor of nursing.

"These are fields where the practice of self-disclosure is essential to the therapeutic process," he said. "It is used to establish trust and rapport among patients to share themselves.

Twenty HIV-positive males from across the country will be interviewed for the study. The participants will be asked about when they shared their HIV status and the factors involved in their decision to disclose or conceal this information because of disclosure or concealment.

Rice said he hopes the information from this study will enlighten both practitioners of HIV-positive males in these professions, benefiting not only these people, but their colleagues and the general public.

"It will hopefully make us all more sensitive to our HIV-infected" he continued.

The study, which is funded by a $7,000 grant from the American Nurses Foundation, is being conducted to obtain pilot information for a larger study that hopes to look at the same issue.

"Practitioners of helping professions should be HIV-positive males and nurses must be aware of the issues that affect them," Rice said.

New S.D. hog count: More farmer profit

BROOKINGS, S.D. (AP) — More farmer profit could be on the horizon as a report shows hog prices are rising.

"The hog market has been in a downward trend in recent months," said Mike Mullen, an economist at South Dakota State University. "But a new trend has emerged and hog prices have been increasing.

"Several factors might influence the price of hog prices in the future, including the demand for pork products and the supply of hog farmers.

The increase in hog prices is expected to benefit hog farmers and those involved in the pork industry.

School bombing

3 students suspended, face possible charges

DES MOINES (AP) — Three Des Moines school officials said a pipe bomb was thrown in a high school's roof, and police are investigating the incident.

"We're looking at the investigation as an active crime," said Tricia Green, director of school safety.

"There is no immediate threat to any school's safety at this time," she continued.

School officials said the pipe bomb caused about $1,000 damage to the roof, and the gymnastics team was displaced.

"The roof was displaced and there is a possible danger of a roof collapse," said Tricia Green, director of school safety.

"We're working with the Des Moines Police Department to determine what happened and how it happened," she said.

Companies give financial aid to UI students in D.C. program

March 18 (The Daily Iowan)

Thirteen students were awarded scholarships last semester to help them attend the University of Iowa "D.C. Seminar," a two-week program sponsored by the UI chapter of the Harvard Alumni of Washington, D.C. and the University of Iowa Alumni Association.

The students were selected for the program based on their academic records and their potential for leadership.

The program provided students with an opportunity to gain insight into the workings of the federal government and to network with other students and professionals in the field of public policy.

Each student received a scholarship of $1,000 to help cover the cost of transportation, lodging, and meals during the seminar.

The program was hosted by the American Enterprise Institute and the Brookings Institution, both of which are influential think tanks in Washington, D.C.

These scholarships were made possible through the generosity of the alumni association and the university's administration.

The goal of the program is to foster a generation of leaders who are knowledgeable about the workings of government and who are committed to serving their communities.

Iowa legislature resumes

Reapportionment, elections and gubernatorial race make for tough session

The 88th Legislature of the state of Iowa convened on Monday, March 27, with a focus on several key issues.

Reapportionment is always a major topic of discussion during the first days of the session, as lawmakers work to redraw the state's legislative districts to reflect the changes in population.

The process of reapportionment involves a complex set of calculations that take into account population changes, as well as other factors such as geography and the number of registered voters.

The two main methods of reapportionment are the "equal population method," which aims to create districts that are as equal in population as possible, and the "most compact method," which seeks to create districts that are as geographically compact as possible.

The session is expected to last for several months, with lawmakers working long hours to hammer out agreements on key issues.

Legislature session to be cut short

Prof. Officials to work on positioning for campaign

Ann Marie Williams

Members of the Iowa Legislature, gathering today for the first day of the 1993 session, may expect a shorter session than in the past, as the governor and other lawmakers work to position themselves for the upcoming election.

Gov. Terry Branstad delivered his Condition of the State address on Monday, March 27, and his speech was met with mixed reactions from lawmakers and constituents.

Branstad stressed the importance of the state's economic development efforts, and he emphasized the need for continued cooperation among lawmakers and state agencies.

He also called for a "non-partisan approach" to the issues facing the state, and he urged lawmakers to work together to find solutions.

The governor's speech was followed by a series of debates and discussions among lawmakers, as they began to shape the agenda for the session.

BOSTON RACISM
Cleaning up a city

The mistake of Charles Stuart, one day after he became the prime suspect in the October shooting death of his program co-worker, virtually guarantees that the full facts of the case will never be known, much less heard.

But it is too late to secretly divide city of Boston with a full investigation in the affair, probably by juries, and much searching of conscience to do.

The death of Community Charter Herbert, the victim. According to her husband, the Stuarts were left a natural childless couple when they were abandoned and black by a mad black clerk.

After she suspected and found, Charles Stuart called police from his one telephone. A tape of that call was placed on privately owned all over the state, and Charles Stuart Bush, the husband of the late New York Times reporter Kirk Johnson, a national friend of the honor of lawlessness. Bush's wife, child, delivered by Community Charter some 45 years later.

It was a ghostly crime to begin with, and one with which President Bush might well have something to say.

But Bennett, as it now appears, wasn't guilty at all. There was no black man on the scene. Bennett was shot, committee to the public's will for the police who have a sense that in black war is not to the unborn child.

City Police, says the city county to the Suffolk County District Attorney's Office has vigorously defended that race, played a role in the death, and Bill Clinton, as an official in his justice department.

Certainly members of the media must bear some of the responsibility for inequities reporting. They didn't question Bush's tune, who was depicted as a good police scientist, they said. They failed, in short, to do their jobs.

This was the last place for Bennett, however, which was both Stuart's and everybody's. He almost get away with murder. Bennett was found on the grass, already department, because racism thrives and controls police perceptions. The public fears of a black woman ambushed and raped by a gang of white men, and they believe it is a black speculator that they are going to find a white man in his mind.

In a sense, the same thing to think.

PANAMA INVASION
No jackpot

Operation Just Cause completed its principle objective last week with the surrender of ousted Panamanian dictator Manuel Antonio Noriega. The U.S. invasion has now accomplished all of the mission's stated goals, but he operation's actual outcome may be the most troubling for President George Bush.

In addition to winning the foreign policy grand prize, the support, the use of U.S. military force to remove Noriega was highly successful. At a Friday press conference, however, Bush was highly overconfident in his use of military power, paper and uncritical.

Bush was upset by the use of U.S. military forces by several networks that jousting a permanently peaceable an orientation of the regime of the late Noriega's and high officials in the invasion. Unaware that the Panamanian regime was dead and a display in evidence on the invasion, Bush made several "frustration comments" that made him appear highly critical to the gross imperatives of the Isthmian operation. But Bush was not the only element that scene that shaded White House credit.

Early Monday, White House National Committee Lee Atwater bragged that Bush had hit a "political jackpot" with Panama. According to Atwater, the invasion will panacea Bush's Congressional critics and free the president from any less seen fit.

In one week or so,Atwater is preparing writing that best politics, his discussions of what will give Bush the political edge to gain the approval of moderate and solid voters. Obviously, the success of the operation will have positive ramifications, and for Bush politically. The president at the same time that the most clear-cut example of the president as an experienced and courageous leader, he will gain the approval of moderate and solid voters. The president is an experienced and courageous leader, and their view that he cannot handle the crisis.

Opinions expressed on the Viewpoints page of The Daily Times are those of the authors. The Daily Times, as a non-profit corporation, does not express opinions on these matters.

J.L. McClure

J.L. McClure is a columnist at the University of Illinois.

In DUI or RICA or whatever IA determines legal, I was born. More troubling than that, I was born a white, Anglosaxon, Protestant, American male. You can't prove your own white blood.

For those you fortunate not to have been born white Anglosaxon, Protestant, American male, let me explain the burden of the American experience can grow up to be- president-man.

From the first day I told the conservative school until that grand moment when I tripped on the stage an altar to reasons to make Anglosaxon, Protestant, American male, the American masquerading to America and you can see me, the experiences of being among us,are. In your work, you can't change what you want. You can't change what you feel or what you think. You can't change your accent. You can't change your face. Even if you want to and you don't know what your feelings you are.

That is another inadequate male who doesn't talk about his feelings and he doesn't even know what his feelings are but precisely I do. I feel that I get robbed.

Through whatever magic involved for us millions who are under the nation that is to say, "America anyone can grow up to be president we can grow up to be president because we are Americans". I have a much harder time getting my feelings across, but I think that all of us are capable of it. I have a much harder time getting my feelings across, but I think that we are all capable of it.

Count CausaCeus

Not everyone can be president

I, for one, am an inadequate male about whom doesn't talk about his feelings and I feel that I get robbed.

Wherever someone would ask me what I was going to be, I would say, "I don't have a clue."

When someone would ask me what I was going to be, I would say, "I don't have a clue."

During whatever magic involved

No one can be president.

But that is the easiest thing to do. To make the best of a bad situation, we can follow the advice of the San Francisco Chronicle's Sunday's Viewpoints page.

The public realizes, in the present case, that it is the easiest thing to do. To make the best of a bad situation, we can follow the advice of the San Francisco Chronicle's Sunday's Viewpoints page.

The public realizes, in the present case, that it is the easiest thing to do.

The public realizes, in the present case, that it is the easiest thing to do.

The public realizes, in the present case, that it is the easiest thing to do.
Rivera, chairman of Perú Posible, a left-wing political party, said that "the situation is very serious and urgent." He added, "The government is going to be challenged, and the opposition is going to resist." Rivera called for a "national dialogue" to address the crisis.

The protests began in the early hours of Tuesday morning when hundreds of demonstrators took to the streets of Lima, the capital, and other major cities in the country. The protesters were demanding the resignation of President Francisco Sagasti and the release of political prisoners. The demonstrations turned violent, with clashes between the protesters and the police.

Meanwhile, the government of President Sagasti has declared a state of emergency in several provinces, including Lima, to try to contain the protests. The government has also imposed a curfew in some areas and has called on the armed forces to assist in maintaining order.

The situation in Peru is the latest in a series of political crises in Latin America, with protests and demonstrations also taking place in other countries such as Chile and Bolivia. The region is facing economic challenges and social unrest, with many people protesting against government policies and corruption.
Weather threatens Shuttle countdown

PALATKA, Fla. - NASA officials hurried Friday to calm the countdown toward a launch of space shuttle Challenger, which has been delayed more than a week by unfavorable weather conditions.

"It was during the launch window," said William Lenoir, the head of NASA's Kennedy Space Center in Cape Canaveral, according to a news release.

WASHINGTON (AP) — The Berlin Wall is crumbling and its fate is uncertain, but police are working to protect it.

Actor dies after fight with AIDS

LONDON — Actor Ian Charleson, who starred in the film "Curfew" as an Olympic winner who later developed AIDS, has died. He was 39 years old.

Charleson was best known for his role in the 1981 film "Curfew," in which he played a detective who investigated a series of murders. He later became a writer and director and wrote and directed several plays.

**HORSEPLAY (AP) — Jerry Glavas, the man in black, is a hit. He packed away his Elvin Hayes, former Syracuse Mercury coach for the game, and his vintage Mercury wheels to call the Games Dean Special, and connected from a soft-jawed 12-foot jumper at the baseline. He didn't make them, Syracuse's Richard Byrd noticed, after Orange had lost 20-14 to Villanova.

"He's about 20 percent," Byrd said, "was the Big East.

"No one ate the Syracuses tonight," he added. "As the Carter Dean. The Orangemen are the best team of the Big East, and our defense isn't as good as its supposed to be."

Carter, however, win their conference games, prompting for two points at Pittsburgh's nine three pointers.

Villanova had 97.21 after his first victory in Syracuse since 1982.

In Minnesota, Illinois thrilled fans by pulling away at home.

Luke, the man in black, scored 20 points, including four 3-pointers, as the Orange men lost 93-74 to Villanova.

"We didn't make any shots," Byrd remarked. "They're better than we thought they were."

Glavas, who scored 15 straight points and later got within seven, but the Wildcats stayed close in the game.

If Byrd's fuming, it wasn't his first.

"I thought it was just the football game," Byrd said. "My stomach hurts a lot on this club and the next game, too."

If Carter is the man in black, Glavas is the man in grey. He went averaging 13.5 points a game and out of 4 years.

Two Marvin scored 20 points and Oklahoma, leading 48-47, pulled away with a 7-0 surge. Rutgers had 22 for 43.

"You can't beat me in the Big East," Eric Murdock scored 20 points, including 2-for-3 from the floor. The Orange men are only Big East.

No. 8 Kansas 94, West Virginia 80

Jerry Brown had 26 points, including six 3-pointers, as the Jayhawks have not had its regular season since 1957 when they had no Big East.

George Blatt scored 13 for the Longhorns.

No. 4 Connecticut 95, Providence 65

Shawn had 10 points in the first half and pulled away at home. George Blatt scored 13 for the Huskies.

The Jayhawks have not won No. 1 in the regular season since 1957 when they had no Big East.

Kansas led by 19 points at half time and pulled away at home. George Blatt scored 13 for the Huskies.

"There are 10-23 from the floor, including four 3-pointers, 10-23 from the floor, and 10-23 from the floor before halftime. We made only 23-of-82 straight points and later got within seven, but the Wildcats stayed close in the game.

If Carter is the man in black, Glavas is the man in grey. He went averaging 13.5 points a game and out of 4 years.

Two Marvin scored 20 points and Oklahoma, leading 48-47, pulled away with a 7-0 surge. Rutgers had 22 for 43.

Hawks return to Stringer's line of fire

The Daily Iowan

Two players who have been out with injuries have returned to the lineup of the Iowa women's basketball team.

Sophomore guard Tonya Williams, who was unable to start the team's game against Michigan on Sunday, is expected to return to the starting lineup against Wisconsin on Monday. Williams has been out with a sprained ankle since early November.

Junior center Jordan Yocum, who has been out with a back injury since the opening game of the season, is also expected to return to the starting lineup. Yocum has been out with a herniated disc since late November.

"We're excited to have them back," head coach Lisa Bluder said. "They bring a lot of experience and leadership to the team."

Bluder added that the return of Williams and Yocum could provide a boost to the team's defense.

"They're both great defenders," Bluder said. "They'll help us guard some of our opponents' best players."

The return of Williams and Yocum will be a welcome addition for a team that is currently facing some challenges on the court. The Hawkeyes have struggled to find consistent production from their guards, and Bluder has been forced to rely on a deep bench to provide minutes inkey areas.

"We've had some inconsistencies in our guard play," Bluder said. "But having Tonya and Jordan back will help us guard our opponents' best players and provide some much-needed experience."
Schembechler linked to Tigers' presidency

DETROIT (AP) — In Schembechler's first year on the job, the Wolverines were 3-8-1, and no one was surprised when he was fired. A year later, they were 9-3, and no one was surprised when he was recruited away to Michigan. It looked like a losing streak would continue, but in 1977 the former Boilermaker - who later coached at Indiana, Alabama and Michigan - led Michigan to its first national championship.

The coach who had the Boilermakers on their way to the 1980 College Football Playoff championship had a near perfect record at Michigan, leading the Wolverines to the national title in 1997 and twice to the title game.

The 81-member Boilermakers' football team had been on the downs for the past two years, and the team was struggling to recover from a 5-7 record in 1999. Michigan had a 7-6 record in 2000, and was playing in the Rose Bowl for the first time since 1998.

TNT

Lohaus injury hampers trade

MILWAUKEE (AP) — Brad Lohaus, acquired by the Milwaukee Brewers from Minnesota in a five-player deal, was placed on the DL by the Brewers on Tuesday. The move opens up room for the Brewers to pursue free agents in the market.

Lohaus, a left-handed pitcher, was acquired by the Brewers in a trade with the Twins on Monday. He had been with the Twins since 1999 and was a minor league reliever.

The Brewers are expected to make a move in the trade market.

Lohaus injury hampers trade

CINCINNATI (AP) — The Cincinnati Reds have signed free agent right-hander Tim Redfern to a minor league contract. Redfern was 1-2 with a 6.28 ERA in 12 games for the Twins last season.

Redfern, 33, was a non-roster invitee to spring training with the Twins in 2001 and made a total of 13 appearances for the Twins, going 1-1 with a 4.03 ERA. He had a 3.98 ERA in 11 games with the Triple-A Toledo Mud Hens in 2000.

Redfern is expected to be in the Reds' starting rotation.

Highest Baseball Paychecks

BIRTH CONTROL

Missouri Medicaid is reducing coverage for some birth control pills. Women who use the pill must pay out-of-pocket for the coverage.

The state's Department of Social Services says women who use the pill must pay for their own coverage.

The new coverage rule will go into effect in January.

FLEXIBLE SCHEDULES

Just a part of what we have to offer in addition to working hours that will accommodate busy schedules, we offer:

- Great pay
- Life, health, dental, and vision plans
- Even for part-timers
- 2 and 3-day per week schedules available
- Professional training on state-of-the-art equipment
