Hundred in London injured in protest
Tax demonstration causes riot

LONDON (AP) - Prime Minister Margaret Thatcher’s tax demonstration caused rioting

As tax protesters clashed with police in London’s worst riots in years, the Prime Minister said she was not to blame for violence that saw 100 injured and 400 arrested.

Thatcher told reporters of her “complete surprise” at activities inside the area.

People had a right to demonstrate peacefully, but violence had no right to be there, she said.

The Prime Minister had not been informed of the plan for the demonstration.

British Police Commissioner Sir Hugh Williams said that 100 people had been injured.

The violence erupted after thousands of people marched through central London to demonstrate against the government’s plans to raise income tax.

The protests were scheduled to coincide with a cabinet meeting in the Nursing Home, but were marred by clashes with police.

Thatcher said she had not been informed of the protest.

She said: “I have not been informed of this demonstration.”

The demonstra-

tion was attended by 50,000 people,

and was broken up by police after a series of clashes.

The police said 100 people were injured.

Scientist denounces humankind's ignorance of greenhouse effect

Dana Walls
The Daily Iowan

Hansen is building in his own time bomb through inactivity to the problem of global warming and a lack of knowledge about gas emissions into the atmosphere.

This was the message that internationally acclaimed physicist and UI graduate James Hansen, director of the NASA Goddard Institute for Space Studies, delivered to about 200 people during a UI lecture Friday.

Hansen, whose 1988 testimony before Congress is credited with starting the environmental movement, said the future will determine whether the president makes it difficult for him to know which actions to take.

Hansen said that he believes President George Bush is unaware of his challenge to environmental leadership. Bush's administration has said the president gave the message, Hansen said, was energy efficiency would not be possible without the implementation of taxes on emissions.

"I don't know of any politician who is willing to do this," he said.

"We should have started implementing programs ten years ago," Hansen said. "We know enough then. We folded away the 1980s, we shouldn't fold away from the 1990s."

"We're going to be locked into a business-as-usual cycle of environmentally hazardous activity."}

Lithuania

The Lithuanian parliament was scheduled to meet Monday morning to forge a response. Lithuania's interior minister, the parliament's interior committee chairman, and his three deputies were arrested during a 20-hour session by a National Salvation Front, which the study said was demanding "impossible things." It was reported that as many as 50 people drove through the city, apparently to protect the parliament building.

"If we as a council are to talk in the '90s, as we did in the '80s, we're going to be locked into a cycle of environmentally hazardous activity," Hansen said.

He concluded, "It's hard to really judge whether I'm optimistic or pessimistic."

River. Evidence of the shell could be seen at the Platte, Powers said. Officials believe thisigy is related to this year’s flooding. The state had one other item found in the area. The case was opened and examined by law enforcement.

The Daily Iowan (AP) - Officials say the shell found in the Platte River was a projectile used in World War II. The state had one other item found in the area. The case was opened and examined by law enforcement.

Alpine! Alpine! Alpine!

The Alpine Sound. Clean, unadulterated and powerful... the emotion of a live concert transplanted into your car. This is the essence of the Alpine sound which you'll find in Alpine's newest ensemble of CD and cassette players, amplifiers, and speakers.

Professional Installation

Professional installation starts with careful component selection, considering your driving and listening habits. The installation itself is tight, true and tested. And retested. No loose wires. No poor connections. The result? Quality and craftsmanship can you see in your rearview mirror.

Service... the Audio Odyssey Touch.

Every car stereo we sell is covered by local, factory-authorized service. Our installations are backed with a lifetime warranty. If a component ever needs service, we'll remove and reinstall it (in the original car) at no charge. Policies like these are our absolute quality commitment to you.

A few examples of why Audio Odyssey has become Iowa's largest Alpine dealer...

Alpine 7167: What's the first thing to come to mind when you think of Alpine? It’s the Alpine Sound. But it’s also the Alpine concept of customer service. Alpine is a company that is committed to the satisfaction of its customers. Alpine has been in business for over 30 years.

Alpine 7269: The high-performance Alpine 7269 has almost every feature you'll ever want in a car stereo. It's a complete system that includes a high-performance equalizer, a high-performance stereo amplifier, a high-performance speaker system, and a high-performance subwoofer. It's all made in Japan and has the power to impress even the most demanding audiophile.

Alpine 7904: You've seen it before, you're familiar with it. But have you also heard it? Alpine enters the world of high power, low distortion, and high fidelity. Alpine's new 7904 series takes the concept of high performance to a new level. Alpine makes a full range of high performance car stereos, and the 7904 is at the top of the line.

The Alpine Sound. Clean, unadulterated and powerful... the emotion of a live concert transplanted into your car. This is the essence of the Alpine sound which you'll find in Alpine's newest ensemble of CD and cassette players, amplifiers, and speakers.

Australian explosions force evacuation

WASHINGTON (AP) — The United States should restrict the export of jet engines, aircraft engines and other military-related items to nations known to sponsor international terrorism, a bipartisan group of Senators said Thursday.

The Senators, in a letter to Commerce Secretary Clayton Yeutter, acknowledged the need for the United States to compete in the world market, but said the policies could not be allowed to compromise the nation's security.

They called for a comprehensive program to address the issue, including legislation that would require companies to disclose the military use of their products.

The Senators said they were concerned about the potential for weapons proliferation and the erosion of U.S. technological superiority.

They added that the United States had a moral obligation to protect human rights and promote democracy in other countries, and that a strong case could be made for keeping sensitive technologies out of the hands of regimes that sponsor terrorism.

The Senators also urged the administration to consider restrictions on the export of dual-use technologies, which are both military and civilian, and to work closely with allies to coordinate efforts.

They called for a comprehensive approach that included economic sanctions, political pressure, and other tools to address the issue.

The Senators said they would work with Yeutter and other Administration officials to develop and implement a comprehensive policy on this critical issue.

NATO missile draws controversy

WASHINGTON (AP) — The United States is considering a test firing of a new, long-range missile, but it will not take place until after the next presidential election, a senior administration official said.

The idea of testing the Lance nuclear missile — which would be based on the ground in Germany and used to target a Soviet target in Europe — has been met with strong opposition from European allies.

But the official said that the United States believes the missile is needed to deter a potential nuclear attack by the Soviet Union.

The official declined to elaborate on details of the test, and noted that the missile would be fired only after consultations with European allies.

The United States has long been a strong advocate of a non-proliferation treaty that would prevent the spread of nuclear weapons.

The official said that the United States has been in discussions with European allies about the proposed test, and that they are supportive of the missile.

The test is expected to take place in the fall of this year, the official said.

The launch would be the first such test since the expiration of the 1987 INF Treaty, which banned intermediate-range missiles.
White House develops conservation policies

WASHINGTON (AP) — The Bush administration, condemning the nation's waste relative to some other countries, will open the door Monday to a British-style public writing campaign where citizens can suggest ways to save energy.

In a move that will likely put a new face on energy policy, said Deputy Secretary Henson, the Energy Department will announce a plan to develop a national energy policy through a virtual town meeting.

"It's a way to get us all thinking about what we can do to save energy," said Henson, who will lead the effort.

The move is seen as a way to increase public awareness about energy conservation, and it is part of a broader effort to increase energy efficiency.

The plan is expected to be unveiled next week, and it will include a series of meetings across the country where the public can learn about energy issues and suggest ways to save.

The announcement comes as the government is facing increased pressure to address climate change and reduce dependence on foreign oil.

The initiative will be launched in collaboration with the Energy Department and the Environmental Protection Agency.

The public will be invited to participate in a series of online discussions, where they can submit ideas and suggestions for energy-saving measures.

The government has set a goal of reducing energy consumption by 20% by the year 2020.

The public meeting will be part of a larger effort to increase public awareness about energy conservation and to encourage people to take action on their own.

For more information, visit the Energy Department's website or contact your local energy authority.

RACISM ON CAMPUS

Public-dis-relations

The resurgence of racist incidents on campus is

regrapid and regurgitis.

Not just the infamous "We're white" leaflet inquiring the student government election, but all the other racially

incendiary notes that have been lighting up the

racial epitaphs and physical objects hurled at minorities and

attacks on them throughobscene telephone calls — to

say nothing of the several things left unrest. Not just this last week, but over the past several weeks.

Several people have called for the cessation of such racist incidents, but I am not to agree with that,

since the absence of racist incidents can at best be termed a

negative freedom.

"It is inevitable that international students experience a "culture shock." But it is sad when minority

Americans are made to feel like foreigners in their own country.

What is also clear is that the minorities on this campus often

are the object of their own seclusion in their own little corner of the campus. When these wallahs dismay and every-

body's eyes feel that they are part of outside life, the

something substantial will have been achieved. This should

seem at all levels from the administrative to the student.

International students experience a "culture shock" when

they are suddenly thrust into a world that is really new to the United States. This is inevitable. But it is a sad state of affairs if minority Americans are made to feel like foreigners in their own

country.

It is not enough that the U. T. take about increasing diversity on campus. Recruiting minority students will not

enough unless those students are retained. And they might not be tempted to stay if their limits of tolerance are tested constantly. When they leave, the resources they sacrifice will deter others from

coming to this campus.

And all the fancy峰值omades produced by the U. cannot rectify a damaged reputation.

Washington named 21st head coach of Bulldogs

Duke's Hurley sent to bed to recover for title game

DENVER (AP) — Allie Duke point guard Bobby Hurley was given the usual treatment and was ordered to bed on Sunday to hope he will be present for Monday night's NCAA championship game against Arizona.

Hurley, who played 38 minutes but scored only three points for the No. 1 Kansas State basketball team last Saturday against Arizona in Denver, has been out for six days with a back injury.

"I'm going to have to cut back on the dribbling and the running," said Hurley, who has no idea how long he will be able to play. "I've been having trouble with my back, but it's been better in the last three days."

The news game marks good guide, bad guide. And Lethal Weapon.

Watch the game marks good guide, bad guide. And Lethal Weapon.

Stanford teams take title using 3-point shot

Washington's 21st head coach of Bulldogs

DENVER (AP) — Bronco Musburger, the primary voice of CBS Sports during the 1980s, was let go by the network Sunday in a move that shocked officials at CBS and other networks.

Musburger was let go on April 22, a day before the NCAA basketball championship game — which Musburger, who will be working for Fox next season, was scheduled to host.

CBS Sports President Tommy Wolper confirmed the move at the Final Four.

"It's all right," Musburger said. "It's a difficult decision. It's never easy to deal with individuals. When you have personal or business issues, it's inevitable."

Ted Blaylock, executive producer of CBS Sports, said the network had been working with Musburger to give its other sportscasters more credit.

"We have a great group of young individuals. We're proud of our past, and we're proud of our future," said Blaylock.

Broadcasting the UNLV-Duke game will be the final assignment for Musburger, who has been with the network for 31 years.

"I was surprised, but it was a mutual agreement and I have no hard feelings and I have no hard feelings," said Musburger, who was named CBS's assistant for the NCAA tournament.

"I'm not working out the blue," said Musburger.

Rutkovsky and I have a feeling that we're going to be the hosts for the network's top drive games, and I'm not working out the blue."

"I knew he was going to get a double overtime on Sunday," said Musburger, who was the host for the UNLV-Duke game.

"I was surprised, but it was a mutual agreement," said Musburger.

Baseball

"We added a great round before the Hawks' spring trip to the States," Toronlo said. "It felt good," Noreen said. "But we didn't get timely hits and that's what hurt us. We hit hard, but we left too many on base." Noreen had a chance to tie the game up at the bottom of the seventh when he hit what looked like a home run into right-center field. It was caught at the wall by the backstop, Jason Denham for the third out.

"You can't that any game away," Noreen said. "We lost seven games, but we didn't play well Saturday. We couldn't hit well and we didn't put the ball in play. We'll have to hit better when we face a better team next weekend." Noreen added, "We had an excellent game against Minnesota last weekend and we should have played as well this weekend. We have to work on hitting better to win our next game against Kansas State."-30-

NCAA

Duke and UNLV were taking different approaches to the title race.

"Fifty percent," Shinkle said. "If we can't get it right, we'll have to try again. We want to win it, but we don't know if we can." Shinkle added, "I think we'll have a chance to win the title this year. We're doing well and we're close to getting it done."-30-

Washington

Fields did not play the head coach role in the game. But he was there, watching the game. He was there to observe the students, the students' managers, the students' parents and the students themselves. He was there to be a mentor, a role model and a leader.

"I was wondering when a universe would come into existence," Fields said. "That's what I believed in. It's what I believed in when I was at UNLV. When I was at the University of Kansas." Fields added, "I was there to give the players the opportunity to be the best they could be. That's what I believed in."-30-

"It was a tough loss," the Iowa catcher said. "But we're not going to let it get us down. We have to work harder to win our next game."-30-
Players could transfer if coach fired

RALEIGH, N.C. (AP)—An North Carolina State official has prepared to ask permission Monday to fire a recruit against basketball coach Jim Valvano, they heard the presen-

ce of a disagreement Wolfpack.

Lawyers for N.C. State are going before the North Carolina Board of Governors on Monday making arguments to prove the viability of the program, according to sources. Jim Bobinski, a former coach at North Carolina, couldn't attribute it to the last week. This is a different

“We've been trying to get the players to concentrate on their games in the conference. They're still trying to win the conference,” said Steve Schillig. Chris Cain Band.

“Jim Valvano

Chicago Bears Player Weighs Options...
Final Four: And Then There Were Two

DENVER (AP) - Ideally for Georgia Tech, the 1988 National League West champions have only to win one game to reach the college basketball championship. The 1988 National League West champions have only to win one game to reach the National Collegiate Athletic Association Big Ten basketball championship.

There are no three reasons why this will be the case.

Dave coach Mike Keyserwitz and UNLV coach Jerry Tarkanian meet Sunday between press conferences in Denver. Their teams will face each other in the national championship game for the first time since the 1979-80 season.

"It's time to go back, in fact, it's past time," Boston Red Sox manager Joe Morgan said. "If there's anything I can do about it, I'll do it."

"It's a team of polite, well-behaved young men," said Rich Garcia, who served as the team's
captain. "I hope they can have a good season."
**Costs slow progress of high-definition TV**

**ATLANTA (AP) -** High-definition television may be the "next wave" in video entertainment, but slow and steady may be the order of the day for the new, high-definition television, or HDTV, industry.

"The problem is that it's complex," said Robert B. Goldstein, president of Communications South Inc. "And we are going to have to go slowly, and we better have the right of way." Goldstein predicted that HDTV signals will not be available to viewers in any major market until 1990 at the earliest.

Manufacturers' prototypes of HDTV show bright, clear images of the movie theater and the concert hall, bringing that technological wonderland into viewers' living rooms.

The Federal Communications Commission, which sets several of the technical standards for broadcast and communication media, is working on a definition of HDTV. The FCC might well define HDTV as "any television system that provides images of better quality than those obtained from an existing system, and standards that will be required to be used in conjunction with those of the new system." This definition is not finalized.

For viewers of HDTV, there are expected to be two sources of signals: over-the-air broadcasts and cablecasting. The stodgier broadcast networks are just starting to show interest in the technology, while cable-service providers have already started using HDTV signals.

"In cable, there are no problems," said N. Scott Schweb, vice president of Advanced Television Systems Committee, a group formed to develop standards for HDTV. "The broadcast networks are the ones who are going to have to go slow." The broadcast networks will begin using HDTV signals in test markets in 1990.

"The system means more," Schweb said. "It needs a new antenna, and you have to order new receivers when you order a new antenna. Many old receivers won't perform well when the system is transmitted in standard form. In addition, viewers will need a new antenna, and some may need new receivers if they want to get the high-definition signal." Goldstein predicted that many viewers who order HDTV signals might decide to order cablecasting instead.

"The industry means more," Schweb said. "Some people might move a whole house just to get the channel in New York." HDTV signals will be sent primarily to big cities, according to Schweb. "Most people in New York City can get the signal, but most people in Los Angeles can't." Schweb predicted that HDTV could be cost-effective for some cities but unprofitable for others.

"The network means more," Schweb said. "It is going to cost more than $5 billion to transmit the signal. The broadcast networks are only offering it to a few markets." Schweb predicted that the cost of transmission would range from $500,000 to $1,000,000 per channel per month.

"The service means more," Schweb said. "It is going to cost more and be more expensive. The networks can afford it, but the viewers have to pay for it." Schweb predicted that viewers would not want to pay for the service.

"The audience means more," Schweb said. "The networks will need new antenna, and viewers will need new receivers. Some viewers might be able to get the HDTV signals with their existing receivers, but many viewers will need new receivers." Schweb predicted that viewers would not want to pay for the service.

Schweb predicted that HDTV signals would be available in 1990 for viewers in some markets. "The broadcast networks are going to use HDTV in the late '80s," Schweb said. "The networks are going to use the technology to test and develop the technology. It will take time for the technology to develop." Schweb predicted that HDTV signals would be available in 1990 for viewers in some markets.

"The cost of converting an entire industry, especially one that is already very expensive, is very high," Schweb said. "The cost of converting an entire industry, especially one that is already very expensive, is very high." Schweb predicted that viewers might not want to pay for the service.

DEAN, GRADUATE COLLEGE

The University of Iowa invites applications and nominations for the position of Dean of the Graduate College. The Dean will report to the President through the Vice President for Academic Affairs and will work with Graduate faculty to recruit graduate students and maintain excellence in the University's 50 graduate programs which serve over 5,000 students. The position is open to candidates who possess an earned doctorate; leading, research, and service of national distinction; and the ability to communicate with a broad faculty as a respected leader at the University. The Dean will work with the Graduate College's executive committee to develop and implement a vision for the future of the Graduate College and its programs. The position requires an outstanding track record of scholarship, teaching, and service, with a strong record of leadership and mentorship. The Dean must demonstrate excellence in the supervision of academic leadership and be able to navigate the complex world of university administration. The successful candidate will have a broad understanding of graduate education and be able to lead the Graduate College through new and continuing accreditation cycles. The Dean will work closely with the Graduate College's executive committee to provide leadership in the areas of policy and development. The University of Iowa recognizes the importance of diversity and is committed to attracting qualified candidates who reflect the diversity of the community. The position is open to candidates who possess an earned doctorate in a relevant field. The successful candidate will have a broad understanding of graduate education and be able to lead the Graduate College through new and continuing accreditation cycles.
