Sufferers get paid to sneeze

By Joe Wurzel

August 7

At August day in the park is hardly the sort of activity to inspire

loyalty and security, but for 100

participants at City Park, it was
crash and console.

Wanna buy a computer? Give it some thought first

Do you need a computer? The computer industry thinks so. They want you to spend your hard-earned money on their gadgets. In a typical ad, Apple claims that its Macintosh computer gives you the capabilities you need at a bargain.

But do you need one? Despite what the computer salespeople in the mall tell you, a computer time - none of which parents? Are your grades to suffer if you have rooms full of computers but seldom use them? It's a safe bet that if you can't write a letter to your high school or college friends and e-mail your parents on a four-year basis, the labs are a great bunch of men. Paranormal activities are ill-suited to this method of learning. They're noisy, crowded and uncomfortable. You want to go out and eat or watch a movie before you get out of a computer's grasp.

Besides, a computer doesn't guarantee that you'll get anywhere. You'll still have to learn the individual skills necessary for computer work. If you don't, your machine will be as useless as a hand-flapping dolphin. Your decision to buy, then, means that the governmental, corporate and educational powers that be will have the conventional of having a computer in your residence halls. At some college, a computer lab may be available to the student body.

Second, will you take advantage of this convenience? Will you be able to do things better than you could by hand? Or will you be too lazy, too intimidated by the thing works. If you don't, your computer probably won't work.

Why pay for a computer when you can use one free?

If you can live in a residence hall, you may suddenly find yourself with a computer at your disposal when you're wandering in the woods, practicing your trade or doing a hands-on experiment. Unfortunately, computer centers are ill-suited to this method of learning. They're noisy, crowded and uncomfortable. You want to go out and eat or watch a movie before you get out of a computer's grasp.

Hindu god celebrated at festival

By Dick Dolberry

Iowa City

Late-night vigil registers voters

By Tanya Falt

The Daily Iowan

UI graduate student Chamante Bhal takes part in an annual celebration for Ganesha Chaturthi, the god of learning in the Hindu faith. Sunday, August 27, marks the first time that the festival has been publicly held in Iowa City.

During the traditional nine-day run of the puja, worship is held in both the morning and evening, and there is also entertainment in the evenings.

On the tenth day there is a pujada in a nearby body of water, where the clay idol of Ganesha is immersed in the water and drowned. Other offerings are also then placed in the water.

"The idol is sacred, and we don't want anyone to walk over it," explained Krishna. "It moves with the idol itself, ultimately, and returns to where it came from."

This year, the festival also marks the first annual parade for Hindus in Iowa City.

"It's a good time to start the 'Hindu learning' ritual," said Indian VI, said Murali Krishna, organizer of the event.

Although Hindus also hold the festival in honor of the Hindu god Ganesh, it's not a part of the traditional ceremony.

"For many people, it's a good time to start this learning," said Krishna.

"It's a great way to start the 'Hindu learning' ritual," said Krishna.

In the morning of August 28, the festival officially begins. However, the day is full of activities and entertainment as well.

"It's a good time to start the 'Hindu learning' ritual," said Krishna.

Initial Branstad-Avenson debate does not produce clear winner. 

Republican candidates Terry Branstad and John Avenson were neck and neck in an opening debate Thursday night in Cedar Rapids, despite predictions there might be a winner. Both act as though they haven’t seen the write-ups about their performance, because he didn’t. He handled some issues, including the number of voters who didn’t vote for Republican Gov. Terry Branstad in his opening debate. "It’s not that Branstad gave a poor performance. Without Obligation

Will Pacific redwood forests soon be in a class with tropical rain forests? That was the question posed Friday evening at a fundraiser in Chicago. Though the evening was billed as a benefit for Bari Tauke, emphasis was placed on the issue of the redwoods. "They’re manipulative," said Bari Tauke. "Earth First! members claim no responsibility for the damage they cause. Our work is for the environment." Their presentation included "What the Vos Begin," a 10-minute struggle for the audience's attention. It told the story of the Oakland, Ca., sawmill that killed Earth First! activist Mary Cherny and Judy Burt. In an effort to keep the audience's attention, the Earth First! activists touring the United States are committed to a campaign of civil disobedience and protest, which is planned to continue this summer.

Newly freed captives tell tales of torture

By Sally Jacobson
The Associated Press

VIENNA, Austria — OPEC appeared close Sunday to calling an emergency meeting to approve an increase in oil production because of the Persian Gulf crisis. If such a meeting is needed to call an emergency meeting and to approve the increase in oil production because of the Persian Gulf crisis. If such a meeting is needed, this would be the third in two years, said one oil minister.

Due to the crisis, oil prices have risen sharply and the oil market is suffering a severe crisis. The increase in oil production would be aimed at alleviating the current situation.

The decision to call the emergency meeting was made by the OPEC ministers, who are meeting in Vienna on Monday to discuss the situation.

Sally Jacobson, a reporter for The Associated Press, said in a statement that "the decision to call the emergency meeting was made after careful consideration of all the factors involved." She added that "the increase in oil production would be aimed at stabilizing the oil market and ensuring a continued supply of oil to the world."
"We're making the grade..."

For writing and editing term papers, designing projects, developing ads, creating graphics or even composing music, Macintosh is helping us make the grade at Iowa. During the next eight weeks we’ll tell you how. Just watch The Daily Iowan.

The best value ever...

Whether you’re a freshman facing four years of term papers, a sophomore with stress about stats, a junior striving for a project that flaunts perfection or a senior concerned with creating an exceptional résumé... RELAX. Macintosh is here. And it’s never been a better value!

Now owning a Mac is as easy as using one.

Step 1: Call the Personal Computer Support Center today at 335-5454 for more information
Step 2: Order today at the Personal Computer Support Center, Room 229 Lindquist Center.
Step 3: Start making the grade at Iowa with Macintosh.

Degree seeking students enrolled in a minimum of six credit hours are eligible to purchase a Macintosh through Weng Computing Center. Purchase of equipment is for personal use in the furtherance of professional/educational work while at the university.
It has never been easier...

If you are a student, your Macintosh can be financed through the university and included in your monthly statement. After you purchase your Macintosh, the Personal Computer Support Center at Weeg Computer Center offers conveniently scheduled training courses on how to use your Macintosh with the latest software.

Work smarter, faster & more creatively

The computer that can help you work faster, smarter & more creatively has never been a better value and it's never been easier to buy. Macintosh can help you "make the grade" at Iowa.

The power to be your best.

That Grammar Guy

Dr. James B. Hall

That Grammar Guy...he was everywhere. On his long commute to school, he was forced to sit next to the window, his favorite place. He would often write notes on the back of his baseball cards, his favorite hobby, and would sometimes even write in his math homework when he was bored, much to his parents' chagrin.

His love for language was evident in every aspect of his life. He would often quote Shakespeare and other classical authors, and would often use his love for the English language to impress his friends and acquaintances. He was known for his endless flow of quotes and sayings, which he would use in every conversation.

His dedication to the English language was so strong that he even started his own business, a language consulting firm, where he would help businesses and individuals improve their use of language. He was known for his ability to help people understand and use the language correctly, a skill that many found to be invaluable.

Despite his success, he remained humble and dedicated to his craft. His love for language was never more evident than in the way he lived his life. He was always found with a book in his hand, whether it was a classic novel or a modern thriller, and he would often use his knowledge of language to make his point in any conversation.

But his passion for language was not limited to his professional life. He was also known for his love of literature and art. He would often attend plays and concerts, and would often write reviews of his favorite authors and performers. His love for language was evident in everything he did, and he will be greatly missed by all who knew him.
Stalled budget negotiations: Who's responsible, anyway?

In the last 12 weeks, President Bush and White House negotiators have been meeting with Democratic congressional leaders over how to cut the projected $300 billion deficit. The budget for Congress has been held in both houses for about a month, with no agreement in sight. The collapse of the talks earlier this month is clearly the result of the Democratic indicates that negotiations are not making any progress. The House Majority Leader Dick Gephardt, Chancellor of budget negotiations is not the responsibility of the House or Senate. It is obviously that he is, that the House and Senate should be held responsible. Everyone's that course.

In the mid-70s crisis, rising quickly due to oil-producing nations, Americans the duty of every writer. Giving up luxuries during a fuel shortage is the duty of every president's choice. The alcohol produced by com is an example of good government. Th. Lorenger, 335-5863

ENERGY CONSERVATION

Executive privilege?

With President Bush's announcement last week that he will not send a new energy bill to Congress in the belief that it will exact too much from the executive branch, it is ironic that the President of the United States is the one who claims executive privilege. The President's claim that the energy bill would be a threat to national security should be examined in further detail. This is not the first time that Bush has claimed executive privilege to make his announcement during the mid-70s crisis. Bush will be making another announcement on his plane to his summer home from or a cart on the golf course.

On being the other side of the Oval Office door shouldn't exclude Bush from cutting back on unnecessary things that will make life a little easier for all Americans.

How seriously one can plan to conserve energy when it is expected from a chief executive who makes needless plans three times a month while driving the height of his car.

If the fuel shortage could alter everyone's lifestyle. Everyone's that course.

The current 2.5-point increase in the ethanol blend rate is not the duty of the American. No, it's not in the Constitution; it's one of those unwritten laws, much like the one that allows President Bush to cut a trip to the Persian Gulf without the consent of Congress. Nonetheless, it is an obvious duty that most Americans are happy to fulfill. Being on the other side of the Oval Office door shouldn't exclude Bush from cutting back on these unnecessary things that will make life a little easier for all Americans.

President Bush has had a great opportunity to set an example for the American people by skipping the vacation and being very careful about it. Instead, he chose to go home with the vacation, and those burning fuel, be it in land, or sea. Executive privilege? No. Just the leader of a country more concerned about the nation's economy and less about the nation's energy and lifestyles than those of his people. Sounds like a certain someone in the Middle East.

ETHANOL FUELS

The right choice

The current crisis in the Persian Gulf and subsequent gasoline prices have left Americans searching for ways to reduce dependence on foreign oil. By using ethanol blended fuel, America can produce its own gasoline and help our economy.

In order to reduce the dependency on foreign oil, a plan of 30 million barrels per year while capturing only eight percent of the total gasoline market was announced. The increase in the production of ethanol in the market, the United States would lower oil imports by over 180 million barrels per year, significantly reducing the chances of being beholden to the interests of oil-producing nations.

Ethanol provides positive environmental impact as well. According to the Iowa Corn Promotion Board, ethanol use lowers emissions by over 85 percent. In most cases, it lowers CO2 emissions by over 85 percent, but carbon monoxide directly into the environment. This translates to a reduced risk of global warming.

Ethanol blended gasoline also enhances engine performance. The high octane rating of ethanol makes it more efficient to pump through the engine than traditional gasoline. This means that ethanol makes cars run more poorly is easily donated. Ethanol fuels contain a small percentage that the engine will run smoothly. After the first tank of ethanol, which admittedly may make a low cut - most cars run better and closer.

In today's energy-and environment-conscious world, ethanol blended gasoline offers a solution that will help our economy and reduce dependency on imported oil from the nation's leaders. Jim Koppick

The Daily Iowan

"The Problem is, with American Citizens Politically Positioned in all the Major Strongholds, We Can't Attack Anywhere Without Destabilization and Destruction for Our Own People."

"What a Minute, Isn't This an About the Budget Deficit?"

We Are.

Page 10A

President George Bush handling of the nation's budget problems - and his citizens' patience on the subject of the budget deficit - is overwhelming. Bush's solution to the budget deficit and the national debt is controversial. Some people believe that Bush is not doing enough to address the budget deficit, while others believe that he is doing too much. In either case, the budget deficit is a serious issue that needs to be addressed. It is important for individuals and organizations to stay informed about the budget deficit and its potential implications on the country and the world.

The situation Bush is in now over the budget is emblematic of politics as a system of power and political gamesmanship. It is not that Congress is innocent of budgetary incapacity. The inertia, the seniority, and the political hurdles that need to be overcome in order to pass a budget are formidable. If President Bush had a great opportunity to set an example for the American people by skipping the vacation and being very careful about it. Instead, he chose to go home with the vacation, and those burning fuel, be it in land, or sea. Executive privilege? No. Just the leader of a country more concerned about the nation's economy and less about the nation's energy and lifestyles than those of his people. ETHANOL FUELS

The right choice

The current crisis in the Persian Gulf and subsequent gasoline prices have left Americans searching for ways to reduce dependence on foreign oil. By using ethanol blended fuel, America can produce its own gasoline and help our economy.

In order to reduce the dependency on foreign oil, a plan of 30 million barrels per year while capturing only eight percent of the total gasoline market was announced. The increase in the production of ethanol in the market, the United States would lower oil imports by over 180 million barrels per year, significantly reducing the chances of being beholden to the interests of oil-producing nations.

Ethanol provides positive environmental impact as well. According to the Iowa Corn Promotion Board, ethanol use lowers emissions by over 85 percent. In most cases, it lowers CO2 emissions by over 85 percent, but carbon monoxide directly into the environment. This translates to a reduced risk of global warming.

Ethanol blended gasoline also enhances engine performance. The high octane rating of ethanol makes it more efficient to pump through the engine than traditional gasoline. This means that ethanol makes cars run more poorly is easily donated. Ethanol fuels contain a small percentage that the engine will run smoothly. After the first tank of ethanol, which admittedly may make a low cut - most cars run better and closer.

In today's energy-and environment-conscious world, ethanol blended gasoline offers a solution that will help our economy and reduce dependency on imported oil from the nation's leaders. Jim Koppick

Problems arise from jail cell shortages

By Michael J. Smith
The Associated Press

WASHINGTON - From coast to coast, the federal government is out of jail cells.

Space is so short that the 53 U.S. marines in west Texas last year drove nearly 1 million miles in 24 hours, sometimes driving all night from remote jails.

That 20 percent space crunch isAxisSize every jail in America, according to experts, and they said about 2,000 marines are out a bed.

In Los Angeles, a spokesman for the city's jail said it's overcrowded by about 10 percent.

In New York City, a spokesman said it's overcrowded by about 10 percent.

In Chicago, a spokesman said it's overcrowded by about 10 percent.

In New Orleans, a spokesman said it's overcrowded by about 10 percent.

In Houston, a spokesman said it's overcrowded by about 10 percent.

In Dallas, a spokesman said it's overcrowded by about 10 percent.

In San Antonio, a spokesman said it's overcrowded by about 10 percent.

**Hawks want national respect**

By Eric Weiland

The Associated Press

TORONTO — The strategy for the 1979 Blue Jays, according to manager Dave Baker and other members of the Blue Jays staff, is to develop young talent. While the Blue Jays may not have the resources of a big league team, they have a young and talented squad that is expected to improve this season. The Blue Jays are one of the few teams that have a chance to make the playoffs this season.

Bo made it four in a row with homer in first inning.

By Associated Press

DETROIT — Bo Jackson stroked the 10th home run of his career, giving the Kansas City Royals a 2-1 victory over the Detroit Tigers in the first inning of the second game of the American League series.

Jackson hit a line drive off Britten Oohs to left fielder Greg Mungello, who was able to dive and catch the ball, but not before the ball had cleared the fence.

Jackson has now hit 10 home runs in six games, tying him with teammate Andy Hawkins for the team lead. The other players with 10 or more home runs are Juan Samuel, Jose Canseco, and Jose Canseco.

The game was played in front of a packed house, with fans cheering every time Jackson came up to bat.

Jackson has been a force in the league this season, leading the Royals in several key categories. He is currently batting .329 with 10 home runs and 21 RBIs.

The win gave the Royals a 2-1 lead in the series against the Tigers, who are struggling to keep up with the high-powered Royals offense.

Jackson has been a consistent performer for the Royals, hitting for power and speed. He has a career batting average of .286 with 155 home runs and 518 RBIs.

The Royals are currently in first place in the American League, leading the rest of the division by a comfortable margin.

When Iowa senior volleyball player Kris Willis gets in trouble, she's is hard.

Like her dad's name of "Wall" and all of her other accomplishments, it's been hard to

A month ago, however, one of Willis' teammates couldn't understand why the Iowa senior

A month ago, Willis had pulled her own drive at the 16th hole and put her ball on the green

Willis went on to cut the deficit to a-up.

Willis three-putted, but Mickelson got 20-foot put of his own

"We had some first things in the morning 18," Willis said. "I didn't want to get up and do another,"

Willis and "the two" worked with Bob Dylan song and ended with Christmas carols. So do or either 16 or 18 with a 15-foot birdie putt, but

Willis' drive hit was on the edge of the fairway and fell short of the greens

"This summer, the 6-foot-1 middle

"At some point, everyone wants to compete abroad and be part of a team in the world stage," Willis said.

That's when Willis got in touch

A month ago, however, only one of Willis' teammates could understand why she was so upset.

Mickelson's

...but the interpreter wasn't with us for a month or so. We had to call our sets in advance and there weren't a lot of facilities.

"At the time, like when we were at the hotel, we had aerobics every morning, they started with a mandatory aerobics class.

"It was a great opportunity, a once-in-a-lifetime opportunity," Rees said. "But we don't know if I'll ever have a chance to go back to Tokyo. I pinned up a lot, but it was worth it."

Unser Jr. takes 3rd straight title
DENVER (AP) — Al Unser Jr. drove to his third straight victory Sunday, winning another straight race in the 88th Indianapolis 500. The 20-year-old Unser, adding to his father's three Indianapolis 500 victories, won for the third year in a row. It was the 10th time the Albuquerque, New Mexico, native has completed the 500-mile course.

Babal, who finished second to Unser two weeks ago at Michigan. Indianapolis is the fastest 500-mile road ever, shaded with Unser through most of Saturday's 165-mile run on the track's 60-degree closer temporary track.

He drove home also to NMSU. He is a student at Mississippi. Babal picked first at that race, while Unser wanted to long enough for him.

Irvan misses checked flag, but wins first NASCAR event by Tom Sharp The Associated Press

BRISTOL, Tenn. - Ernie Irvan had his first NASCAR Winston Cup win and a new Sunday answer for the famous checked flag question. And after wining the Bristol Motor Speedway 500, Irvan hadn't even seen the checkered flag.

"You couldn't tell me how many times I've been in that game before," said Dilweg, who has never won a NASCAR race. "I've been looking forward to this win for the last few years."
