UI health official defends incinerator

Tour provides information, chance to refute complaints

Having decided it was not about dou- 

trees, the UI health official, in his report to the public, explained that the project was for a valid reason. The official asserted, "I gave you a stack of information on the health benefits of burning trash." He further stated, "Our goal is to provide a safe and healthy environment for our community." The official emphasized that the incinerator would not be a detriment to the community, and he encouraged the public to visit the site and learn more about the benefits.

Top economists believe U.S. has skidded into recession

By John B. Dales

The Associated Press

WASHINGTON — Three out of four of the nation's top economic analysts believe the U.S. economy has skidded into a recession, and that the economy will not recover until the spring of 1980. The economists believe that the unemployment rate will rise to 9.5 percent by the end of the year and that the inflation rate will remain high.

"We think that the recession will begin in the fourth quarter and that the (Persian Gulf) oil price shock played a major role in ending the expansion," Richard J. McKee, senior vice president of the American Economic Association, said in a statement. "We are concerned that the economy will not recover until the spring of 1980, and we expect the unemployment rate to rise to 9.5 percent by the end of the year."
Women's society formed

By Leslie Davis
Special to The Daily town

The women, who are part of the UM campus, now have something to call their own. The women of the Advance of a Society Group of the Women, a group of senior English major from Gary, have just founded a center. The center, located at 1111 Main St., was recently opened to the community.

"Our goal is to encourage the women to have an unlimited goal," said Rodolfo Rodriguez, the Black Student Union and group president. "We are providing the women an opportunity to be a part of the community.

"Through our discussions and presentations, we aim to empower women, model ourselves, and how to alter." African-American women in Iowa City and nationally. One of the main goals of the group is to attack the increasing number of domestic violence incidents and to empower the women.

Speaker: Ethanol has a lot to offer; SIU seminar highlights many benefits

By Chris Polotsky

Urban air pollution, global warming and alternative international trade could be improved with a group of interesting new technologies. The seminar, titled "Ethanol and Railroad Forts," was presented by the Laboratory of Alcohol Products in the U.S. Department of Energy. Lindahl discussed the advantages of using ethanol as a clean fuel.

"Ethanol has many benefits," said Lindahl. "It is a clean fuel that can be produced from a variety of feedstocks, including corn, sugar, and even waste products." Lindahl also discussed the environmental impact of ethanol production.

"Ethanol production has a low carbon footprint," said Lindahl. "It is a clean fuel that can be produced from a variety of feedstocks, including corn, sugar, and even waste products." Lindahl also discussed the environmental impact of ethanol production.

Incinerator

In his barns were sodium and aluminum, in the building that became the incinerator. The incinerator is a significant waste facility. The incinerator is the subject of current debate because of its toxic emissions and its contribution to local and regional air pollution. The incinerator is located in an environmentally sensitive area.

Twaler said that the incinerator is a key component of the facility's waste management system. The incinerator is a large, open-burner incinerator with a capacity of 200 tons per day. The incinerator is used to burn a variety of waste materials, including municipal solid waste, industrial waste, and hazardous waste.

The incinerator is equipped with state-of-the-art pollution control equipment, including stack gas cleaning systems and scrubbers. The incinerator is designed to meet all federal and state regulations for air emissions.

Twaler said that the incinerator is a critical component of the facility's waste management system. The incinerator is used to burn a variety of waste materials, including municipal solid waste, industrial waste, and hazardous waste.

Regulator gives S&L testimony

By Larry Margese
The Associated Press

WASHINGTON — A former top federal regulator testified Tuesday that he ordered DeConcini to attend

a two-day meeting Wednesday to discuss settlement of savings and loan seizure charges. Later, Senate Majority Leader Robert Dole of Kansas, one of the leading Republican Congressmen, said his staff was informed that the meeting "is a major event in our history."

The committee is currently considering legislation to reform the nation's savings and loan industry.

DeConcini, the Senate Commerce Committee chairman, said he heard the testimony of DeConcini and Sen. John McCain, R-Ariz., before testifying at the hearing.

Sen. Daniel K. Inouye, D-Hawaii, the committee's ranking member, said the hearing is a "big event in our history." He added that DeConcini "is a man of deep conviction and integrity."
None of the mayhem the fazes the seemingly omnipotent Predator, which can turn invisible at will, leap from skyscraper to skyscraper and which, Transformer-like, can create a transplanted the killer to a new area or a new body. But it's just collecting trophies. The Predator is simply a new kind of thriller, a sort of monstrous film noir, a study in the psychological Achilles' heel a villain can have. (It's as though we're watching a madman kill for the hell of it, not for any deeper reason.) The Predator is played by a Jamaican drug lord, a figure out what they're dealing with. The film includes "Lethal Weapon." The new Los Angeles, which has well-armed mutual.
**CAPITAL PUNISHMENT**

The real debate

In recent weeks, pressure to reserve capital punishment in India has mounted, even as the country's judiciary begins to brazenly ignore the intentions of the Founding Fathers. While the debate has been heated and often polarizing, a number of points have been made in favor of and against the use of capital punishment. A number of individuals have argued that the debate is misplaced, as it fails to address the root causes of crime and punishment.

**Academic interest**

Mr. Walters asks what "animal rights," says Michael Blanchard of World Wildlife Fund: "We know that the vast majority of people in my apartment are in favor of animal rights, and I wish to express my views on behalf of all of them."

**Premature praise for new divorce laws**

In the dark ages of marriage, a husband who wanted to get rid of his wife had to seek the permission of his father and the approbation of the local clergy. But that was before civil marriages introduced divorce, which gave the wife standing as a person and removed the ultimate suffering from her.

Bush, Salinas forge new agreements, continue to work on free-trade pact

In a key agreement, the pair reached a U.S.-Mexican understandings on trade over the question of whether Mexico's oil industry should be open to U.S. or other foreign investment. Salinas has long argued that the industry should be exempt from the free-trade talks. Treasury Secretary Nicholas Brady told reporters here that the dispute has been mastered by an agreement to place an Export-Import Bank funds for drilling and exploration equipment in Mexico. Under such an arrangement, U.S. companies would work with Mexican counterparts in finding oil. The Export-Import Bank is an independent U.S. government agency. Brady said that "The first time we will be welcome and sought after with regard to drilling and other supplies in the Mexican oil fields." Brady said the agreement will continue to prohibit U.S. companies from owning direct interests in Mexican production. But he added, "We have agreed that this point will not press for that." The two presidents also recognized that both governments would work toward opening more U.S.-Mexican oil-points-of-entry to ease movement in crossing points and to make it easier for access to American and Mexican supplies to move across borders. 

President George Bush and Mexican President Carlos Salinas de Gortari share a laugh Tuesday during a breakfast meeting in Monterrey. The two leaders met for two days of discussions primarily on creating a free-trade pact between Mexico and the United States.

NBA finally gets livable loser factor

When David Stern took over in 1984, it was a time of turmoil and triumph for the NBA. The league had not seen an almost perfect product to appeal to the average American athlete. The teams were not as powerful as they are today, and the NBA was in need of a leader to guide it towards success.

By Erica Weland

This year’s 12 teams

The 1980s were a time of growth and change for the NBA. The league was expanding and modernizing, and the teams were beginning to attract more fans. The NBA had a new commissioner, David Stern, who was determined to bring the league to new heights.

Tamara McKinney, who has been named the 1990 Domino's Pizza Woman of the Year, has announced her resignation from the Dallas Cowboys.

McKinney, a 1983 World Cup winner with the United States women's soccer team, said she was leaving to pursue other interests.

"I believe that now is the right time for me," McKinney said in a statement. "I have been fortunate to have spent the past three years with the Dallas Cowboys and I thank them for their support and guidance."

McKinney, a midfielder for the United States women's team, was a member of the 1983 World Cup championship team.

She has also been involved in community service work, including serving as the 1990 Domino's Pizza Woman of the Year.

McKinney was a key player on the United States women's team, which won the World Cup in 1991. She was also a member of the United States Olympic women's soccer team in 1996.

McKinney is the first woman to be named the Domino's Pizza Woman of the Year.

She replaces the 1989 Domino's Pizza Woman of the Year, Deidre Hall, who retired in January after a 20-year career with the company.

The Domino's Pizza Woman of the Year is selected from a pool of nominees chosen by the company's franchisees, employees, and customers.
Unbeaten down, big game diminished

By Dave Goldburg
The Associated Press

Duane Brown was the first to talk. He put the Pflugerville Black Panthers in perspective.

"Nobody expected we'd have been in this," the Panthers' quarterback said Wednesday night after laboring to a 39-33 victory over Cooper.

"We didn't think we'd be here," added Brown, a 15-year-old.

The Panthers, who finished 10-2, include a 7-1-1 record against teams that reached the final four.

LSU Gets Curley from Southern Mississippi

By John Jerry
The Associated Press

LSU has hired Curley Hallman as its new head football coach, the school announced Thursday.

Hallman, who led Southern Mississippi to a 23-11 record in his six years, replaces Mike Archer, who resigned earlier this month.

"I'm happy. I'm excited. I hope to coach for a long, long time," Hallman said.

The move came after LSU officials met with Hallman at Southern Mississippi on Wednesday.

Curley Hallman's departure from Southern Mississippi was announced Thursday, and LSU has hired him as its new head coach.

Hallman, who led Southern Mississippi to a 23-11 record in his six years, replaces Mike Archer, who resigned earlier this month.

"I'm happy. I'm excited. I hope to coach for a long, long time," Hallman said.

Now we all know it's true — scandal brings down Vanilli

By Jennifer Wiegand

Y

ou are on the road to nowhere; the scenery is not even worth remembering. Part of the problem is that the road you and Vanilli are traveling down is so smooth. You are in the middle of nowhere. A dull, endless stretch of gray.

You are in the middle of nowhere. You are in the middle of nowhere. You are in the middle of nowhere.

The King of Waldorf Tanks, Vanilli, is a phenomenon. But it's not the kind of phenomenon that you would want to be associated with. He is the laughing stock of the music world.

You are in the middle of nowhere.

It's not the end of the world, but it is a little painful. As a producer — like Frank Zappa, who ran on that same Ronald Reagan bandwagon — you have to wonder if the media is the thing that's causing the singing. Hourly, choicest phrases are broadcasted in a way that makes one state the use of bookings tapes, as a

POM POM AND CHEERLEADING WORKSHOP

The University of Iowa Cheerleading and Pom Pom Squad will be holding workshops for all interested students, whether you're thinking about trying out this Spring, or if you just want to know more about the programs. These workshops should be a lot of fun as well as educational. We'll be demonstrating tumbling, jumping techniques and basic dance. If you're a Hawkeye fan, stop by and give it a try.

LOCATION: Carver-Hawkeye Arena

(Next Entrance)

TIME: 7:00pm-9:00pm

OPEN TO ALL UNIVERSITY STUDENTS
