By Victoria Graham

**UNITED NATIONS** — The U.N.'s grim annual estimate of how many new cases of HIV and AIDS are showing up worldwide was released here today, with figures showing that the global spread of the disease is increasing faster than ever before. This is the first time the new estimate has risen for two years in a row.

The report, which was issued by the U.N.'s Joint Programme on HIV/AIDS, says that 2.2 million new cases of HIV and AIDS were diagnosed worldwide last year, up from 2.1 million in 1997. The number of deaths from AIDS also rose slightly, to 1.9 million from 1.8 million.

The report also notes that the number of new cases in the United States and Canada has increased by 16% since 1997, with the highest number of new cases occurring among women and girls aged 15 to 24 years.

At the same time, the report says that the number of new cases among women and girls in sub-Saharan Africa, which has been on the rise for several years, has slowed down. However, the report notes that the number of new cases among men in the region remains high.

The report also highlights the increasing number of new cases among injecting drug users, and the need for more effective treatments and prevention programs for this population.

The U.N.'s chief AIDS envoy, John摆在, said the report is a stark reminder of the immense challenge facing the global community in the fight against HIV and AIDS.

"The epidemic continues to grow in every region of the world," he said. "We must redouble our efforts to prevent new infections, provide treatment to those who need it, and support those affected by the disease."
Farm group: Risk exists for all-out trade war

By Bonnie P. Noseworthy

The American Association of University Professors, warning that it is "the head of Iowa's largest farm group," moved Thursday to warn the Iowa legislature of the "risky" risk of an all-out trade war.

The committee cut out the Iowa Farm Bureau Federation, which in turn warned about the implications of the "risky" risk.

World AIDS Awareness Day is Saturday

Emphasis to be on women with HIV/AIDS

By Mike Glover
The Associated Press

SIOUX FALLS (AP) - The spread of AIDS doesn't adequately represent the actual number of people who carry the AIDS virus, since it can lie dormant in the body while carriers spread it to their sexual partners.

The number of infected people is even larger than official figures indicate because the AIDS epidemic is how it is spread, not how it is diagnosed. The vast majority of infected people, like 80 percent of a million people worldwide are infected with the disease, are asymptomatic, and more than 100,000 of those people will die of AIDS before they even know they have the disease.

The number of women who will contract HIV/AIDS in the next few years is expected to be larger than the number of men infected during the past decade.

"AIDS is now one of the leading causes of death in women of childbearing age," said Jane Ginsberg, assistant director of the U.S. Hospital Inpatient Unit.

"The number of children who will continue to increase even if we manage to prevent the spread of AIDS among women of childbearing age," she added.

Linda Fowler, media coordinator for the University of Iowa, Iowa, Division, said the number of women who will die of AIDS in 1984. This year, there are 22.5 million women worldwide who are married, and the number of women who will die of AIDS is expected to be larger than the number of men who will die of AIDS during the past decade.

The Spread of AIDS

AIDS (Acquired Immune Deficiency Syndrome) is a fatal disease caused by a virus known as HIV. AIDS can be passed during sexual contact, vaginal or anal sex, needle or intravenous drug use, or through infected blood and syringes or contaminated needle sticks.

AIDS Information

The National AIDS Hotline provides U.S. Public Health Service information on AIDS. The call is free and you do not have to give your name. The hotline offers 24-hour service to answer questions you may have about the disease, including:

the location of AIDS counseling and testing centers near Iowa City that provide confidential or anonymous services.

the care of the HIV-positive patient.

Area groups organize for holiday charity work

By Harold Smith
The Cyan House

Area businesses, agencies, churches, and service groups are pulling together to assist needy families during the holiday season.

Project Holiday, sponsored by the West, is a coordinated effort between local groups to make the season as enjoyable for the less fortunate by providing gifts and food through a local fundraising drive.

Gift trees will be placed in local businesses, groups and churches. Cards representing the wishes of children will be donated to the tree by local families. Gifts can then be picked up off the tree by parents at their convenience.

Several of the forms the forms have been created by area arts and crafts organizations, assisted by gifts and charitable acts from community groups. Some families will also be assisted by gifts of clothing, toys and other gifts.

The theme for this year's Project Holiday, is "Love from the Heart." Gifts will be distributed through a number of agencies, including the United Way, the Salvation Army, and local churches.

UI looks at evaluating student learning

By Jennifer Hourihan
The Daily Iowan

Finding out what students have learned in their first, few or all years of college is a new program being considered by the UI and the State Regents.

Borrowing student performance and monitoring an institution’s effectiveness — called student outcomes assessment — has become a trend in universities and colleges, said Elizabeth Nathan, associate professor of pharmacy in the UI College of Pharmacy.

In Nov. 13 meeting, Nathan told the Faculty Council that the Board of Regents, state legislators and the governor were requesting the university to develop a new program to demonstrate accountability for the UI’s educational mission.

"It allows us in document that we’re doing a good job or you’re doing a good one," he said.

Nathan said he hopes the program shows student outcomes assessment is a trend in higher education and that the UI is on the cutting edge of the trend.

A committee of representatives from the UI, the University of Northern Iowa and Iowa State University was formed to look into the student outcomes assessment.

UI Acting Faculty Senate Chairperson Elizabeth Cleary, associate professor of English, said the committee is reviewing the existing assessment programs.

"All of us are involved in evaluation of what we do. It’s a non-stop process," Cleary said. "It’s of us to be always evaluating."

Nathan said he hopes the program shows student outcomes assessment is a trend in higher education and that the UI is on the cutting edge of the trend.

The faculty council and the UI Senate passed a resolution that the UI, the state of Iowa and the University of Iowa were committed to the new program.

"The council supports the creation of the new program to demonstrate accountability for the UI’s educational mission," the resolution reads.

The resolution also says the council would like to see the new program begin sometime next fall.

"The UI needs to lead in creating a system of accountability for the educational mission," Nathan said.

"And if we don’t, we will be left behind," Nathan said. "We need to lead in the creation of the new program."
Fired policeman denied jobless benefits

By Mike Glover  
The Associated Press  

DES MOINES — A former policeman who threatened a prosecutor with a gun and lied about his employment benefits, the Iowa Court of Appeals ruled Thursday.

The court said Jesse Guerra, who had been a police officer in Des Moines for eight years, also had lied to the state on his jobless benefits application and had consisted a woman that he was living with a married woman and had falsely claimed that a worker suffered from AIDS. The court upheld the lower court's denial of jobless benefits in Guerra's appeal.

The court upheld the lower court's denial of jobless benefits in Guerra's appeal.

Under unemployment insurance laws, benefits can be denied to anyone who is dishonest in filing an application or who hides information, the appeals court ruled. Guerra, who was convicted of the three incidents, is responsible for preparing and presenting a claim that is not bona fide.
Court decides not to reinstate guard

By Mike Glover
The Associated Press

DIAN MONEH - The Iowa Court of Appeals on Thursday refused to reinstate a Waterloo airport guard who claimed his employer told him to take security checks to avoid flights.

Rome Hofmann said the city and airlines that employed him decided to fire him to reduce Federal Aviation Administration fines. The airport's security guard said the FAA reimbursed it $16,000 to work a simulated pipe bomb through the airport's X-ray machine.

Hofmann had no security equipment at the Waterloo Municipal Airport when the FAA conducted a 1988 security check by sending a simulated pipe bomb in a case with the lead safety irregularities to the promotion of air travel.

The court said the case would have been stronger had Hofmann been fired for refusing to take the security checks.

"I'm just wondering why there were no other cases of the same situation," Judge Steven Van Schaik said in his opinion.

The court ruled that the FAA and the city do not have a case of misapplication of the law.

Hofmann's attorneys say there are other cases where the FAA did not have a case of the same situation.

Bush signs bill to allow increase in immigration

By Rita Beausoleil

The Washington Post

WASHINGTO~—President Bush on Wednesday approved a bill that would allow up to 2 million more people to immigrate to the United States, the most significant enrollment of new immigrants since the end of the Vietnam war.

The bill, which Bush signed into law at the White House, would allow up to 50,000 visas a year for family members of U.S. citizens and permanent residents. It also would allow up to 100,000 visas a year for skilled workers, graduate students and others who would fill a labor shortage.

The legislation, which was passed by Congress in November, represents a significant change in immigration policy. It was supported by both parties and was signed into law by the president.

The bill would also allow up to 60,000 visas a year for unskilled workers seeking employment in the United States. It would also create a new category of visa for individuals who have been persecuted for their political beliefs.

The legislation was hailed by many as a significant step forward in American immigration policy. It was signed into law by the president as part of a broader deal with Congress on immigration reform.

The legislation was supported by both Republicans and Democrats and was passed unanimously by the Senate.

Soviet Union faces serious food shortage

By Alan Cooperman

WASHINGTON John D. Bolling, an economist with the Federal Reserve Bank of New York, said that the Soviet Union faces a serious food shortage this winter and early next year as a result of a decline in food consumption.

Bolling, who has been following the Soviet economy closely, said that the Soviet Union is facing a serious food shortage this winter and early next year as a result of a decline in food consumption.

He linked the decline in food consumption to the economic weakness of the Soviet Union, which has been experiencing a slowdown in recent months.

Bolling said that the Soviet Union's economic weakness is likely to continue into next year, as the country is facing a number of challenges, including the need to increase food production and the need to increase economic growth.

He also said that the Soviet Union's food shortages are likely to have a significant impact on the country's economy, as food is a major component of the Soviet Union's GDP.

Musical detective work inspires duo of lutists
By Jennifer Weglarz
The Daily

In Iowa City it is a rare occasion when more than one musical tradition can be heard at the same time. But when the work of a pair of Renaissance and Baroque music specialists will join in a concert on the stage at the University of Iowa's Music Building, it will be an occasion to be treasured.

The duo, Lute Players, consists of Oleg Timofeyev and Greg Blackburn, who have been playing together since 1985. They met while working on a project to recreate the lute music of the 16th and 17th centuries. Since then, they have performed together in concerts and recordings, and have developed a unique style of playing that is both technically demanding and musically rewarding.

Their concert will feature music from the 16th and 17th centuries, including works by composers such as Orlando di Lasso, Hieronymus Praetorius, and Girolamo Frescobaldi. The program will also include some of their own compositions, which showcase their creativity and technical skill.

The concert is part of the university's Arts and Entertainment series, and will be held in the University of Iowa's Music Building at 7:30 p.m. on Friday, November 30. Tickets are available at the door for $20, or $10 for students with ID.

Lute players Oleg Timofeyev and Greg Blackburn, who will perform tonight in the UI Music Building.

CLOSE-UP: CASUALTIES OF WAR

February

By Lindsey Allen

The Daily

R ight now, the word "war" is shorthand for the battle between good and evil, right and wrong. It is a battle that has been raging since the dawn of time. But what happens when that battle becomes more than just a battle of good versus evil? What happens when it becomes a battle of men against men, of brother against brother? This is the question that drives the plot of the film "Casualties of War.

Directed by Lewis Milestone, the film is a powerful and thought-provoking exploration of the human cost of war. It tells the story of a group of young men who are drafted into the army during the Vietnam War. These men come from different backgrounds and have different goals, but they are all united in their desire to survive.

The film opens with a scene of a group of young men standing in the rain, waiting to be drafted. They are all dressed in their best clothes, and they are all filled with a sense of excitement and anticipation. But as the days pass, the reality of war begins to set in. The men are sent to Vietnam, where they are forced to fight a war that they do not understand.

As the film progresses, the men begin to realize that they are fighting for something that is not worth fighting for. They begin to question whether it is worth sacrificing their lives for a cause that is not worth fighting for. They begin to question whether it is worth sacrificing their lives for a cause that is not worth fighting for.

In the end, the film is a powerful reminder of the cost of war. It is a reminder that war is not just a battle of good versus evil. It is a battle of men against men, of brother against brother. It is a battle that has been raging since the dawn of time, and it is a battle that will continue to rage until we learn to live in peace.
Old Gold Singers continue tradition

By Michael Williams

While all that glitter may not be gold, the Old Gold Chorus at the University of Iowa may possibly be. The group has recently added two more performers to their ranks, bringing the total number of infantry to the already-excellent group. The Old Gold Singers, who have brought a fresh, vibrant sound to the University of Iowa, will perform this weekend at Hancher Auditorium. Those interested in attending the performances are encouraged to come and witness the excellence of the group's rendition.

Music

"I think we are doing things that a few little bit more interesting," says the chorus director. She adds that the group is currently preparing for the upcoming concert, which includes a variety of classic and contemporary pieces.

Old Gold Singers continue tradition

In addition to being one of the top performing groups in the United States, Old Gold has become known for their innovative and engaging performances. The group's repertoire includes a wide range of music genres, from classical to contemporary, ensuring that there is something for everyone.

One of the new "additions" to the Old Gold repertoire is actually quite old. "We've researched the University of Iowa Alumni," the director of the group, "and we have found that there is a huge number of alumni who are interested in our performances."

The Old Gold Singers' performances are known for their high level of professionalism and attention to detail. The group is well-known for their ability to captivate audiences with their harmonious singing and engaging performances.

Desert dance

U-danced Marc Binkard and Monica Grider in a scene from Lezlie Fields' "Desert Sun," one of several pieces in a concert of new student choreography to be given Friday and Saturday, Nov. 20 and Dec. 1, in the Space/Peace Theatre in North Hall. Admission to the concert is free.

Concert to include original works

The Daily Iowan

The University of Iowa Dance Ensemble will present a free concert at 8 p.m. Friday, Nov. 6, in the Old Gold Band Hall.

The program produced by UI Director of Dance Myron wall, will feature new works for concert and stage, as well as old favorites. The concert will feature an ensemble of dancers performing in various settings.

Concert to include original works

The concert will open with the "Columbus Overpass" of American composer William Schuman. Originally written for orchestra, the work features a driving rhythm, with the old Gold choir. The concert will also feature the "Circus Overture" of the German composer Richard Strauss.

The Daily Iowan
Almost every public institution of higher learning claims to have a large number of good instructors on its faculty. Primacy is somewhat difficult to evaluate. The criteria defining good instructors are not agreed upon nor easy to assess. Since many instructors do not publish or do not attend educational conferences, it might appear that the quality of professors is not possible to determine. Even if publication and participation in professional meetings are important criteria, they are not always available. In fact, many instructors who do not publish or attend meetings are still considered good instructors. The quality of instructors is a very individualistic subject. Some instructors are

City tries orange extract to mask sewage

LYNN, Mass.--The stench from a sewage dump here is so foul that officials tried to mask it with orange-scented Yardley soap. But when they added the scented scent, they might even have come closer to the odor than before. "It's strong, it's a novel idea, and it's a novel approach," said John Casey, executive director of the Lynn Water and Sewer Commission. "Right now, it's the least bad approach."

The problem arose last week after workers started dumping a small load of orange-scented Yardley soap at the landfill. The stench is coming from an incinera-

ator at the landfill. The odor is coming from one of the new sewage treatment plants on the site. The smell is not unusual, Casey said, and it is not unusual for the smell to change. The smell will continue to change, he said, until the plant is completely overhauled.

"It's not a pleasant smell," Casey said. "It wouldn't meet my standards. We're all on it with this." Casey said he was hopeful the smell will be reduced over time.

The smell has caused considerable concern among nearby residents. Some have complained about the smell, and others have complained about the smell's effect on the environment. Casey said he was hopeful the smell will be reduced over time.

Keller rewards attentive college class

GRAND FORKS, N.D.--Arthur Girman Keller has an English class at the University of North Dakota in Grand Forks. Keller rewarded his attentive students by giving them a cup of tea.

Keller thanked the class with a box of tea and cake. Keller praised his students, saying they were "very attentive" and "very good." Keller said he was happy with his students and enjoyed teaching them.

"It's not a pleasant smell," Casey said. "It wouldn't meet my standards. We're all on it with this." Casey said he was hopeful the smell will be reduced over time.

The smell has caused considerable concern among nearby residents. Some have complained about the smell, and others have complained about the smell's effect on the environment. Casey said he was hopeful the smell will be reduced over time.

Free ticket lure brings in criminals

BURLINGTON, Vt.--Police said they caught the crooks in a "cute" car that contained about 250 top-quality cigarettes in making their drug bust.

Police Chief Arthur DuBois said people wanted for crimes including robbery and drug dealing were apprehended when they showed up for a "cute" party. This arrest was the result of a drug bust.

"It seems to be a new tool," he said. "We're not sure if it will work." Casey said he was hopeful the smell will be reduced over time.

"It's not a pleasant smell," Casey said. "It wouldn't meet my standards. We're all on it with this." Casey said he was hopeful the smell will be reduced over time.

Gary Franks, a black Republican, has said he was told by his doctors during his tour of duty in Vietnam that he may have been a genetic carrier of the p53 gene, a gene that can lead to a high rate of cancer. Franks' doctors found that he had a mutated form of the p53 gene, which can lead to a high risk of cancer.

Researchers have found that the p53 gene is responsible for about 40% of all cancer cases. The gene is responsible for keeping cells from dividing uncontrollably, and mutations in the gene can lead to cancer.

In a study published in the journal *Science*, researchers found that people who have a mutated form of the p53 gene are more likely to develop cancer than those who do not. The study found that people with a mutated p53 gene have a 40% higher risk of developing cancer than those without the mutation.

Researchers believe that the p53 gene is a key player in the development of cancer, and that understanding its role could help in the development of new cancer-fighting drugs.

Franks' case is significant because it highlights the importance of genetic testing and the potential for genetic counseling to help people understand their risk of developing cancer.

But there is still much to learn about the p53 gene and its role in cancer. Further research is needed to fully understand the complex relationship between the p53 gene and cancer, and to develop effective ways to prevent and treat cancer.

Franks' story is a reminder that cancer is not just a medical issue, but also a social and economic one. People who have a higher risk of developing cancer may face financial, social, and emotional challenges as they cope with the disease.

Researchers are working to develop new ways to help people understand their risk of developing cancer, and to develop effective ways to prevent and treat cancer. But there is still much work to be done.

In the meantime, people who have a higher risk of developing cancer should talk to their doctors about their risk and what steps they can take to reduce their risk.

Franks' story is a reminder that cancer is a complex issue, and that we need to continue to work together to find new ways to prevent and treat cancer.
Hawkeyes cruise to easy wins in WIVC pool

By Brian Gaul

The Iowa volleyball team made short work of the American River College Bees on Friday, winning in straight sets to improve to 11-4 overall and 8-0 in the ACC.

The Hawkeyes took the first two sets in the conference match, winning 25-12, 25-8, before closing out the match with a 25-13 victory in the third set.

Iowa head coach Steve Aird said the team's focus was on execution and communication, which they showcased throughout the match.

Individual standout performances included outside hitter Megan Mott, who recorded 12 kills and a .368 hitting percentage, and middle blocker Bailey Day, who had nine kills and three blocks.

The victory extended Iowa's winning streak to eight matches, the longest in the ACC, and solidified their status as one of the conference's top teams.

Hawks top UCCON on road, 58-41

By Brian Gaul

The daily WOU

Jackson State's win over Arkansas-Pine Bluff on Saturday kept the Jackson State women's basketball team undefeated in league play this season, as they improved to 13-5 overall and 5-0 in the SWAC.

The Lady Bulldogs took down the Golden Lions 89-84, with a strong effort from senior guard Javonte Burton, who scored 30 points on 12-of-20 shooting.

This win is the third in a row for Jackson State, and they'll look to extend their streak when they face Grambling State University next.

Grapplers head East to face ranked opponents

By Jay Hende

The Daily Iowa

The University of Iowa men's wrestling team traveled to Iowa City on Saturday to compete against the University of Wisconsin-Madison and the University of Minnesota. The Hawkeyes emerged victorious in both matches, improving their overall record to 12-1.

In the dual against Wisconsin, the Hawkeyes won all six matches contested, with the closest score being 4-1. The team secured their victory with a 17-15 decision in the 197-pound weight class.

Against Minnesota, the Hawkeyes won five of the six matches, with the only loss coming in the 149-pound weight class. The Hawkeyes won the dual 26-13.

The Hawkeyes will now prepare for their upcoming meet against Ohio State on Sunday. The Buckeyes are currently ranked No. 4 in the country and will provide a tough test for the Hawkeyes as they look to maintain their perfect dual meet record.

Amana Hawkeye Classic

By Erica Weiland

The Daily Iowan

The Case Study: Dally

There's no truth to the rumor that the Hawkeyes are considering returning to the Big Ten Conference.

However, the team is preparing for a tough weekend, as they face off against Penn State and Ohio State, two of the conference's top teams.

The Hawkeyes are currently sitting at 3-2 in conference play, but are looking to improve their record as they enter the second half of the season.

Davine expects tough Amana Classic field

By Erica Weiland

The Daily Iowan

The Case Study: Dally

The Amana Hawkeye Classic is one of the biggest meets of the season for the Hawkeyes, as they face off against some of the top teams in the country.

The meet is scheduled for Friday and Saturday, and is always a strong test for the Hawkeyes as they prepare for the NCAA Championships.

The Hawkeyes are coming off a strong performance at the Big Ten Championships, where they finished in third place.

The meet features 10 NCAA teams and 44 individuals, with 14 of those individuals representing either the Hawkeyes or the Cornell Big Red.

Fred Davis is one of the top individuals in the field, as he is currently ranked No. 2 in the nation at 125 pounds.

The meet is always a strong test for the Hawkeyes, and they will look to secure another top-three finish as they prepare for the NCAA Championships.

Hawks/Keyes augur well for Hawkeyes in ACC match

By Jay Hende

The Iowa Hawkeyes men's basketball team opened ACC play with a 79-64 win over Boston College on Saturday. The victory marked the 11th straight season the Hawkeyes have started ACC play with a win.

The Hawkeyes were led by senior guard Jordan Bohannon, who scored 15 points and dished out five assists.

Iowa guard Jordan Bohannon was named the ACC Player of the Week for his performance against Boston College. Bohannon scored 15 points and dished out five assists in the victory.

The Hawkeyes will look to continue their ACC dominance as they face off against Virginia Tech on Wednesday. The Hokies are currently ranked No. 25 in the country and will provide a tough test for the Hawkeyes.

The Hawkeyes are currently sitting at 12-4 overall and 3-0 in conference play, and are looking to extend their winning streak as they enter the second half of the season.

NCAA lets UNLV off — for now

Robert Maxson, the NCAA's deputy executive director, announced last week that the university had been granted a one-year reprieve from penalties.

Maxson said that the NCAA had decided to allow UNLV to participate in the 1991-92 season but would have to follow the rules until the completion of the 1992-93 season.

The NCAA has been investigating the UNLV basketball program for alleged violations of the NCAA rules.

UNLV basketball coach Jerry Tarkanian, center, and his team will be allowed to defend their national championship this year after the school and the NCAA agreed to postpone the season post-season penalty until the 1992-93 season.

“Let’s put these matters behind us and look to the season ahead and defending our championship.”

Jerry Tarkanian

UNLV basketball coach

Tarkanian emphasized he would do what he had to do in his kids play in the tournament. I give 100 percent of the credit. “

The school served the probation, placed UNLV on probation for two years and was placed on probation for two years.

The school was placed on probation for two years.

UNLV basketball coach Jerry Tarkanian, center, and his team will be allowed to defend their national championship this year after the school and the NCAA agreed to postpone the season post-season penalty until the 1992-93 season.

Maxson noted the NCAA gave the school until the conclusion of the 1991-92 season to accept its penalty. He said the school was granted a one-year reprieve from penalties.
