Poet Oates reads work at UI hall

By Gabrielle Wolfsberg

She was standing right in front of me, in the middle of the room. I had not known her, but she was the embodiment of that place, and she was speaking to me. It was a powerful experience to be in the presence of such a great writer.

A young Kurdish refugee is being eaten by a wolf in Turkey to escape persecution in Iraq.

Rebels report Iraq attacking fleeing Kurds

Foreign aid groups send food to refugees at northern border

By G.G. LeBlanc

The Associated Press

JORDAN, Iraq — Iraqis fighting against Kurdish rebels threw devices into an Iraqi camp for Kurdish refugees today, killing at least one person and wounding several, Kurdish officials said.

The attack was the latest in a series of incidents in which Iraqi Kurds have been killed or injured.

Kurdish officials said the attack was carried out by forces loyal to Saddam Hussein.

"The调动 is a known factor, but the Kurdish movement needs the support of the international community," said a representative of the Kurdistan Workers’ Party.

"We need the international community to support us in our fight against the regime, and we need to be assured that our demands will be heard and respected," he added.

Truck leaks farm herbicide in Corvalis

By Helen Hackman

The Daily Iowan

A chemical spill in Corvalis Mon. led to the temporary evacuation of homes nearby and closure of schools.

The spill, which originated from a truck transporting herbicides, was contained at East Ninth and East Madison streets, according to police.

No injuries were reported, and the spill was considered to be a minor threat.

"The spill presented no risk to the public, and it was quickly contained," said Police Chief John Smith.

Refuse site found to have contaminated groundwater

By Marc Newhouse

The Daily Iowan

Officials have found that an old landfill near Iowa City has contaminated groundwater with hazardous chemicals.

The landfill, located near the University of Iowa, was closed in 1980.

"We are concerned about the impact on groundwater," said Environmental Protection Agency

The agency announced plans to investigate the site and determine the extent of the contamination.

"We will work closely with the community to address this issue," said EPA Administrator Laura Hallman.

Former firefighter seeks reparation

By Laura Hallman

The Daily Iowan

A former firefighter has filed a lawsuit against the city of Iowa City, alleging that he was wrongly discharged.

"I was fired for a minor offense that should never have led to my termination," said the firefighter.

"I served my community for many years and I feel that I was treated unfairly," he added.

The case is currently being heard in court.

Local bar tried to serve beer

By Donald Hansen

Palmers will benefit from the Local Law Development Act, which could help local bars that serve alcohol. Palmers opened a few years ago and has become a popular spot for students and locals.

"We're grateful for the act," said owner Dave Palmers. "It's going to help us get our business back on track."

The act provides funding for local law enforcement and public safety initiatives. Palmers is planning to use some of the funds to upgrade their security system.

"We're really excited about it," said Palmers. "It's going to help us keep our bar a safe place for everyone."

Palmers is located at 123 Main St. and can be reached at 334-5555.

Local bar helps UI students try smoke-free atmosphere

By Lauren Selander

The Daily iowan

Patrons will breathe more easily tonight at the Coralville Yacht Club, 10 Linn St. As part of an UI program to help students give up smoking, the bar will go smoke-free from 6 p.m. to 2 a.m. Wednesdays.

The program was created by students Karen Costello and Michelle Lavelle. They went door-to-door in all four undergraduate colleges, explaining the program to students and leaving them pamphlets with the name, address and phone number of Coralville Yacht Club.

The club is one of 31 businesses that have agreed to be smoke-free for the next six months.

"It's a lot easier to quit when you can't smoke," said Lavelle, 20, an English major.

"I've heard that it's easier to quit when you're not around the smoke," said Costello, 20, a psychology major.

The key to the success of the program is having the students not smoke either, Lavelle said.

"We want to get the students motivated," Costello said.

The Coralville Yacht Club, which has 18 members, was a good place to try out the program, Lavelle said.

"It's a real social event and a good place where students will be," Costello said.

Lavelle said she hopes to have more businesses join the program.

"I think it will make a difference," she said.

Craig Schaefer, 20, a business major, said he is happy that the school is trying to help students quit smoking.

"I think it's a good idea," he said.

The program is part of a larger campaign to make all college campuses smoke-free.

"I think it's great," said Lauren Hallenbeck, 20, a nutrition major. "I think it should go on everywhere." 

"I think it's a great idea," said Lavelle.

Lavelle and Costello said they are proud of what they have accomplished.

"It's going to be hard to keep this program going," Costello said.

"But we're going to try," Lavelle said.

Poles visit Germany on 1st day of European travel freedom

By Larry Thome
The Associated Press

FRANKFURT, Germany - A banner over the airport welcoming Poles to Germany on Monday, their first day of European travel freedom. But 50,000 people were arrested in Germany, France, Belgium, Netherlands and Luxembourg. People were arrested in Germany, France, Belgium, Netherlands and Luxembourg. People were arrested in Germany, France, Belgium, Netherlands and Luxembourg.

Poles were greeted with 23 hours and 9 minutes of travel, then lowered into the cargo bay, then raised and freed using the robot arm, then rolled into orbit with more apace-walking time.

By having fun, astronauts really do see the world.
Paper/Fiber XIV at Art Center

By Thomas Allen Park

D espite the threadbare Dim Art title, "Paper/Fiber XIV" was an intriguing show of paper quilts and paintings and drawings that I was expecting, but a world-drawing crowd that may garner more than my curiosity, since I was expecting a 10th-century dance re-enactment in the sculpture courts, or at least some clever antithesis to the 10th-century showmanship that the museum is so fond of. The event has produced an interestingly evocative show, featuring 15 artists, who have been selected for the show, which is a group show that has been selected by the museum. The show includes both figurative and non-figurative work, and includes a variety of media, from paintings to sculpture. The show is open to the public until April 28.

"Graham Greene gave peerless insight"

By R. A. Oudekerk

T he Daily Iowan

G raham Greene gave peerless insight into the human condition in his writing, which spanned over 50 years. Born in London in 1904, Greene went on to become one of the most influential writers of the 20th century. His work covered a wide range of topics, including politics, religion, and literature, and his insights into human nature and society remain relevant today. Greene's writing was characterized by its depth and complexity, and his ability to explore the human condition in a way that was both insightful and accessible made him a beloved figure among readers around the world.

"Take Twice Daily"

By J. B. Brown

The Daily Iowan

A lthough the title suggests a newsworthy story, the piece actually focuses on the daily life of a man named John, who wakes up each morning to the sound of his alarm clock. John is a character who is struggling to make ends meet, and he spends much of his time working long hours at a menial job in order to support his family. Despite the challenges he faces, John remains determined to make a better life for himself and his loved ones. The piece concludes with a note of hope, suggesting that even in the face of adversity, there is always a chance for improvement.

Old Capital Criterion

"Iowan City Transit"

By J. B. Brown

The Daily Iowan

"Iowan City Transit" is a piece that explores the challenges facing one of Iowa's most important industries: the transportation sector. The piece highlights the impact of declining ridership and budget cuts on local transit systems, as well as the efforts being made to improve service and attract more passengers. The piece also touches on the larger issue of transportation policy, and the need for a national strategy to address the challenges facing the industry.

"American-African painter to speak"

By J. B. Brown

The Daily Iowan

A merican-African painter to speak

American-African painter to speak. The piece highlights the contributions of African-American artists to the world of art, and the challenges they face in gaining recognition and support. The piece concludes with a note of optimism, suggesting that as the world becomes more connected and diverse, there is an increasing appreciation for the unique perspectives and experiences of artists from all parts of the world.

Izmir, Turkey — They stood off officially fleeing on snowcapped mountainsides, Rebels: cruelty cut the war short, that be should ing the entire population of a village of northern Iraq that the Kurds held briefly before the border.

"Why did they stop the war?" asked Mary Barzani, 15, of the village of Uukurca, Iraq, where she and her family fled. "We don't know. We saw soldiers, tanks, and helicopters. We don't want to stay here. We want to go abroad." It is nearly impossible to get an accurate count of the number of people who have taken refuge in Turkey and those struggling to get out.

Saddam Hussein's brother said that 180,000 people were counted in the area. But within a week their number would rise to 200,000, the U.S. government offensive to create a sanctuary in northern Iraq.

"We see nothing but rain and hunger and starvation," said Eiji Asanuma, a 15-year-old Turkish student from Kirkuk, the key oil center of Kirkuk, part of the government offensive to create a sanctuary in northern Iraq.

"Our children are suffering from hunger and starvation," said Ine Masaoka, 41, of the adjoining village of T Mounted by the US military, Baker visited this village in northeastern Turkey, around which some thousands were clustered. The women spoke of the severity of the conditions, and the young woman named a small child and a second woman who had just given birth.

"Our children are suffering from hunger and starvation," she said.

If the reported figures are anywhere near the truth, thousands of thousands of Kurdish civilians, already governmentless and without food, might be tempted to the area by Baker's announcement. The counterinsurgency strategy envisaged by the Pentagon and the administration is to set up a sanctuary in northern Iraq that is safe enough to enable the Kurds to create a sanctuary in northern Iraq.

"Our children are suffering from hunger and starvation," said Ine Masaoka, 41, of the adjoining village of Takeda.

"We're all disappointed," said Mr. Baker, who visited with the Kurds in Iraq, that the Kurds held briefly before the border.

Baseball

The Cincinnati Reds continued their winning ways last night.

Brewing, the team's top prospect for the upcoming season, is being courted by several teams, including the Boston Red Sox and the New York Yankees.

Hawkeyes

The University of Iowa baseball team is off to a strong start this season, with a 6-1 record in their first six games.

Softball

The University of Iowa softball team is off to a strong start this season, with a 6-1 record in their first six games.

Fill-in umpires go back to regular jobs

The Associated Press

Normally, Alvin Higgins doubles as both pitcher and umpire. On Monday, he was called up to help out.

When major league umpires didn't make it to town, they would go to local high schools and minor league games to keep their skills sharp.

Higgins has been a fixture in the Iowa high school ranks for years, and he has a good record there.

"It's a good feeling to know that you can help the kids and leave a legacy," said Higgins.

Higgins is also a well-respected figure in the minor league community, where he has made many friends over the years.

"I enjoy knowing that my presence on the field can positively impact the lives of others," said Higgins.

Baseball season opens with patriotism, politics

The Associated Press

Packaged in patriotism, the 1991 baseball season opens with a resumption of popular rituals, cheers and solemn remembrances of an era a half-century ago. The opening-week games take on a heightened meaning today as the first games in a season that will be played are played.

The baseball season has always been a time to clear the air, get a breather, a chance to rethink old problems.

The season was a time to reflect on the year's events, to savor the idea that there were fresh starts of possibilities. It was a time to do a mental inventory of how the past year was perceived, to see how the global picture changed.
