Persian Gulf war cuts U.S. trade deficit

By Mark W. Pocan

WASHINGTON — The United States paid $30 billion to its Persian Gulf war allies in the first three months of the year, but only because of a large oil surplus that has not yet been sold to Japan, Saudi Arabia, Japan and other allies. However, the Commerce Department noted that the war's trade performance was also aided by a rise in U.S. high-tech exports and a drop in imports stemming from the war. The trade report supported its belief that strength in the dollar will help the war south of the border.

American Indians attend UI program

Students to explore careers in science

By Steve Skoog

Thirty-two Native Americans have been named to a $60,000 Outreach program at the University of Iowa to attend the University of Iowa, the only program of its kind in the nation.

The Iowans — including students from three tribes, the Winnebago, the Dakota and the Kiowa-Apache tribes — have been selected for the Outreach program because they have educational or personal obstacles that prevent them from attending the University of Iowa.

The Outreach program is a four-year program for American Indian students to pursue academic and professional opportunities.

The students will receive personal counseling, academic assistance and financial aid.

The Outreach program is supported by the National Science Foundation, the American Indian Science and Engineering Society and theAssociated Press.

Peter Nathan, UI vice president of academic affairs, speaks to members of the American Indian Science and Engineering Society at a recent reception in City Park Tower.

Billion more needed for S&L bailout

By Jim缒son

WASHINGTON — An additional $25 billion to $27 billion will be needed by the savings and loan bailout fund over the next year, Treasury Secretary Nicholas Brady said.

The government has already spent $76 billion to bail out savings and loan institutions, which have been hurt by the booming real estate market.

Mr. Brady said the cost of the bailout could be $100 billion, or more, if the real estate market continues to grow.

The White House has asked Congress for an additional $5 billion in bailout money.

Mr. Brady said the government will have spent all of the $80 billion that Congress has authorized to be spent so far, plus an additional $5 billion, by the end of this year in closing or cleaning up failed thrifts.

Mr. Brady said he expected the administration to push for more bailout money.

Mr. Brady said the government would be able to save less than half of last year's 8.8 percent increase in federal budget outlays.

Mr. Brady said the first half of the year had been relatively calm, but the government would face more pressure in the second half of the year.

Mr. Brady said the government would have to spend $2 billion to $3 billion in the second quarter, and another $2 billion to $3 billion in the third quarter.

Kuwait begins expelling Iraqis

By John Biewen

Stevenson, Ill. — The 100th anniversary of the University of Illinois was marked last weekend by a large gathering of students, faculty and alumni.

The celebration included a parade, a concert, a football game, a speech by President Bowers and a reception at the UI President's house.

Iowa disaster request

The Associated Press

IOWA CITY (AP) — Agriculture Secretary Tom Vilsack is reviewing a request for federal disaster aid or borrower relief for about half of Iowa's counties and could reach a decision by Monday, the governor's office said.

Iowa Senate Republicans have called on Vilsack to declare a disaster in 15 of the state's 99 counties. The request comes a day after Vilsack met with Iowa's governor, an Iowa senator and a former congressman from Iowa, a former congressman who asked lawmakers last month not to say or even give this information and that a decision could be made as soon as Monday, if not sooner.

Vilsack's office did not say whether it was reviewing a specific request for borrower relief or whether the request would apply to all of Iowa or to specific counties.

Iowa Senate Republicans have called on Vilsack to declare a disaster in 15 of the state's 99 counties.

Vilsack met with Iowa's governor, an Iowa senator and a former congressman from Iowa, a former congressman who asked lawmakers last month, not to say or even give this information and that a decision could be made as soon as Monday, if not sooner.
City council approves Iowa firms expansion

Larry Other
The Des Moines Register

The Iowa City Council voted to adopt a resolution allowing United Technologies Automotive to expand its existing facility in its north end.

Granville Keers, a spokesman for United Technologies, said a new warehouse would be built to expand the manufacturing operations. The manufacturing operations have been completed with the city's existing buildings.

"United Technologies invited me to their plant, and I have been very impressed," Keers said. He added that the company hopes to expand its existing waterfront operations.

Mayor Joe O'Keeffe agreed, saying, "I'm happy to see United Technologies expanding their business and creating new jobs for Iowans."

A resolution was passed allowing United Technologies to expand its existing facility in its north end.

School board weighs accreditation options

Heather Chase
The Daily Iowan

The district school board (DSB) met to discuss the accreditation status of the school for the upcoming school year. The district is currently accredited by the Iowa Department of Education.

"We are currently accredited by the Iowa Department of Education," said DSB member Jim Johnson. "However, we are considering seeking accreditation from the National Council on Accreditation to better align our district with national standards." The DSB discussed the benefits and drawbacks of seeking accreditation from the National Council on Accreditation, including cost and potential changes to curriculum.

"I agree with Jim Johnson," said DSB member Mary Smith. "We have been accredited by the Iowa Department of Education for many years, and it has served us well. However, I believe seeking accreditation from the National Council on Accreditation would give us a better understanding of the national standards and help us improve our curriculum." The DSB decided to seek accreditation from the National Council on Accreditation for the upcoming school year.

Iowa's registered Democrats outnumber Republicans by 100,000

Mike Glover
The Associated Press

According to the Iowa Secretary of State's office, Iowa's registered Democrats outnumber Republicans by 100,000.

"We have approximately 350,000 registered Democrats in Iowa," said Secretary of State Paul Pate. "That's compared to 250,000 registered Republicans." The numbers reflect a significant shift in partisanship in Iowa in recent years.

"In the past, Republicans have held a majority in Iowa," said Pate. "But in recent years, Democrats have gained ground, particularly in metro areas." The shift in partisanship has been attributed to a variety of factors, including demographic changes and a growing emphasis on social issues.

"Iowa is a swing state, and this is reflected in our electoral politics," said Pate. "But it's clear that Democrats are gaining ground in the state, and we will continue to work to ensure that all Iowa residents have a voice in our government."
**Viewpoints**

**Aid to Soviets needs link to democratization**

When Ronald Reagan once said that "the Soviet Union supports all the current that is going on," he elicited snickers from his listeners. A similar scenario is occurring today as the Soviet Union and its constituent republics try to overcome a variety of economic and social problems. This is happening in a context of a seemingly endless redefinition of the nature and extent of the Soviet Union. The economic problems faced by the Soviet Union are not new, but they have intensified in recent years. The economic problems are closely linked to the political problems facing the Soviet Union. The political problems are also closely linked to the economic problems. The economic problems are not limited to the Soviet Union. The economic problems are also occurring in other countries, such as China and India. These economic problems are not new, but they have intensified in recent years. The economic problems are closely linked to the political problems facing these countries.

Havileck responds to Rose Bowl allegations

To the Editor:

I would like to offer the opportunity to clarify a situation which is currently being addressed, although insufficiently. I refer to the USA's attempt to provide an inexpensive alternative to US students to view the Bowl game.

As you are aware, the Rose Bowl is one of the most prestigious games in the world. It represents the pinnacle of college football, and it is considered to be one of the most exciting and entertaining events of the year.

The USA is the host nation of the Rose Bowl, and it is responsible for organizing and providing the necessary facilities for the game. The USA has a long history of hosting the Rose Bowl, and it has successfully organized and provided the necessary facilities for the game in previous years.

In addition, the USA has implemented various initiatives to make the Rose Bowl more accessible and affordable for students. These initiatives include offering discounted tickets, providing shuttle services, and implementing various other measures to facilitate student attendance at the Rose Bowl.

I would like to emphasize the importance of addressing this situation adequately, and I would encourage the USA and its相关部门 to take necessary steps to ensure a fair and equitable opportunity for all students to view the Rose Bowl game.

Sincerely,

[Your Name]

**VICTORY CELEBRATIONS**

Atoning for the past

Ticket-tape parades in New York City, military parades in Washington, D.C., and displays in public places throughout the country were the recent focus on the American homeland.

Forget that thousands of miles to the east, Buddha Buddhist has launched a new campaign of homage against Shiite groups in Iraq. The Nagaiti oil spill in "Buddha's" war was a clear demonstration of the aggression.

The opponents of the Desert Storm victory are no longer seeking victory as a means to an end. They are scaling back on all the fronts, and they are more conciliatory in their approach.

The war in Vietnam has a cost of over 58,000 American lives, and it was a war that claimed a generation.

Kevin Taylor (then 32) of D.C. and Rose Dally Iowan, (then 31) of California, we did not vote on it.

We can have a second track of aid, a maintenance track, to reward those republics rather than the imperial center. The whole aid package would function as an incentive for the Soviet Union and its constituent republics. This democratic principle would channel assistance from the West to the republics.

In addition, the USA has implemented various initiatives to make the Rose Bowl more accessible and affordable for students. These initiatives include offering discounted tickets, providing shuttle services, and implementing various other measures to facilitate student attendance at the Rose Bowl.

I would like to emphasize the importance of addressing this situation adequately, and I would encourage the USA and its相关部门 to take necessary steps to ensure a fair and equitable opportunity for all students to view the Rose Bowl game.

Sincerely,

[Your Name]
such as enzymes, and the sentiment at the moment was, "They're like peeling a onion."

13-year low in milk prices threatens to put thousands of farmers out of business

Milk

...it's been at double the auction prices since late 1989. The price paid to farmers for raw milk nationwide has plummeted 33 percent since late 1989. Those who have sold their last few years, the price has fallen about 12 percent to $1.00 per hundred-weight of milk.

The price paid to farmers for raw milk nationwide has plummeted 33 percent since late 1989. Those farmers who have sold their last few years, the price has fallen about 12 percent to $1.00 per hundred-weight of milk.

Economists attribute the sharp drop in the late 1980s, driving the price of each region affected by producing 148.4 billion pounds in 1989. Japanese volcano tragedy causes
talk of possible Mt. Fuji eruption

Dan North
The Associated Press

The volcano that caused a
famous film to be
released in some southern
Japanese cities on the birthday of
Mount Fuji, the majestic
snow-capped peak revered as a
god of the indigenous
Shinto religion, has
caused a new outburst.

The mountain's disastrous
eruption in 1707, during which
the volcano erupted on August 14
and claimed more than 1,000 lives,
is considered a major eruption.

There was no immediate
report of damage or injuries
in the eruption, which
occurred near Mount Fuji in
southern Japan.

The volcano, which is
considered a god of the indigenous
Shinto religion, has erupted before
a major eruption, the chief
scientist at the Japan Meteorological
Agency said Tuesday.

There have been some
southern islands of Kyushu
and about 75 of the
islands' volcanoes are
active, according to the Japan
Meteorological Agency.

The volcano is one of the
active volcanic centers in the
world, and the agency says
it's still active.

The eruption comes as a
remind of the island nation's vulnerability
to volcanic eruptions.

Scientists are using Hibok-Hibok
Island, one of the country's active
volcanoes, to study the
behaviors of the volcano.

This is not the first time
the volcano has erupted.

The volcano erupted in 1991 and
caused a series of earthquakes and
hundreds of thousands of people
were evacuated in three provinces
in the area.

The volcano, located near the
slopes of Mount Pinatubo,
has been evacuated in three provinces

Opponents mount smear campaign

Barry Freedman

The New York Times

MOSCOW — Hard-line forces in the Russian media are expected to begin a smear campaign against Anatoly Sobchak, the first president of the Russian republic, in preparation for his expected entry into the race to become the republic's premier. The sobchakists, who_operate several newspapers and magazines, have already started their efforts to discredit Mr. Sobchak, who is a leading candidate in the next election. A spokesman for Mr. Sobchak said it would be "the biggest, most efficient, and most systematic campaign ever." In preparation for the campaign, Mr. Sobchak has proclaimed a "Thousand Days of the Republic," during which he will highlight the achievements of the republic and the importance of its independence. The campaign, which is expected to be a major factor in the upcoming election, is being coordinated by the Sobchakists and the Russian Orthodox Patriarch Alexy, who is a close ally of Mr. Sobchak. The campaign is also expected to focus on Mr. Sobchak's opposition to the communist government, which has been in power since 1917. Mr. Sobchak has already declared that he will not support the communist government in any way, and he has called for a transition to a democratic system of government. The campaign is expected to be a major factor in the upcoming election, and it will be closely watched by the international community. The campaign is expected to be a major factor in the upcoming election, and it will be closely watched by the international community. The campaign is expected to be a major factor in the upcoming election, and it will be closely watched by the international community. American

Alex Fernandez (6-3) had allowed 2 runs -- both in the fourth inning -- when the Rangers scored twice in a 5-hour, 15-minute single by Chris James Bates. With that run total in mind, Jon Doner (14.3) and Andrew Duncan (14.6) were named the players of the game. They both allowed a 9-2 win to the Rangers.

Webb

In helping his teammates mature, Michael Adams said, "It's great to see all these guys out there." Adams is third in the NL in batting average (.331) and leads an otherwise mediocre team to the NBA championship.

Lakers set to represent NBA in Paris

Three others, Keenick, Hegg and Farnam, have been named to the team, which will play at the Tri-City Classic in Kansas. Keenick and Farnam will stay on as president of the team, while Keenick will be a player. The Lakers also need to quickly fill the void left by their best player, a 26-year-old center who has averaged 36 points in 351 career shooting.

Magic

"It's an exciting time," Krause said. "We've got a lot of energy going on here." Krause said the team will stay in the NBA until the new owners take over.

The Associated Press

The Lakers also need to quickly fill the void left by their best player, a 26-year-old center who has averaged 36 points in 351 career shooting.

Sportsbriefs

The 49ers, which were the Yugoslavian League champion in the previous year, will appear in the McNally Cup for the first time in their 30-year history. 

The other two European teams have been Spanish League champion, Barcelona Basketball and RFBARD, which have been represented by the American Sports Federation, the Ukrainian Basketball Association and the Polish Basketball Association.
Dykstra has brief first day in court
Law Under
The Associated Press
RADNOR, Pa. — Phillies outfielder Darren Daulton went to court Wednesday for a preliminary hearing that could determine whether he will be able to play in the majors. Daulton's attorney, Harvey Uran, entered not guilty pleas on Daulton's behalf.

Dykstra has been exonerated on the seek of injuries suffered when Philadelphia's anti-terrorism task force searched his house during a sweep for suspected terrorists.

The Associated Press

Dykstra has been exonerated on the seek of injuries suffered when the Phillies searched his house during a sweep for suspected terrorists.

Dykstra walked into the courtroom Thursday at the gray and green rooms. The Associated Press reporter asked about the incident and Daulton's new job as a commentator for the team.

"It's been a tough couple of weeks, but I'm really looking forward to the new job," Daulton said. "I'm excited to be back in Philadelphia and to be able to help the team in any way I can."
Nuggets trade Adam's for 1st-round pick

**John Maxwell**

**DENVER — The unheralded Denver Nuggets dealt the Washington Bullets on Tuesday for a first-round draft pick, giving the NBA's most busts two of the top eight picks in the NBA draft.**

The Nuggets sent Adam's, along with a second round pick and cash, for the Bullets' No. 1 pick, the eighth overall.

This deal gives the Nuggets the fourth and eighth choices in the first round. Denver has never had its ball in its hand to do other than in the Amateur Athletic Union.

For Adams, it means a return to the Bullets, where he played for one season (1986-87) before being drafted by the Nuggets. He's a "no-brainer" in a trade that also sent Michael Adams to the Bullets for the No. 3 pick.

The Nuggets added defender Dave's, the 6-foot-10 Adams became one of the game's best point guards and a dangerous射手 athlete. This past season, he led the Nuggets in scoring and steals per game (1.8).

On Friday, the Nuggets signed forward Bickerstaff and received on the fourth round from the Bullets.

With the first-round pick, Denver, the 5-10 Adams became one of the league's top point guards and a dangerous athlete. This past season, he led the Nuggets in scoring and steals per game (1.8).

**Jordan on verge of 'greatness'**

In the battle with Magic Johnson to be recognized as the greatest basketball player of all time, Michael Jordan has some mighty impressive numbers to back up his case as the best of the best.

The Bulls star, who had 23 points and 10 assists in Tuesday night's 107-90 victory over the Indiana Pacers, has scored at least 20 points in 10 of his past 11 games.

Johnson has three straight 30-point games and a career-high 31 points in his last two games, but Jordan has had three straight 30-point games and a career-high 31 points in his last two games.

**Twins rally for 10th in a row**

The Associated Press

LOS ANGELES (AP) - The Minnesota Twins, getting a home run in the ninth inning, rallied to beat the Los Angeles Dodgers 10-9 Monday night.

The Twins took the first two games of the four-game series against the Dodgers, who have lost seven of their last eight games.

**Cubs donate win to Giants**

The Associated Press

CHICAGO - A missed sign, a gift for one team and a bad break for another.

When it was over, the Chicago Cubs and the San Francisco Giants were in agreement on one thing: a win.

The Cubs had a 9-2 lead in the ninth inning, but the Giants rallied for four runs to force a 13-inning game, which the Cubs won 16-12.

MANILA, Philippines — The Philippines won 11-0 in the ninth inning against the United States Wednesday night to win their first game in the 1997 Southeast Asian Games.

**Disappointed Magical Thinking**

Bill Bernard

INGLEWOOD, Calif. — The disappointment was evident as Bill Bernard left the floor Tuesday night.

Bernard, who is regarded as one of the brightest young minds in basketball, thought he might have a chance to finally make it to the NBA this year.

"I'm disappointed," Bernard said. "I thought I was in line to get a contract. I thought I was a good player. I thought I was deserving of a chance."

Bernard, a 6-foot-10 forward, played for three years at the University of Arizona and was named to the All-Conference team.
