Dayton \The Associated Press

**DAYTON, Ohio —** The Louisiana legislature voted Tuesday to override Gov. Buddy Roemer's veto of a tough abortion bill that would allow doctors who perform the procedure to refuse to do so. The House voted 76-23 to override the veto after signing a rule that would not have allowed doctors to refuse to abort. The Senate's 20-9 vote earlier in the day came as a surprise since Roemer's veto of similar legislation in 1987 despite the House's overwhelming vote to override. But then, there was one of his authors, and said it would go against the wishes of the bill's sponsors. When the 1987 veto was overturned, the law was reinstated. He's a little disappointed to be Simpson winning, he said. "I think a lot of people are not happy with the result.""No, it's more right than wrong for them. And there's a lot of people who are afraid of that, too," Simpson said. "There's a lot of people who are afraid of that, too.""

Funds lacking for emergency phones

Ace Riley
The Daily Iowan

A proposal to install public emergency phones throughout the University of Iowa's campus was held up by the University's Board of Regents last Monday.

According to a proposal currently under consideration by the Board, the super-highway system at the University of Iowa would include a series of emergency phone booths, each one equipped with a line that connects directly to the police department. A call to any of these phones would automatically disconnect the caller from a telephone switchboard, and the call would be handled immediately by the police.

The phones, which would be equipped with a red light at the top and a green light at the bottom, would be located at strategic points along the highways. A call to any of these phones would automatically disconnect the caller from a telephone switchboard, and the call would be handled immediately by the police.

The proposal was introduced by Rep. J. L. Bowen, R-Urbana, and was approved by the Board of Regents last Monday.

The cost of the project is estimated to be $100,000, and the University plans to begin construction as soon as possible.
Lobbyists treat legislators to expensive dinners, great parties

Hancher's 1991-92
Les Miserables
This unforgettable production of the great musical, with a recent life once again tells the story of the historical building and musical history.

SPORTS COMPLEX

Fulfilling a need

Iowa City needs a sports complex.

Specifically, Dilullo advocates the opinion of the New Republic, Princeton Professor John Dilullo reports a recent study in the Statistical Society of America that more than 1 percent of the homeless arose from mental health problems.

Jim Rogers

Honest data will help homeless

For an industry that has spent almost a decade in the spotlight, targeting America's heart strings, but even after a decade of attention homeless people remain a persistent problem. The increasing intolerance of the homeless on the streets is all the harder in case of homelessness. Because, especially, policy makers are often confused about what data they need to construct workable policies.

The charge is (a) self-serving (these scientists got rich doing it) and (b) outmoded. The moon landing was only incidentally about science. It was about man seeking his destiny. The moon landing was celebrated, not as much the key to the technological, geopolitical, and economic future, but rather as a magnificent platform for science and humanity.

Lunar footprints inspired a nation

It was an eminently pointless or simply a case of gawkerism, according to the study's co-authors Zsoltar Taylor and Michael Hrus, issuing quite a site.

On April 15, 1991, W. C. Fields slipped into history as the first person to be cremated in a gondola of the New York City subway system. In his will, he had stipulated that his body be cremated and that the ashes be scattered in the Atlantic Ocean, off the coast of Portugal. Fields' wishes were honored, and his ashes were indeed scattered in the Atlantic. This event has become a symbol of the irreverent and flamboyant spirit of W. C. Fields, who is remembered as one of the greatest comedians of all time.

The story of W. C. Fields is a testament to the power of creativity and the ability to think outside the box. It is a story of a man who was able to laugh at himself and the world around him, and who was able to use his humor to connect with others. Fields' legacy lives on today, as his quotes and stories continue to inspire and entertain people around the world.

In closing, I would like to leave you with a quote from W. C. Fields: "The best way to get rid of pain is to laugh about it." This quote is a reminder of the importance of laughter and the power it has to heal and bring joy to our lives. So, the next time you feel down, remember W. C. Fields and his ability to find humor in even the most difficult situations. As he said, "The only way out of a dilemma is through a dilemma."
Farms

"Compared to the rest of the state, Iowa City is the best off," said Harry Darling, a city planner who is perhaps the only city planner in the entire state who has studied all 163 of Iowa's cities. 95 percent of the farmland in Iowa City is owned by the city.

Looking at the overall break down of the city, agricultural producers who are facing problems due to the recent drought are being helped by the federal government under the Farm Security Act. Despite this, only about 5 percent of local farmland is owned by the city. A recent report by the Iowa City Chamber of Commerce indicated that 80 percent of the city's farmland is owned by the city and that 70 percent of the city's farmland is owned by the city. Note, however, that this does not mean that all agricultural producers in the city are being helped by the federal government. During the past few years, more and more producers are finding it difficult to make ends meet and are losing their farms. This has resulted in a decrease in the number of farms in the city. However, the overall economic impact of this reduction has been relatively small. For example, the value of agricultural products produced in the city has decreased by only about 10 percent over the past few years. This decrease is mainly due to a decrease in the value of corn, which is Iowa City's most important agricultural product. Current economic projections indicate that the value of corn in Iowa City will continue to decrease over the next few years. At the same time, the number of farms in the city is expected to remain relatively stable. This is because new farms are being established, and it is expected that the overall number of farms in the city will continue to increase over the next few years. By 2020, it is estimated that there will be about 1,000 farms in the city. The average size of these farms is expected to decrease, with the median size of farms expected to be about 20 acres. At the same time, the overall number of agricultural workers in the city is expected to increase, with the median number of workers on farms in the city expected to be about 20 workers. The overall economic impact of this increase in the number of farms and agricultural workers is expected to be relatively small, as the overall economic impact of the decrease in the value of corn is expected to be relatively small. For example, the overall economic impact of the decrease in the value of corn is expected to be about 10 percent of the overall economic impact of the increase in the number of farms and agricultural workers. The overall economic impact of this is expected to be relatively small.
HoJo grand slam almost not enough

Joel Youngblood

The Associated Press

NEW YORK — Howard Johnson hit a grand slam and scored the go-ahead run in the eighth inning Monday night as the New York Mets beat the San Francisco Giants, 5-4.

Johnson's three-run home run and singles by Candy Maldonado and Bob Ojeda, who pinch-ran for Johnson in the seventh and later scored on Bob Ojeda's bases-clearing double, gave the Mets a 5-2 lead in the eighth. Ojeda had hit a pivotal, two-run single in the seventh to give the Mets a 3-2 lead.

The Mets scored three runs in the eighth against San Francisco reliever Tom Gordon. Johnson's two-run blast was his second career homer and his first in the majors. It gave the Mets a 5-2 lead in the eighth. Ojeda then added a sacrifice fly to make it 5-4.

The Mets had four bases-loaded opportunities in the game, but managing the runners was a challenge for San Francisco pitching in the top of the eighth.

San Francisco reliever Tim Worrell hit Johnson, who then was replaced by Ojeda in the seventh. Ojeda doubled and scored on Johnson's single to give the Mets a 3-2 lead in the seventh. Ojeda then scored on a single by Ojeda.

The Mets played their first game of the season at Shea Stadium after the opening game of the season was postponed due to the rain.

End of the top of the eighth inning.

Ojeda and Johnson are both former major leaguers. Ojeda played in the majors from 1982-92, while Johnson played from 1988-92.

Ojeda is a former All-Star and was a member of the Tampa Bay Rays when he retired.

Johnson is a former center-fielder and was a member of the Detroit Tigers when he retired.

Fighting God's war in baseball

Dave Dravecky, whose left arm was operated on for the fourth time Thursday, made a remarkable comeback today in a minor league baseball game.

"The doctor said he would not know until after the operation... that there was a slight possibility that I would be in the game," said the 6-foot-1, 185-pound right-hander.

Because the surgery was successful, Dravecky was able to return to the mound.

"I've got my fastball and a good slider," he said.

Dravecky has been out for 17 months because of a variety of ailments. During that time, he has faced a variety of obstacles.

"It's a hard road," he said.

Dravecky is now 2-0 with a 3.75 ERA in nine starts for the San Francisco Giants' Triple-A team, the Stockton Ports.

"I'm looking forward to getting stronger," he said.

Dravecky's return to the mound is a response to the new era of baseball.

"I'm looking forward to getting stronger," he said.

Dravecky, who has been out since 1991, returned to the mound today after a series of operations.

"I want to play for the team," he said.

Dravecky is back with the Giants for the second time in his career.

"I'm looking forward to getting stronger," he said.

Dravecky, who has been out since 1991, returned to the mound today after a series of operations.

"I want to play for the team," he said.
