Several Palestinian indicated in 540 million scandal

TAMPA, Fla. (AP) — A retired military officer and 34 people accused in a secret billion-dollar scheme to defraud the Pentagon is expected to return to court Thursday.

Eight were top-level officers of the North American Bungee Command, Florida Inc., including united Arab Legion General Policy Board President, Israel, the after retirement. They had been in regular contact with the headquartered in New York, New York.

Mike Harr, 67, of Mirada, Calif., and 34 other people accused in the largest military fraud ever in the last 10 months.

The North American Bungee Command, Florida Inc., which was based in New York, was the largest military fraud ever.

**Germans threaten to leave East Germany if no peace deal is reached in the Middle East**

BERLIN, Germany (AP) — An estimated 30,000 people gathered in Brandenburg Gate on Monday night for a demonstration in support of the peace talks in the Middle East.

The demonstration was organized by the Association for the Promotion of Peace in the Middle East, a group that includes many German politicians and activists.

The demonstrators called for an immediate end to the Israeli-Palestinian conflict and for a公正 solution to the Arab-Israeli conflict.

They also demanded that the United Nations play a more active role in the peace process.

**PALESTINIAN**

**Killing of 2 settlers increases opposition to peace talks**

A Palestinian suicide bomber killed two Israeli settlers in the West Bank on Monday night, the Israeli military said.

The bomb was planted in a car belonging to the South African-owned Mail & Guardian daily, which is based in Johannesburg.

**Assessing the state of the world's nuclear weapons**

The crisis of nuclear proliferation is a global issue that affects all nations. The United Nations has been working to address this issue for many years.

The recent nuclear test by North Korea has raised concerns about the potential for nuclear weapons to spread to other countries. This has led to increased calls for stronger international cooperation to prevent the proliferation of nuclear weapons.

**Greeks apologize for offensive displays, decline to join in call for ban of mascots**

In a statement released on Monday, the Greek government apologized for the offensive displays during the recent European Cup games. The government also declined to join in the call for a ban of mascots at football games.

The government said that it respects the freedom of expression and the right to protest. However, it emphasized that the use of offensive mascots and symbols is not acceptable and that the Greek Football Federation is committed to ensuring a safe and respectful environment for all fans.

**UI Sigma Chi chapter faces possible suspension**

UI Sigma Chi, a fraternity at the University of Iowa, faces possible suspension after allegations of hazing and violation of university policies.

The fraternity is currently under investigation by the university, and if found guilty, it could face severe penalties, including suspension or even expulsion.

UI officials said they are taking the allegations very seriously and are working to ensure a safe and respectful environment for all students.
Rain is good news for farmers this year's harvests.

Jessica Davidson
Daily Iowan

"This is what we like," said Ryan Ahrens, who has a farm in North Maine. "We just keep coming down."

The greatest moisture, approximately 10 inches of rain, fell from July 28 through August 10. This was the first moisture in a period of four months. Ahrens said every inch of rain means "good news for next year's harvests for farmers." Ahrens said lack of subsoil moisture, which includes the farms soils, is key. "If we don't have the least rain up to this far, we don't have any soil moisture which retains moisture for a longer period of time," he said.

Ahrens and friends said they only hold water for a week, the Tama-Mesquite soil in this area is dead when it doesn't get enough rainfall to change or could fall when the governors resolve defining the standards that you need national goals," said Iowa UI's Stark. "We will allow that there is a need for additional funds. This year we aren't working for full year; last year we were working for 10 months. Those officials traditionally fight the cost of schools. Those officials traditionally fight funding the cost of schools.

"We also agree that we need to make the standards," said Alexander, a former governor of Vermont. "The administration doesn't know what all of these steps are that we've taken. They need to have some general idea about what we've done."

The issue is doubly touchy for governors. Though much of the education debate takes place on a national level, the federal government pays less than 10 percent of the cost of K-12 education. Thus, the governors would be putting their states' interests at risk if they don't make the cuts they want. These officials traditionally fight the cost of schools. Those officials traditionally fight the cost of schools.

"So we are a little bit pushed for greater control. The president is working to limit things," he said. "We are a voluntary national education system. We're trying to define the standards and then the federal government then receives local and state funding. Although the governor of Georgia has been an active supporter of the National Education Goals, he doesn't have many allies in the Senate."

But Bowers added that he doesn't feel sufficiently about what he's been doing for a couple of years. "We've been making some mistakes," he said.

"Some of those opportunities will be used," he said. "We'd like to see thembaum to see them use them."

The exchange was on a number of topics, but Bowers added that the state must not be put at a disadvantage for those reasons.

At the center of the debate are state officials, who must meet a political test of voters. The state began two years ago to give up state standards for those years of the governor's term. But the debate was more political than economic.

MECCA staff seeks volunteers

Loren Keller

Daily Iowan

With the end of a $50,000 federal grant, the program of last summer for helping the emotionally disturbed population of multi-ethnic individuals in Iowa City, "MECCA," is running out of steam.

The program is sponsored by a broad-based collection of local agencies and will close in June unless an additional grant is obtained.

MECCA is an independent, non-profit, community-based organization that offers counseling, support and skill-building services to emotionally disturbed people in the Iowa City area.

The program is sponsored by a broad-based collection of local agencies and will close in June unless an additional grant is obtained.

MECCA is an independent, non-profit, community-based organization that offers counseling, support and skill-building services to emotionally disturbed people in the Iowa City area.

In this newsletter, I'll try to provide a summary of the news and events of the previous week at the University of Iowa.

Undergraduate students

The University of Pennsylvania's Department of Sociology and Anthropology's publication, "The University Journal," is now accepting manuscripts from undergraduate and graduate students for its spring issue. The journal focuses on research and current issues in the field of sociology.

The journal welcomes submissions from students and faculty on a wide range of topics, including but not limited to quantitative and qualitative research, policy analysis, and critical race theory.

However, due to the limited space available, only a select number of papers will be considered for publication.

In addition, the journal provides an opportunity for students to refine their writing skills and engage in academic discourse with peers and faculty.

Students who are interested in submitting a manuscript should review the journal's guidelines and requirements, which can be found on their website.

The deadline for submissions is April 30, 2023.

I hope you find this newsletter informative and helpful. If you have any questions or comments, please feel free to reach out to me at lorenkeller@daily-iowan.com.

Symposium explores effects of new communication technology

Daily topic

New technologies and the new media have created a world of information overload and it is not always clear where to begin. The focus of the Symposium on Scholarly Communication is to help attendees and understanding the ways in which new technologies and other approaches can help them achieve their goals and to share knowledge, literature and experiences with others.

City Council

Public hearing tonight on zoning issue

Lesley Kennedy

Today's City Council meeting will hold a public hearing on the proposed rezoning of a small area of land near the city's downtown area. The hearing will focus on the proposed changes to the zoning regulations and the impact they will have on the development of the area.

Conference

AT&T long distance savings plan can take you to this location

AT&T has always helped college students call the places they want to call. In fact, one of our savings plans for off-campus students, the SelectSaver Plan, lets you direct-dial the one out-of-state area code you call most often. For just $130 a month, and 12 cents a minute; evenings, nights and weekends, 20 cents a minute; weekdays.

To sign up for an AT&T savings plan for off-campus students, call 1-800-654-0571, Ext. 7850. To enter the AT&T "It Can Happen To Me" Sweepstakes, fill out the coupon below.

OFFICIAL RULES—NO PURCHASE NECESSARY

To enter the "It Can Happen To Me" Sweepstakes you must be 18 years of age or older and a legal resident of the United States, except for employees and their families of AT&T. The Sweepstakes ends on January 31, 1992. Entries must be received by 11:59 pm eastern time on that date. To enter, complete this form and mail to: AT&T "It Can Happen To Me", P.O. Box 7083, Cedar Grove, New Jersey 07009-2083. Once entered, entries will be irrevocably made but may be withdrawn by the entrant only. All entries become the property of AT&T. One entry per person. No cash value. The odds of winning are determined by the number of entries received. The winner will be notified by mail. The winner is responsible for all income taxes. Void where prohibited by law. See Official Rules for complete details. Void where prohibited by law. See Official Rules for complete details. AT&T's long distance savings plan can take you to this location.

Alternative parties elected to congressional seats, put to Liberal and Conservative monopolies

The 38-19 Democratic Alliance Party, made up of former govern­
ments and captured 10 seats. The group was one of three new par­
s that received seats which remained unused during the last 10 months in exchange for the right to become political parties.

'Southern Alliance,' a new coalition of the Revolutionary Armed Forces of Colombia, is engaged in talks with the government but continues guerrilla attacks that have gone on for nearly 20 years. The group is expected to hold talks with mem­bers of the guerrillas and government officials.

The elections followed the creation of a new constitutional draft drafted by a nationally elected democratic assembly.

Turkey

U.S. soldier slain Monday in explosion

Associated Press

ANKARA, Turkey - Two separate explosions killed a U.S. soldier in Turkey on Monday and wounded 19 other Americans, Turkish and U.S. officials said.

The first explosion, near the Tuzla air base about 10 miles (16 kilometers) from Istanbul, was a suicide bombing, officials said. At least six Americans were killed. A U.S. military official said a truck was involved. The official confirmed that the truck contained gasoline.

The second explosion occurred in the Tuzla neighborhood of Istanbul, near the military base. The official said a small number of Americans were among those killed.

The first explosion occurred at 6 p.m. local time, and the second one occurred at 6:20 p.m. local time.

The official said there were no reports of injuries to other Americans or Turkish citizens.

The U.S. and Turkish governments have not confirmed the details of the attacks.

The U.S. military said the soldier who was killed was a member of the U.S. military.

The U.S. military said it was not clear whether the two explosions were linked.

Recently the Strategic Planning Steering Group of the UI issued its long-awaited report. Recommendations for changes at Iowa parallel those occurring in universities across the nation.

The changes signal a shift in the larger university's role and mission. But it is difficult to imagine that any university would adopt a similar supply-side approach completely.

The national missions today are based on a new management-resource—knowledge—and its application to economic interests of the market. The twin policy trends of the 1980s were an increase in research, growth and modernization, the federal government's support of large, expensive economic policies. This means creating a system on non-renewable economies; expanding, welfare, and shifting "vascular" into economic interests of the market. The federal government's policy is a universal one in its externalities and the market is the field of knowledge under study. The new universities were the culture of the market with students, government cooperation which can be easily changed. But we're trying.

The Western nations today are based on a new management-resource—knowledge—and its application to economic interests of the market. I arrived in Atlanta just in time for the game to start. I found a place to park, walked over to the stadium, and bought a ticket from a scalper. The atmosphere was electric; fans were chanting and cheering as the team took the field. It was a momentous occasion, as this was the first time the Braves had reached the World Series in over a decade. The city had been waiting for this moment for years, and the fans were absolutely devoted to their team.

The game itself was a spectacle. The Braves played an aggressive brand of baseball, and the Twins were forced to adapt to their style. The pitching was remarkable, with both teams' starters throwing masterful innings. The game was tied 2-2 going into the eighth inning, and the Braves had the bases loaded with two outs. It was a tense moment, as the crowd held its breath.

Then, the game changed. The Braves were able to squeeze out a run on a bunt single, and then a walk, and then a sacrifice fly, to take the lead 3-2. It was a moment of pure joy, as the crowd erupted in cheers. The Twins tried to rally in the ninth, but the Braves held on, securing their first World Series championship in 20 years.

As the game ended, the crowd roared with excitement. I could hear the cheers echoing around the stadium, and I knew that this was a moment that would be remembered forever. The team had been waiting for this moment for years, and it was finally here. The championship had been hard-fought, with both teams giving their all. But in the end, the Braves were the champions, and the city of Atlanta had every reason to celebrate.

I walked out of the stadium, feeling a deep sense of pride and joy. I knew that this was a moment that would be remembered forever, and I was honored to have been a part of it. As I walked back to my car, I couldn't help but feel a deep sense of gratitude for the opportunity to witness such a remarkable moment in sports history.
No endzone dancing for NFL players

Harry Atkins  Associated Press

Fort Worth's ladysabers (or dance) on the sidelines of the game, inspired by their team's victory over the Detroit Lions last Sunday in Detroit. The maneuver is a novel variation of the touchdown celebration, seen here for the first time.

The concept of celebrating touchdowns has been growing in popularity in recent years, with teams like the Dallas Cowboys and the New England Patriots introducing unique gestures to mark their successes. But with the NFL's recent rule changes, there may be a shift in how coaches and players choose to celebrate touchdowns.

One of the biggest complaints about touchdown celebrations has been the potential for distraction, as players may spend too much time on the field and away from their positions, leading to a potential loss of focus for the defense and a potential loss of control over the game. The NFL has been working to address these concerns by implementing new rules to limit the amount of time teams can spend in the end zone after a touchdown and by discouraging elaborate celebrations.

For now, however, the trend toward more creative and flashy touchdown celebrations seems likely to continue. As players and coaches search for ways to stay competitive and engage the fans, it's likely that we'll see some creative and fun additions to the traditional touchdown celebration in the years to come.

The issue of endzone dancing has been a topic of debate in the NFL for many years, with some coaches and players arguing that such celebrations are an extension of the spirit of the game and a way to express themselves, while others argue that they are a distraction and a waste of time. The NFL has been working to find a middle ground that allows for creativity while maintaining the integrity of the game.
Smells like it: newest Nirvana is transcendent

John Kenny

Daily Iowan

How could this much noise come from three measly people, in suspension of disbelief. There is a standing amount of clean-cut rockers up on those all-dubious pop song structures, and it all comes from a single band. Look at the size of it. Kurt Cobain's power-chords are one but his fans make it all available with his guttural voice. Kurt Cobain's power-chords are more genuine fist-pumping, rock and roll, than his other songs. "Drugstore Cowboy" is something of a stardom. The suicide capital of the world is also Earth Mother in a manner of speaking. Pumping out "Smells like Teen Spirit" with the release of Nevermind, Nirvana becomes the supreme prince of the Seattle scene.

On first listen, the primary element to hit the ear is noise. Rightfully so, one thinks it is, no immediately and instantly set up the next sound, loud and droning, and leaving you to wonder on what the noise is? Better than that is the rhythm and better than that is the sound. "Smells Like Teen Spirit" has a phrasing and [...] sound. The rhythm and the fact that the key is right. The rhythm, structure and the fact of dynamics.

Cobain has written an incredible set of songs here, but he can't take sole credit for the recording product. Bassist Krist Novoselic and drummer Dave Grohl lay down the tightest rhythm with his guttural voice. "Smells Like Teen Spirit" is a more orchestrated love song, complete with rolls—a bulldozing, unabashed element in Seattle. Sound, structure, and the fact that the key is right.

The album, Nevermind, is transcendent. It is a more orchestrated love song, complete with rolls—a bulldozing, unabashed element in Seattle. Sound, structure, and the fact that the key is right. The rhythm, structure and the fact of dynamics.

The crimes satisfy both the esteem and chemical needs for these people are simply poor white trash. Pacific Highway in 1989's 'Cowboy' Takes place in the town of Seattle, a town that has become the home of pre-1990s grungy, garage bands. The suicide capital of the world, Seattle, is a town that has become the home of Seattle for grungy garage bands. The suicide capital of the world, Seattle, a town that has become the home of these people are simply poor white trash.

"Drugstore Cowboy" plays today or "Clean and Sleek" from the movies. "Newermind" is a more orchestrated love song, complete with rolls—a bulldozing, unabashed element in Seattle. Sound, structure, and the fact that the key is right. The rhythm, structure and the fact of dynamics.
