Rawlings discusses drop in no. of women hired

Jane Johnson

The Daily Iowan

University President Hansen released a report last week examining the reasons why the percentage of women hired in the past year has dropped. Rawlings said that the drop was unexpected and that he and his administration are trying to address the issue.

"We're very disappointed," Rawlings said. "We've had a lot of positive feedback from women who have been here for a year, and we're definitely looking into ways to make sure that we continue to have a diverse faculty."
The low profile is an attempt to emphasize political neutrality.

Guide lists candidates who support abortion rights

**ROUSE**

Associated Press

"FIFTY-FOUR abortion rights activists Wednesday rallied outside City Hall and met with city officials, demanding that the city support abortion rights." They pledged to more actively promote candidates who support abortion rights, saying existing abortion services have been more aggressive in promoting political issues.

"[We] want to get abortion rights into the forefront of everyone's mind," said a woman who asked not to be identified.

The people you hear [are the] ones who are always advocating for more abortion services.

The guide lists the shortened list of the candidates who support abortion rights, giving an overview of the candidates and their views on the issue.

**Religious cases**

To the Editor:

I am responding to the Associated Press article of July 18, 1992, "In Illinois, women seek state protection for religious cases." This article discusses the case of a federal judge who granted a request for religious protection in the Illinois abortion case. However, the judge's decision is based on a constitutional interpretation of free speech and not on religious grounds.

I am concerned that the article misrepresents the nature of the legal issues involved in this case. The case is not about religious protection, but rather about the right to choose abortion in the face of a State Supreme Court decision that requires the use of a RU-486 pill.

The article also fails to mention that the case is being appealed to the U.S. Supreme Court. It is important that the public is aware of this fact, as it indicates that the legal issues involved are far from settled.

**Lecching**

Marvin doctrine dictates that one's political views are based on an evolution from belief to the disbeliever of reasoning. I am one of the many political scientists who believe in the theory of lecching. According to this theory, people change their political views based on their experiences and the reasons they give for their beliefs.

The concept of lecching is important because it helps us understand how people's political beliefs can change over time. It also helps us understand why people may hold certain beliefs about politics even though they have little knowledge of the issues.

The concept of lecching is important for political scientists because it helps us understand how people's political beliefs can change over time. It also helps us understand why people may hold certain beliefs about politics even though they have little knowledge of the issues.

**Homicide arrests surge among teenage males**

Fred Barnes

- Associated Press

BETHLEHEM, Pa.-For years, criminologists James Fox linked the rise and fall of teenage homicide rates to a broad range of social indicators of assault, rape and home ownership.

But when 16- to 19-year-old males accounted for 56% of the nation's 4,060,651 arrests in 1988, the nation's homicide rate hit its highest level since 1965, according to the FBI. Among teenagers, the homicide rate rose to 16.3 per 100,000 population, while the rate dropped to 13.8 per 100,000 population - the lowest since 1964 - for 1965. The FBI found that an increase in violent crime from 1965 to 1985 has shrunk 7.5 points.

The increases in violence we're seeing now, said Glenn Pierce, the director of admissions at the University of New Haven in the 1960s, now the younger age group is doing a lot of heavy lifting.

During a 20-minute question-and-answer period with the City High School audience, Lindsay Jones said: "It's clear to everyone who saw it that something's wrong, that something's changed." The speech was given to the 18-24 age group and said he would replace the 1980-81 student body with a speech I give when I went to high school.

"I was just a kid the other day at the mall with my mother when we saw a marginal young man in the 18-24 age group. In the age group, которые застревали в своем 18-24 возрасте, умерли 1,000,000.

Cunningham out to run past Tarkenton

"Definitely it's special because it's the history of the league." - Randall Cunningham

Philadelphia quarterback Randall Cunningham needs just 31 rushing yards Sunday to pass Tarkenton's record of 7,264. Cunningham, who has 7,234 rushing yards, needs just 31 to break Tarkenton's 13-year-old mark. The game features two of the NFL's three highest rushers - Cunningham at 3,994 and Tarkenton at 3,603. Cunningham is 14 yards behind Tarkenton's record. 

Chiefs vs. Cardinals: 3 p.m.

The Cardinals have clinched the AFC West and can clinch a first-round bye with a victory over the Chiefs. The Chiefs, who have clinched a playoff berth, are seeking their first winning season since 1962. The Chiefs are 6-3, while the Cardinals are 11-0. 

Cunningham is a career 12-2 in the NFC East. Tarkenton, who has 96 career victories, is 23-8 in the NFC. 

"It's special because it's the history of the league," Cunningham said. "It's not like running for 33 more yards. You get to run against the best and it's something that you take pride in. It's something that you respect." 

Cunningham said he wouldn't mind if Tarkenton scored the record-breaking touchdown. 

"I told him, 'Don't worry about it, just go get it,'" Cunningham said. "I'm just happy for him. I'm happy for him for being able to do it. You don't do that every day."

Jackson passes on spotlight

Associated Press

ARLINGTON, Texas (AP) — Tennessee, fresh from the catch of the two-time SEC champion, Chicago Bears, will be leaving off its star power from the spotlight and the shoulder pads.

Jackson, the fifth overall selection in the NFL draft in April, was named the starting quarterback last week.

He accepted a promotional opportunity this summer after the Bears went 2-3 in the regular season.

The Bears, who finished 3-1, have a 13-1 record in their last 14 games.

Jackson has been named the starting quarterback since the Bears' season opener against the New York Giants.

Bulls coach Phil Jackson

Bulls coach Phil Jackson
does not want his team to lose its momentum.

Jackson, who played for the Bulls in 1989, is back for his second season.

He is the third player to be named the starting quarterback.

Jackson has missed the last two games with a shoulder injury.

The Bulls, who are 11-4, have a 7-0 record in their last 15 games.

Jackson has not started since he missed the Bulls' first game.

Regardless of clichés, 'Mighty Ducks' is OK

Sofia Vent

The Daily Iowan

There's something very comforting about clichés. They come to us in a package when we're still kids and you can be sure that you will always be able to invoke them in a scene with a smile on your face.

I'm not saying that clichés should be done away with, just that 'Mighty Ducks' is nothing new to the world of films.

The story of 'Mighty Ducks' revolves around a collection of young hockey players who are trying to win the local championship. The team consists of a group of child actors who find themselves up against the odds.

The team is led by a young hotshot player named Gordon Bombay (Emilio Estevez), who's motto is to "Do it right or don't do it at all." Bombay is a former hockey player who had his career cut short due to an injury. He is now a no-talent group of child actors, but the team is determined to win.

Bombay is struggling with his fear, but is eventually able to overcome it with the help of his team and coach. In the end, the team wins the championship and Bombay is able to fulfill his dream of playing hockey again.

Movie review of 'Mighty Ducks' by Sofia Vent.

The Daily Iowan, Iowa City, Iowa, Thursday, October 15, 1992 - 58
'Mother of Us All' combines political with surreal

Characters from different time frames meet and interact in a surrealistic dream-play that opens this fall. The play, written by Georgia State University's Arlene MacVey, explores the struggle for women's rights. The action includes flashbacks of events and characters from the past, landscapes from present-day America, and future visions of utopias. The play features music, costume designing, and directing. MacVey suggests that the play is more accessible than other works of this type. "Women's voices resonate against the background of America's past very very complex stuff. They won't be heard of this time. It's very entertaining. It was written in 1946, it's incredibly contemporary, everyone will be able to get it. Finally, and even more immediately, this other reason MacVey chose the play, he said that "Mother" seems appropriate for the issues because of the political issues raised in the story. "It's a very timely piece," he says. "It's almost voting, and about women's place is a natural structure as women. It takes a deep look at women's issues and needs and what should be done."

The production of "Mother of Us All" is directed by Jane Schoen.

R.E.M.'s Automatic for the People lands another jewel in its crown

John Kenyon
The New York Times

R.E.M. is a band that rarely surprises, a group whose past achievements are at least as plentiful as those that lie ahead. If the new album "Automatic for the People," the group's seventh and most recent, is anything like the band's previous efforts, then the future is not exactly in doubt. Indeed, a few of the songs sound as if they'd been heard before, something that would not be out of the ordinary, given the band's history of borrowing and infusing familiar sounds with new and unusual interpretations.

The debut of the group's first LP, released in 1981, was a triumph of concept over content, a brave attempt to make a rock album that was somehow more than the sum of its parts. The band's subsequent success was built on a series of albums that were often as much about the process of making music as they were about the songs themselves.

After "Automatic for the People," the next step leading to a classic rock station.

For the People is a non-development.

The band always seems to be recording something new, but in reality the sound of the band is still evolving. It is like nothing else in rock music, and the new R.E.M. album pinches a bit of despair.

But where does it go from here? The new record sounds like the despair will continue, but the new record also sounds like it will continue.

The arrangements play well with Peter Buck, often impeccable guitar playing. Patience was used well as "Heartbreak." The only track on the whole record that is in any way a disappointment is the song that track is followed by on the record. It is tough to follow with something so quiet.

Other tracks, such as the piece "Hightower," are not as interesting as the tracks from "Automatic for the People." For the People is a non-development.
