Regent schools take most capital spending

Mike Glover  
Associated Press

BERKELEY, N.Y. — Iowa’s state universities have accumulated $743 million in construction debt in the past decade, according to a report issued Tuesday.

The report, which states that the state’s construction debt has nearly doubled over the past 12 years, found that the debt has grown by $242 million in just the past two years. The report also notes that Iowa State University, the University of Iowa, and Iowa State University of Science and Technology are among the institutions with the highest levels of debt.

The report calls for a comprehensive review of all state university construction projects to ensure that they are necessary and will generate sufficient revenue to repay the debt. It also recommends that the state consider alternative funding sources, such as bond issues or private partnerships, to reduce the burden on taxpayers.

Local community leaders have expressed concern about the state’s increasing debt burden and the potential impact on taxpayers. Some have called for a moratorium on new construction projects until the state can address its existing debt.

In a statement, the Office of the State Auditor said it would review the report and provide its findings to the legislature. The state auditor’s office has previously called for a moratorium on new construction projects due to the state’s debt burden.

The report recommends that the state consider selling off some of its assets to help reduce the debt burden. It also suggests that the state consider requiring universities to pay a portion of their construction costs through user fees or other revenue streams.

The report concludes that the state must take a comprehensive approach to addressing its construction debt, including a review of all projects and consideration of alternative funding sources.

DIVERSITY DISCUSSION
"Greeks Analyzing Our Diversity"
Wednesday, March 10, 7:00 p.m.
Lecture Room 1, Van Allen Hall

"Do Greeks really let other "Greeks" get away? What are the similarities and differences in black and white students? How can diversity be encouraged more?"

"Parties from traditionally black, white, and hispanic cultures discuss the definition of "diversity" in greek cultures and the ways that diversity is or is not embraced. (Audience members can ask questions and make comments.)"

Emergency phones give security

The Daily Iowan

The security of having an emergency phone on the UI campus has been somewhat enhanced, and blue phones have been installed," UI Department of Public Safety Director William Furhmeister said.

"An installation involving over 40 emergency phones has gone forward apace each month. The first week after the phones were installed, there were 17 false alarms, then 10 in February. The phones are being used increasingly," Furhmeister said.

"I hope we'll continue to go down," he said. "In talking to students and residents with similar phones, they usually go down in time," he added.

Solid-waste policy discussed by supervisors

Lydia M. Taff
The Daily Iowan

Parent with a budget than ever and the rising costs of waste disposal, the Johnson County Board of Supervisors said Monday that it is time to complete the Johnson County Solid Waste Plan.

The supervisors next Tuesday with Fred Morton, solid-waste planner for the Johnson County Developmental Disabilities, is the next step in completing the Johnson County Solid Waste Plan.

Supervisor revokes waste on March 30 in rural Johnson County, who live in town or another county where garbage collection is performed.

The county could several counties in businesses, he said.

The application process would determine eligibility of a solid waste service to limit the number of people who can obtain landfill rights.

"We are suggesting lowering the weight limit from 1,000 pounds to 500, and making the county subsidy only $5 with the rural residence paying the other $450," Morton said.

"The Iowa City landfill and the Johnson County landfill may refuse to give access to people who pay taxes for land can not be used for solid waste disposal on charged by the state's third largest landfill, and the 50 be used by the county," Fox said.

"Yes, we need to decide what we want to be in the waste disposal process in the long run," Fox said. He doubled on the current PPEL Board of Supervisors not to extend the waste disposal program before reaching the county policy.

"We do not have to decide what we want to do with our waste disposal program in the long run," Fox said. He doubled on the current PPEL Board of Supervisors not to extend the waste disposal program before reaching the county policy.

Call or write your congressmen to tell them how you feel about the issue.

The Federal Highway Administration is proposing to form states as the legal entity to pass the law with a threat. All states that do not have a helmet law enacted by the end of this year will lose federal highway funds diverted to motorcycle rider education. If that is the case, Iowa loses at least $1.5 million from highway maintenance.

Some Iowa legislators have called the federal government's tactics a "simple-case of blackmail." Just as it happened some years ago with changing the speed limits, Washington has also made it clear that partial losses forming only some population segments (riders under 18 or 21) to the fees increase. And Monday the Iowa House introduced itself. No doubt. We were only allowed to do it in an attempt to break into two and it already longer. We were only allowed to do it during an attempt, and it was a frivolous thing.

The boys look like, the girls look and their idea is to drive with man and people. I will not allow it to do. We were only allowed to do it during an attempt, and it was a frivolous thing.

The boys look like, the girls look and their idea is to drive with man and people. I will not allow it to do. We were only allowed to do it during an attempt, and it was a frivolous thing.

The type of being with man and people. I will not allow it to do. We were only allowed to do it during an attempt, and it was a frivolous thing.

In the U.S., 30 million people own motorcycles, and 15 million ride them on a daily basis. About 5,000 people die in motorcycle accidents each year. The average cost of a death is $2 million, and the cost of injuries is $1 billion per year. The direct costs of motorcycle accidents in the U.S. exceed $6 billion per year. And that doesn't even include the indirect costs, such as lost wages, medical care, and property damage.

One of the most significant challenges facing motorcyclists is the lack of visibility. Motorcycles are often difficult to see on the road, especially at night or in poor weather conditions. To improve visibility, motorcyclists should wear bright clothing and use lights when possible. They should also be aware of their surroundings and use hand signals to indicate their intentions.

Motorcycle riders also face a higher risk of injury than drivers of other vehicles. The lack of a protective enclosure means that riders are more vulnerable to injuries. To protect themselves, riders should wear helmets, protective clothing, and gloves.

Finally, motorcyclists should be aware of the laws in their area. Some states require helmets for all riders, while others do not. It is important to know the laws in your area and follow them to ensure your safety and the safety of others.

In conclusion, motorcycles are a popular and enjoyable mode of transportation. However, they also present unique challenges. By being aware of these challenges and taking steps to protect themselves, motorcyclists can ensure a safe and enjoyable ride.

The U.S. is a nation of cyclists, with 30 million people owning motorcycles. However, there are growing concerns about the proliferation of electric motorcycles. Some argue that they are a safer and more environmentally friendly alternative, while others worry about their impact on the environment. It is important to consider both sides of the argument and make informed decisions about our transportation options.
Bill Clinton desperately wants to sell his new proposals as a once-in-a-generation progressive plan that would sustain the rich to shoulder the main burden in saving the sick and the elderly. But if he cannot further the rich, he cannot win.

Clinton’s plan is little more than a thinly veiled political strategy to shore up the living standards of the average worker. If the Clinton plan is illustrated to get the rich to offset the rich in the 1970s, the Clinton plan is illustrated to get the rich to offset the rich in the 1980s. Hardly.

Clinton’s broken promise on a rate raise to working people.

Clinton has reneged, moreover, to keep the 40-year-old promise of increasing the rich’s rate by 3% to 5% a year since Ronald Reagan’s first tax cut of 1981. During the 1980s, the average tax cut of the rich was 14% per year. If the rich have benefited from 37% tax cuts in the 1980s, Hardly.

Clinton’s broken promise on increased Social Security benefits.

Karen Hall
Associated Press
WASHINGTON — A "well-known terrorist group" is likely responsible for the fatal shooting of a police officer in Coralville, Iowa, late Saturday night, said a top local law enforcement official.

"We're saying it's a group that has been identified, and we have very good reason to believe it is not an isolated act of terrorism," said John Yonts, Iowa's chief state law enforcement officer.

In a file photo, two police officers stand outside the Coralville Police Department on Sunday, March 20, 2022.

Terrorist group

Police officers were responding to a report of a domestic disturbance when they were shot, Yonts said. The death of the officer, identified as Officer Paul Henry, was the first line-of-duty death in Coralville, a city of about 45,000 people.

According to Yonts, the officer was shot multiple times and died at a hospital. He said the investigation is ongoing and that more information will be released as it becomes available.

Yonts said the officer was on duty and responding to a call when he was shot. The investigation is being handled by the Coralville Police Department, the Iowa Division of Criminal Investigation, and the FBI.

"We are working with all the relevant authorities to make sure we have a thorough investigation," Yonts said.

The Coralville Police Department said in a statement that the officer was shot while maintaining a "high-risk call," which is a term used to describe situations where there is a risk of violence.

The statement said the officer was shot while responding to a call in the 1300 block of Iowa Street. The department said the officer was shot multiple times and died at a hospital.

A spokesperson for the Coralville Police Department did not return calls for comment.

"I'm sure the community is devastated," said Yonts. "We're working with all the relevant authorities to make sure we have a thorough investigation."

Ice Hawks net hat trick

Juanita Mitchell and Toni Davis hit the game-winning goals as the Ice Hawks swept the weekend series against the Milwaukee Admirals, 6-1, in the semifinals of the Western Hockey League playoffs. The Ice Hawks will face the Chicago Wolves in the Western Conference finals, the title game.

**BASEBALL**

Clinton to kick off season

**DAYTONA BEACH, Fla.** (AP) -

"...and dad will help major league baseball get started here," said his sister Pam, Gary. He was 65. Gary spent 22 years as a major league baseball player, including from 1955 to 1961 for the New York Yankees and the Chicago Cubs, and 1962-64 for the New York Mets. Gary was a right-hander and a first baseman.

First black All-Star dead at 77

**OAKLAND, Calif.** (AP) -

Dewey Johnson, the first black player to make the NBA all-star team, died Sunday of cancer. Johnson was 77. Johnson was a guard for the Boston Celtics from 1961 to 1964.

**BOXING**

Fighter objects to ring announcer

**MIAMI** (AP) -

"I think announcer Howard Moses is just a despicable human being," said Mike Tyson's ring announcer, Bob Rutledge. "I think he's just a bad guy who goes around making up things and saying things to get his point across."

**NFL**

Judge rejects Marshall

**MINNEAPOLIS (AP)** -

A federal judge has rejected a Minnesota Vikings' appeal of a fine and suspension for Minnesota Vikings tackle Fred Marshall.

**Hawks learn to temper aggression**

**Jen Goldman**

The Daily Iowan

**EDITOR'S NOTE:** This is the second in a three-part behind-the-scenes series by Daily Iowan reporter David Goldman, focusing on the two top defensive players, the Wisconsin Badgers and the Iowa Hawkeyes. The first part was published on February 11. The third part will be published on February 25.

Dave Gable and his wrestlers have been referred to as a “rugged pack of warriors” and a “force of nature.” They are not known for their finesse or refinement. They are known for their raw power and their unrelenting aggression. They are known for their ability to control the flow of a match and to dominate their opponent.

Jen, who is the Hawkeye’s head coach, is the first to admit that her team has a lot of questions. She is not sure how they will fare against the Badgers, who are known for their defense and their ability to shut down an opponent.

Jen has been working with her team to teach them how to control their aggression and to learn how to control the flow of a match. She has been encouraging them to think about what they are doing and to control their emotions.

Jen is hoping that her team will be able to control their aggression and to learn how to control the flow of a match. She is hoping that her team will be able to win a match and to control the flow of a match.

"You can be two different people in your life," said Haws. "On the court, nobody should be your friend, but when you are out of it, here, you have to be a human being."

Hawks adds that the intensity he brings is needed to the practice floor.

"I want to challenge all of these kids to try and do more than we did in the past, if you want to be better than what we were recently," he said.

WRESTLERS: Controlling tempers not easy

Contrasted from Page 10 Page

"Trying to control the wrestlers is not easy," said John Hawk. "Sometimes you have to be tough and sometimes you have to be soft."

Hawk says that theFILE page is not a place to control the wrestlers.

HAWKEYES: Davis utilizing bench more

Contrasted from Page 10 Page

"We are utilizing the bench more," said Davis. "I want to give everyone a chance to play and see who works best for us."

Davis adds that the FILE page is not a place to control the bench.

Picking teams not done for TV

Doug Tucker

KANSAS CITY, Mo. — The Big Ten Conference is releasing its 2013 NCAA tournament selection committee. The committee will be released Friday morning, and it will be used to determine the selection of the tournament.

The committee will begin selecting teams Friday morning, and it will be used to determine the selection of the tournament.

"You can always look and say, 'I bet that was done to enhance TV.' But it is just simply isn't the case, it is not an issue," said Davis. The committee

Tom Butts Chairman of NCAA tournament selection committee

The nine committee members do not have any overlap, and they are selected by the league's athletic directors.

The sport's athletic directors at two-time defending champions Duke, Maryland, North Carolina, and Virginia will be on the committee. The sport's athletic directors at two-time defending champions Duke, Maryland, North Carolina, and Virginia will be on the committee.

"The committee will consider a variety of factors when selecting teams, including but not limited to: strength of schedule, quality of non-conference opponents, quality of conference opponents, quality of wins, and strength of conference opponents," said Davis.

"We will go back to the selection committees and review this year and see how it went," said Davis.

The committee will be released Friday morning, and it will be used to determine the selection of the tournament.

MICHELLE GOODMAN

ANN ARBOR, Mich.—Michigan head coach Steve Fisher said he was in the wrong place at the wrong time but he was doing nothing wrong when he was arrested and taken to a police station for questioning during a drug raid.

"I was doing nothing wrong," Fisher said during a news conference Tuesday. "I was there to help a friend." The charges against him, however, led to the firing of Fisher after the raid. Fisher is the father of the head of the Detroit Police Department Stanley Knox.

"I think it's really unfortunate," Knox said. "We need to put our energy into finding out what happened." He added that police sometimes make mistakes.

Chairman Fred Pyle of the Michigan State Police said Fisher was not involved in any police activity, and that he wasn't even there at the time of the raid.

"I don't think I have anything to comment about that," Pyle said. "I can tell you that we've had several complaints about Fisher's sleeping habits." He added that Fisher had been involved in some sort of drug-related activity.

"I think it's important to have good police officers on the force," Knox said. "I think we need to do something about that." He added that Fisher had been involved in some sort of drug-related activity.

The FBI is investigating the case.

The Detroit Police Department said the police decided not to put Fisher on trial.

"I think we've got a lot of work to do on this," Knox said. "I think we need to go back and look at it." He added that Fisher had been involved in some sort of drug-related activity.

The Michigan State Police said they didn't have any specific information about Fisher's involvement in the case.

"I don't think I have anything to comment about that," Pyle said. "I can tell you that we've had several complaints about Fisher's sleeping habits." He added that Fisher had been involved in some sort of drug-related activity.

Vertigo's trade paperbacks helpful to new readers

Tasha Robinson
The Daily Iowan

One of the most interesting things about comics is the difficulty of picking up the medium if you missed the first few issues - or ever read them at all. Even people who plan to stick with a series for years can find themselves lost back under back issues, knowing that a new reader will have a hard time picking up any issue in a given series, which is why it's helpful to wind up through the pages of the new reader.

This week, Vertigo trade paperbacks will be available from DC Comics' "new-reader" series, which in itself is noteworthy because it's the first of its kind. The series is a collection of original stories, written by some of the best names in the business.

"Strange Adventures" in the 20, don't worry - a superhero with ultra.
