Stringer sheds tears of joy after weekend victory

The Iowa women are to face Big Ten rival Ohio State.

Jay Nomada

Victor Stringer might only cry. The Iowa women's basketball coach has done more than his share of talking about this season. Over the course of the year, there were trials of joy. "We have a lot to be proud of in Iowa history," Stringer said.

This special season saw Hawkeyes' 72-56 victory over Tennessee, its second-ranked team, Saturday at Carver-Hawkeye Arena. The win propelled No. 1 Iowa into its first-ever Final Four in Atlanta; what's more, it reflects a 27-game winning streak that has the team ranked second in the nation.

"I am now a little bit more at peace with how much I have," Stringer said. "It's not 100 that I've wrestled with a lot, but I'm more at peace with it now."

"That's what makes it so special," he added. "It's made to happen. And for that reason, we have to be proud.

"I would have asked Stringer a couple of months ago about the possibility of winning the Final Four; it may have been the last thing from her mind. As improbable.

"I think I was going to be happy if I could have a smile on my face as I have my twice and my hands on a basketball. I wouldn't," Stringer said. "I thought I would help us.

"Because I was a sense of completion and strength for me in the way I've been winning the twice," Stringer said. "I've been winning the twice with all the hopes and all the things.

"That's the thing everybody has been watching with the university. That's the thing everybody has been watching with Dino."

"I think that's what I'm all about. I have never felt that I'm going to be surrounded by people like me."

Iowa women's basketball coach Vivian Stringer sits down the net in celebration of the Hawkeyes' 72-56 victory over Tennessee in the NCAA Michael Regional Final Saturday at Carver-Hawkeye Arena. The win earned the Hawkeyes a trip to the Final Four for the first time in school history.

Beheaded dino baffles custodies

Jan Taylor

The Dinosaur, mascot of the Sinclair Station located at 2153 ACT Circle in Iowa City, lost his head head last week.

"It does bother me when someone comes in and asks what happened to the dinosaur. It's obvious what happened to someone cut his head off," Lonnie Vivian, clerk.

"It's a shame," said one customer, as he walked out of the station with his head in his hand. "It's a shame when someone is a kid and they take it.

"I'm not the guy who is a kid, but I'm probably the guy who is a kid," Vivian said. "I think it's a shame when someone comes in and asks what happened to the dinosaur."

"I do hope it gets replaced," she said.

Yeltsin heralds success after failed impeachment

Alan Cooperman

"It's a shame," said one customer, as he walked out of the station with his head in his hand. "It's a shame when someone is a kid and they take it.

"I'm not the guy who is a kid, but I'm probably the guy who is a kid," Vivian said. "I think it's a shame when someone comes in and asks what happened to the dinosaur."

DNR hatcheries restocking trout streams

At the Iowa City hatchery, 90% of the fish we restock are rainbow trout. The other 10% are brown trout.

There are currently 14 trout hatcheries operated by the DNR throughout Iowa. Each hatchery produces thousands of fish annually.

The hatchery process involves several steps:

1. Collecting eggs from wild populations
2. Incubating eggs in hatcheries
3. Rearing fish from fry to fingerlings
4. Restocking lakes, streams, and rivers

The DNR hatchery programs are designed to provide anglers with high-quality fish for recreation.

Three main hatchery systems are used:

1. Anadromous - Hatchery-reared fish that return to freshwater to spawn.
2. Reservoir - Hatchery-reared fish that are released into reservoirs.
3. Coldwater - Hatchery-reared fish that are released into coldwater streams.

The hatchery process includes:

- Collecting eggs from wild populations
- Incubating eggs in hatcheries
- Rearing fish from fry to fingerlings
- Restocking lakes, streams, and rivers

The hatchery fish are released in various locations such as:

- Lakes
- Streams
- Rivers
- Reservoirs

The hatchery fish are typically released in the spring to ensure their survival.

The hatchery process involves:

Students volunteer for habitat service

Chris Woltman  The Daily Iowan

While many students were spending a typical spring break vacationing in warm and sundrenched parts of South Padre or Destin, two UI students gained a unique advantage of the week to go on service projects to help the less fortunate.

The UI chapter of Habitat for Humanity and the UI Association for Habitat Mississippi traveled to a rural area in the state to help build houses for low-income families.

"It was an empowering experience being able to help in that kind of area," said Woltman.

The homeowners are chosen according to an application process based on need and their ability to put back interest loans on the houses. Staley said that the UI group will work a certain number of hours on their house, but the homes are arranged known as "sweat equity."

"That said the real was a team effort in Missippi, which is located in the middle of a national forest. "It's just a beautiful area, and there's a lot of work to do there," she said. "We just kind of fell in love with it last week."

"This was our first trip with Habitat this year," Woltman said. "I am looking forward to coming back with a single mother and her three children."

"It was definitely an alteration of the tropical vacation. It created more meaning than your typical spring break trip," she said.

While in Mississippi, the group did a bit of work on the roof of the house, as well as putting up some new sheathing on the roof. Woltman said, "The people there said that with- out us they would have never been able to do that, saying it was a beautiful area."

"I think all of us are really felt it was a very rewarding experience," said Brian Farr, one of the organ- izers of the UI-Mississippi Association for Habitat.

Another UI student, Forrest, said, "I didn't expect to help, but I loved it."

"It was amazing becoming friends with new people. There Habitat just gained a lot of volunteers and donations from the community," he said. "We made friends with some really nice people there.

"While in the community, the newspaper did an article about us, and that as a digital pens, people come up and asked if we ever gave from Iowa City. The woman had a tear in her eye."

The UI group was somewhat disappointed that it could not put a service project closer to Iowa City, but that could change came next year, he added a Habitat/ UI volunteer group will be formed. "I think we should help the people around with Habitat," he said.

"As a Habitat volunteer, we do find people who do find us," Forrest said. "It was the most rewarding experience I've had, and it was very rewarding."

The UI-Mississippi Association for Habitat is now open to students from other colleges, as well as UI students. "We are very enthusiastic," she said. "You should help the people around with Habitat," she said.

"I think all of us are really felt it was a very rewarding experience," said Brian Farr, one of the organ- izers of the UI-Mississippi Association for Habitat.

Big springs, big experience

Elena MKA students, as well as many other students, participated in the UI Spring Break Experience. "I think all of us are really felt it was a very rewarding experience," said Brian Farr, one of the organ- izers of the UI-Mississippi Association for Habitat.

"It was amazing becoming friends with new people. There Habitat just gained a lot of volunteers and donations from the community," he said. "We made friends with some really nice people there.

Electronics push conservatives in strong position

Patrick McDowell

Washington — Conservatives and New Democrats moved closer to a deal on the powerful House Appropriations Committee Tuesday, as the New Democrats’ threat of an all-night filibuster ended.

The two sides reached an agreement on spending levels, but not on key issues like health care and Social Security.

The deal would allow the committee to move forward on its budget resolution, which the New Democrats want to include as a floor amendment.

The agreement includes $1 billion in new spending for education, health care, and environmental programs. It also sets aside $3 billion for a new infrastructure plan.

The New Democrats have been trying to force a vote on their plan, which they say would create thousands of jobs and reduce the deficit.

But the agreement leaves unanswered questions about how much of the new spending would come from existing revenues and what would happen if the economy slows.

"We’re very happy to have made this progress," said one Democratic leader. "But we’re also clear that we need to keep fighting for a more robust plan that helps working families and our middle class."
Analysis finds NPR lacking in diversity

Mitchell Landers
Associated Press

NEW YORK — National Public Radio, long a target of conservative criticism, was found Monday to have a liberal mindset, with most of its top-ranking positions held by whites.

According to a study commissioned by NPR, its programming and audience are of a liberal bent. The study found that 71 percent of NPR's programming target audience is considered liberal, with another 9 percent considered moderate.

The study also found that NPR's programming is more likely to feature topics related to social and political issues than to entertainment or sports.

The findings come as NPR faces criticism from some quarters for its perceived bias.

In a statement, NPR said the study is not intended to influence programming decisions, but rather to better understand its audience.

The study was commissioned by NPR's president, ScottStringham, who said the network is committed to diversity and inclusion in all aspects of its programming and operations.

The study found that NPR's programming and audience are of a liberal bent. The study found that 71 percent of NPR's programming target audience is considered liberal, with another 9 percent considered moderate.

The study also found that NPR's programming is more likely to feature topics related to social and political issues than to entertainment or sports.

The findings come as NPR faces criticism from some quarters for its perceived bias.

Incentive factor fuels emotional 72-56 win
Jay Nanda
The Daily Iowan

The Iowa Hawkeyes didn't need much more than incentives Saturday to get their season back on track.

"The Final Four game is in the year," Iowa Coach Larry Bรถยn said.

But this game is very important, a game that has already been purchased.

The Hawkeyes and Buckeyes (27-3) now match the team's 28-for-34 at the charity stripe and their 34-34 assists.

Iowa's defense is one of its best and it was that defense that was the deciding factor in the game.

The Hawkeyes led 28-23 after the first half and Iowa and the Buckeyes were tied at 4-4 in the second half.

The Hawkeyes led 28-23 after the first half and Iowa and the Buckeyes were tied at 4-4 in the second half.

The Hawkeyes' defense made it a tough game, allowing only 11 points in the second half.

But Iowa's defense was not enough to win the game, as the Hawkeyes lost 88-86 in overtime.

"We need to come out of this game in a better place," Bรถยn said.

The Hawkeyes are back in the top 10 of the Associated Press Top 25, after being ranked No. 1 in the nation.

Michigan, Tar Heels round out semifinals

Associated Press

IOWA CITY - The "Fab Five" were just too fabulous for Temple.

Michigan had too many players with too much talent for the Owls, who fell to the Wolverines 71-47 in the West Regional semifinal.

"We thought we were out," Temple Coach John Chaney said.

For Temple, this was the end of their season, as Chaney said.

And for Michigan, this was just the beginning of their season.

But for Temple, this was the end of their season, as Chaney said.

Hawk trio shares pain and glory

By Nanda

The Daily Iowan

Troy exited NCAA Wrestling after the last match, it would have lost. So I4 I had the slight edge at the last second, at 133 pounds.

The story of McCrory and his teammates, Hayden and Trumbull, was almost too good to be true.

FEB. 6 - Coach Dan Gable said in the post-match analysis that he was proud of his team for making it to the NCAA Wrestling Championships at that level.

The move did not appear to hurt the team in any way.

The move also benefited the team in the last match against American

The move was made in the interest of the team.

Northwestern missed its first opportunity to win the NCAA team title.

Interestingly, the move was made in the interest of the team.

Pacino’s methodic oldies truly golden

Ian Carroll and Ted Pavlidis

The Daily Iowan

They’re a dying breed. Short, dark-skinned men who just seemed the best to good ladies and have to get so by us.

Imagine being a method actor back in the 1940s. You portray the vice-president of a certain company in "A Streetcar Named Desire," and make damn sure that when you’re through. what you’ve said and done words to pass your life as an impor-

tance of life and the world. William... People look at method actors and say "What’s his saying?" The saying requires a whole era to unfold.

It’s a great circle of life. By playing the same kind of role, the same era of life, a whole circle of life begins to un- fold. You may be in the shallows of a minor role, but you’re joining the circle of life.

Pacino looks like a man who’s been watching and waiting, a man who perhaps has tipped a few at Times Bar, a man who has a warm heart and a warm smile. A man who can sympathize with the good ones in his world.

They’re a class of actors that no one ever seems to want to hire anymore. But there’s something about Pacino that makes him want to hire.

He’s got the Oldies. He’s got the Oldies that make the best to good ladies. He’s got the Oldies that make the best to good ladies and have to get so by us.

Crumb visits campus for Boatright recital

The composer will give a free lecture Tuesday.

The Daily Iowan.

Noted American composer George Crumb will visit the UI for a series of concerts this week in connection with the School of Music's annual guest lectures. Crumb is known for his use of subtle instruments and his odd ensembles. At Boatright tonight at 8 it's "Iigih Rock Vocal". Boatright will perform Crumb's "Makrokosmos" volumes I and II during the recital, which is free and open to the public. Crumb will also perform the music of other composers in the "Makrokosmos" concert on Thursday and will appear in a workshop on Friday.

Crumb, 60, was born in Delaware and moved to Pennsylvania when he was seven. He received his Ph.D. from the University of Southern California and is now on the faculty of the University of Pennsylvania. He has received many awards and commissions and has been the recipient of a Guggenheim Fellowship and a National Endowment for the Arts Grant. Crumb is known for his use of unconventional instruments and his unique style of music. The lecture will be given in the newly renovated Boatright Recital Hall.

THE GOLDFID GOLDEN

Best Picture nominees to duke it out tonight

Bob Thomas

Associated Press

Hollywood's magicians, playing two amplified pianos and singing, will be duking it out tonight at this year's Academy Awards. The59th Annual Academy Awards ceremony will be held at the Shrine Auditorium in Los Angeles.

Here is a rundown on the five nominees for Best Picture, each of which is related to one of the 12 zodiac signs:

ROBINSON CRUSOE ON MARS

The story comes from Aaron Sorkin's script for "A Few Good Men," written and directed by Rob Reiner, and starring Gene Hackman, with co-stars Jack Nicholson and Tom Selleck. It is a Cold War thriller about a Soviet submarine that is captured by U.S. forces. The film is based on the novel by Tom Clancy, which was published in 1984 and has been adapted into a Broadway play, which was produced in 1991. The film was nominated for three Academy Awards, including Best Picture, Best Director (Rob Reiner), and Best Original Screenplay (Aaron Sorkin). It was also a box office success, grossing over $200 million worldwide.

DOONESBERRY

The film is based on the popular comic strip by Garry Trudeau, which has been running since 1970. The strip follows the adventures of a high school student named Doonesbury, who is always getting into trouble and making up stories. The film was directed by Garry Trudeau and stars a star-studded cast, including Bill Murray, Chevy Chase, and John Candy. It was a critical and commercial success, grossing over $100 million worldwide.

WALTZ WITH BLOODY FINGERS

The film is a British crime thriller that was directed by Mike Leigh and stars Timothy Spall and Gemma Arterton. It is based on a true story about a man who becomes a却又杀的and becomes a success. The film was nominated for two Academy Awards, including Best Picture and Best Director (Mike Leigh). It was also a critical success, receiving positive reviews for its performances and direction.

GODFATHER

The film is the second installment in Francis Ford Coppola's "The Godfather" trilogy. It stars Al Pacino, who returns as Michael Corleone, and Marlon Brando, who returns as Vito Corleone. The film was nominated for eight Academy Awards, including Best Picture, Best Director (Francis Ford Coppola), and Best Actor (Al Pacino). It was also a commercial success, grossing over $100 million worldwide.

A BEAUTIFUL MIND

The film is a biographical drama that was directed by Ron Howard and stars Russell Crowe. It is based on the life of John Nash, a mathematician who suffers from paranoid schizophrenia. The film was nominated for four Academy Awards, including Best Picture, Best Director (Ron Howard), and Best Actor (Russell Crowe). It was also a critical success, receiving positive reviews for its performances and direction.

The Academy Award nominations for Best Picture were announced on Wednesday night at the Academy of Motion Picture Arts and Sciences' headquarters in Hollywood. The nominations were announced by Academy President Jennifer Fox and Academy President-Elect Margaret Mazzell. The nominees for Best Picture were:

1. "Robin Hood: Prince of Thieves"
2. "Doonesbury"
3. "Waltz with Bloody Fingers"
4. "Godfather"
5. "A Beautiful Mind"

The winners will be announced at the Academy Awards ceremony on April 25, 2000, at the Shrine Auditorium in Los Angeles. The Academy Awards are presented by the Academy of Motion Picture Arts and Sciences to the best films and performances of the previous year. The awards are considered to be one of the most prestigious awards in the film industry.
