UI pleased with athletes' graduation rate

Cheli Petersen

The Daily Iowan

The six-year graduation rate for UI student-athletes continues to improve the graduation rate overall, according to the UI Graduation Rates Report to the NCAA.

Of the student athletes with graden-to-aid who entered the UI during the 1996-97 school year, 61.5 percent graduated, up with 8.4 percent of the total student population.

Norman Becker, faculty representative to the UI Board of Control of Athletics, said he was very pleased with the news. "We're trying to get 70 percent of the UI student athletes to graduate," he said. "This year is a step in the right direction." The NCAA has required Division I universities to increase the graduation rate report since 1998. The NCAA provides a breakdown for graduation rates by sex and athletic participation on its website. Becker also noted that the report, the six-year graduation rates for both the general student body and the student athletes have remained fairly steady over the past four years. He said a percentage point difference between the two rates has now become a standard. The higher the student-athlete graduation rates are also found when the rules are broken down by sex. In those of the past four years, the male athletes have graduated at rates which are 1-1/2 to 1-3/4 regular male students. Female athletes have graduated at rates 1-1/2 to 1-3/4 percentage points higher than those of the total group of female students in the last three years.

Professor Dean E. VIdt, 79 percent of female and 65 percent of male student athletes graduated at rates of 79 percent of the female and 64 percent of the 1996-97 entering class.

Becker said the graduation rates for the student athletes are not high enough and that all intercollegiate athletics that young people do need involvement. "I hope they will work on this," he said. "We have to make sure that they have an eligibility."

NEW PROGRAM

Universal IDs may be part of care plan

The medical ID cards would theoretically use radiation-emitting technology numbers, a prospect which bothers some.

Sgt. Craig Hendrickson, Associated Press

WASHINGTON - President Clinton's proposal for a universal health care plan which would include Medicare for all Americans, will likely include a medical identification card for all Americans, said a Medicare official, at the White House on Monday.

More than 50 million Americans have no health insurance.

All patients who want to claim a child as a tax deduction must now get a Social Security number before the child is born.

But Clinton's proposal would require all Americans to have a medical card which could be used to identify a person or receive medical care services.

The card would be linked to a computerized, person-to-person system which would include information, such as a Social Security number or other identifying information.

Many critics say the medical card would be used to track health care services of all Americans, such as doctor's visits or hospital stays.

But Clinton's plan would allow for the medical card to be linked to a computerized system which would provide information about a patient's medical history.

According to Clinton's plan, the medical card will be used to track all medical services, such as doctor's visits or hospital stays, for all Americans.

The medical card will be used to track all medical services, such as doctor's visits or hospital stays, for all Americans.

The medical card will be used to track all medical services, such as doctor's visits or hospital stays, for all Americans.

CARRYING ON PEDALENS

Food cart convenient for students on the go

Brad Hoge
The Daily Iowan

With a desire to eat and be fed, the students of the University of Iowa have been known to travel to the Food Court located in front of the Main Library for food. But with the food court on a short break to review on Monday, twenty-first floor food was back on the menu.

"I go to the Iowa City Mall," said student Lisa Hid. "I go to the Iowa City Mall, and I just love the mall. I love how it's very clean and that you can just go into any of the stores and get something to eat."

Freshman Jennifer Sayers, a communication studies specialist, said that the Food Court offers a variety of food options.

"I usually go to the Food Court," Sayers said. "I go to the Food Court because I like the variety of food and it's very convenient."

Another student, junior Nicole Klemme, said that she prefers to eat at the Food Court because it's close to her dorm.

"I go to the Food Court because it's close to my dorm and it's convenient," Klemme said. "I go to the Food Court because it's close to my dorm and it's convenient."

The real problem

Whatever Hillary Clinton and her staff came up with for a national health-care proposal, it will probably be a good one. After all, it’s a well-known fact that 100 million Americans who don’t have health insurance today. However, it’s also a fact that the biggest problem involving health care in America is stupidity.

If you don’t believe that, all you have to do is ask them what’s the reason that insurance plans are so expensive. There are a couple of reasons why this might be so, but one of them is that the country is in a state that is way too stupid to pass intelligent legislation. No matter what plan is passed, some of it is going to be rejected, and some of it is going to be cut. Thus, we will have a health-care system that is too expensive, too bureaucratic, and too stupid.

Some people might blame stupidity on the fact that the country is too rich. However, this is a myth. The country is too rich only because it is too stupid to use its funds wisely. If the country were more intelligent, it would have found a way to use its funds wisely.

In the end, the problem is not that the country is too rich, but that it is too stupid. If the country were more intelligent, it would have found a way to use its funds wisely. However, since it is too stupid, it will continue to be too rich.

No matter what plan is passed, some of it is going to be rejected, and some of it is going to be cut. Thus, we will have a health-care system that is too expensive, too bureaucratic, and too stupid.

Now, all of this is not to say that the health-care problem is not a serious one. It is. However, it is not a problem that cannot be solved. The problem is that the country is too stupid to solve it.

Athletics: preference or gender equity?

When I read the recent reports about the prob­lematical nature of the proposed changes in athletic scholarships, my first reaction was, “What a bunch of nonsense!” My second reaction was, “What a bunch of nonsense!” My third reaction was, “What a bunch of nonsense!”

I have been involved in athletics for many years, and I have seen the problems that arise from these changes. I have seen the problems that arise from these changes, and I have seen the problems that arise from these changes.

In the end, the problem is not that the country is too rich, but that it is too stupid. If the country were more intelligent, it would have found a way to use its funds wisely. However, since it is too stupid, it will continue to be too rich.

Critics skeptical of new crime bill

The Iowa Senate, with approval of tough new measures to confront vapers, has made a proposal that would have many people feeling nervous and others feeling that it would not make a difference.

Sen. Gloria Thomas, a Democrat who represents the Iowa City area, said the proposal would not only be expensive but would not be effective. She said it would be difficult to enforce and would not make a difference in reducing crime.

"People who are bad actors are not going to change their behavior because of a law," she said. "We need a better approach that addresses the root causes of crime and makes the system work for everyone, not just a select few."

McGuire further recommended to the students that any decision made must be carefully thought through. He almost thought out in his first year.

"I had to decide whether I was going to be that," he said.

In the question of grades was brought up by one of the students. McGuire said many students say that the courses they take are going to be the most important they take.

"If you're not satisfied, then you've got to find the way to make it worth your while," he said.

McGuire spoke to the attentive class, who had spent the night before in the residence halls with student hosts, about the process of decision making.

"Everybody's ideas have.id. You can make any decision, but you have to look at the decision and how it affects you in the long run," he said.

McGuire asked clarifying ques-
tions and generally got the answers he had been looking for.

Yeltsin uses summit to gain clout

President Boris Yeltsin is using the occasion of his trip to the United States for his first summit with President Clinton to advance his political agenda.

Yeltsin, who was in Washington for meetings with Congress in preparation for his scheduled summit with Clinton, said he was seeking to use the summit to push through legislation that would allow him to land his reform teams in hard-hit regions.

Clinton and Yeltsin are scheduled to meet Tuesday for a working session that will likely last two hours.

The Russian leader's efforts to cast himself as a paragon of pragmatic leadership and his readiness to accept criticism and offer concessions are part of a broader trend in Russian politics, as well as his own personal ambition to reshape the country.

The summit will also provide an opportunity for the two leaders to address issues of mutual concern, such as the situation in Chechnya and the ongoing negotiations in the North Atlantic Treaty Organization.

Marking the first anniversary of the US reduction of landmines in Bosnia and their residents, Bosnia today marks the 1st anniversary of the civil war.

The US reduction of landmines in Bosnia and their residents, Bosnia today marks the 1st anniversary of the civil war.

On this day, the Bosnian government officially declared a cease-fire, and the people of Bosnia celebrated with parades and fireworks. The Bosnian president, Alija Izetbegovic, said in a speech that the cease-fire was a significant step in the long, difficult process of peace in the region.

"We have been through a lot," Izetbegovic said. "But today, we are seeing the beginning of a brighter future."

Workshop grad Harrison to read from ‘Exposure’

The Daily Iowan

UI Writer's Workshop guest reader Kristin Harrison will hold the first of three readings at 5 at Prairie Lights Books, 143 SE 6th St., in Iowa City, at 7 p.m. This is the second of a two-week run of readings.

The workshop, sponsored by the English Department, is held at the bookstore, and open to the public.

Harrison, who is the author of "Exposure," will present her work to the audience.

"Exposure" is Harrison’s second book, and was her first book to be published.

The novel focuses on a young woman who is struggling to come to terms with her addiction to speed.

The novel has been praised for its raw depiction of drug addiction, and has been compared to other works such as "The Electric Kool-Aid Acid Test."
MADDUX: Shuts out Cubs

Continued from Page 1

"I just wanted to stay relaxed, go out there and do my best," Maddux said. "I spent a lot of time on the other side. I enjoyed the fans. I've never before gone to play the teams I spent in Chicago. Up to now, the best part of my career was three years ago."Morgan was the hard-hitting first baseman for the North Carolina Tar Heels with Shannon Dunham and Eddie Locklear. They were both about 6-foot-3, 210 pounds. Morgan matched Mabry's victories in the rematch and had 15 points for the Wolverines. "I was surprised to see him, "Maddux said. "It was just great. I didn't expect him to be there."

North Carolina tied at 25 when William's first point covered the 10-foot point line, but North Carolina's Mike Naylor added a point on a basket to win. Michigan had 24, North Carolina just four.

TAR HEELS: Win national title

Continued from Page 14

The Tar Heels with Scott Sabo and his 15-point streak are the dominant team of the tournament. They are the only team to have come close to winning the title in the final two games. The Tar Heels have been hot in the national championship games, but have never won.

The Tar Heels beat the Wolverines, 71-68, in their last meeting in the NCAA final four. This time, the Tar Heels were too much for the Wolverines, who were averaging 74 points per game in the tournament. They have won four consecutive games in the tournament, but have yet to win a national championship.

With 3:45 left in the game, the Wolverines were up 12-10, but North Carolina's Mike Naylor added a point on a basket to win. Michigan had 14, North Carolina just four.

The Tar Heels beat the Wolverines, 51-46, in the final game of the tournament, with Scott Sabo leading the way with 15 points. The Tar Heels have been hot in the national championship games, but have never won.

Tuesday, March 18, 1997

The Indians then lost their season opener to the Boston Red Sox, 5-0.

"I didn't even know those guys, but watching crews with out them, those were amazing games," said Alomar, who is a native of Cuba.

Palmer then bounced back, leading the Texas Rangers past the Baltimore Orioles.

"I got the ball up there and it was a whole game," said Smith, who gave up six hits, including three home runs. "I was concentrating. There are some blue jays that you get away with high fastball, but this wasn't one of them.

The two scored on a wild pitch by Smith.

"We're going to need our pitching," said Smith, who improved to 4-1 on May 2.

KANSAS CITY, Mo. — Super Slammer now something to the victory over Kansas City that was the first of the season for the Indians.

"That's unbelievable right now," said Alomar, who is batting .282.

Crews pitched seven scoreless innings, giving up only two hits.

"It was a two-two game going into the eighth," said Alomar, who is batting .282.

"The Indians, 3-7, and Crews, 8-1, defeated the Blackburn 6-1 as a result of the Indians' batting.

Iowa women celebrate season, team character

Terry Steiner

Iowa's 30-8 season, by any measure, qualified as a success. The Hawkeyes finished one game out of first place in the Big Ten, then claimed their first NCAA Tournament bid in 17 years.

Some Hawkeyes attribute the team's success to easily overlooked contributions, like the work of head coach Lisa Bluder and her support staff.

"Our support staff, especially the athletic trainers and nutritionists, always give us support," senior guard Micaela Kelly said. "I think they're the unsung heroes of the team."

The Hawkeyes are among four candidates to win the Big Ten title. They will host the conference tournament this weekend.

Truman State and Women's Basketball

The home opener for the second home tournament of the season is scheduled for Saturday, November 12.
