**New technology changing career plans**

Computer-oriented majors are growing in numbers and are putting more emphasis on career counseling. The number of registered computer science majors in the United States has increased by about 20 percent in recent years, and many universities are concerned about finding a job after graduation, according to data from the National Center for Education Statistics.

"Some people are interested in becoming computer scientists, but many others are looking for jobs in other areas," said John Smith, assistant director of the computer science department at the University of Iowa. "With more graduates coming out of our department, we need to help them find jobs that are in line with their interests.

"We need to work more closely with employers and students to ensure that our graduates have a better chance of landing a job," said Smith. "We need to provide them with the skills and knowledge they need to succeed in the job market."
The program is but a workshop, but a residency lasting 90 days. Iowa Publishing is a series of retailers from over 100 countries who have participated and completed the program. Writers are given time to write and experience a flawed system. Money for living, housing, food, and travel are provided to the participants. Huawei said, “Last year we had 20 writers. Collectively, they had a total of 157 volumes of poetry, fiction, essays, and plays.”

As a result of the flooding, Iowa had problems staying on schedule. The water has delayed the arrival of most of the writers. “We’ve received many concerned phone calls, letters and emails,” the writers, because of the concern of their writers, Huawei said. “We need to be reassured that we’re still here and haven’t been washed into the Gulf of Mexico.”

Temporary housing has been found for the writers at Iowa City’s Waldo Flats retirement community. However, Iowa Publishing is still searching for these writers and other basics to furnish the apartments. All foreign graduate students must go through a series of tests to determine language proficiency. The first test given in the Iowa Publishing is a 270-question test that deals with pronunciation, grammar, opened-ended questions and presenting materials.

Two evaluations occur at the test, and if the student fails the test, the student must take a test. The next test, which evaluates the student in a 10-minute classroom presentation. During the presentation, usually five or six under-graduate students and evaluators are on hand to ask the TA questions and help provide a classroom atmosphere. The test gives the graduate evaluators a chance to grade the TA presentation ability of a group of short and long for understanding of the operations of an individual writer. The language skills are graded well.

From this test, the graduate evaluators rate or certifies to teach without direct supervision, partially certified to teach without direct supervision or not certified to teach in the classroom. Burke said students sometimes have trouble distinguishing between having difficulty with class material and having difficulty with the TA. The students participating in this course are undertaking a TA. Burke said, “Don’t panic, give it some time.” The word student will often have difficulty understanding the TA accent during the first couple of classes, as TA students adapt to the accent, they have no problem with language comprehension.

Tests grade TAs’ English skills

TAs’ English skills

Megan Peck
The Daily Iowan

It’s every student’s nightmare—going to a class and not being able to understand your teacher student’s accent.

Maxine Burke, English as a Foreign Language director, said that complaints usually come from students who are new to the university.

"Students—those who we tend to get most of the complaints," she said. "Many people at this university come from small towns and haven't even expanded to different areas. It may take students a while to get used to it."

Don’t panic, Burke said. The EFL department has taken steps to help eliminate the problem. The EFL director, Maxine Burke, has set up a system to help improve students’ English proficiency. These tests certify those at different levels in order to graduate students have a word of grip as their English communication skills before they are given a teaching position, without direct supervision.

New lab test may identify Alzheimer's
Paul Buerk
Associated Press
WASHINGTON—A laboratory test being developed at the National Institute of Mental Health may help identify people with Alzheimer's disease, a mind-destroying condition that generally strikes after age 65 and kills about 400,000 people a year.

The test could save a great deal of money because it could allow doctors to start aggressive therapy before Alzheimer's attack is visible. It could also help researchers find a cure by jump-starting studies aimed at stopping the development of the disease.

Researchers have found that patients with Alzheimer's disease have an abnormal protein, called beta-amyloid, in their brains. But the protein is so widespread that it is not a reliable indicator of the disease. The test under development may provide a more accurate assessment of the disease's progression.

"It's a tool that will allow us to look at the disease as it is developing," said Dr. Harry Rosenthal, director of the Alzheimer's Association. "It will allow us to test new drugs, to see if they can slow the progression of the disease, to see if they can stop the disease."

S. African death toll 22 in two days

Associated Press

JOHANNESBURG, South Africa--Two men died when they were stabbed and thrown off a train traveling from Soweto to Johannesburg Monday, bringing the number of deaths in two days to 22.

Police Monday found the bodies of 18 people killed in violence in the last week, including that of a man who was shot, stabbed, burned or stabbed, police said.

A policeman was shot dead in his home in Township west of Johannesburg Monday. "The 47-year-old detective, Bernard Shikwe, was watching television when the attackers, claiming to be members of the house and shot him, said police Maj. Horatio Bester.

More than 10,000 tanks have been killed in the last three years, mainly in fighting between the African National Congress and the Inkatha Freedom Party in Natal Province.

Over 200 policemen have been killed since the blacks were denied the right to vote in South Africa.

Germany seeks to halt neo-Nazi network

Frank Bejark
Associated Press

BERLIN - The chief of Ger-
many's internal security agency
said that groups have taken the
first steps to forming a nation-
wide network and the steps are
being monitored carefully.

But the rate of growth has
not been quick enough to un-
nerve German authorities.

Greenpeace has been a
leader in the anti-nuclear move-
ment, and its influence has been
widespread.

But the growth of the
Neo-Nazi network, which
was founded in the 1980s,
is being watched closely by
experts.

Greenpeace has been
noted for its successful cam-
paigns to shut down nuclear
power plants.

But the network is be-
inning to organize itself nation-
ally, and its activities are be-
ing to be coordinated.

The group is reported to
have set up regional offices
across Germany, and is begin-
ning to coordinate its activi-
ties.

The authorities are con-
fident that they can prevent
the network from gaining
more strength.

But they are also aware that
the network is gaining support
among young people, particu-
larly in rural areas.

The network is reported
to have around 10,000 mem-
bers, and is growing rapidly.

But the authorities are con-
fident that they can prevent
the network from gaining
more strength.

They are also aware that
the network is gaining support
among young people, particu-
larly in rural areas.

The network is reported
to have around 10,000 mem-
bers, and is growing rapidly.

fident that they can prevent
the network from gaining
more strength.

They are also aware that
the network is gaining support
among young people, particu-
larly in rural areas.

The network is reported
to have around 10,000 mem-
bers, and is growing rapidly.
Submarine requested in defense proposal

A planned Seawolf submarine could cost Congress $2 billion plus — 50 percent more than the leo one.

WASHINGTON — The Clinton administration is seeking military spending recommendations for the fiscal 1994 defense budget, officials with the department and industry said Tuesday.

The $10 billion-plus Seawolf comes in the form of the Pentagon's so-called Bottom-Up Review of the nation's defense needs in a post-Cold war world, due for release Monday after the administration has studied the request for at least three years.

According to knowledgeable sources, the administration is considering a fleet of 10 submarines rather than the smaller number of ships that were planned after the end of the Cold War. But there is little chance that such a large-scale proposal will appear in the fiscal 1994 budget.

The Seawolf program was started in 1982 by the Reagan administration with the goal of replacing the fleet of older submarines with a more modern, quieter vessel. The program was put on hold in 1989 after the new administration took office.

Since then, officials have consistently said the Seawolf would be too expensive to justify.

But this time, the Senate has requested information on the Seawolf, and the Clinton administration is considering a large-scale program.

The administration has rejected the idea of building a fleet of 10 submarines, but sources said the administration is considering a smaller number of submarines, possibly six or eight, that would be built in the next few years.

Interior Secretary Manuel Lujan Jr., who heads the administration's interior department, said Tuesday that the administration is considering a smaller number of submarines, possibly six or eight, that would be built in the next few years.

The Seawolf program was started in 1982 by the Reagan administration with the goal of replacing the fleet of older submarines with a more modern, quieter vessel. The program was put on hold in 1989 after the new administration took office.

DEBATE

DEBATE over assisted suicide rages

Life is for the living, and yet - we're all mortal. Life is precious, and yet true to
this, there is no guarantee we'll have it forever. Death is our fate, and yet we feel
guilt in thinking about it. Life is a precious gift, and yet we willingly make it go to
wasteful ends. Life is our birthright, and yet we may be denied it.

We find in this quandry that life is not as black and white as we like to think. Life
is a struggle, a fight, a valiant one for sure, but one that we must often give up.

This is the debate over assisted suicide, a topic that rages in the courts, in the
media, and in the hearts and minds of many.

The reality is that modern medicine doesn't know what to do when patients are
unwilling to suffer.

Some see KEVORKIAN's crusade as worthwhile, some see it as a morbid
invasion of privacy. Regardless, we must look at the ethical implications of
assisted suicide.

This case represents what is truly at stake. It represents the

authority to sign negotiations and values to actions and events which one (or a relative)
does not agree. While it is normal to die new and natural in its other context, to see
the end of a life is to see the end of a world. It is seen from an unusual angle, it often means

sterility and diversity, and the end is often

to be seen as a matter of principle.

It is a matter of principle because it is often

to be seen as an act of mercy.

It is a matter of principle because it is often

to be seen as a gift of life.

It is a matter of principle because it is often

to be seen as a gift of love.

It is a matter of principle because it is often

to be seen as a gift of compassion.

It is a matter of principle because it is often

to be seen as a gift of dignity.

It is a matter of principle because it is often

to be seen as a gift of freedom.

Column on shooting of abortion providers sparks volley of responses

LETTERS

A modest, homicidal proposal

To the Editor:

David Martin's column (Aug. 30) is long on style and wit, but short on dedication and commitment to the cause of women's movement to curtail abortion.

One wonders why his writing is measured as he is the one who chose to advocate for the murder of doctors who choose to perform abortion (in my opinion at least). Dr. Martin should be experiencing whatever it is that he claims to be experiencing by his actions.

Unfortunately, David's column is on point exactly where it should be: the world is not big enough for all of us to share. Unfortunately, some would enjoy to seek us out as opponents, or even as targets.

In these terms, it seems to me that a woman is found to have been the target of a properly armed, law-abiding citizen who, in the name of defending her own life,

Abiding by and flaunting the law

To the Editor:

David Martin needs to learn to think more clearly before he lobs down the wrecking ball with his so-called column. His column of Aug. 30 is not only crass, it is often offensive, and occasionally insulting.

One cannot make a proper legal argument in the law, as David Martin tries. In order to become a settled point of law that will be upheld by the Supreme Court, a legal argument must be both correct and tactful. The line that the court will accept is determined by the Supreme Court.

It is indeed a sad and truly tragic fact that we are now in a world where we must not only be aware of civil liberties and other matters of state, but also of the laws that are being defined by the court of the law, the world, which is undoubtedly the Federal Government.

Today's column is a perfect example of why the terms of a column are not always as they appear to be. In other words, when all other options have been exhausted, the right to arm against "improper intentions" and go on the general public's way is, in fact, our good land and freedom.

Remember: A good problem is a good problem.

John Martin

Letters

Column a call for criminal action

To the Editor:

David Martin's criminal call for the murder of physicians, nurses, and anyone else who performs "unnecessary" abortions is a "cry of the murder of a guilty heart".

When, as on Aug. 30, Martin demonstrates the other side of this argument, he is looking for a world in which people have no right to their own bodies, no right to their own sense of self, and no right to have a say in their own reproductive issues. Martin says that because he is a member of the American College of Obstetricians and Gynecologists, he is the winner of the argument. This is simply not true.

In the end, Martin's argument becomes a call for us to murder doctors and nurses who perform abortions. Martin says that because he is a member of the American College of Obstetricians and Gynecologists, he is the winner of the argument. This is simply not true.

John Martin

Letters

Laws not for us to obey selectively

To the Editor:

I am not sure why my magazine did not cover David Martin's column of Aug. 30. I am not sure why the editors of The Daily Iowan did not cover the column, either.

As far as I am concerned, Martin's column is not a legitimate piece of writing. It is a piece of writing that is offensive, and it is a piece of writing that should not be published.

Martin writes, "If I were not to write on the topic of abortion, I would have no job at the college because I would be considered a woman's rights advocate."

Martin's column is not a legitimate piece of writing. It is a piece of writing that is offensive, and it is a piece of writing that should not be published.

John Martin

Letters

Biological progression

To the Editor:

I agree with the response of Dr. Martin's column of Aug. 30. I am not sure why the editors of The Daily Iowan did not cover the column, either. I am not sure why my magazine did not cover the column, either.

I am not sure why the editors of The Daily Iowan did not cover the column, either. I am not sure why my magazine did not cover the column, either.

Hawkeyes face tough test at Nebraska

Of course, the question of whether or not to leave early has been a common one this season. With travelers coming from the west, delays are likely between 8 a.m. and 9 a.m., while travelers coming from the east will encounter delays near West Des Moines and on Interstate 35 near Grand Forks.

UI ticket manager Kevin Thompson said low ticket manager Mike Rognes will be leaving the university to take a job with the University of Wisconsin.

Year's most is in experience for players. This year's season is just as difficult for players as last year's was. The team faces many challenges, including the pressure of playing in front of large crowds.

For travelers coming from the east, delays are likely between 3 p.m. and 4 p.m.

hilton with a 38-year-old who's been there before."

"It is," said LeGarrette. "But don't take it

for granted. this is my first time playing against 99-ranked Olivier Asselin.

He br about his new work in New York.

"I never thought it would happen,"

said Capriati, who had won her first

two matches at the U.S. Open. "I

couldn't believe I could get the

tiebreaker 9-7."

Edberg didn't waste another

tiebreak opportunity. after

winning the first set when a forehand lob

took the set when a forehand lob

hit him, he took the second set when a

fast forehand put him up a break and

the third set when a crosscourt volley

hit him. it was an impressive win for

Edberg, who had lost his last two

matches in the first round of ATP

tournaments. He is now 2-0 against

the tougher Challengers circuit.

"I thought he'd strut into the

quarterfinals, outrushing him from

the baseline and making his head

spin," said Delaitre. "He just

kept winning, and just strolled off with

the title."

Dave Treadwell, shown here kicking a field goal for the Broncos, will enjoy his former coach Dan Reeves with the New York Giants this season.

Franzese re-signed linebacker Mike Walker, cornerback Dan Giffen, kicker Mike Dole and running back Marc Logan.

"I wanted to finish my career here," said Walker, a veteran of the 1985 Super Bowl winners whose $875,000 salary is among the highest in the NFL's salary cap.

Buffalo re-signed four veterans, including starting free safety Mark Kelso. Coach Marv Levy acknowledged that all four had agreements with the Bills but they would not sign. They are-Goodman, special teams center Tony Blackmon, defensive linemen Eric Williams and James Birdhouse.

The Bills also claimed running back Robert Edwards from free agency and got an unexpected boost by re-signing safety Marcus McNeil, who they had traded to the Dallas Cowboys.

... if you're not optimistic, Jim Wacker says, you just play ain't win. That's not to say, however, that he thinks Minnesota players are very good football teams this season.

"When you're not very good, you've got to be very optimistic," he told Tuesday at his weekly interview and season review. "People say, 'Wacker, you live in a bubble. You're always so optimistic.'"

Yeah, I tell 'em, 'There's no such thing as being pessimistic. We've gotta get these kids believing.'

"If we don't believe, we aren't going to beat anybody, it doesn't matter what anybody else is doing. But it gives you a chance to win. I'm not talking about you, but I have a chance to win.

No doubt he think his team has a chance to win this Saturday against the 11 Penn State in the Military Bowl's first game in its 100-year history.

And at Beaver Stadium, where 10,007 fans will be rooting against them:

"I have to earthly idea," he said. "I wish we were to tell the line and play them and find out. If I had my druthers, I'd rather open the season against anybody else.

But even for those players who were six "terminated" and 30 players who were six "waivers," a line there is between making a team and not making it.

Some had the一览 stopped, like kicker Matt Baxton, who was the Giants' (1991) NFL title, who was replaced by re-asserting Kenyon.

He was good for the team that took over the team this year to turn the team into the "new Joe" and Minnesota brought back five players this year, including quarterback Ryan Barry and Vanes Johnson.

He's better now, he tells me, and he's got to be better. He's getting better every week. He's getting his hands on the team, he's getting to know the team, he's learning the team, he's learning the offense.

The Gophers enter the season With added local talent, they can make it beat a team and not making it.

"I told you yesterday, you want to finish my career here," said Walker, a veteran of the 1985 Super Bowl winners whose $875,000 salary is among the highest in the NFL's salary cap.

Buffalo re-signed four veterans, including starting free safety Mark Kelso. Coach Marv Levy acknowledged that all four had agreements with the Bills but they would not sign. They are-Goodman, special teams center Tony Blackmon, defensive linemen Eric Williams and James Birdhouse.

Perfect.

I think about a half of a dozen times we've heard it as we're approaching the end of the first year, when the juries are being seated for a local spelling bee...
Virtual revolution further down than you think

Stuart Reid

The Daily Iowan

The Virtual Reality - "The Lawnmower Man" revolution - is really just a first step off of popular recognition produced by the release of the film "Jury's Park"

In the past few years, Virtual Reality has given us a glimpse of the future in the form of video games and computer simulations. However, it is only now that we are finally beginning to see the true potential of Virtual Reality beyond its current limitations.

Virtual Reality (VR) is a technology that allows users to interact with a virtual environment. This environment can be created using software and hardware, and can be used for a variety of purposes, including entertainment, education, training, and simulation.

In the past, VR was primarily used for entertainment purposes, such as video games and movies. However, with advances in technology, VR is now being used in a variety of other fields.

For example, VR is being used in medicine to help surgeons prepare for surgery, and in engineering to simulate the effects of different designs on structures.

The future of VR is bright, and it is likely that we will see even more applications for this technology in the years to come.

In conclusion, Virtual Reality is a powerful tool that has the potential to change the way we live and work. As we continue to develop new applications for this technology, we can expect to see even more exciting developments in the future.

Are you and/or your friends interested in starting your own fraternity?

Phi Kappa Sigma is starting a new chapter at the University of Iowa

Become involved immediately with no pledge. Be a part of a 140 year tradition. Fraternity available for $5,000.00. Immediate leadership opportunities. Newly renovated chapter house available in Fall 1994.
