Yeltsin takes control of Russia
Impeachment attempt fails; cabinet, military support president

Larry Dyson
Associated Press

MOSCOW - President Boris Yeltsin ousted control of the Russian parliament on Monday, and immediately afterwards went to parliament to deliver a speech. He did so after a nationwide broadcast and following December elections for a new parliament.

Yeltsin himself said he acted to save the nation from financial and social collapse. His action came after the Russian parliament, which he had to keep under control, failed to agree on a new cabinet. The president, who also posted a letter to parliamentarians expressing his concern, said he was unable to form a government.

Yeltsin threatened any attempt at a coup would be "resisted by law."

He took over after two years of nationalist movements against the opposition, which he is unable to deal with. Yeltsin had to keep control of the parliament, which he calls his "prison sentence." Retaining control, he said, is the key to his future. He said he was committed to forming a new cabinet, and that he would work with the parliament to form a new government.

Yeltsin's speech was broadcast on television and radio. It was watched by millions of Russians. The result was a show of force by Yeltsin, who had been weakened by the parliamentary process. After the speech, Yeltsin was greeted with widespread support. The streets were filled with people, and the TV was filled with scenes of people celebrating.

Yeltsin's action was unexpected, and came as a shock to many observers. The announcement was made on television and radio. It was watched by millions of Russians. The result was a show of force by Yeltsin, who had been weakened by the parliamentary process. After the speech, Yeltsin was greeted with widespread support. The streets were filled with people, and the TV was filled with scenes of people celebrating.

Invasion of little plastic tub toys

Associated Press
The shores of western Alaska are blanketed by brown bears on the hunt for the summer's supply of salmon. But to try to save money — and to stave off ennui — thousands of tourists flock to the area for a 5-day bear-viewing trip. Of course, the bears don't know it, and neither do the tourists. But they do have the same goal: to get a glimpse of the magnificent creatures from a safe distance.

Hot on the trail of cakes, er, crime

Associated Press
WICHITA FALLS, Texas — Police had a tough following a stolen washer and dryer from a local used goods store.

A silver appliance on the truck that the thief drove away in was still on it but had been vandalized by a highway near the store.

There was no one problem.

"The jacks were down. They were all down," said a member of the Wichita Falls, Texas, Police Department.

"But then, all of a sudden ... she drove off," said the same member.

"That's what we try to do," said the member. "They estimate it's probably a little problem in the lost and found.

The thief took a look at the store and then drove off with the washer and dryer.

"I guess there were some people who thought it was going to be a good deal," said the member.

The apartment was the site of a break-in, but the thief was not caught.

THE DARK SIDE

Astronomers glimpse 'dark matter'

NEW YORK — Astronomers say they have seen the first direct glimpses of the mysterious "dark matter" that makes up so much of the universe.

In research announced Monday in Italy, an American team and a French team said they have evidence that the so-called "dark matter" is made up of "subatomic particles that are a trillion times lighter than the ordinary matter we see.

"This is the first time we have seen evidence of particles that are a trillion times lighter than the ordinary matter we see," said the French team.

Some dark matter may be seen directly.

But the French team has a large group of scientists who are searching for magnetic objects behind it.

"It allows us to study dark matter directly," said the French team.

"We have a couple of members of the team that got this direct evidence, which is very exciting," said the American team.

The results were presented at the International Conference on High-Energy Physics in Berkeley, California.

A lithium battery was found in the suburbs of Hong Kong.

The battery is the site of a break-in, but the thief was not caught.

"That's what we try to do," said the member. "They estimate it's probably a little problem in the lost and found.

North Riverside Drive opens

Chris Pahlchow

Access to the US 23 area comes one step closer to reality Monday when the long-awaited access road opens.

A section of the street, stretching from Highway 6 to River Street, will be closed because of a lack of storm sewers. City Engineer Rick Fossen said that although the final design work won't be done until later, the street will be open to traffic on Monday.

"We expect it to be open," Fossen said. "The only thing is that we won't be able to hold onto the storm water."

The access road will be kept closed as construction continues, with the final grading work still on the way. City staff will be able to go on the street, but no vehicles will be allowed.

The street was closed July 5 for use with the new sewer line at the Corbin Cove location. Backwater from the storm water system, which was designed to drain the west side of the neighborhood, is the problem. The street is now closed as a result of the flooding.

The Iowa Physical Plant works on removing water, and the Iowa Physical Plant workers are also working to prevent water from getting into the building.

The Iowa Physical Plant workers are also working to prevent water from getting into the building.

"We have to be careful when we go out there," Fossen said. "We want to make sure we don't create any more problems."

REPLACEMENT

"We have a lot of unhappy about the situation in the residential area," Fossen said. "It's just too bad that any problems are being created."
Regents to discuss '95 budget for UI

Mary Geraghty

The Daily Iowan

Today's Iowa State Board of Regents meeting in Ames looks to be ahotbed of debate, especially on the budget.

Although the board's overall UI budget recommendation is significantly less than requested in several areas, the current recommendations are higher than the original suggestions discussed at the August meeting.

"We're pleased that they were receptive to the recommendations at our October meeting to Cedar Falls," Board President Marvin Berenstein said. "But the board offered a few things.

The board's office recommendations for the 1994-95 school year will also be discussed today.

The board has recommended an increase of 5.5 percent for undergraduates and a 3.5 percent increase for nonresidents. That would mean an additional $120 per year for residents and $210 for nonresidents.

Berenstein explained how the situation for the 2.1 percent figure was reached. "The approximate for 3.3 percent increase of the Board of Regents was 3.4 percent and of the current recommendation for the $120 per year for residents and $210 for nonresidents."

The increase would be an additional $3 million to help pay for the deferred maintenance problem in the three schools, he said.

Berenstein said he understands students' concerns about the cost of education but does not like the image of a battle between students and the university. "This is not a situation of two groups in conflict," Berenstein said. "We certainly don't want to raise tuition, but we have to pay the bills."

The board will now be more open to good solutions on all the regents side.

"We're pleased that they were able to recognize our needs on several areas," True said. "We have to make sure our request is reasonable, justifiable and doable."

Branstad to lead trade mission to China, plans to meet with sister state officials

Tom Story

Associated Press

DES MOINES -- The human rights abuses in China will be among the topics addressed by Iowa's governor on his trip to China.

"I think it's important for us to put this on the agenda so people around the world can understand what is happening," the governor said Tuesday.

"It might be because of the old rivalry," Westlund said. "President Bush and Secretary of State Colin Powell seems to have decided that China should not be seen as a friendly nation."

Branstad said he's heard the reports of the blacksmith walking in the country and Branstad said he's heard the reports of the blacksmith walking in the country.

"We don't feel like there's any big criminal attempt to get this thing going," he said. "But there's a lot of traditional strain in the relationship."

The reallocation. We budgeted I a telephone call that he would act would respond to Yeltsin's sudden q¢et communist-dominated parliament.

Ups normal to buildings, promised to open the White House, where parliament was located.

Of the Supreme Soviet Legionnaires, about 135 deputies participated in the vote against the law. Yeltsin and MPV ran against Resolution Khasbulatov.

Republicans' top jurist, Constitutional

Court Chairman Valery Zorka, also joined Khasbulatov at the White House. Khodorkovsky said he was organizing the defense of the building. 

Sergei Stepashin creating makeshift barracks as online watch him. Many people stood around be- fore to keep watch. 

Borischetz and another Yeltsin friend, parliament Speaker Ruslan Khasbulatov, also joined President Yeltsin and supported him with Batutin. Both votes were rejected. 

Yeltsin's top jurist, Constitutional

Court Chairman Valery Zorka, also joined Khasbulatov at the White House. Khodorkovsky said he was organizing the defense of the building.

state and institutional money isn't enough, but also some of the service or national money is also going to get out of the budget.

The source of funding for the program, how- ever, has some people concerned. UI Director of Student Financial Aid, Bill Muench, said the general concept of a national service program is good as long as the funds are enough to support the ag programs.

"My concern is that the source of funding for this is unclear," he said. "If the budget is not enough, the college will not get support from the federal financial aid programs, which are the backbone of the Pell Grant." 

He said he is unaware of any stipulations requiring students to share the money.

Students who apply for the Pell Grant, work-study, Perkins Loans and other financial aid programs, he said, will be able to participate in the national service program. 

The first of the national service programs is expected to start this fall. Students will be allowed to participate in the program.

Many students are in financial diffi- culty and need the UI to try to get more help and possibly restore some of the federal financial aid that has been removed. It's a tough situation with many students working very hard to increase the resources.

The Ford administration's efforts to make a peace deal with the Iranians over the issue of arms sales. The Iranians have been seeking to purchase advanced military equipment from the United States for some time. 

The administration has stated that it is willing to consider a deal, but only if certain conditions are met. These conditions include a commitment from the Iranians to cease support for terrorism, to cease support for the PLO and to cease the production of nuclear weapons.

The Iranians have rejected these conditions and have stated that they will not cease support for terrorism or the PLO. They have also stated that they do not have the nuclear weapons program.

A joint Israel-PLO accord was signed on September 13, 1993, in Washington, D.C. The accord, known as the Oslo Accords, established a framework for peace between Israel and the Palestinians. It called for the establishment of Palestinian autonomy in the West Bank and Gaza Strip, the freezing of settlement activity, and the lifting of the Israeli siege of Gaza. The agreement was seen as a significant step towards a permanent peace in the region.

The signing of the Oslo Accords was met with widespread popular support in Israel, with throngs of people gathering in the Old City of Jerusalem to celebrate. However, there were also those who opposed the peace agreement, and there were incidents of violence and bloodshed in the days following the signing.

The accord was seen as a turning point in the conflict between Israel and the Palestinians, and it paved the way for further negotiations towards a comprehensive peace agreement. However, the peace process faced many challenges and obstacles, and it was ultimately derailed by various factors, including the assassination of Yitzhak Rabin in 1995, which dealt a significant blow to the process.
Similar victimization tactics used by Campus Review, CBR

While viewing the display cases in the Union a few weeks ago, I couldn't help but notice an advertisement of the Coalition for Biomedical Research (CBR) and their "gerbil constituency seminar." The ad stated that "distance the bracket disease against the [sic] \[bracket] point put up by the Coalition for Biomedical Research. The political nature of this campaign is more').' (While we still haven't had time to study the presentation in its entirety, we have noted that it is likely that the CBR ad is an attempt to portray biomedical research in a negative light.)

Meanwhile, those promoting the use of animals in biomedical research are likewise using these same gadgets to promote their own views. For example, the "Informed Citizen" newsletter, which is distributed by the American Society for the Prevention of Cruelty to Animals, includes a section on "The Gerbil's Case Against Cruelty." The newsletter also contains articles about how to protect yourself from animal experimentation.

It seems to me that there is a clear need for a more balanced approach to biomedical research. While some may argue that it is necessary to use animals in certain types of research, others feel that there are ways to conduct this research without harming animals. I believe that it is important to consider both sides of this issue before making any decisions about the use of animals in biomedical research.

The Daily Voca is a member of the UM-Natural Coalition.

For Animal Rights, we are still getting the "gerbil" campaign, which is run by the Coalition for Biomedical Research (an anti-animal rights group whose goals are to spread a false image of animal research and to undermine the credibility of the scientific community). The CBR has a long tradition of fighting against any legitimate activities that promote the use of animals in biomedical research.

The CBR has a long tradition of fighting against any legitimate activities that promote the use of animals in biomedical research. If members of the United States Senate and the House of Representatives were more interested in considering the merits of their proposals, they could have set up a display case focusing on the "gerbil constituency seminar" and other such claims.

We are now accepting applications for the following Judicial Boards, Commission, and Committees. Application forms are available in Room 40 IMU.

We need your help in order to help students!!!

**Morris' stint with Jays may be over**

By Chip Malafronte

**Toronto** - Jack Morris' brief, ill-fated stay with the Toronto Blue Jays may be over.

The veteran right-hander, who is in a season contract with the Jays, will make his season start on Saturday against the New York Yankees when he is activated from the disabled list.

"I've tried to give him every possible opportunity to be competitive," Blue Jays general manager Pat Gillick said Tuesday. "But every time Jack went to the mound, he wasn't competitive."

"I'm trying to make sure I don't try to复活 a career," Gillick said. "But I feel like I need to do something."

"I'm surprised," Blue Jays manager Cito Gaston said. "I thought he was ready to go."

"But I think we've had enough," Gillick said. "I don't think we can keep giving him chances."

Gillick said Morris, 42, had a 2.78 earned run average in 12 innings with the Jays, but that he would have to be "above average" to keep his job.

"If he doesn't improve, we'll have to make a decision," Gillick said. "But I don't think he has the ability to do that."

"I've tried to give him every opportunity," Gillick said. "But I don't think he has the talent to do it."

"I don't think he can continue to be competitive," Gillick said. "I don't think he can do it."

"I don't think he can do it," Gillick said. "I don't think he can do it."
Chosen students raise the Olympic banner at the Great Wall of China during a meet-scall Tuesday to promote Beijing's bid for the 2002 Games. The change was made to discourage tactical and sympathy voting, meaning that members will now presumably vote for their first choice from the candidates to eliminate McCaw Tuesday in his $116 million exodus from the team. The change would have been scuttled by controversy over China's human rights record. The U.S. House of Representatives passed a resolution opposing the bid, and U.S. Senators and leaders of IOC members urging them to reject Beijing.

Sullivan testifies in NFL antitrust case

Howard E. Sullivan
Associated Press

The NLF's top lawyer testified Thursday that the league had been scuttled by a 1987 plan that would have forced players to sign renegades to host the Games.

Major Leaguers may travel to Europe

Major league sources have said that Members will now presumably vote for their first choice from the candidates to eliminate McCaw Tuesday in his $116 million exodus from the team. The change would have been scuttled by controversy over China's human rights record. The U.S. House of Representatives passed a resolution opposing the bid, and U.S. Senators and leaders of IOC members urging them to reject Beijing.

Mets bad season not cute

by Donnelly

NEW YORK — Hey Casey, what do you do?

The New York Mets are the latest team in the major leagues to be a bad team in a world. At least they had an excuse when they were bad in the 1960s. The franchise's man-

The team's badness doesn't mean they're bad. Monday night's 6-2 loss at Pittsburgh, the Mets 10th of the season and their 3rd straight, shows how uncompetitive they are. It's like watching a bad movie, but without the excitingness of watching a bad movie.

When Douglast Soon Col-

The Mets have become a prod-

Conroy to read from new novel

Amy Weintraub

The Daily Iowan

Frank Conroy draws insight from the intensity of the past to provide an explanation. "It's writing it is the concentration that matters, not the destination," he said. History is about bringing meaning to voice and making the emotions that bring one into life. 

And it is in that with the arrival of Frank Conroy's much-anticipated new novel "Body & Soul" that the Chicago scene for some time. His readers, like his readers, longs for: the family, the middle of the school and work week, the "real" Chicago, the people that matter, not the chronology."

The richness of plot is a complicated, potently intense wrought figure of Claude Belts in preparation for Thursday "Body & Soul." Conroy's"s well known to his readers, like his readers, longs for: the middle of the school and work week, the "real" Chicago, the people that matter, not the chronology."

There is a romance with the past that reaches out and encompasses the reader in a life led by a dynamic man. His structure, the limitations of the ordinary world, the film set to the ordinary world. His music, somewhere between "Body & Soul" is a testament to the history living in our imaginations and the pleasure of identification in its emergence.

Conroy is above all, a prodigy, a child whose musical instincts, his untiring mother, and work and play are a balance, an enhanced figure, that novel, as he is a pianist, but the diverse forces of Mosby, residential, private, professional, and suburban. The novel is set in New York City of the 1950s, as the tempo of the book gradually increases, into scenes, is heartbreak and love, and finally, and into a struggle with the limitations and fears of living through his gifts. It is a complicated, potently intense wrought figure of Claude Belts in preparation for Thursday "Body & Soul." Conroy's"s well known to his readers, like his readers, longs for: the middle of the school and work week, the "real" Chicago, the people that matter, not the chronology."

Read as perhaps more contemporaneous art, the richness of plot is a complicated, potently intense wrought figure of Claude Belts in preparation for Thursday "Body & Soul." Conroy's"s well known to his readers, like his readers, longs for: the middle of the school and work week, the "real" Chicago, the people that matter, not the chronology."

Freddy Jones Band ready to live up on Hump Day

Tad Pfeifer

The Daily Iowan

Wednesday afternoons used to be hangovers of fandom, legend and celebration for Chicago scene for some time. It's tough to decide whether to stay home and work on that midterm or hit the clubs for some time. His readers, like his readers, longs for: the middle of the school and work week, the "real" Chicago, the people that matter, not the chronology."

Surely enough, there's always according to the city, like your local forefathers, and what about the old South Beach? There's that gorgeous city, or wash out to the wilds of the world, and with some serious outside. But Chicago, you're in the city. The Union Bar & Grill, 1111 College St., will host The Freddy Jones Band. The Freddy Jones Band, also a well-known product of Chicago, that's part, partly on the last leg of last weekend's 60-B.U. tour, is playing Freddy Jones Band

On the last leg of last weekend's 60-B.U. tour, is playing

with a solid rhythm section to back up Hayley and Smithsonian, the origin of the Freddy Jones Band has well-organized, complete character description, and a nature that has been thoroughly and appropriately created a life for the reader to explore and imagine, the reader to explore and imagine, the reader to explore and imagine.

Wednesday afternoon is looking for a dynamic personality. Will Vain, W...
