Serbs target Muslims

"We are not going to assist this in any way. This is pure ethnic cleansing," we cannot involve ourselves in this.

Kris Janzen, a spokesman for the U.N. High Commissioner for Refugees, about a request by Serbs that the U.N. provide fuel for convoys that transport Serb refugees from the eastern Bosnian town of Srebrenica to Austria - the U.N. declared "safe area" around Mostar.

A main purpose of the U.N. presence in Bosnia was to prevent Serb attacks on Muslims - to protect them, and the first Serb rebels sought refuge at the camp just south of the town, in an improvised camp of about 48,000 refugees. "This is pure white cleansing," we cannot involve ourselves in this.

LOCAL

Student activism of issue for 1994

A local AIDS activist has drawn a lot of attention to a bill that would ban AIDS testing in the state.

Kris Janzen, the Iowa City-based project director of the University of Iowa's Iowa AIDS Resource and Education (IARE), was a member of the Iowa City Vaccine Right Commission, the Iowa Board of Health, and the Iowa City AIDS Resource Center. He also founded the UI Gay Student Union, one of the first independent gay- or lesbian-identified groups in the United States.

Two groups are now working on a national AIDS awareness campaign. Janzen is involved in the planning stages of an AIDS awareness campaign that will be funded by a federal grant.

Iowa City to tally residents for state aid benefits

Iowa City officials believe the city's population will increase by about 1,100 people. Officials expect the count to be around 34,000, which is why the city's population will increase by about 1,100 people.

Mercury peaks at 98 degrees

Although the mercury didn't quite reach the 100 degree mark Wednesday, the hot index temperature (humidity plus temperature) hovered around 110 degrees.

"It's not going to be much of a break," said Michael D. Hansen, an analyst at the Iowa State University in Ames. "But conditions will be much cooler in the coming days."

UIHC doctor receives Gold Heart Award

Lisa McInerney

The Daily Iowan

Professor Abboud's career has been distinguished and influential. Recently, he was awarded the Iowa City Community College Gold Heart Award for providing the best instruction and service to students. Professor Abboud is especially proud of his work in developing the Cardiovascular Research Center and a world-renowned medical training program. Despite his many contributions to the heart's health and suffering, Abboud is the first to admit that he still has much to learn. "My actual work must be put in perspective. They have recognized the recipient and their accomplishments. They remind us of what we are doing in our society—a profession that celebrates the discovery of truth. And in biomedical research, truth is extrapolated to the ultimate goal of helping the sick and suffering." 

Francois Abboud

head of internal medicine in the UI College of Medicine, said: "Francois Abboud, although Abboud's list of honors is long as his dedication to helping the sick and suffering, he also always a huge fan of the Iowa Hawkeyes. In fact, he once said: "I'm a Hawkeye lifer, and I don't see that changing anytime soon."}

Quotable...

"A driving motivation has been to keep the transition period as short as possible. We hope to have a president in place by Jan. 1, 2006." — Steve Collins, chairman of the UI Presidential Search and Advisory Committee

Myers expresses regret about drunken driving incident

By JENNIFER MULLINS

The Daily Iowan

Dr. Daniel J. Myers said he regretted and apologized for the magical incident. "It was a bad mistake," he said. "I realize now that alcohol has no place in my life." Myers said he was at a party the day before the incident occurred. He also said he has seen the results of similar incidents for years. "I know the problem is real," he said. "I want to help solve it." Myers said he planned to speak to his fellow physicians and encourage them to set a good example. Myers said the hospital administration was aware of the incident and that he was given the option to resign. He said he declined the offer.

Utility merger results in smaller workforce

Oct 20, 2008

Chad Kiddhaus

The Daily Iowan

The merger between two Iowa
utility companies has reduced the
work force by about 1,100.

"In former MidAmerican, we
had about 17,000 employees,
"said Kevin Benjamin, president of
MidAmerican Energy, which will
operated as a separate company.

The merger makes the two
divisions of MidAmerican

"You will see a fair amount of
stress and anxiety about
futures of jobs. But
overall, there's been
acceptance of the fact that
in what's happening in our
industry and our country.

We must prepare for the
pamphlet and get on with
business."

Evan Vorbrich, president of
the electric division of
MidAmerican Energy

"There is a fair amount of
stress and anxiety about
futures of jobs. But

"We anticipate not many
reductions affecting people,

"The company has implemented
an early retirement incentive
which employees 10 years and older are
given incentives to retire early.

In Iowa, all employees will be
eligible to take part in both
incentives to retire early.

All selected employees must
satisfy for their jobs, Vorbrich
said. For employee not satisfied,
the company offers a separation
package with severance pay
with a variable amount of pay
based on years of service.

The company has done its
best to eliminate stress accompanying
a merger, said Paul Shipe,
vice president of the Louisa
generation Daniels energy supply

"This situation just doesn't
seem to be ending up
well. We are going to put
our literature on

"In the future, we will

**Greek** piece filched from UI art gallery

By Megan McCabe

An ancient Greek-style vase - representing a bull's head - has been delightedly filched from the University of Iowa's Décor Gallery and engaging attention from visitors to the East Dinner East Gallery in the Old Capitol.

The piece, which was part of the University of Iowa's Décor Gallery's permanent collection, was stolen on June 28 from display under a glass case and was last seen to be in the possession of a student who had borrowed the piece for a course.

The student, who is studying the history of art, has not been identified.

The piece was known to have been stolen overnight until it was spoke with baton

Police say the student, who was living in the dormitory, was arrested on July 1 for the theft.

The piece was valued at $5,000 and was on display for two weeks before it was stolen.

Police are investigating the case and have asked anyone with information to come forward.

President Clinton will "reluctantly" accept a base closure commission's recommendation to close a Texas military post after meeting with lawmakers on Tuesday to discuss the issue. The White House said Clinton would propose a "flexible" plan to Congress that would include provisions for transferring personnel and equipment to other bases.

The Associated Press

The Pentagon has told the commission that it will accept the recommendation to close the base, but the decision will ultimately be up to Congress.

The commission has been working on a plan to close the base since late last year, and its recommendations are expected to be announced this week.

Ancient torture tools form Mexico'ssideshow

Tara Sheri
 Associated Press

Mexico City — School kids, young lovers and the elderly crowd into the flea market, drawn by the promise of a bargain, and fight their way through the dense crowds, jostling each other, the stallholders and the tools of torture.

"It's all fun," said one vendor, happily."We sell them to students and tourists. It's a way for them to learn about their history, to understand the suffering of their ancestors."

The standholder, a middle-aged man with a weather-beaten face, showed off his wares — the sharpened knives, the branding irons, the thumbscrews, the saws, the whips, the flails, the crossbows, the ropes, the chains, the leashes, the metal spikes — all tools of torture used by Mexican police to extract confessions from suspects.

The police have been using these torture tools for generations, according to the vendor, who has a tattoo of a skull on his arm.

"We are the link between the past and the present," he said. "We keep the memory of the horrors of our history alive, so that we never forget."

U.S. WOMEN'S OPEN

Lengthy course proves challenging

John Morrison

Colorado Springs, Colo. — Betsy King shot a one-under-par 71 in the final round of her title at the women's U.S. Open Golf Championship which ended in a 14-hole playoff for the longest, which tied Miss King with Laura Davies of England. Miss King was the only one to make par on the par-4 ninth hole, when Miss Davies made a bogey. She then went on to win the playoff.

Defending champion Patty Sheehan threw off on the second hole during a playoff practice round for the U.S. Open Golf Tournament Wednesday with 841, 176, and said she expected to be left with a pitching wedge and usually a sand wedge — for her second shots on the par-4 holes when she went on to win.

Ohio Series

Reds, Indians sit atop baseball

Joe Kay

CINCINNATI — Betsy King shot a one-under-par 71 in the final round of her title at the women's U.S. Open Golf Championship which ended in a 14-hole playoff for the longest, which tied Miss King with Laura Davies of England. Miss King was the only one to make par on the par-4 ninth hole, when Miss Davies made a bogey. She then went on to win the playoff.

"If you play a little bit harder and if you play a little bit lower this week," Betsy King said, "it's going to be fun."

For former Florida assistant baseball coach Gary Thomas, it was an emotional experience to see his home team win.

"I think if there's any way you want it," Betsy King said, "I think that's the way you want it."

KISS AND MAKE-UP

Players hoping for fans to return

Ben Walker

Arlington, Texas

"Three days after the season ended in Los Angeles, this is what baseball is. Last night was the start of a new season, and the fans will be back. This is a new game. We're doing a new start, doing it a little bit differently."

But the Pirates, who finished fourth in the National League with 90 wins, still have a long way to go to get the fans back in the ballpark.

"The fans are important to us," said Pirates manager Clint Hurdle. "They provide a lot of energy and motivation. They're a big part of the team's success."

The Pirates have had a solid season so far, with a 24-10 record, but they still have some work to do to get the fans back.

"We have to continue to play hard and show the fans that we care," said Hurdle. "We have to give them a good game every night."

The Pirates will open the season on April 6 against the St. Louis Cardinals at PNC Park in Pittsburgh. The team has been preparing for the season by working out and practicing at the training facility in Bradenton, Florida.

"The fans are important to us," said Hurdle. "They provide a lot of energy and motivation. They're a big part of the team's success."

"We have to continue to play hard and show the fans that we care," said Hurdle. "We have to give them a good game every night."

The Pirates will open the season on April 6 against the St. Louis Cardinals at PNC Park in Pittsburgh. The team has been preparing for the season by working out and practicing at the training facility in Bradenton, Florida.

"The fans are important to us," said Hurdle. "They provide a lot of energy and motivation. They're a big part of the team's success."

The Pirates have had a solid season so far, with a 24-10 record, but they still have some work to do to get the fans back.

"We have to continue to play hard and show the fans that we care," said Hurdle. "We have to give them a good game every night."

Mainz takes over women's tennis program

Shannon Stevens

The Daily Iowan

When Kelsiightly resigned the 15 women's tennis coach for the past five years, Mainz was able to accept the position and continue her coaching career. The women's tennis team will now be led by Mainz, who has been an assistant coach at the University of Utah for the past two seasons.

"It was a great opportunity to work with Mainz," said Stevens. "She has a lot of experience and knowledge of the sport, and I think she will be a great addition to the program."
