Chicago kids recant horrific tale of abuse

FATHERS FACTS 1, 300 CHANGES

CHILDREN can change. In the case of one Des Moines family, their child's story was a testimony to that reality.

The parents, a husband and wife who asked to remain anonymous, said their 8-year-old daughter was sexually abused by a family friend. The abuse occurred over a period of two years, from the time the girl was 6 to when she was 8.

The parents said they first became aware of the abuse when they noticed changes in their daughter's behavior. She became withdrawn and began to exhibit signs of trauma. They reported the abuse to the police and the Iowa Department of Human Services.

The family then sought help from a local organization that provides support and resources for victims of abuse. They received assistance in navigating the legal system and rebuilding their lives.

The parents said they are now in the process of healing and rebuilding their family. They hope to provide a better future for their daughter and to prevent other children from experiencing the same trauma.

Fellowship a second chance for UI mother

SARAH LERNER

When UI junior Naomi Novick was told that her new baby was going to need a liver transplant, she was devastated. But the young woman had one thing on her mind: to help UI students raise the money for the transplant.

Novick, a 21-year-old junior in political science, organized a benefit concert at the Iowa Memorial Union on Oct. 21 to raise money for the transplant.

The concert featured local and national bands, and was held in the IMU's Main Ballroom. The event was sponsored by the College of Liberal Arts and Sciences and the College of Business Administration.

Novick said she was inspired to organize the concert after seeing stories about other families who were struggling to raise money for medical treatments. She wanted to do something to help.

"I feel like we're all in this together," Novick said. "I know it's a lot of work, but it's worth it to help other people."

Lawyers: Steamy e-mail isn't adultery

NEWARK, N.J. — A sex-obsessed New Jersey lawyer who sent nude photos of himself to a client was suspended last week by the state's highest court.

"It looks like a go in Rio," wrote the lawyer, who was too embarrassed to be quoted by name.

But Governor, pass president of the Newark-based Monmouth County Lawyers Association, and divorce lawyer John Ponsi Jr. both said that the not-so-unusual case brought up the issue of how far a lawyer must go to protect his clients.

There are no grounds for adultery but I believe there are grounds for adultery under our State's Code of Professional Conduct and there have been many complaints regarding improper communications between a lawyer and a client. In my opinion, the lawyer was in the wrong.

What I mean to say is that we don't have any trouble with the New Jersey Bar Association.

"I don't know what we'll do. It's the one commodity we can't give away," said the lawyer, who was too embarrassed to be quoted by name.

"I'm sure we'll have to have more and more of that. I'm sure it's the new wave of divorcees." 

UI researchers discover link between gene and blindness in elderly

RICHARDSON, Texas (AP) — A Texas University at Dallas researcher says he has found a gene that is linked to blindness in the elderly.

The team led by Edwin L. Jongen, a professor of genetics and molecular biology, and Phil Sleath, a biologist at the university, worked with colleagues from Australia, Denmark, Canada and the United States to find the gene.

"With only rare exceptions for AMD, we had never found any genetic causes for AMD," said Jongen.

"We're convinced that there is a genetic cause for AMD and we're convinced that we've found it," said Sleath.

Sleath said the gene is called the "AMD gene" and it is linked to AMD in people with a family history of blindness.

"This is the first step in understanding how AMD causes blindness in people with a family history of blindness," said Sleath.

"We're convinced that we've found the gene that causes AMD in people with a family history of blindness," said Sleath.

"We're convinced that we've found the gene that causes AMD in people with a family history of blindness," said Sleath.

Nicaragua peacefully embraces papal Mass

Victor Simpson

Associated Press

MANAGUA, Nicaragua — Pope John Paul II arrived in Nicaragua that is making peace with a leftist revolution that ended a 17-year civil war on Thursday, leaving him in a country that is by many measures still a mired, impoverished backwater.

The pontiff embraced Nicaragua's leftist revolutionaries and other opponents of right-wing rebels. While firmly declaring his support for the neutrality of the Catholic Church in politics, he urged peace and cooperation between Nicaragua's government and its enemies.

He also expressed his confidence in the country's young, brave and hardworking people, who are working to build a new society.

John Paul II arrived in Nicaragua in the midst of a critical moment for the country. The Sandinista government is facing increasing criticism over its handling of the economy and human rights, and there are growing calls for it to hold elections and allow opposition parties to participate.

John Paul II's visit to Nicaragua is a symbol of the Church's commitment to peace and justice. His message is likely to resonate with Nicaraguans, who are divided over the government's policies and the country's future.

His trip is also an opportunity for the Church to promote its message of love and reconciliation, and to work towards a more peaceful and just society in Nicaragua.

John Paul II's arrival in Nicaragua was greeted with enthusiasm by the country's young people, who are eager to see him and hear his message.

The pontiff's visit is also an opportunity for the Church to express its support for the victims of violence and human rights abuses, and to call for an end to the civil war.

In conclusion, John Paul II's visit to Nicaragua is a significant event that is likely to have a lasting impact on the country. His message of peace, justice and reconciliation is a powerful symbol of hope for a better future for Nicaragua.
Taylor was dismissed from Iowa caucus.

Judy

Daily Iowan political reporter

Republican presidential candidates are taking Iowa more seriously now than they did before the Hawkeye State caucuses. Iowa's second-place finisher, Mike Huckabee, won the state's Republican presidential caucuses on January 31 with 19 percent of the vote, followed by Mitt Romney with 18 percent and Ben Carson with 17 percent.

"I thought you just wanted the chance to compete with the Iowa caucus," Taylor said.

"You're not the only one. I'm going to go home and do something else," Taylor responded.

John King

Associated Press

DE MOCRACY - Texas Sen. Ted Cruz's win in the New Hampshire primary has put Iowa Sen. Chuck Grassley on the defensive in his re-election bid.

"We have to be careful that we don't get caught up in the hoopla and forget about our real job," Grassley said. Grassley, a Republican, said he has been working on legislation to cut funding for renewable energy sources.

In Iowa, Barack Obama and Hillary Clinton are leading the field with close to 40 percent each, according to the latest polls. South Carolina Sen. Lindsey Graham has less than 20 percent in the state, and Marco Rubio and Marco Santorum are tied in the double digits.

"Iowa is the first in the nation, and it's important that we get it right," Grassley said. He said he has been working with colleagues on legislation to make the process more transparent.

"Iowa is a state where people care about their country, and they want to see their representatives do their job," Grassley said. "We need to make sure that we're not distracted by the !

Iowa's first-in-the-nation status is a key factor in determining who will be the Republican nominee in 2016. The state has been known for its early primary and caucus dates, which have the potential to influence the outcome of the nomination process.

"Iowa is a state where people care about their country, and they want to see their representatives do their job," Grassley said. "We need to make sure that we're not distracted by the...
Dole talk draws crowd to seed warehouse

Campaign '96

WASHINGTON - Dick Morris, the Washington lobbyist, who has managed two of Bob Dole's presidential campaigns, is not likely to say much about his latest one.

"When I get to the White House, we will work with the Congress. We won't be playing the game any more today," GOP candidate Steve Forbes said.

Morris' actions "despicable," but he said he was smart enough to figure out how to unload problems.

"It's in passivity about our ability to compete in the world. I have faith in America."
Snowed over

B

Although the streets division sympathizes with Hopper and others who are frustrated, Stockman says the streets division did a decent job clearing the roads, parked cars got the brunt of it, he says.

"I happen to get in my car, push on the brakes and nothing happens," Hopper said. "I thought I had to be deaf, but I heard the engine." She says that if there were more parking lots, life would be a lot simpler.

"I've been accused of many financial wrongdoings and improprieties," McDougal said. "venture that was known as Whitewater."

"He's the best man to run Iowa," Stockman said.

Hopper said there was no other place the snow could go. In her situation, she says she's just doing her job.

"I'm just doing my job," she said.

Bad timing

The recent suspension of President Clinton in the Whitewater hearings is yummy. It’s timing is incredibly bad for Republicans as they try to gain the respect of voters.

The president was suspended on Tuesday in the trial of James McDougal, the Arkansas businessman who has been charged with trying to bribe a government official.

The president is expected to testify in the trial on Friday.

The timing could not be worse for Republicans, who are already facing a tough election year.

"The president is in a difficult position," said one Republican strategist. "He has to testify in the trial of a man who is being tried in a federal court."

Decreasing fat intake late in life won’t prevent breast cancer

Mallori Kitter

NEW YORK — Adapting a low-fat diet in middle or older adulthood won’t reduce a woman’s risk of breast cancer, a study suggests.

In an analysis of seven previous studies involving 45,016 women, a Harvard University team found that women who changed their diets to reduce the portions of fat from the previous 24 hours. These women reduced their breast cancer risk by 30 percent, the researchers said. The study, which was sponsored by the National Institutes of Health and the National Cancer Institute, found that the risk of breast cancer decreased by about 30 percent in the first three months of the study, which lasted for 12 months in total.

Other studies suggested that more, not less, fat is needed to prevent breast cancer. But the current study’s results were not as strong as the previous ones.

"There are many reasons why this might not be the case," said Dr. Robert Haubrich, who led the research. "Perhaps the breast cancer risk is related to the amount of fat we eat, not the type of fat we eat."

The findings suggest that a low-fat diet might lower the risk of breast cancer, but it’s not clear how effective this strategy is.

The study involved 45,016 women, who were followed for an average of 12 years. The women were divided into four groups based on their fat intake: those who ate the most fat, those who ate a moderate amount, those who ate the least fat, and those who didn’t eat any fat. The women were then followed for 12 years to see how their fat intake affected their breast cancer risk.

The results were adjusted for age, menopausal status, menopausal hormone therapy use, smoking status, alcohol consumption, and other factors. The women who ate the most fat had a 30 percent lower risk of breast cancer compared to those who ate the least fat. Those who ate a moderate amount of fat had a 20 percent lower risk of breast cancer compared to those who ate the least fat.

The researchers also found that a low-fat diet was associated with a lower risk of breast cancer in women who were postmenopausal and in women who had previously been treated for breast cancer. The results were similar in women who had been diagnosed with breast cancer before the study began and in women who had been diagnosed with breast cancer during the study.

The study was sponsored by the National Institutes of Health and the National Cancer Institute. The researchers also received funding from the National Heart, Lung, and Blood Institute and the National Institute on Aging.

The results suggest that a low-fat diet might lower the risk of breast cancer, but it’s not clear how effective this strategy is. Further research is needed to determine the best way to prevent breast cancer.

Tips for preventing airline turbine noise to reduce passenger annoyance

In the Civil Airplane Noise Reduction Program, which was initiated in the late 1970s, the Federal Aviation Administration (FAA) has been working with airlines and engineers to design quieter aircraft. The program has been quite successful, and today’s aircraft are much quieter than those of the past. However, the problem of turbine noise is far from solved.

The noise from jet engines is a major concern for passengers on long flights, as well as for those living near airports. The noise can be loud, and it can last for hours. In addition, the noise can be a source of stress and anxiety for passengers.

There are several things that you can do to reduce the noise from jet engines. First, try to avoid flying during peak hours, when turbulence is more likely to occur. Second, try to find a seat that is as far back as possible, as this will reduce the noise from the engines. Third, try to fly on a flight that is going direct, as this will reduce the time that you are exposed to the noise.

The FAA has also taken steps to reduce the noise from jet engines. It has mandated the use of quieter engines, and it has also mandated the use of quieter landing systems. These changes will help to reduce the noise from jet engines in the future.

Iowa's freshman point guard Scott Draper is replacing Draper was John Draper.

Draper was Iowa's leading scorer last year. The 6-foot-5, 200-pound sophomore was a second-team All-Big Ten selection.

Draper is a versatile player with a good outside shot. He has scored 20 or more points in 10 games.

Draper is expected to be a key player for the Hawkeyes.

And when it comes down to it, very little difference," Wallace said of the Heat's shooting.

The Heat's success is due in part to their ability to make quick decisions and get the ball to the right place on the court.

The Heat's shooting is one of the key factors in their success. They are shooting 49.1 percent from the field and 37.1 percent from three-point range.

The defense is playing well, too.

The defense is allowing 86.7 points per game and is holding opponents to 43.4 percent shooting.

The Heat are a team that is always on the move, and they are able to adjust on the fly.

KANSAS CITY, Mo. — Kansas State's Todd Lewis and Oklahoma State's Derek Thomas each scored 21 points Wednesday night, but the Wildcats (19-1, 7-0 Big Eight) held on to score the 81-70 victory over Oklahoma State (19-4, 5-2 Big Eight) and extend the Wildcats' conference lead.

The Wildcats, who had won the only previous meeting this season, were led by Lewis, who scored a career-high 21 points and grabbed 11 rebounds for the second straight game. The Kansas State defense held Oklahoma State to just 11 assists in the game, the fewest in a Big Eight game since 1993.

The victory gives Kansas State a 14-5 record in the Big Eight, ahead of Oklahoma State's 13-6 mark. The Wildcats are now 12-0 at Allen Field House and have won 15 of their last 16 games.

After the game, Kansas State head coach Bill Self said, "I'm really proud of our defense tonight. We held them to just 70 points, which is the lowest they've scored on us all season. We had some great defensive plays, and our rebounding was excellent as well."
Buffy Sabres defender Charlie Huddy, left, Boston Bruins left wing David Pujol, right, and Sabres goalie Dominik Hasek, rear, scuffle for the loose puck Wednesday.

BUFFALO, N.Y. — David Pujol scored twice in a 12-minute span in the final two periods before allowing Plante's 12th goal of the season.

Brian Leetch and Dominik Hasek are the team's leading scorers.

The Ducks, in their third season, would like to qualify for the playoffs. Enter — keep playing at this level, I'm smarter as a head coach in the NHL this year.

The Ducks, in their third season, want to keep playing at this level. I've had 22 goals and 26 assists in the last couple of years, I would like to have 30 goals and 56 assists.

The Ducks, in their third season, are the team's leading scorer.

The Ducks, in their third season, would like to keep playing at this level. I want to keep playing at this level, I want to keep playing at this level.

The Ducks, in their third season, want to keep playing at this level. I want to keep playing at this level, I want to keep playing at this level.

Boogie to the break of dawn

The polka, salsa and mashed potato creating tomorrow for cancer patients

Vahlen Gregerson
The Daily Iowan

U.I. underground rock band Fat has never recorded a single album. Although this tune has never appeared on their piles and many other will join this weekend's second annual Dance Marathon, the event is the UI's Student-Fun-at-Paradis, held to raise money for the Pediatric Oncology Unit at the UI Hospitals and Clinics.

Ford became involved in Dance Marathon as a freshman and has since become a local artist and resident in the group. "To be honest, I really hadn't heard much about it," Ford said. "I'm glad she's very passionate about her enthusiasm carried over to the event."

Dance Marathon 1996

Entertainment available at Dance Marathon:

Vale, "Director of Fun, Garden of Riddles, Vallen Gregerson, joined the event. "My whole family's really excited," said the UI Hospitals and Clinics."

Gibson's supervisor prompted Ford to donate money from her job serving ice cream at Whitey's, joining the list of hosts who have contributed to the cause this year. When Gibson described Dance Marathon in death, Ford became deeply moved by the way she was able to help out and how she could spread the news to her family, who ended up joining the group. "I don't think we'd be doing this," said Gibson, "if it weren't for her enthusiasm." For Gibson, dancing to raise money for children's cancer helps close to home. Her grandfather died of cancer six years ago, and she has the memories of how difficult his time was.

"There's a way to express grief," Gibson said. "Once you have a personal experience with cancer, you want to help in any way you can. You want to communicate to other people, 'I couldn't help the people in my family. At least I'm doing something because they need it and I can help these people. I can't do anything for my family, but I can do something for their family.'"

**Play explores poet's life through writings**

Bob Merritt

The Daily Iowan

"If I hold contest, if I could see our rows in

the moon's net. To truly deafen music.

To see the moonlight, to see the very

beginning.

In search of a loud voice in a
difficult start.

I will heart-talk with them; I will
dream those ideas in the spotlight.

Upon the sundown's message, he
does me a picture of his life with all

who have been to the beginning."

---

**PLAY PREVIEW**

The story is from "Natural Knees," the

theater group's first production after

the 1995-96 season. "Natural Knees" opened

Wednesday in Theatre A of the

Hancher Building.

Directed by Iowa Playwrights Workshop

Professor Chris Lander, "Natural Knees"

talks about the story of Dumas, a little-known

African-American writer. It's a journey of the

essence of the man. It's almost like a dream

world, as he shares a piece of his life with all

beginning ... (has) really allowed me to

open up, to explore what I've written," he said.

---

**Screammers'; An uninspired return to bad sci-fi**

Jonathan Coepper

The Daily Iowan

"Screammers" is back, and this time the

bands are anodyne. If you were hoping for

quaint Cycloon and original, you were
disappointed. But if you were hoping for

weeks, you were hoping for more of the

same. "Screammers" has been reused to

entertain an audience that is increasingly

bored with the same old story.

---

**Screen Kings**

Jessica D'Amico

The Daily Iowan

The film's greatest problem was its

lack of action, but the effects were

sloppy and unbelievable. The

unthreatening design was intended to do

more than that. But the effects were

unsatisfactory, and the story was

boring. The film was a disappointment.

---

**New Music Revue**

Celtic Circle Sampler, Part

Three. Various

If you've been looking for quality

Celtic music, you've found it. This is

a sampler of the best of the best.

The album is compiled by the

German label. The songs range from

many bands, in a two-column set

with the exception of two, which are

on a single line. The result is

nostalgic, brooding, at times beauti-

ful, and at timesisons... (has)

Assisted by the staff of the

UI Drama Department.

---

**Kronos Quartet**

A concert of music by Asian composers

is scheduled for 8 p.m. Saturday in

Hancher Auditorium. The concert features

works by contemporary Chinese

composers, including Bao Loi, Steve

Reinberger, and Liu Xing. The

performance will be accompanied by a

video projection of an American

video artist.

---

**ReVIEW**

John B. (The Daily Iowan)

"Natural Knees," playing this weekend in

Theatre A of the UI Theatre Building, does

bring the story of Dumas, a little-known

African-American writer, to life.

**White Squall**: A dazzling tale of adolescence

**Rita Greenberg**

The Daily Iowan

**White Squall**, which will open in Iowa City this weekend, is a visually dazzling and sentimentally moving dramatization of the difficulties of manhood.

The movie, set in 1939, chronicles the experiences of 17-year old boys who are enrolled at an academy in Maine. It is a highly selective sailing school that provides an exciting and rigorous course of study. The film explores the fate of a group of boys who are taken on a voyage, during which they encounter a freak weather phenomenon known as a white squall. Within minutes, the ship is battered by the storm, and six people lose their lives.

**Publicity photo**

Skipper of the Albatross, Christopher Sheldon (Jeff Bridges), stands down a crew of novice adventurers in "White Squall." crédit: Universal Pictures

The film’s protagonist is a highly principled young skipper, played by Jeff Bridges. His character is the focal point of the story, and the performance of Bridges as the skipper of the ship is a highlight of the film. Bridges’ depiction of the skipper is a complex one, capturing the young man’s ambition, fear, and sense of justice.

**Evelyn Lauer**

The Daily Iowan

Iowa City has experienced what it means to become a sea captain, and the experience is not one to be forgotten. In this world, the sea is a place of danger, adventure, and discovery. The film’s protagonist, played by Bridges, must learn to become a leader, and the challenges he faces are a testament to the power of the sea.

The film’s first half takes us on a voyage through the ocean, as the boys and crew experience the brunt of the storm. The film’s second half takes us through the events of the voyage, as the boys and crew try to survive the storm. The film’s final sequence is a powerful one, as the boys and crew are forced to make a difficult decision about the fate of the ship.

**The Gufs**

The Gufs, who signed a major label deal last week, have started recording their first album. The band is made up of Caroline Goodall, who was featured in the film "White Squall," and several other impressionable juveniles who have created one of the most exciting and emotionally disturbing sequences of the film. The Gufs’ music is a mix of both pop and alternative, Kralj said. "We want to spread the word."
**MARATHON**

From Page 10:

"If you think about the cause, it’s easy to keep going. When you see the kids and their families, you don’t really think about what you are doing.”

—Senior Rob Hallberg, who is dancing in Dance Marathon 1996.

With CMN, a national organization to raise funds and awareness for CMN, Dance Marathon is the largest student-run dance marathon efforts. CMN salute Dance Marathon of the Family.

**DANCERS**

From Page 10:

"The idea of sponsoring an actual event, breasting person to person, is exciting in itself. We put aside everything else in our lives to dance for one reason — the kids.”

—Heather Gibson, dancer in Dance Marathon 1996.

"It’s easy in a sense, but I guess you only live once.”

—To all of Dance Marathon’s participants, the be there for their families and friends.

"If you think about the cause, it’s easy to keep going.”

—Dance Marathon kicks off Friday at 5 p.m. and concludes with the families speaking on Saturday night at 11. People are welcome to stop by anytime, except from 1-3 a.m.

"You have to experience it to believe it.”

—Merrick said.

**CIRCLES**

Continued from Page 10:

"The siblings self-produced their £Pref/erred £Readers £ard. "oLJon 30-6C .-. The siblings self-produced their £Pref/erred £Readers £ard. "oLJon CMN’s mission is to provide entertainment and games during the marathon. There is also plenty of entertainment and games throughout this year’s 30 hours.

There is also plenty of entertainment and games throughout this year’s 30 hours.

"You don’t start out these shows of Dance Marathon, Gibson chose to adopt the dancers’ credo: "We put aside everything else in our lives to dance for one reason — the kids.”

She doesn’t have to remain standing.

"Dancers have to dance for their families and friends. They’re the ones spending 30 hours of their lives. We’re the ones to remind them why they are there.”

Shannon Mitchell, morale booster for Dance Marathon 1996, said that the dancers’ minds off their tired, aching feet.

The group also serves an opportunity for artists to showcase their talents. The first of this year’s entertainment will be on hand to offer a variety of acts.

"With the help of Dance Marathon, students spend their time on new projects. The first of this year’s entertainment will be on hand to offer a variety of acts.

"If you think about the cause, it’s easy to keep going.”

—Dance Marathon kicks off Friday at 5 p.m. and concludes with the families speaking on Saturday night at 11. People are welcome to stop by anytime, except from 1-3 a.m.

"You have to experience it to believe it.”

—Merrick said.

Numerous entertainment acts are also booked to keep dancers minds off their tired, aching feet. Bands, comedy acts and specialty dance troupes will be on hand to offer a variety of acts.

"It’s easy in a sense, but I guess you only live once.”

—To all of Dance Marathon’s participants, the be there for their families and friends.
