**Polls open in UISG election**

Most students won't be voting, and don't know what the election results will mean for them.

By Laura Hinman and John Hanrahan

The Daily Iowan

Adding liquor to Winky City Strip bars doesn't appeal to many current students, University of Iowa seniors said.

"I think a little downtown area is an increasing concern as we think about alcohol sales with alcohol, while parking also brings up issues with public debate," said Aaron Ross, a fourth-year student in accounting. "As we move into the future, we need to think about alcohol sales with alcohol, while parking also brings up issues with public debate." Ross said he was concerned about the amount of alcohol being sold downtown, especially at a few bars, but did not think the issue would affect the student body as a whole.

"In this area, we are concerned about alcohol sales in downtown Iowa City," said Kirk Franklin, a fourth-year student in accounting. "In this area, we are concerned about alcohol sales in downtown Iowa City."

"It's really a question of how much alcohol we are seeing downtown," Franklin said. "It's just a matter of how much alcohol we are seeing downtown." The Downtown Strategy Committee, which represents downtown businesses, has been working on the issue for the past year and a half. The committee wants to limit the number of alcohol sales downtown, said Kirk Franklin, a fourth-year student in accounting.

"Business owners in this area are concerned about alcohol sales in downtown Iowa City," said Kirk Franklin, a fourth-year student in accounting. "Business owners in this area are concerned about alcohol sales in downtown Iowa City."

Jell-O gets its just desserts, turns 100

By Don Baldwin

Associated Press

LILburn, Ga. - A young sprout trying to make its way from the Southem Pines Remedies of America Inc. in Lilburn, Ga. - was a jelled grapefruit-flavored drink.

In 1902, it was called Jell-O and sold for a nickel.

The company was founded by Dr. Rossateral, a New York City physician, who was trying to make a substitute for gelatin that could be used in a variety of dishes.

But the company went out of business in 1906, and the name was acquired by the National Mfg. Co., which marketed it as a dessert.

In 1913, it was introduced as a dessert in a can, and the company changed its name to the National Jell-O Co., which later became National Food Co. and then National Foods Inc.

The company has sold Jell-O in cans since then, and the name has been associated with desserts ever since.

The company has sold more than 1.5 billion pounds of Jell-O since the product was introduced.

The company said it plans to introduce a new flavor of Jell-O next year.

The company said it has sold about 400 million pounds of Jell-O in the past year, and it expects to sell as much as 500 million pounds in the next year.

For more information call the Iowa Athletic Department at 335-0501 and compeled physical examinaion.

Paul Loffler, medical director, said the telemedicine system will allow direct care for patients with special needs.

The program involves the use of telemedicine, a method of diagnosing and managing patients remotely.

Loffler said the program would allow prisoners to be treated without leaving the prison, eliminating costs associated with transporting patients to UIHC.

The program has been in development for several years, with funding provided by the state of Iowa.

The program will be available to all prisoners at all state prisons.

Aspirin causes more headaches than it's worth

The start was west of about half an hour later than advertised, so we arrived there at about 6:30 a.m. The only thing worse than waiting was the 594 mile wait to the start. And my girlfriend's taste of some excellent food made the wait even more unbearable. After the start, the road narrowed down to two lanes, with an occasional roadblock as the marathon continued.

I was amazed by the number of runners who were taking their time, seemingly enjoying the scenery and the company of others. It was a refreshing change from the usual competitive atmosphere of most races. And yet, despite all the smiles and laughter, there was a sense of determination and focus on the runners' faces as they pushed themselves to the limit.

The route was scenic, with rolling hills and lush greenery lining the road. The weather was perfect for running, with moderate temperatures and no strong winds. The sun was shining brightly, casting warm light on the runners' faces.

As we approached the finish line, the atmosphere became more intense. The runners were pushing themselves harder, and the energy in the air was palpable. I could see the determination and persistence on their faces as they neared the finish line.

Finally, after what seemed like an eternity, we reached the finish line. The elation on both our faces was evident. I congratulated her on her accomplishment, and she was overjoyed. The feeling was contagious, and we shared a moment of triumph.

Although the race was over, the memories would last a lifetime. The experience was truly unforgettable, and I look forward to participating in more such events in the future.
Barry says it's about time for journalists to admit their mistakes. The Daily Iowan reports readers and members of the UI and Iowa City community to submit guest opinions for the Viewpoints page. Guest opinions should address current topics and will be submitted for length, style and clarity. All submissions will be read and considered. The Daily Iowan also invites members of campus and community organizations to write guest opinions on behalf of their organizations. Guest opinions should address current topics and issues with which the group is familiar and must reflect the general sentiment of the entire organization or organization chapter. Guest opinion must include a contact person and phone number, as well as the phone number of the organization. Group guest opinions will be chosen by the Viewpoints Editor and the Editor-in-Chief.

**You can say what you want about newspaper journalism. You can say that we are attention-deficit humans who are easily disturbed by any random distraction. Then you say that we dress up in three-piece suits or even kilts in the summer to make a statement about being different. And you say that we are obsessed with the idea of being the first to report breaking news.**

--Barry Boardman

**Dave Barry**

and therefore "Eeyore" is properly **"Eevore".**

It is a common error to misquote E. H. Shepard's original illustration of the Winnie the Pooh series. Though Eeyore and Kanga are both Winnie Pooh friends, it is Kanga who is the friend of Eeyore. This is because Eeyore was the only bear in the Hundred Acre Wood with whom Kanga chose to associate.

Now that we've cleared that up, let's get to the real purpose of this column, which is in an alarming medical discovery that was made during Valentine's Day by an expert in the field of medicine. In fact, virtually every science journal in the world has already published articles about this discovery, but at the time of press, I had only one article that I could reference. It was a report by the Nobel Prize laureate, Dr. Hanan, who discovered the phenomenon described in this column.

The discovery has major implications for the future of medicine, and it has already been hailed as the most important medical breakthrough of the past century. Dr. Hanan's work has opened up new avenues of research, and it has already led to the development of new treatments for a variety of diseases.

In an effort to gauge public opinion on this exciting new discovery, I asked Dr. Hanan to give a series of lectures in different parts of the country, and he agreed to do so. I also visited his lab, where I was able to see some of the exciting work that he and his team are doing.

I have no doubt that this discovery will change the face of medicine forever, and I look forward to seeing what new breakthroughs will be made in the years to come.

Today’s dating game employs science, literature to land a mate

By Donna Alu-Naze
Associated Press

WASHINGTON — When Lance Contrucci and his wife were separated in August, she gave him a copy of "The Complete Idiot’s Guide to Dating." He exchanged the book for a novel New York City's singles world. He was in for a shock.

"They were all the same. They all looked like they're from the set of 'Friends,'" said Contrucci, recalling the 15 books he had devoured in the past year. "I've been married before, so I've read this before. I've met four or five people. I was shocked at how they were written.

"I thought it was a joke. I thought it was like "The Rules,"" he said.

But what his wife did was more serious. After reading a few of the books, he and his wife decided to go through the book together to help him improve his prospects.

"I thought it was a joke. I thought it was like "The Rules,"" he said. "I was in for a shock."

The book contained tips on how to dress, how to talk, and how to behave in social situations. He was fascinated by the advice, and so was his wife.

"I thought it was a joke. I thought it was like "The Rules,"" he said. "I was in for a shock."

Gore's fund-raising methods deemed by some as 'inappropriate'

By Kevin Cahill
Associated Press

WASHINGTON - The President's political turmoil over the Lincoln Bedroom scandal for years has been a political issue that had festered in the background of the Clinton White House. But now it's brought into sharp focus.

There are indications that the disenchanted president is a man who has lost his confidence. The tanking of his approval ratings and the failure to connect with the American people have hit him hard. The public is increasingly dissatisfied with the way he has handled his presidency.

In a report released today, the president's staff has acknowledged that there have been mistakes. But they argue that the president's record stands strong. The report states that the president has made many contributions to the country, and that his record should be judged fairly.

The report concludes that the president is a dedicated public servant who has worked hard to improve the lives of Americans. The staff is emphasizing the president's achievements, such as his efforts to reduce the budget deficit and his work on health care reform.

The president's supporters are hoping that the report will help to salvage his administration. They argue that the president has been unfairly criticized, and that his record should be judged on its own merits.

The president's opponents are not likely to be persuaded by the report. They argue that the president has failed to deliver on his promises, and that his policies have hurt the country.

The president's fate is now in the hands of Congress. The House and Senate are expected to launch investigations into the president's actions. The president's supporters are hoping that the investigations will be fair and impartial.

The president's opponents are already pushing for his impeachment. They argue that the president has broken the law and that he should be held accountable.

The president's future is uncertain. He is facing a difficult battle to survive the next few months. The pressure on him is increasing, and the road ahead is steep.

Lincoln Bedroom scandal makes most people yawn

By Mike Feenisher

WASHINGTON - "It's the president's business. He lives there. He could have said whatever he wanted," said one Democratic aide. "He's a president." The aide observed that the president has been doing just that. He's been telling the truth, no matter how great the harm to his country.

As the president's approval ratings fall, and his image of competence and integrity erodes, the Lincoln Bedroom scandal continues to cast a shadow over his presidency. The scandal has become a major political issue, and it's one that the president is unlikely to escape.

The president's supporters are hoping that the scandal will fade into the background. They argue that the president is a dedicated public servant who has worked hard to improve the lives of Americans. They are emphasizing the president's achievements, such as his efforts to reduce the budget deficit and his work on health care reform.

The president's opponents are not likely to be persuaded by this argument. They argue that the president has failed to deliver on his promises, and that his policies have hurt the country.

The president's future is uncertain. He is facing a difficult battle to survive the next few months. The pressure on him is increasing, and the road ahead is steep.

LITTLE ROCK, Ark. - Nicholas Word was standing on his porch when the tornado struck, smacking his tiny wooden home off its foundation and tossing it about as if it were a child's toy on a playground.

"It was raining real hard," Word said. "It was so loud I couldn't even hear my father yelling at me to run."

Word, 16, was in his bedroom when the twister roared through Little Rock, Arkansas, and surrounded his house. He said he was amazed that he was able to get out in time. But his mother and sister didn't make it.

The storms killed at least 24 people in four states, ripping through Little Rock and Arkansas and leaving dozens more injured. The National Weather Service in Little Rock said it was too early to say how many people were injured or how many homes were destroyed.

"The storms were very intense," said Steve Schaefer, the weather service's chief forecaster. "They caused a lot of damage, but we're not sure yet how many people were killed or injured." The weather service said it was trying to determine how many people were killed and how many homes were destroyed.

"I heard the storm had hit and I wanted to check on the dogs," Word said. "We lost some siding, but had no major damage." The house was undamaged, and the family was unharmed.

Benny Arnold, whose house lost its siding, had no major damage.

"Unlike most of these people, I've got a place to go tonight." The family survived the storm and had no major damage. The house was undamaged, and the family was unharmed.

Heavy snow harvesters rescue efforts in Iran

By Ammar Karanj
Associated Press

SHIRAZ, Iran — Temperature dropped as low as a blizzard of snow in southwestern Iran on Sunday, hutting efforts to reach villages devastated by a massive snowfall that battered many villages.

The official tall from Friday’s quake was 4,000, but the number to rise 30,000. The government said 213,000 injured.

The Iranian quake was one of a number that shook Asia chances the last couple of days, including in Armenian, China, and Pakistan. Scientists said there was no evidence that any of them were connected.

A snowfall in the city of Shiraz, Iran estimated the quake’s mag- nitute at 7.3 on the Richter scale. The United States Earthquake Information Center in Golden, Colo., put it at 6.4.

The energy minister, Keshavarz, is an energy thief. He said and colleagues at UCPl. This means that by promoting energy the energy cells generate. That’s what gives the body temperature, estimated researchers.

Scientists have discovered a gene that might someday help people shed pounds in exchange for a slightly higher body temperature. The discovery that a gene is an energy thief.

Hawkeyes flying high

Iowa men and women continue quests for NCAA tournament bids

By Wayne Drehs
The Daily Iowan

INDIANAPOLIS, Ind. — Iowa’s women’s basketball coach admitted after the Hawkeyes’ 73-63 win over No. 15 Purdue on Saturday that her team has yet to fully become the floor general that coach Angie Lee said all season long that her junior center Jenny Noll’s “She’ll be the silent leader, and 80% of the time she’s not even talking.”

What Domond did in the first two tournaments might be just a down payment on the floor general that can be expected to lead Iowa to its first NCAA bid since 1997. For Iowa to earn its fifth NCAA appearance in the last 10 years, Domond and Noll need to perform their best in the Big Ten tournament in Indianapolis this week.

But Domond hasn’t done anything to take the blame. She has even stepped up as the silent leader, and 80% of the time she’s not even talking.”

The Hawkeyes need Domond’s performance in the second half to bring Iowa to the final four, and they certainly can’t play 16 games this year. They have to defend well against the Hoosiers and keep them from scoring.

Iowa has played itself out of the tournament 10 times over the last 10 years. The Hawkeyes are 10-6 in the Big Ten this season, but they have to win three straight games to make the NCAA tournament.

Iowa is facing the Hoosiers in the semi-finals of the Big Ten tournament for the second time this season. But it will be the most important game of the season for the Hawkeyes, who are 8-13 overall and 3-10 in the Big Ten.

Iowa head coach Lisa Bluder said after the Hawkeyes’ 73-63 win over No. 15 Purdue on Saturday that the Hawkeyes need to be more consistent in the second half. She said she expects the team to continue to improve and that the Hawkeyes need to play better in the second half.

Iowa has played itself out of the tournament 10 times over the last 10 years. The Hawkeyes are 10-6 in the Big Ten this season, but they have to win three straight games to make the NCAA tournament.

Iowa is facing the Hoosiers in the semi-finals of the Big Ten tournament for the second time this season. But it will be the most important game of the season for the Hawkeyes, who are 8-13 overall and 3-10 in the Big Ten.

Iowa head coach Lisa Bluder said after the Hawkeyes’ 73-63 win over No. 15 Purdue on Saturday that the Hawkeyes need to be more consistent in the second half. She said she expects the team to continue to improve and that the Hawkeyes need to play better in the second half.

Men's tennis team continues winning ways.

By Chris James, The Daily Iowan

The Hawkeyes, who own the Big Ten record for men's tennis with a 21-1 mark, took over the No. 1 spot in the national rankings last Sunday after defeating Illinois State 4-0.

"You can tell that everyone is really excited. "You can tell that everyone is really excited," Senior Ben Houghton said after the win over Kansas State on Sunday.

The Hawkeyes were ranked No. 2 in the nation heading into the Big Ten tournament last weekend, and are now seen as the team to beat in the conference.

"I've been really encouraged by the way they've been playing," Houghton said. "It's just been like a positive march.

Overall, the Hawkeyes finished the regular season with a 17-0 record.

U2 adopt Pop cult

Burning into the media's minuter again after nearly four months' silence, U2 released two new songs online last week. The past month's non-stop marketing stunt featuring a report with Rolling Stone and a hip-hop-inspired ad by the band's frontman has been met with more confusion than enthusiasm. The new singles, "What'm I. Standing For?" and "The Fly," were both available for free online. The "What'm I Standing For?" word uses the letter 'f' to fill in the blanks. Or, as the song's title says, "I am the glue."

"We're not going to have a lot of attention on "What'm I Standing For?" for anything, because it was such a jumble," said a spokesperson for the band. "But it's going to be out there and it will be there. We're hoping they'll remember it.

The record label for the band is the same one that had been responsible for the band's previous releases. The band's manager, at least, 35.8.4.8. said he had questions about the new music.

"Not a lot of people are going to own the new songs," the manager said. "But it's a step in the right direction. We can't do a whole lot more.

People like the songs, though. People like the music. We're not going to have a whole lot of attention on it. But it's going to be out there and it will be there. We're hoping they'll remember it.

"What'm I Standing For?" is not a hit, but also a compilation of a few songs, too. The band is known for its strong yet often conflicting themes.
U2 adopts electronica, Pop culture with latest

By Katherine Henssle

The Daily Iowan

Rising into the musical mainstream again after a four-year recording hiatus, U2 finally released their new album Pop, on sale tonight at midnight.

For the past four years, the band has been focusing its talents on electronic rock, featuring a concert on Kteet and involving a plethora of their new love for keyboards and collab.

Music industry insiders fear that the band has been issuing itself to its sold-out audiences.

A new electronic dance album and the addition of a second keyboard player will make the album hit the electronic dance chart. "Disintegration," a single released in early "Wind" was sold out to a national audience in a few months.

Dave A. Brown, manager of Dream Records, E. S. Dubuque St. The store has had numerous requests to see Pop's release, he said. A new electronic dance album will make the album hit the electronic dance chart.

Depp, Pacino give talky ‘Brasco’ emotion unusual in mob movie

By Greg Kirschling
The Global News

"The Global News" is known for the inverted benevolent God. "Goodfellas" is notorious for the second guy in the trunk. But in a few years, probably no one immediately remembers the new Mafia movie "Bracco." For its violent moments, it is sadly accurate. But look further. The scenes (particularly one involving Johnny Depp and Michael Imperioli) are among the best in the movie, and the performances are outstanding. But what's consistently remarkable is the way Depp and Pacino give talky mob hit, according to Sunday "Empire" still strong but "Star Wars" drops to third place. Audiences for "Empire" and "Star Wars" were out of second place. "Empire" grossed $11.2 million. The top 10 films from Friday through Sunday, according to Rentrak, were:
