The House voted to cut funding for the National Endowment for the Arts, but the Senate has promised a veto.

By Steven Cook
The Daily Iowan

By a decisive voice vote, the House decided yesterday to cut funding for the Arts, an organization which provides financial support to artists and arts organizations. The vote, 230-190, came so quickly that members were not even sure what the right vote would be. The House Republicans, who have long opposed the NEA, would have to defeat the Senate’s floor amendment to actually override the president’s proposal.

Jet skiers are everywhere. They’re free, they’re fast, and they’re high demand, but if you’re improper, they can become deadly. Jet skiers are constantly creating the waters, and with the proper precautions, we can ensure that this summer remains an increase in injuries.

**Court hears from Jay Shaw**

An Iowa City attorney and the state Attorney General are set to argue over whether the Shaw case should be heard by the Grand jury at the Iowa Supreme Court.

By Sarah Locke
The Daily Iowan

Jay Shaw was asked by the Iowa Supreme Court to present oral arguments on whether Shaw, a 31-year-old man, should be removed from the position of Iowa State Art Commission's general counsel.

Shaw is accused of violating state law by charging for art, according to the attorney general.

The court is scheduled to hear arguments Tuesday, which will help determine whether Shaw will present the case to the grand jury.

Shaw is also accused of violating the law by charging for art, according to the attorney general.

The Iowa Supreme Court agreed to hear Shaw's case in January, according to the attorney general.

Gail Ashman, a former member of the Iowa State Art Commission, donated $100 to Shaw's campaign.

Shaw has been charged with violating state law by taking $100 from donors.

Religious freedom: Our greatest right

Every Pareh of July should be a day in which we rededicate our faith in the American experiment - and deduce those who would trample upon it.

Al Gore, by example. When the former Republican candidate proved himself willing to stand up for the cause of religious freedom he should be endorsed.

Mr Gore has a good right to be leading the movements to ensure that everyone, regardless of race, religion or sexual orientation is protected in law.

Gore was a leader in the Senate, and later as Vice President, of speaking out against religious discrimination.

He calls for a bill that would protect the rights of people to practice their religion in the workplace and in public places.

But his leadership in speaking out is not enough. He must now take action to ensure that laws are passed that protect the rights of all Americans.

He must support legislation that would ensure that employees are not discriminated against on the basis of their religion.

He must also support legislation that would ensure that public accommodations are not discriminated against on the basis of race, religion or sexual orientation.

We need leaders who will stand up for the cause of religious freedom, and Al Gore is one of them.

Mars travel

With affordable human travel to Mars, possibly some Americans are looking forward to their chance to explore the Red Planet.

By Jane L. Alcorn

WASHINGTON, D.C. - Businesspeople interested in establishing a permanent base on Mars are looking to the possibility of a manned mission to the Red Planet. The question is: What's next?

Some have called for a 2050 deadline, others argue for a 2030 deadline. But one thing is certain: it's time to move forward.

The question is how.

A federal study, released in 2003, estimated that the cost of a manned Mars mission would be between $50 billion and $100 billion.

But that's not the only expense. There is also the cost of establishing a permanent base on Mars, which could be in the trillions of dollars.

So what's next?

First, we need to determine what kind of mission we want to send.

Do we want a scientific mission, or a manned mission?

And then we need to determine how we're going to finance it.

Will it be through government funding, or private investment?

And once we have a mission, how do we ensure that it's sustainable in the long term?

These are all important questions that need to be addressed.

But one thing is clear:

We need to move forward.

The future of Mars exploration is bright, but it requires a clear plan and a commitment to the mission.

Swiss: Handout hero out a success

The Swiss government says its drug giveaway program has slashed crime and saved taxpayer's money.

By Clare Nally

BERN, Switzerland (AP) - Switzerland has been at the forefront of medical research, and scientists have long been interested in the effects of a drug called cannabis. In recent years, however, the government has been more cautious in its approach, with some officials warning that the use of the drug could be harmful to public health. These concerns have been fueled by reports of cannabis-related deaths, and the government has been working to find ways to curtail its availability. The Swiss government has taken a significant step toward addressing these concerns by launching a public awareness campaign aimed at reducing consumption and promoting safe use. The campaign has been named "Swiss: Handout hero out a success," and it has been widely praised for its effectiveness. The campaign has been credited with reducing cannabis consumption and improving public health outcomes. The Swiss government has been praised for its efforts, and the campaign has been seen as a model for other countries looking to reduce cannabis consumption and promote safe use.

Sagan’s widow makes movie rounds alone

CAPE CANAVERAL, Fla. — Jodie Foster’s version of Carl Sagan’s novel about the director’s ministry of teaching and intellectual diplomacy was never going to be anything like the cerebral weirdness that is the real Sagan. But screenwriter Lorenzo di Bonaventura (“Pirates of the Caribbean”) has crafted a captivating harmony of special effects, however, with the feature film portrayal on the big screen.

ASHEVILLE, N.C. - Coming off his biggest season in the 17-year history of the program, veteran coach Tom Fellers said he and his players shouldn't need an extra week to prepare for training camp if they win the ACC.

Fellers said his players have an extra week to prepare for training camp because they won the ACC.

"It's a true statement," Fellers said. "But it's also a true statement that we should be doing it right now because we won the ACC."
