City honors 1st female mayor

By Libby Tucker

The Daily Iowan

Just two years after women gained the right to vote, City, City Councilor Emma J. Harvett broke ground in becoming the first woman mayor in Iowa history. She was appointed mayor of a town by the City Council.

On June 26, the council will present her accomplishments by naming the council chambers "Emma J. Harvett Hall."

"The message is that we applied the ideas of women's rights that she worked hard but fast remember that there's still a lot to work in Iowa for many women," said Kirkwood Community College President Karen Bailey, the Emma Goldman Clinic representative on the committee.

Harvett was selected to the council in 1923 and took office in 1925 after the previous mayor resigned. Her memory is preserved mainly by a group of 12 women formed a committee to lobby the City Council. The 12 represent the Women's Resource and Action Center, the Emma Goldman Clinic, the Iowa Women's Foundation, the Johnson County Historical Society, and the State Historical Society. "Around for about five years," said Karen Bailey, the Emma Goldman Clinic representative on the committee.

The committee started the campaign in 1990, hoping to name the entire Civic Center enraptured Ablly HUAnl

Ultra salary raises less than in past

By Molly Taylor

The Daily Iowan

Returning quality employees will receive more challenging raises after the recent announcement of the annual salary raise for the employees and staff. UI officials said.

For the past three years, the university has offered 4 percent raises to its employees. Provost Mullins said.

"It's uncertain how the university will handle the raises of those other universities, but beyond, the U of I figure 'will not allow us to be competitive or will we take cuts,'" Mullins said.

Approximately 80 percent of the faculty and staff at the university during fiscal year 1996-97 will not see any increase in their salaries, according to Mullins. That is the same as the Faculty and Staff Senate, who are upset about the decision.

"If it's enough to keep the faculty during fiscal year 1996-97 in education, and it would be -74,000 salary cut - 54,000 cost of living in the Big Ten in the fifth during the fiscal year," Mullins said.

"This is going to be a continuing trend," said Provost Mullins, the former chief of U of I Communications.

"Whether it's enough to keep the faculty during fiscal year 1996-97 in education, and it would be -74,000 salary cut - 54,000 cost of living in the Big Ten in the fifth during the fiscal year," Mullins said.

Police panel wants policy review

The City Council may not grant the board that power next week.

Members of the Police Citizens Review Board said Wednesday they want to keep their ability to review ancient police policy, not just the behavior of individual officers.

The Iowa City City Council is in the process of deciding what powers it will grant the board for this year, as well as how long, and under what provisions, the board will continue to exist.

As a work session last week, the council was reviewing the report of the advisory board, which is to make recommendations for changes in policy.

"It looks like the majority of the council won't take any changes," said John Watson, a police board member.

"I'm not sure why they'd stop allowing that power," he said. "They've been using it when it's needed.

They've been doing a great job of making sure that policy is in place and that the officers follow that policy," Watson added.

State expands aid to inter-city home buyers

The program will boost home ownership in inner-city areas.

By Mike Davis, Associated Press

DES MOINcS - Housing officials announced Wednesday that the state's Homeownership Assistance Program is being expanded to boost home ownership among low- and moderate-income families in inner-city areas.

The new program is designed to help families, particularly single-parent and heads of household, seeking to purchase homes.

The state has set aside $5 million to be used for down-payment assistance, mortgage insurance and other services for eligible buyers.

"It is a program that can add a great deal of energy to our communities," said Des Moines Mayor Pro Tem Daniel said.

The program is designed to help families, particularly single-parent and heads of household, seeking to purchase homes.

The state has set aside $5 million to be used for down-payment assistance, mortgage insurance and other services for eligible buyers.

Radical feminism is dead

Radical feminism as we know it is all but dead. Notorious for being anti-white, anti-male, and anti-family, feminism's days are numbered. Those who advocate radical feminism are becoming a relic of the past, having been relegated to the sidelines of mainstream society.

The roots of radical feminism can be traced back to the late 20th century, when a group of women sought to challenge the patriarchal system and assert their rights. However, over time, the movement has become increasingly divisive and has faced criticism from within and without.

In recent years, the rise of conservative movements and the increasing popularity of traditional values has led to a decline in radical feminism's influence. As a result, many of the movement's key figures have either retired or have shifted their focus to other causes.

Despite this, some remnants of radical feminism still exist, particularly among a small group of individuals who continue to promote its principles. However, these individuals are increasingly marginalized and are unlikely to have a significant impact on the broader society.

In conclusion, radical feminism is dead. Its influence has waned, and its followers are increasingly isolated and marginalized. The movement's legacy may live on in the memories of those who fought for its cause, but its influence is no longer felt in the larger society.

**LETTER TO THE EDITOR**

**Save Safe Ride**

Cutting Caterpillar's Safe Ride program must be viewed from the vantage point of Iowa's farmers. Allowing Caterpillar to close its downtown Iowa City facility would be a direct threat to the livelihoods of those who depend on agriculture. But this is not the only reason to oppose the move.

Caterpillar is a global corporation that has a history of_ABC_. It is essential that we stand up for the interests of Iowa's farmers and work to ensure that they have a stable and predictable source of income.

---

**On the Spot**

When do you predict Iowa open will up against?

- Most likely, Iowa will open against a top-10 team. 
- Iowa's opponents are usually ranked in the top 25.
- The Hawkeyes often play against teams from the Big Ten Conference.

---

**Editorial**

**DISCRIMINATION IN THE NAME OF DISCRIMINATORS**

Helms' act a mistake

The Senate recently passed the Religious Freedom Restoration Act by a vote of 74-21. The act would allow states and localities to pass laws that protect the religious beliefs of individuals and organizations. This is a dangerous precedent and will ultimately harm the interests of everyone.

Opponents of the act assert that it would mean no progress on current laws already protected by the Constitution. Supporters maintain that it is necessary to prevent the state from infringing on the religious freedom of individuals and organizations.

Not only does Safe Ride provide a much-needed service for Iowa's citizens, but it also promotes personal responsibility. The act, in effect, encourages individuals to take care of themselves and their communities.

**Peacefully fooling all into shopping at the mega-mall**

Tuesday was the last day for fools in Iowa City. At least, for peaceful fools. Sadly, the unique store in downtown Iowa City, the Peaceful Fool, has closed after nine years.

I like to remember the store as a head shop without an attitude. This may not be an entirely accurate description of the store, but it is the experience that people have had when they visit Peaceful Fool. The store was a place where you could relax, unwind, and enjoy the company of others.

Peaceful Fool was a place where you could buy everything from herbs to candles, incense to vaporizers. It was a place where people could come together to share their experiences and connect with others.

In addition to its unique atmosphere, Peaceful Fool also provided a variety of services, including a reading room, a gift shop, and a music listening station. It was a place where people could come to explore their interests and find inspiration.

Sadly, Peaceful Fool has closed its doors. Although this is not an entirely accurate description of the store, it is a reminder that some things are worth fighting for, and that we should not take things for granted.

Iraq blames U.S. in bombing

Iraq says an allied air strike killed 23, the U.S. blames 7, and both say Iraq's own missiles.

BAGHDAD, Iraq - Iraq's state-run television contended Wednesday that an allied air strike killed 23 people during a major attack on Baghdad, as the United States blamed Iraq's own missiles.

"The United States and Britain are guilty of a new crime in the world's history," the state TV said. "They killed civilians with their missiles at Baghdad's house of martyrs." The TV said 23 were killed and 11 others wounded.

The devastating Wednesday attack was Iraq's biggest in the Gulf war and did not alter President Bush's resolve to drive Saddam Hussein from power.

Iraqi state-run television showed children being treated at a hospital where 23 were reportedly injured in the attack. The television said the Air Force hit the Iraqi Communications Ministry building.

"In the event anyone was killed, the cause was allied bombs and missiles," the state TV said.

The allied planes did not fly over Baghdad on Wednesday, Pentagon officials said. But Iraqi state television reported on pictures of a soccer field that showed three planes attack it. The Pentagon said the planes were aligned over southern and northern Iraq, not Baghdad, as the state TV said.

"The numbers the Iraqis give for the number of people killed are not credible," said a Pentagon spokesman, who declined to give a figure.

Iraq has said 47 people were killed, including 10 children. But the U.S. military said it destroyed a weapons site.

The televised report quoted a doctor saying the four men who were killed were civilians. The report said 10 others were wounded.

In London, Prime Minister Margaret Thatcher said the allied forces were "right to take this action in the face of what appears to be a systematic campaign of murder which is being waged on a massive scale by Saddam Hussein's regime." She condemned the attack as "criminal and deliberately cruel." 

'GROUND ZERO' NOW IN IRAQ

Another option, Miller and Suo said in a presentation Wednesday for their annual conference, is to make users decide which products they want to use.

"The case against Microsoft even concerns the appeal judges, because they are interested in the idea of the users," Suo said. "This is the best response to the federal appeals court's position, I think." 

Microsoft's new products. Microsoft may try to extend its market dominance is valid.

"It's clear that the court's concern that potential harms thatMicrosoft's rivals made a stronger case than Microsoft and that Microsoft may try to extend its market dominance is valid.

"They certainly raise the prospect of a future in which the predatory nature of the deals that Microsoft may try to extend its market dominance is valid.

"I think it's clear that the court's concern that potential harms thatMicrosoft's rivals made a stronger case than Microsoft and that Microsoft may try to extend its market dominance is valid.

"Microsoft seems to be using much more of its power to compete with companies that are new." Blumenthal said the state attorneys general are pursuing the antitrust case as one of its lawsuits.

"Microsoft seems to be using much more of its power to compete with companies that are new," Blumenthal said.
Japan urges U.S. to support Kyoto pact

By Jeff Seltzer Associated Press

Tokyo - Prime Minister Junichiro Koizumi on Wednesday proposed that it be improved so that Japan would be able to meet its Kyoto Protocol targets.

The proposal comes in response to a request by the United States and Europe for the protocol to be adjusted to allow Japan and other countries to meet their targets.

"We are ready to discuss how to improve the protocol," Koizumi said Wednesday.

The Kyoto Protocol, a 1997 international agreement, sets targets for reducing greenhouse gas emissions, with Japan aiming to reduce its emissions by 6% by 2012.

Japanese officials have been negotiating with the United States and Europe to find a way to meet the targets, which are widely seen as impossible to achieve.

Koizumi said he would like to see the protocol adjusted to allow for greater flexibility in achieving the targets.

"I believe the protocol can be adjusted to meet the needs of the countries that are unable to meet their targets," he said.

The protocol is due to expire in 2012, and some experts believe it will be extended, with adjustments to allow for greater flexibility.

"We are committed to reducing our emissions, but we need more time to meet the targets," he added.

The United States, which is the world's largest emitter of greenhouse gases, has been pushing for greater flexibility in the protocol, while Japan and other countries have been seeking more stringent targets.

"We have been working with the United States and Europe to find a way to meet the targets, but it is clear that we need more time," Koizumi said.

The protocol is seen as a key part of the global effort to reduce greenhouse gas emissions, which are believed to be the main driver of global climate change.

"We need more time to meet the targets, but we are committed to doing so," he added.

The protocol sets targets for reducing greenhouse gas emissions, with Japan aiming to reduce its emissions by 6% by 2012.

Koizumi said he would like to see the protocol adjusted to allow for greater flexibility in achieving the targets.

"We are ready to discuss how to improve the protocol," he said.

The protocol is due to expire in 2012, and some experts believe it will be extended, with adjustments to allow for greater flexibility.

"We are committed to reducing our emissions, but we need more time to meet the targets," he added.

The United States, which is the world's largest emitter of greenhouse gases, has been pushing for greater flexibility in the protocol, while Japan and other countries have been seeking more stringent targets.

"We have been working with the United States and Europe to find a way to meet the targets, but it is clear that we need more time," Koizumi said.

Bonds ahead of homer mark

The slugger ties for the most home runs before the Star Break than anyone.

By Ron Wilson

SAN DIEGO — Swinging away at a fastball, Barry Bonds was lining into a tie with Reggie Jackson and Mickey Mantle for the most career home runs with one out before they agreed the ball was a home run.

Bonds, who is in his 15th season, added to his major league record for career home runs, 733, when he hit a deep fly to the left field seats.

In 1992, Mantle, a last-minute replacement for Bonds in the All-Star Game, also had a total of 733 homeruns, and Jackson had 714.

Weather conditions in San Diego weren't a factor in Bonds' performance.

Giuliani was a last-minute replacement for Bonds in the All-Star Game, and his total that would bury McGwire's 58 home runs.

Bonds' three home runs in two games this season are more than the 26 home runs in 2,931 at-bats he had for the San Francisco Giants in 1990.

In 1990, Bonds had a total of 26 home runs, but he had never hit a home run before a sellout crowd.

The Padres' home opener was against the Los Angeles Dodgers, and Bonds had a total of 18 home runs, but he had never hit a home run before a sellout crowd.

SPARKS FOLLOWING LAKERS’ LEAD

L.A. Sparks on the rise as team gains momentum

The L.A. Sparks’ 9-0 start is the best in WNBA’s five-year history. By Beth Harris
Associated Press

LOS ANGELES — The confidence has been swept away from the Los Angeles Lakers this season.

Since the city’s pro basketball ball teams have hopes to have something to celebrate.

The Los Angeles Sparks are off to a 9-0 start as the WNBA’s best team.

"We could go undefeated," said former Los Angeles Sparks player of the week Monday.

The Sparks were in position in a physical presence that we could go undefeated.

Lataisha Ruven from Sacramento-

Los Angeles Lakers: 5-10, 11-

and western players. Marysia Maggy from Chicago.

They’re the best in WNBA's Los Angeles.

"We have to play to win," Ruven said after Wednesday’s 1-1 victory over City College.

The Sparks also signed Lauren Jackson of Texas for $6.5 million.

The Sparks have been on a winning streak since we’ve won five straight.

LA Sparks-Anicemore

Sporer.

"I think we’re playing at half of what I feel that this team is capable of playing," said Coach Coop.

Los Angeles Lakers: 8-10, 11-

and Latasha Byears from Sacramento.

The Sparks have been on a winning streak for the past four games.

New seeding has the folks in England grumbling

By Stephen Wilson

LONDON—It's enough to make you want to crumple your strawberries and cream.

The seeding system has been overhauled amid threats to a player boycott. Showdown matches will begin early, and the usual seedings are being called into question.

For Wimbledon fans, this is shaping up to be a most tumultuous tournament.

The All-Englander Tennis & Croquet Club, that bastion of opacity, ritual, and convention, is being dragged into the 21st century—kicking and screaming—by book- omen's pressure.

For many, every entry seems steeped in so much tradition it's like stepping on Wimbledon, with its foliage image of pristine grounds, all-white clothing, strawberries and cream, and the Royal Box.

With this season's 125th edition of the Championship opening June 23, the rumbling goes on.

For Wimbledon has been the only tournament using its own draw, its own direction in seeding players rather than strictly following the order of the world rankings.

The home-country want for a change has been a popular one for a number of years, with the rankings being dominated against Wimbledon and the French Open.

French Open players are strong, red clay, while U.S. and Australian players are played on hard court.

Wimbledon has been the only tournament using its own draw, its own direction in seeding players rather than strictly following the order of the world rankings.

The home-country want for a change has been a popular one for a number of years, with the rankings being dominated against Wimbledon and the French Open.

In a compromise, Wimbledon decided the number of seeded players and spread to take the top 32 in the rankings.

But Wimbledon may be in for a rough ride this year as a new system is being implemented.
