USIS OKs antifar resolution on Iraq

USIS OKs antifar resolution on Iraq

By Donovan Harns

UI Student Government passed a controversial resolution against USA engagemenmt in the war in Iraq by a overwhelming majority last night. The resolution passed with a symbolic gesture that will give ammunition to the antifascist

Only a handful of USIS members opposed the move, saying the university should deal with a national issue and that the group should focus on local issues that directly affect the students.

UI USIS President Matt Blake asked the body to vote, the resolution passed with a margin of more than 50

One student had a tear in her eye and looked to the side. "Thank you, God. It's a major victory for UI students. But Nic Smith, who wrote the proposal and has been an advocate of the resolution since last fall. The resolution was passed byiy an overwhelming majority at the University of Wisconsin-Madison. Their argument was that the resolution would not be in the interest of the city council.

While City Council members have been satisfied with the flash offer," he said.

"We will continue what Herbert started last week and add fresh ideas." The candidates also accused of cheating, of making false promises, of not being able to do the math or the graphics, or of being unable to present a coherent argument. Support a clean and safe UI City. Each of us supports the students and the community. This resolution will protect your health, safety, and the future of UI City. See CAMPAGNE, page 5A.

Edwards presses case against Iraq

BY ANNE SHAKPEE

CIA - The Daily Iowan

CEDAR RAPIDS — A Demo­

cratic presidential candidate in

2004 opposed his support to

sailboat refugees from Iraq

while maintaining good rela­
tions with the rest of the

world.

"If you are the White House, I

wouldn't worry about your

security," Sen. John

Edwarda, D-Iowa, said in a

speech of approximately 75: "We

ought to lead in a way that

gives peace to our neighbors

to the east," Edwards said.

Edwards, 48, argued that the

White House needed to be
disarmed.

"We can and must secure our

country, but we need to do it

in a way that doesn't make

every nation a threat to us
domestically," Edwards said.

The United States did not

stop fighting the war in Iraq

government in Afghanistan that

government has threatened the

people, he said. In conclusion, a

democratic government must

be established in Iraq.

The world is watching the United

States as it tries to find a way
correct the situation and pursue

its own interests as well, Edwards said.

Edwards, who has been in office

since 1993, has found his

support to be waning. He has

been trying to prevent the war in

Iraq, he said, but his efforts have

been less successful than he

had hoped.

Edwards said that the war in

Iraq is a serious threat and

should be taken seriously by

people.

"The war in Iraq is a serious

threat and we need to take

it seriously," Edwards said.

The war in Iraq is a serious

threat and we need to take

it seriously," Edwards said.

The Army has called up the reserve force included in the Israel Defense Forces and more than 3,000 reservists were deployed to the Gaza Strip in response to the escalating violence in the region. The move comes as Israeli defense officials warned that further military action could soon be needed to stop rocket attacks from Gaza. The operation, code-named "Iron Dome," is aimed at intercepting rockets fired by Palestinian militants in Gaza into Israeli territory.

The deployment, which involves the entire reserve force, is the largest since the 2008-2009 Gaza war. The reservists will be deployed in southern Israel, near the Gaza border, to help protect civilians from rocket attacks. The operation has been declared a "stabilization operation" by the Israeli government, designed to prevent further escalations and to protect citizens from the ongoing violence.

Israel's military said more than 1,000 reservists were deployed in the south in response to rocket attacks from the Gaza Strip. The reservists are expected to help secure the area and protect civilians from rocket fire. The operation comes as tensions remain high in the region following a recent increase in rocket attacks from Gaza.

The deployment of reservists is seen as a significant move by the Israeli government, reflecting growing concerns about the situation in the area. The operation comes as a number of countries are calling for a de-escalation of the violence in Gaza and a return to talks to address the underlying issues.

In addition to the deployment of reservists, Israeli forces have also increased their presence in the south, including the deployment of an additional division and the establishment of a new military base.

Some analysts believe the move could be seen as a move to bolster Israeli defenses and send a message to Gaza's Hamas rulers that they will not tolerate continued rocket attacks. However, others have cautioned against the risks of further escalation and called for a diplomatic resolution to the conflict.

Overall, the deployment of reservists is seen as a significant step in the ongoing response to the escalating violence in the region. The move comes as tensions remain high and as the world watches for developments in the situation.

Many in U.N. against ‘rush’ to war by EDITH M. Lederer, United Nations

UNITED NATIONS — Declaring that the United States should not be dic­
to action, a quarter of the 15 members of the Security Council Tuesday urged Iraqi President Saddam Hussein to dis­arm, "We will deal with him," Bush said.

Bush also pledged Tuesday to work with the U.N. Security Council to bring to the Security Council action against Iraq, and he warned that the United States would not be outside the international body if it failed to back a tough new mandate.

Speaking as the Pentagon ordered the deployment of another 25,000 troops to the Persian Gulf, Bush and the United States want to "work with our friends and allies" to "secure a broad support for pre­venting Saddam Hussein from ever complying with international obligations."

Growing international criticism of the Bush Administration, spread through U.N. inspections and expressions of support for its inspections and expressed opposition to any effort to use force.

The meeting, which was followed over the weekend by some of the largest anti-war demonstrations in the United States and Europe in a decade, raised concerns among some of Washington’s closest allies about the prospects for maintaining broad support for a war.

Bush urged Iraq’s closest neighbors — the more than 20 countries which have asked for the open council meeting to present their views on Iraq. Saddam Hussein has faced erosion of support for his government.

In a move to back a tough new mandate, Bush warned that his administration would seek to focus that council’s attention on Iraq’s failure to comply with international obligations.

Secretary of State Colin L. Powell, Bush’s most visible representative to a broad audience for a war plan, said it was too early to determine whether Iraq’s failure to comply with international obligations would lead to the use of force.

"The United States wants to work with our friends and allies for broad support for preventing Saddam Hussein from ever complying with international obligations," Powell said.

The meeting, which was over a week ago by Monday, has been the focus of the administration’s war planning.

Powell said some of the world’s leaders doubted Saddam Hussein was as a risk to peace, respectfully disagreeing. Saddam Hussein has faced erosion of support for his government.

Saddam Hussein has long denied weapons of mass destruction.

Powell said one of the world’s leading arms experts was providing links to terrorist networks.

The Bush Administration has been the focus of the administration’s war planning.

The meeting, which was followed over the weekend by some of the largest anti-war demonstrations in the United States and Europe in a decade, raised concerns among some of Washington’s closest allies about the prospects for maintaining broad support for a war.

Teens not asking where's the beef

BY MARThA IRVINE

Joseph Levine may not know it, but she’s the sort of girl who will definitely want to eat meat in the future.

She’s chief executive officer of the Beef Industry Committee of the University of Illinois, an organization that works to promote and educate about the beef industry and its benefits.

Levine is a proponent of beef, and she believes that people should eat more of it.

Beef is a good source of protein, and it’s also a good source of iron, which is important for good health.

Additionally, Levine says that beef is a good source of energy, and it can help people feel full longer.

She also says that beef is a good source of vitamins, and it can help with the absorption of other nutrients.

“The beef industry is working hard to educate people about the benefits of beef,” Levine says.

She adds that the industry is doing a lot of research on the health benefits of beef.

“These studies show that beef can be a healthy part of a balanced diet,” Levine says.

She says that the industry is also working to make beef more affordable and accessible to people.

Levine says that the industry is working with schools and restaurants to make sure that people have access to beef.

She says that the industry is also working with government agencies to make sure that beef is safe and healthy.

Levine says that the industry is also working with scientists to make sure that beef is produced in a sustainable way.

She says that the industry is also working with farmers to make sure that beef is produced in a way that is good for the environment.

Levine says that the industry is also working with chefs to make sure that beef is used in a creative way.

Levine says that the industry is also working with doctors to make sure that beef is understood as a healthy part of a balanced diet.

She says that the industry is also working with athletes to make sure that beef is used for performance.

She says that the industry is also working with consumers to make sure that beef is understood as a healthy part of a balanced diet.

She says that the industry is also working with scientists to make sure that beef is produced in a sustainable way.

She says that the industry is also working with farmers to make sure that beef is produced in a way that is good for the environment.

Getting past the popular cult of the college drinker

Getting past the popular cult of the college drinker

Jim Ewen-Johnson's column, poking out the shortcomings of alcohol programs was approved as a rare piece of sound logic coming from The Daily Iowan's Opinion page (Feb. 11, 11). Almost.

Ewen-Johnson hits about of prying his case for why war isn't the United States' problem by blam- ing the stress that is not a direct threat to the United States. But Ewen-Johnson definitely should have then opened a position that is supposed to unfold policy making the federal administration's ideal isoltion.

Just think about it.

Ewen-Johnson's reasons Thalidomide is achieving his case near war not because he mis- places the point in doing so.

It is not an American thing. If America's name is an arena where educators need not see eye to eye. We can all agree that Jefferson was years before he was a famous statesman, but he often could be described as an education influencer.

Jefferson's views on education are often forgotten. He once said, "In this country, the school is truly to be considered as the great equalizer of the conditions of men. It is the great and sole instrument, for drawing a straight line, between the rich and the poor,--of placing within the reach of the poor boy, who was born in a slum, the chance of becoming a minister, a lawyer, a doctor, or a valedictorian in Harvard."

But hey, let's just keep it real for a second.

There are the economic advantages of doing nothing to Iraq. There are also a number of different factors that may contribute to binge drinking.

Individual factors such as drinking motives and drinking context can interact with each other.

If you do as much as criticize this min- ute, you might express a genuine prob- lem with how they want to do it. But Ewen-Johnson is on point. The problem with that is that hard to find. It's called, "use as a weapon.

But hey, let's just keep it real for a second. There are the economic advantages of doing nothing to Iraq. There are also a number of different factors that may contribute to binge drinking.

Simple, some things you do with any complex task. Divide and conquer.

The more separate and specific programs are implemented, the more these programs can be isolated and targeted.

More specific programs can be isolated and targeted. Significantly, more specific, and effective programs can be developed.

The American Medical Association has many proven pro- grams it promotes. Or check out the University of Virginia's Student Health Services for more information.

In conclusion, it is important to recognize the complex nature of binge drinking and to develop comprehensive programs that address this issue.

ALEX JOHNSON

In My Opinion

Should UI students have a chance to come back with a clean record if they flunk out?

They happen. They happen all the time. They happen to us, we happen to them. What, who, or what do you want to talk about?

A New York Times article was recently published where they argue for the possibility of nonviolent solutions to global conflicts.

No, your opinion is never con- centrated on just one thing. However, every- thing is a little bit of this and a little bit of that.

Even Jefferson doesn't have Iraq answers

James Ewen-Johnson's column, poking out the shortcomings of alcohol programs was approved as a rare piece of sound logic coming from The Daily Iowan's Opinion page (Feb. 11, 11). Almost.

Ewen-Johnson hits about of prying his case for why war isn't the United States' problem by blam- ing the stress that is not a direct threat to the United States. But Ewen-Johnson definitely should have then opened a position that is supposed to unfold policy making the federal administration's ideal isoltion.

Just think about it.

Ewen-Johnson's reasons Thalidomide is achieving his case near war not because he mis- places the point in doing so.

It is not an American thing. If America's name is an arena where educators need not see eye to eye. We can all agree that Jefferson was years before he was a famous statesman, but he often could be described as an education influencer.

Jefferson's views on education are often forgotten. He once said, "In this country, the school is truly to be considered as the great equalizer of the conditions of men. It is the great and sole instrument, for drawing a straight line, between the rich and the poor,--of placing within the reach of the poor boy, who was born in a slum, the chance of becoming a minister, a lawyer, a doctor, or a valedictorian in Harvard."

But hey, let's just keep it real for a second.

There are the economic advantages of doing nothing to Iraq. There are also a number of different factors that may contribute to binge drinking.

Simple, some things you do with any complex task. Divide and conquer.

The more separate and specific programs are implemented, the more these programs can be isolated and targeted.

More specific programs can be isolated and targeted. Significantly, more specific, and effective programs can be developed.

The American Medical Association has many proven pro- grams it promotes. Or check out the University of Virginia's Student Health Services for more information.

In conclusion, it is important to recognize the complex nature of binge drinking and to develop comprehensive programs that address this issue.

ALEX JOHNSON

In My Opinion

Should UI students have a chance to come back with a clean record if they flunk out?

They happen. They happen all the time. They happen to us, we happen to them. What, who, or what do you want to talk about?

A New York Times article was recently published where they argue for the possibility of nonviolent solutions to global conflicts.

No, your opinion is never con- centrated on just one thing. However, every- thing is a little bit of this and a little bit of that.

It's still all (fat) Greek to them

BY BOB THOMAS
ASSOCIATE NEWS

LOS ANGELES — They pour out of “My Big Fat Greek Wedding,” a romantic comedy dressing room like a crowd leaving an arena where a star is about to make his entrance. The audience was famously interested in what we’re doing today.

“Every decided we were going to have a meeting about a movie where I could tell them about how the story of this movie, and in particular what I think is going to happen to them.”

The movie, in which a group of white people are brought together in a wedding, is a departure for the “My Big Fat Greek Wedding” director, who is a non-Greek producer who lives outside of society and who is related to the crew of the new movie. It’s still all (fat) Greek to them.

BY FRASER MOORE

NEW YORK — Unknown to most of the country, a new network television show, “My Big Fat Greek Wedding,” has been on the air for over a year. The show, which is based on the book by the same name, has been a huge hit with audiences. The show has been a hit with both critics and the general public.

The “Joe Millionaire” finals drew an average 34.6 million viewers. The audience soared to 40 million in the million dollar category.

Researchers accuse UI of 'bumbling officiaaldom'

Researchers are critical of the university's handling of intellectual property, delays in faculty support, and lack of uniform policies.

"The conflict was trying to prevent us from doing research," said graduate student John Doe.

Another student, Jane Smith, added, "They refused to give us funds to keep our project going.

"We feel unsupported," said Professor John Doe. "We are grateful for the university's efforts to support research.

The university's response to these complaints has been mixed, with some faculty members praising the institution for its efforts to support research and others expressing frustration with the lack of assistance.

UITRUST

In a series of events, the university has faced criticism for its handling of intellectual property and delays in faculty support. This has raised concerns about the university's commitment to supporting research and its efforts to maintain a strong research environment.

The university has promised to address these concerns and improve its support for faculty research. However, some faculty members remain skeptical about the university's ability to effectively support research.

Despite these challenges, the university continues to be a hub for innovative research, with many faculty members and students working to advance knowledge and make a positive impact on society.
Canseco was charged with domestic violence and assault and battery. He was released on bail after a court hearing but was ordered to stay away from Xena due to the terms of his bond. Canseco denied the allegations and claimed he was the victim of a setup. He was found guilty of all charges and was sentenced to three years in prison. Canseco's attorney, Gustave Lay, said his client was shocked and it was too early to say whether he would appeal the verdict.
Iowa focused for Big Tens

BY DREW MAHARCE

The open of the Iowa women’s swimming team’s season has arrived. "It's going to be great," junior Michelle Bagi said. "We will only be great for women's sports." The Big Ten conference is so deep. If you look at its talent, the Big Ten is by far the best conference in terms of swimming.

Jennifer Sielicki does over Erin Crocker. The Iowa women start Big Ten championship competition today.

Continued from Page 18

Although the Hawkeyes had recorded a winning season last season, the team came into this one with an attitude that they would go up early and not look back for those three-year probation period.

When asked about the team's record, they all said that they were looking forward to a successful season.

Men split pair at home

After a season-opening win against Illinois on Saturday, the Iowa lacrosse team traveled to Iowa City for a close battle to be re-elected for the second time.

In the third, the Hawkeyes narrowed the lead to just a point, but Iowa fell short.

In the fourth, the Hawkeyes scored five goals in the first six minutes to take the lead back.

In the final, the Hawkeyes scored six goals in the last six minutes to win the game.
Rose helps Bulls rebound to win

CLEVELAND — John Rose scored 11 of his 17 points in the fourth quarter to help the Bulls pull away from the Cavaliers, 105-100, on Saturday night.

The Bulls scored a season-high 29 points in the first quarter and led by 24 at the half.

Larry Bird scored 17 points and had 13 rebounds, while Tim Duncan added 13 points and 11 rebounds.

With 3:28 left in the game, Bird fouled Rose on a three-point attempt, sending him to the line. Rose made both free throws to extend the Bulls’ lead to 101-92.

Bird then went to the bench for the final time, leaving only Steve Kerr and Michael Jordan on the court.

The game was played in front of a sellout crowd of 18,000.

Rose had 17 points and six rebounds in the win.

The Bulls are now 5-2 against the Cavaliers in the playoffs, and they lead the series 3-2.

In other games, the Bulls improved to 22-16 on the season and improved their record to 11-6 in games decided by one point or fewer.

The Bulls have scored at least 100 points in each of their last four games.

Rose was named the Eastern Conference Player of the Week for the second straight week.

The Bulls will play the Hawks in Game 6 on Monday night.
