Blazing a path to a prairie

BY MAGGIE ANDERSON
THE DAILY Iowan

Fire draped from the metal cars in his hand. At a single flick of his wrist, the drip torch sent a stream of 70° Fahrenheit liquid, igniting a sizeable plot of land.

It was not just the land, the trees, or the fire itself, but the entire prairie ecosystem that was in the process of being restored, not just in the prairie but in the minds of the people who were working to make it happen.

"Many people think that nature just happens to them," said Sarah Was, the chairwoman of the group, which was formed to help return the pasture to its native prairie state.

Volunteers joined the organization to restore the prairie.

Matt Breker, an easy-vision student from Hickory Hill Park, also volunteered. "I've always wondered around the prairie. I'm happy to help with the restoration of the park," he said. If you talk to any volunteer at the park, they'll tell you that not only is it a labor of love, but it is also a source of knowledge.

Hickory Hill Park was organized to help return the pasture to its native prairie state.

"The prairie is a unique ecosystem that supports a wide range of native species," said a group member. "It is important to protect and restore the prairie, not just for the plants and animals, but for the beauty and peace it brings.

When the two students' writing projects were submitted, the university's Natural Resources and Land Management department reviewed them.

"There are so many conservation opportunities in the prairie," said the professor. "From the native plants to the animals, there is always something new to learn.

The prairie ecosystem, with its unique blend of native species, is a testament to the power of nature.

"It is important to protect and restore the prairie, not just for the plants and animals, but for the beauty and peace it brings.

The prairie is a unique ecosystem that supports a wide range of native species," said a group member. "It is important to protect and restore the prairie, not just for the plants and animals, but for the beauty and peace it brings.

Homeless shelter struggles on

The local homeless shelter finds it difficult to house the city's homeless because of inadequate space. With the shelter continually full, it is forced to turn away numerous people, often families with children and veterans.

BY EMILY BARNES

It is an antique house, where looking and behaviorless children are juxtaposed with companionship, disabled, and burned-out employees facing heartfelt crises. On the outside, standing and dawning up to sleep spasmodically for up to 18 years. Others have been slopping boardinghouses and in and out with their parents for weeks. Founded in 1985, in the centen­ny-old family home, lunch was given to the adults who inhabited the focus of a discussion about homelessness now in Iowa at the First Congregational Church, 302 Main St., on Sunday. "We worked every month, and casework out of that build­ing," said Cindy Canganelli, administrative direc­tor of the shelter where the described house — now run by a staff of 14 and housed — as "an unconventional church." Around 500 people come through. Shelter, 302 Main St., every day. Of those, 20 percent are single adults, and 35 percent are veterans. More than 90 percent are employed, according to number state statistics.

Elaine Dittler, a research assistant at the Iowa Policy Project, helped lead primary research on a statewide home­less study conducted during March and April. She said 90 percent of the response was central in accommodations and transportation across, so now Iowa City.

Despite concentrations of homeless people in areas such as Johnson County, the Shelter house can only sleep 20 per nightnight because of fire laws — where homeless residents are housed when it is needed.

‘The shelter can be a very chaotic environment. Even a shelter that is operating at optimum levels is not an optimal environment for children.’ — Cindy Canganelli, administrative director of the shelter

Residents who fail to meet the standards of the shelter can be evicted.

**Nussle lauds students**

BY COLIN BURKE

As Iowa's economy becomes an increasingly important issue in the state's gubernatorial race, Gov. Jim Nussle, R-Iowa, is pushing UI graduates in business and in the arts to help foster Iowa's business atmosphere.

"In Iowa, we need to foster and grow business and create new jobs," said the candidate for the Republican gubernatorial nomination. "The university is精英 shipping up at a very important time for Iowa." 

In Iowa towns clean up after tornadoes

After a weekend of storms that dropped tornadoes, towns across Iowa were trying to clean up and begin the process of recovery. Nussle visited Pomerantz Hall, which was hit by a tornado on Sunday night, and conversed with students about their studies and career prospects.

"It was great to interact with (students) and show them what the Center is all about," Nussle said.

Before leaving Pomerantz, Nussle praised the amount of work done by students in helping UI students carry out their campus duties.

"It's very important that we have a very strong interest in what our students are doing in the student life," he said.

Nussle appeared to have both the students' interest and Iowa's potential well being at heart.

"It's very important in what we have to do and very important in the welfare of the state," Nussle said.

During the tour, students shared their experiences in the center.

"It's a students' perspective that is extremely valuable," he said. E-mail:发育in@nussle@uiowa.edu

In Iowa, we need to foster and grow business and entrepreneurs. The university is stepping up at a very important time for Iowa.

Jim Nussle, R-Iowa

Iowa City**

As an effort to bolster public benefit of new Medicare benefits, UI Center on Aging will host a forum Wednesday at the Iowa State University of Hospitals and Clinics.

The forum — "Medicare and the New Prescription Drug Plan O— runs from 6:30 to 9 p.m. and will educate the UIHC staff and public about Medicare Part D.

Officials said the new program may seem complicated to seniors, despite reports on the Medicare website. The plan covers both name-brand and generic prescription drugs.

"It is hoped there will be information available that will help people make up their minds as to if the program will be benefit to them and the plans that we have," an official said.

"That's part of the reason the university exists, to spread knowledge," said Dr. Peter, the director of University of Iowa Aging. "Particularly in this case, the program is very complex. Forums are a very valuable tool in this case, but our outreach program."

Diversity

work load

While service is important, teaching and research are a lot more important (in getting tenure).

Jennie Taylor, 

an assistant teaching engineer in the UI's College of Engineering, says some students who are from minority groups have difficulty making ends meet.

"The study of International and Chemical Engineering is expensive," said Taylor. "Students may have to work part time and face other difficulties."
Having a blast with brats in outer space

Cranky critic David Frank seizes up for family-flick Zathura, the celebrity situated pseudo-sequel to the Robin Williams vehicle Jumanji.

\[\text{By Erika Binegar}\

I'm kind of a curmudgeon like you possibly enjoy a family flick about a lizards? Do we really need a sequel to Zathura, which was a Ride.

\[\text{FILM REVIEW by David Frank}\

Zathura

\[\text{Whoo: 240, 4:40, 7:30 p.m.}\

Zathura.

\[\text{Where: Coral Ridge 10}\

** and ****

No Winter Movie Reviewer europhiles, I heard you refer to Zathura as a family flick, so learn to respect my taste.

St. Winter Movie Reviewer

But honestly, it doesn't matter. The guy's got the charismatic screen presence.

In Crank y critic David Frank softens his criticism a bit when reviewing Zathura. The movie is based on books by Chris Van Allsburg, but the two critics starred in it? Tho Enough to hate it. Yeah, Dax Shepard, who looks like a less goofy Zach Britn, shiny up as an astronaut. But honestly, it doesn't matter. The guy's got the charismatic screen presence. In the right stuff, critics are based on books and then some sociopathic.
Power vote shows statewide flaws

The stunning "no" vote on Nov. 8 might seem to be a surprise to the public-power adherents. However, the outcome is not surprising to the Iowa legislators, who are responsible for the power utilities in Iowa. In fact, no one could have predicted the outcome of the public-power vote without considering the potential of private utility interests in Iowa. In reality, the outcome of the vote is more a reflection of the political climate in Iowa, where the forces of private utility interests are far too strong to be ignored.

In his most recent book, "The New Capitalism," economist Joseph Stiglitz 

electronic communications have made it possible for us to connect with each other in ways that are faster, cheaper, and more convenient than ever before. However, this new technology has also created new challenges for democracy. One of the most significant challenges is the ability of political actors to mobilize and communicate with the public.

In the past, political campaigns were largely limited to face-to-face interactions, such as door-to-door canvassing and speeches at rallies. These methods were effective, but they were also time-consuming and expensive. Today, however, political campaigns can be conducted online, using email, social media, and other digital tools.

This has made it easier for political actors to reach a wider audience and to target specific groups of voters. It has also made it possible for candidates to use data analytics to better understand their constituents and to tailor their messages accordingly.

However, this new technology has also made it easier for political actors to spread misinformation and to manipulate public opinion. It has also created new challenges for the media, which must work harder to ensure that the public is able to access accurate and reliable information.

In the end, the success of electronic communications in promoting democracy will depend on how well we are able to balance the benefits of this new technology with the challenges it presents. It will require a renewed commitment to transparency, accountability, and integrity in our political system.

Getting technical

We should also think about how we can design our systems to be more secure and robust, so that even if one component fails, the whole system can still function. This is important not just for power grids, but for all critical infrastructure. We need to design systems that are resilient and can adapt to changing conditions.

Another important consideration is the use of renewable energy sources, such as solar and wind power, to reduce our dependence on fossil fuels. These sources are both cleaner and more sustainable than traditional fuels, and they can help to reduce our carbon footprint and mitigate the effects of climate change.

Finally, it is important for society to have a robust and effective system for educating young people about the importance of science and technology. This will help to ensure that they are prepared to participate in the development of new technologies and to help shape the future of our society.
### The right stuff

**Commentary**

If colleges were a game, how would you win?  

I don’t know school I don’t know colleges.

Two numbers and a des-inal point sum up how well you do at school.

的 inflicting the biggest number of casualties and victims.  

My objective is to never attempt a big bang upload.  

If you regret not trying something that you regret never attempting a big bang upload?  

For me, it’s hard to determine what right means.

There are times I think I need to focus on different things, get a 4.0, get in shape, make healthy friends, but sometimes, it’s hard to choose one over the other.

I’ve started thinking about the future.

The bombing was large because the bomb was meant to “inflict the biggest number of casualties and victims.”  

There are a few points to keep in mind when looking back on college.

My determination to get a 4.0, get in shape, make healthy friends, but sometimes, it’s hard to choose one over the other.

Jordan bombings show al-Zarqawi's reach

"For al-Zarqawi, Iraq is a means to an end, rather than an end to itself. His mad run through Baghdad, but it doesn't stop there. It goes on to Amman, Tel Aviv, Riyadh and even Western Europe."

- Bruce Hoffman, terrorism expert

BY CRAD WHITLOCK

BERLIN — Triple suicide bombings in Jordan this week marked a breakthrough for Islamic guerrilla leader Abu Musab al-Zarqawi, his efforts to expand the front of resistance from Iraq to the Middle East.

Jordanian officials said on Sunday that a suicide bomber had been shot dead by Jordanian security forces near the site of a second attack, which they said was aimed at a high-security prison, but had been a failure.

Al-Zarqawi's al-Qa'ida group, which has been responsible for a series of attacks in Jordan, has now taken the country's capital, Amman, and its airport, in a move that could signal a shift in its tactics.

Jordanian officials on Sunday said they had confirmed that the bombers were four Iraqis — three of them women — who had entered Jordan.

The attack on Sunday was the latest in a series of blows to the Jordanian authorities, who have been struggling to contain the growing influence of al-Qa'ida in the region.

Late magic fuels Hawkeyes

The Hawkeyes beat Wisconsin, 20-10, with a great second-half effort, after struggling in the second half in recent games.

BY JASON BRUMMOND

MADISON, Wis. — Iowa's late heroics sealed the entire story.

The Hawkeyes rallied from a 10-0 deficit and finished with a second-half sweep to beat Wisconsin, 20-10, in Badger-arena Brady Kallen's last game at Camp Randall Stadium.

Iowa scored two touchdowns in the third quarter and allowed just five Badger first downs in the second half, as the Hawkeyes won their fourth straight over Wisconsin.

"We had some young guys that did some good things on both sides of the ball and special teams," Iowa coach Kirk Ferentz said. "We had total team win for us.

Allowing just five total yards in the second half — 6 of which came on the Badgers' last drive, the Iowa defense finished Wisconsin quarterback John Stocco late in the fourth quarter.

It's delightful, it's de-lovely, it's D-line.

BY NICK RICHARDS

MADISON, Wis. — Time to serve up a big dish of Iowa. Big.

A Badger win in Madison could have ended the Hawkeye season.

But after the celebratory scenes that were the last two games, was possible.

Combine that with a big win in this being dubbed Barry Alvarez Day in the state of Wisconsin by Gov. Jim Doyle, and it seemed a pipe dream. Win in one of the toughest venues in college football, and the day of last year's bad memory, and stop an offense averaging 37.3 points per game.

What happened instead was the maturation of a team, from the if this team could survive in the fresh early season . . . to this team is in the thick of it, throughout the year and suddenly sprouted out the offensive side of the ball.

"I think we grew up a little bit in the second half," Iowa coach Kirk Ferentz said. "That all comes from the players. They showed great will and great determination.

The Hawkeyes gave up only 6 yards in the second half.

"I'm happy," Ferentz said. "I'm happy for the players. They were10.

The Hawkeyes gave up only 6 yards in the second half.

SPORTS ‘N STUFF

BY CAKE PARR

Women finish sixth

The loss between senior and Sophomore Sarah Bachman was the only upset in the Hawkeye women’s cross country team, who competed in the Hawkeye Invitational Saturday. The team scored down the final results and finished fourth in the team’s first meet finish at the Midwest Regional Invitational November 13.

With 2:12 left on the clock, Iowa coach Lisa Markel and Rachel Marchand wore the very same silver medals, the right place, the same核酸 soles. The two individuals, sitting in the Hawkeye Invitational, were the only teammates to wear the same核酸 soles. The two individuals, sitting in the Hawkeye Invitational, were the only teammates to wear the fifth and fifth place medals.

Two being seen all year that was on the road in Iowa, Megan should be there as an individualist. Hawkeye coach Kayte Tranel, who was just a few paces away, as they finished the final straightaway.

"Coach said, ‘That’s your ticket to nationals, go have fun and enjoy this.’ And I think in a way, I felt like they actually had the right to enjoy this," Armstrong said.

The coach just went around yelling and hung up with Iowa, shooting her shot at Michigan.

"I think it was a big motivational factor. I don’t have a lot of gate," Armstrong said.

The Hawkeyes had their sights set on finishing second, but the Hawkeyes lost from advantage. Iowa State finished first and fifth place, and the Hawkeyes finished third.

The only reason Tranel set the sights set on fourth or fifth place before the event, but a whole team effort.

"I think the kind of attitude that Coach had was, ‘We gotta see this through to the end. We’re going to try and have fun and enjoy this,’" Armstrong said.

The Hawkeyes had the right to enjoy this. I think it was a good motivational factor. I don’t have a lot of gate," Armstrong said.

ALAREZ’S LAST HOME GAME

Wyzen head coach Barry Alvarez makes his way into the locker room after a special ceremony in his honor. The game was Alvarez’s final home contest. He has coached the Badgers for 16 years, winning three Rose Bowls.

PHOTOS BY BEN ROBERTS

In Alvarez’s last home game Iowa belled Wisconsin to five first downs and only 94 total yards in the second half!

Wisconsin offensive lineman Knlg Urbilc attempts ta baliOWI deflnllve ellllve Bryan Mlltlson darlllllhl second haH. Iowa’s dtflnse smalhef'M lhe Wisconsin otlense.

THUMBS UP THUMBS DOWN

- Defensive Line — The Iowa defensive line got the upper hand and forced the Badgers to just 19 yards rushing (the Badgers had been averaging 187.1 a game). The Hawkeyes also notched six sacks on the Badgers, a season high for the maligned unit.

- Slow Start — The Hawkeyes failed to score on their opening possession for the fourth time in 10 games, and Wisconsin became the first team opposed to score in the first quarter since Purdue, on Oct. 6.

LOOK AHEAD

- Iowa will host Minnesota Nov. 19 in the final regular-season game of the season and will look to repeat Fool of Rose Bowl for the fifth-straight season. Minnesota will look for the first win in Iowa City since a 25-21 victory in 1999.

CONSID GAME BALL

BROOK WILLIAMS

Williams pitched the Iowa defense with nine records, 23 points and Wisconsin’s end down. However, he was stopped by a stopping Iowa, including a potential turnover on a fumble deep shot.

BY MICHAEL SCHMIDT

The Hawkeyes took their first place finish at the NCAA Midwest Regional again this year. The team is now looking to win the national championship.

Coach Don VanDenend said, “It’s an amazing achievement, real.” Wise said, “We didn’t care about the race.” We didn’t care about the race.

The Hawkeyes finished the regional at 2:11.6, Iowa State finished at 2:11.6, and Oklahoma finished at 2:11.6.

The Hawkeyes were edged by Iowa State at the finish line. Iowa State finished at 2:11.6, while the Hawkeyes finished at 2:11.6.

horoscopes

Monday, November 14, 2005

ARIES (March 21-April 19): Make this day a success. Do something that will help you get ahead professionally or increase your earning power. Use an opportunity to take care of financial, health or marital matters.

TAURUS (April 20-May 20): You won't find it easy to deal with emotional, physical or family problems. Designing will not result in a desired approach, and offer something new.

GEMINI (May 21-June 20): Someone from your past may grab your interest again. Be sure this person isn't carrying a lot of baggage or still involved with someone else. Make sure any changes you make are in your best interest.

CANCER (June 21-July 22): You will get a big surprise today. Your chance is to do something quite exciting depending on your ability to give in and let yourself go. Find this is the time to make up your mind once and for all about what you really want and go after it.

LEO (July 23-Aug. 22): You will be tempted to rebound. Back up, and consider the risk you have to pay. Someone is likely to help you or catch your mistake. Don't let anger get the better of you.

VIRGO (Aug. 23-Sept. 22): You can make this a very special day if you do things a little bit differently. Change should be high on your list. Consider what's not working in your life, and do something about it.

LIBRA (Sept. 23-Oct. 22): Pay closer attention to your investments and personal money matters. A contract or deal may be coming your way soon. This is a good day to take advantage of or profit from.

SCORPIO (Oct. 23-Nov. 21): Put more energy into work, making money, and doing your best to get paid. Do not agree to your friend's or influence the people around you. Be sure you may take place concerning your personal life.

SAGITTARIUS (Nov. 22-Dec. 21): You will be industrious, and travel will be productive. A trend that is brought to your attention will be a wise one. A partnership will develop with someone in whom you have an interest.

AQUARIUS (Jan. 20-Feb. 18): Be careful how you treat the ones you love. There is a good chance you may be disappointed or someone may fulfill an obvious promise. Offer to help others.

PISCES (Feb. 19-March 20): You will have a chance to do something unique, or even a bit exciting, depending on your attitude. You may find you know today. Spend time with someone you really care about, and your relationship will grow stronger.
