STORMS & DESTRUCTION • THE AFTERMATH

Some pause to reflect on tornadoes

BY WESLEY CROPP

Iowa Citzen came together at Old Brick on Thursday night to “paint the balance of life and death,” as one local artist commented, and remember the tornadoes that devastated Iowa City.

The gathering area of the old church, 20 E. Market St., admired in partitioned corners for reflection, housed centers for meditation, writing, healing, prayer, conversation, and expression — welcoming residents in need of an outlet for expression.

“Part of this evening is to give us a community the chance to reflect together,” said Robert Dotzel of the Lutheran Campus Ministry. “With our storm, we have a chance to experience how the people in New Orleans live — or the people in the Midwest’s reality every day.”

At the most active center located under the only full-stained glass window in the room, David Larsen-Zierath and UI junior Jeremy Swartz listened. “I am painting just to get all of this out,” he said.

Part-time Uptown Bill’s Small Mall employee Sue Swalt (right) wipes down the tables in the coffee shop of the three-business mall, which are independently owned and staffed by disabled employees, on Thursday afternoon. Uptown Bill’s will receive some of the proceeds of the April 30 RiverRun as part of this weekend’s RiverFest.

BILL SACKTER’S LEGACY

• After 44 years in a mental institution, the mentally disabled Sackter lived in Iowa City from 1974-83, where he served up coffee and bought of Wild Bill’s Coffee Shop in North Liberty.

• In 1999, Sackter was named a “Martyr of the Dream” by the Dream Foundation.

• As a “big state,” its caucuses may be aiming for the Oval Office because it has a unique role in selecting the presidential nominees.

• Presidential candidates need to do two things: They need to get off to a big start, and they need to be the chosen state,” said UI political-science Profesor Charles Shipan.

Romney Massachusetts governor

Mitt Romney, Massachusetts governor, may be aiming for the Oval Office because it has a unique role in selecting the presidential candidates.

KEEPING TALLY

UI students, faculty, and staff affected by the April 13 tornado are being asked to complete an online form to help state officials keep tabs of those affected.

By e-mail Thursday, UI President Michael Hogan said officials need the personal contact information for those affected in order to avoid impediments in distributing aid.

The information, to be submitted at http://surveys.uiowa.edu/waill/76/Promontory.html, will be disclosed only to the UI, state and federal emergency response officials.

City to closely observe minority teacher rehiring

The Daily Iowan

By COLIN BURKE

A minority teacher search advisory group in the Iowa City School District is in the process of selecting new teachers in an effort to match the trend of increasing minority student numbers. The number of minority teachers in the district is not an insurmountable obstacle, according to Jim Pedersen, director of human resources and diversity.

Pedersen said the district has set a goal of 6 percent minority teachers, which is the percentage of minority students in the district. He said the district is currently at about 2 percent minority teachers.

"We have a lot of work to do, but we're making progress," Pedersen said. "We're not at the 6 percent yet, but we're working on it." He said the district is currently working on a new minority teacher search plan that will be implemented in the fall.

The minority population is currently 6 percent in the district, which is below the state average of 10 percent.

THE DAILY IOWAN

Renewable-energy proponents are teaming with enthusiasm over recent efforts undertaken by the state government and the industry to strengthen Iowa’s position as a national leader in wind-power production.

The Iowa Senate unanimously passed some $5.5 million in tax breaks recently to encourage small-scale local investment in renewable energy. It was not immediately clear if the budget deal struck Thursday night by Iowa lawmakers would change the amount of the tax package.

State of the Bill for small-scale local producers complements a recent announcement by MidAmerican Energy that it received approval from the Iowa Utilities Board to move forward on plans for a 545 megawatt wind project.

The venture could reduce Iowa’s carbon-dioxide emissions, which are linked to global climate change, by as much as 1.6 million tons annually.

The company already has a 365-megawatt project powered by 207 wind turbines throughout northwest and north-central Iowa. The $80 million project can produce enough electricity to power 100,000 homes and is capable of curtailting carbon-dioxide emissions up to 800,000 tons annually.

Iowa emits close to 40 million tons of carbon dioxide annually, according to recent data from the Environmental Protection Agency.

Ron Weir of Tama plugs it in Thursday night in Hubbard Park. The two were working for Craig’s Amusements, owned by Weir’s son, and they were setting up equipment for this weekend’s RiverFest.

THE DAILY IOWAN

Development efforts between Iowa City and North Liberty topped the list of issues at a Johnson County Board of Supervisors Democratic candidates forum Thursday.

Democratic for American and FAIR, a local progressive group, sponsored the meeting, which was held at the Iowa City Public Library, 125 S. Linn St., and included incumbent Supervisors Sally Stutsman and Mike Lehman, as well as challengers John Schneider and Larry Meyers.

Stutsman, Meyers, and Schneider all labeled the land-use plan as one of the three biggest issues facing the county.

In March, the board approved a controversial proposal that included widening and straightening Newport Road, which many residents felt would destroy the natural beauty of the land.

Meyers, a remodeling consultant and Newport Road resident, and Schneider both opposed the Newport Road development — but on different grounds.

Meyers said current vehicle traffic and accident rates aren’t high enough to justify the road development. "It raises the question, 'Why are we doing this?''" Meyers said.

"There is no evidence there is a demand for the growth," Meyers said. "The county’s growth plan is too expensive, and the supervisors could partner with the trail committee to build the road at a reduced cost.

Lehman argued the accident rate is high enough to justify development because crashes aren’t under-reported.

"We have very few track drivers, and they can’t believe these are all of the reported accidents," he said. "If law enforcement agencies are not reporting every accident, then we aren’t meeting our goals." Lehman added.

Stutsman said the road operation was "reasonable," citing consideration in the area, and traffic was indeed too high.

Taking a momentary break from the pavement-heavy conversation, all candidates expressed their support for a county-wide community partnership.

Meyers said it appeared likely the measure would pass but questioned the timing.

"I don’t know how much of that is because it’s an election year," Meyers said. "Maybe we should have an election every year, and we’ll get something done.

The county supervisor primary election is set for June 6.

Early voting began Thursday.

Metro Man reportedly tries to lure girl into his car

Police are investigating a Thursday morning incident in which a man allegedly attempted to lure a young girl into his truck. According to police documents, a woman who was driving home from school on Thursday saw a man in a dark blue truck parked on the side of the road.

The attempt was interrupted by a firefighter and another person, and the suspect fled the scene, police said. There were no reported injuries.

The suspect was described by witnesses as a black male, roughly 30 years old, 5 to 6 feet tall, mustached, and possibly a small goatee. He was wearing jeans, a red T-shirt with a yellow and blue stripe, and a cap.

The vehicle was a two-door late 1980s to early 1990s dark blue pickup truck with no damage.

Searches should consider minorities

Someday you may receive an e-mail stating that your ideas by e-mailing him at barry-pump@uiowa.edu.

When former Hawkeye wrestling coach Don Zalewski was let go March 20, the UI's fired a man with 27 years of experience and a 75 percent winning percentage. Officials' comments might have been slightly more joyous. But whatever your reaction, it is important to note that Zalewski's firing and the subsequent departure of women and minorities starts to pay on us, then we might begin to realize the futility looking those ideas and beliefs as immoral and wrong.

To argue against the idea that the university administration in particular, has made a serious mistake.

It's also worth remembering not only is the school hunting for a new AD but a new university president is also needed. Even more with this position, the university's search committee regards pedagogy as an inclusion to be planned around, not just planned for.

Letters from the earthwords

BY AHRIF SARUMI

At the beginning of March, the first Anne Hidalgo ever received from Earthwords was a rejection slip during her freshman year. As a rejected poet, she landed her a position as Earthwords' managing editor. This year, Earthwords introduced a monthly reading series to hold the last Tuesday of every month. The series will feature poetry, short fiction, and creative nonfiction. The first issue was successfully published and added poetry editor three years ago.

Skip Elsheimer, known as the A/V Geeks, will screen five instructional 16-mm films Saturday at the IMU.

The hindsight with [the film's] really is a master of technology, while an inept woman struggles to throw awaylover food from her sink. Never fear, though, the new GE disposal keeps her from going colorless.

The event is being presented by the Creative Cinema Unit, Iowa City Microcinema, and the Biju, a crossover of KC Microcinema, Jen Proctor, and the Emcee. Proctor witnessed Elsheimer present a different set of films in Austin, Texas, where she said, the projectors were lighted from lighthouse and amusing forms of entertainment. The Emcee would do a job day at a computer-software company in 2003 to devise all the energy to his collection of films. Besides screening films regularly in Raleigh and elsewhere, he also sells DVDs of his themed programming to many TV networks, including the Discovery Channel.

While quite not an audiovisual guy in high school, Elsheimer said, he was the kid who helped his teacher with the "3.14159" on the VCR to stop blinking. "It's reflective of our own feelings and self-destructive tendencies." - Michael Stokes, director of The Sound of Music, at IU's Long Center.

"This has never happened to me before," he said. "I've been so taken by the films that I haven't been able to make a decision about a show." The films are more interesting to me, he said, than others.

"It was a rejection slip during my freshman year," she said. "It was a rejection slip during my freshman year. This year, we saw a sudden increase in the number of people seeking the release of the 400th anniversary of the Kit Kat Club's own show. Director Michael Stokes staged the show, now beginning its second and last weekend of performances in Oakdale on a simple set — with only a few doors, a staircase, and chairs. It's an unrepeatable event.

"We're a club of people who make music, and I think we're the best part of it," she said. "What was the kitsch?" She said the 1960s, that is.

"What were they thinking when they did this?" she said. "I know that's different from what I'm interested in. We've never received from Earthwords before. The plan's character is reflected in its own features. "I'm happy to see you open up our book," she said, "because I think you have a lot of good things to say."
Rice: Security Council credibility at stake

BY PAUL AMES
ASSOCIATED PRESS

SOFIA, Bulgaria — Secretary of State Condoleezza Rice arrived on Thursday the credibility of the U.N. Security Council was as stake as it decides how to deal with Iran's likely rejection of a deadline to bring its nuclear program in line with international demands.

"In order to be credible, the Security Council, of course, has to act," she told reporters at a NATO Foreign ministers' meeting.

The U.N. has given Iran until today to halt its uranium-enrichment activities. She said it was "pretty clear" that Iran would not meet the requirements set by the U.N. nuclear watchdog, the International Atomic Energy Agency, regarding the enrichment of uranium—a process that can produce fuel for generators or fissile material for nuclear weapons.

"The Security Council is the primary and most important institution for the maintenance of peace and stability, and it cannot have its word and its will simply ignored," Rice said. She said it was "pretty clear" that Iran would not meet the deadline. She will seek to make the demand compulsory, a process that could lead to sanctions. That is opposed by Russia and China, the other two veto-wielding Security Council members.

In apparent message to China and Russia, Rice asked, "Is the Security Council going to be credible in making clear to Iran that it cannot be unilaterally simply to flaunt the will of the international community?" She said she was hoping for support for her view at talks here with her counterparts from the NATO allies and other European Union nations. Russian Foreign Minister Sergey Lavrov is due to join the NATO talks today.

French Foreign Minister Philippe Douste-Blazy said the world had to show "unity and firmness" toward Iran. He added that Iran should be offered cooperation with its civil nuclear-energy program if it complies with international demands to ensure it cannot be used to develop weapons.

Rice did not directly address a suggestion from German Foreign Minister Frank-Walter Steinmeier that the United States could hold direct discussions with Iran on the nuclear standoff if Tehran agrees to Washington's proposal for talks on the violence in Iraq. "If there are talks with Iran anyway on the situation in Iraq, then nobody would understand if the current central issue in world politics would not come up," Steinmeier told reporters.

The United States, which has no diplomatic relations with Iran, said in March that it was ready to talk to Tehran about calming the unrest in Iran. Iranian and U.S. officials have insisted the talks will deal only with Iran, and President Mahmoud Ahmadinejad has not directly addressed the issue directly with Tehran, preferring to work through the United Nations Europe.

Douste-Blazy said talks through the U.N. should take priority, but he added that "all contacts would be welcome if they lead to the resolution of this crisis ... it's only through dialogue that we can get out of this crisis."

"The Iran question was not on the official agenda of the NATO Foreign ministers' meeting which, focused on bold by Ukraine, Georgia, Albania, Croatia, and Macedonia to join the alliance. De Hoop Scheffer said NATO leaders would "send a signal" on the country's membership aspirations at a summit in November, but a final decision was unlikely before 2008.

Lithuanian Foreign Minister Antanas Vainauskas said there was widespread support among the ministers for a "membership action plan" with Ukraine at the November summit in Riga, Latvia, if the country sticks to political and military reforms.

Further expansion of the Western alliance in the former Soviet bloc faces Russian opposition. The Russian Foreign Ministry on Thursday complained that the entry of Ukraine and Georgia would be "highly painful" for Moscow, could call international arms agreements into question and provoke a reorganization of Russia's armed forces.

Thursday's meeting also discussed proposals for NATO to develop closer ties with other democracies—including Australia, Japan, New Zealand, and South Korea—to coordinate political and peacekeeping operations. Several thousand Bulgarians demonstrated against the NATO packing to sign an agreement to join the NATO pact and join the alliance.

Who did the best job coaching Iowa this season? That’s an argument that might be the deciding factor in Iowa basketball coach Steve Alford, who led the Hawkeyes to the NCAA Tournament.

ATHLETICS DIRECTOR BOB BOWLSBY will announce the AD job at Stanford University.

The Iowa men’s tennis team has experienced a season of des- troy and it is interestingly this weekend’s Big Ten Tournament in Cham- paign, Ill., with a school best 1-7-5-10 Big Ten record and the tourna- ment’s No. 2 seed.

In order to secure its first confer- ence title and its home court advantage, the Hawkeyes have to win their next three matches before the tournament.

“Sophie, I didn’t expect you to do anything,” Kowal said. “I just want you to go out there and work hard, but I wasn’t counting on you to do any better than that.”

The Hawkeye tennis team is in the midst of an impressive season, as they have already swept the Big Ten Conference.

“I think the key to our success this season has been the team’s ability to work together and support each other,” said Iowa head coach Daryl Greenan.

Penn St. too much for Hawks

Rowsers hope to improve

Greenway: a top prospect at linebacker

Left out of the blue-chip category coming out of high school, the Hawkeye attributes his development to great coaching

Greenway's motivation spurred him to become the player he is today. "We had just come off our worst season ever, and the fans were not happy," Kowal said. "I think they expected us to do a little better, but there's no reason for us to be behind you 100 percent."

Greenway said he's been a big influence in his development, "because there are so many great coaches, and they know how to develop a great football player."

Greenway's mother, Julie Greenway, said, "He's had a lot of good coaches, so they've been real good for him."

Since Greenway's attention has turned to the NCAA, one question that lingers is what will a team get out of Greenway? "He's had a lot of good players to work with," Greenway said. "They've rowed at the correct speed, and that's why you have good players who are in the boat already."

In a draft class that includes All-American names, such as Ohio State's J.A. Hawk, Florida State's Ernie Sims, and Alabama's Darel Russco, Greenway is in a class all his own. He said he has the ability to cover some people and walk out over收到, and jam them up, and do some things out there that I've done in college."

Drew Boylhart of www.thehuddle.com says an opinion similar to Greenway's. "He's done a good job when defending against the pass and shown good enough speed to cover running backs coming out of the backfield. Chad is a smart player, and he knows his responsibilities, and plays well."

This is the first time in years that they have been able to try something new, and they are excited about it. They have been working on their swings and their putting, and they are hoping to improve their scores. The team has a lot of potential, and they are looking forward to the Big Ten tournament this weekend.

  - **April 28 (Taurus) 19**: Take the time to go over what you are doing before you present your results, making sure everything is as it should be. Start thinking by pulling together all your resources, attributes, and knowledge.
  - **April 28 (Gemini) 20**: Levels of emotions are set the tone today. Someone you know may try to influence you the wrong way. Ulterior motives are likely to say something that will upset you. Trying to get others to do things will be awkward, so you may go it alone. Avoid getting into an argument.
