MEXICO ELECTIONS

Youth may be key in vote

BY DANNY VALENTINE
THE DAILY IOWAN

Much like the 2000 Bush-Gore presidential election, a victor emerged after the Mexican polls closed Sunday night. And when on Tuesday a protracted vote count revealed leftist candidate Andres Manuel Lopez Obrador trailed in votes, his campaign demanded a recount — further echoing the Florida-focused electoral controversy six years ago. But in the Mexican election, some believe the race hinged on the youth vote.

“There is just a flourishing of young people who want to be a part of the democratic process,” said Chuck Collins, a senior scholar with the nonpartisan Institute for Policy Studies. Collins, who has lived in Oaxaca, Mexico, for the past six years, opened a polling station in Sunday’s election, and he was impressed by the number of young people involved. Not only were youth turning out to the polls, but almost all the officials on duty were young — 21 to 22 years old, he said.

Shakira’s voice echoed in the nation’s history, also just the second time people have cast their vote in a democratic process since the Institutional Revolutionary Party lost its 71-year stranglehold over the presidency to Vicente Fox and the National Action Party in 2000.

“All the [Mexican] students I interviewed stressed the importance of their participation,” said Tee Judge-Ellis, a UI assistant professor of nursing who visited the country in May with UI nursing students.

Judge-Ellis is among professors on what might be the last U.S. trip for many students who have lived in Mexico for six years.

“All fired up”

STUDY

MORE THAN JUST A PICK-ME-

BY LISA BLUM
THE DAILY IOWAN

Java House, Starbucks, T’Spoons, House of Aromas — the abundance of coffee in Iowa City is unmistakable. According to a recent study in the Archives of Internal Medicine, students consuming several alcoholic beverages may want to order up a double-shot, non-fat, sugar-free, extra caramel latte with whip — or something to that effect. The study suggests drinking more than four cups of coffee per day reduces the risk of liver disease — specifically alcoholic cirrhosis — by 22 percent per cup. And because these preventive measures can reduce health care costs, the study concludes, by $25 per year.

“Saturated fat consumption comes at a cost,” said Beth Skogen, a University of Iowa nutrition professor who visited Mexico last May with UI nursing students.

“TOKYO — A defiant North Korea tested a long-range missile Wednesday that may be capable of reaching America, but it failed seconds after launch, officials said. The North also tested five shorter-range missiles in an exercise the White House called “provocative” but not an immediate threat.

Ignoring stern U.S. and Japanese warnings, the isolated communist nation carried out the audacious military tests even as the United States celebrated the Fourth of July and launched the space shuttle.

None of the missiles made it as far as Japan, all crashing into the Sea of Japan separating the island from the Korean Peninsula, officials said.

“We do consider it provocative behavior,” U.S. National Security Adviser Stephen Hadley said.

Both Japan and South Korea protested Japan called for an emergency UN Security Council meeting. South Korea said the tests would further deepen its neighbor’s international isolation.

“We will take stern measures,” said Chief Japanese government spokesman Shunsuke Abe, adding that economic sanctions were a possibility. He said the launch violated a long-standing moratorium and that Tokyo was not given prior notice by Pyongyang.

The U.S. administration reacted quickly but made it clear that its response would not involve military action.

President Bush, consulted with Hadley, Secretary of State Condoleezza Rice, and Defense Secretary Donald Rumsfeld. The State Department said Rice conferred with her counterparts from China, Japan, South Korea, and Russia.

UI student Julie Latham has a cappuccino at the Java House on Monday afternoon. Latham said drinks around two cappuccinos a day.

THE DAILY IOWAN

An unidentified 20-year-old man, who many spectators thought had drowned Tuesday while swimming in the Coralville Reservoir, was alive and undergoing treatment as of 9 p.m. Tuesday, according to a statement from the Johnson County Sheriff’s Office. The incident stunned holiday revelers, who believed they had failed to recognize the man after pulling him from the lake floor near crowded West Overlook Beach.

ZENN & the art of motoring

BY BRYCE BAUER
THE DAILY IOWAN

Many drivers, fed up with $2.50-a-gallon gas, are considering a switch to a more fuel-efficient vehicle — or perhaps one without any fuel at all.

On display at a festival organized by the Iowa City environmental group Resources for Life on Saturday, the ZENN car might be able to fill an ever-growing need for people everywhere.

“Emissions No Noise,” the vehicles are manufactured by the Toronto-based Feel Good Cars.

The ZENN and its electric engines were introduced by the Johnson County Sheriff’s Office.

Vaccine not sparking local debate

BY KELSEY BELTRAMEA

Despite a recent announcement that a new vaccine for human papilloma virus was introduced nationwide, controversy continues among organizations representing women and health advocates, Iowa officials are waiting for the debate to emerge locally. The new vaccine grows in the body of a young female, but it can be given to girls as young as nine years old at a decider’s discretion to prevent the development of the virus.

The CDC’s advisory committee recom- mended the vaccine should be routinely administered to girls when they are 11 or 12 years old. This recommendation was given in June 2006. The Food and Drug Administration approves a vaccine for types 11, 16, and 18 of human papilloma virus safe and effective for use by girls ages 9 to 26.

The Centers for Disease Control and Prevention releases a recommenda- tion from the Advisory Committee on Immunization Practices that all 11- and 12-year-old girls routinely be administered the FDA-approved vaccine.

Alexander Zick, a medical student at the University of Iowa College of Medicine, said the vaccine should be routinely administered to girls when they are 11 or 12 years old. The recommendation was given in June 2006. The Food and Drug Administration approves a vaccine for types 11, 16, and 18 of human papilloma virus safe and effective for use by girls ages 9 to 26.

Groups such as Piazzola on the Family, a Christian organization that works to preserve “fa- mility” family values, fear there may be a push for states to make vaccinations mandato- ry as a part of a child’s panel of immunizations.

US Student Health Service physicians Andy Lunsford said the possibility of such a requirement is unlikely. The vaccines that are currently required for school admis- sions are for diseases that are communicable, transferable quickly from child to child, he said. “They are designed to protect others rather than the students themselves.”

Other concern centers on the age group the committee advocated for.

“I think that the whole point is that they want you to get immu- nized before you’re sexually active,” said Linda DiNicola, Planned Parenthood clin- ical counselor. “So it’s kind of backwards in my opinion.”

Ponseti’s sentiments become more complex on Riverside Drive.

UI Student Health nurse manager Laura Jones said she had not heard that many negative comments about the vaccine, but she said she expected a few.

“Look, any buzz surrounding the vaccine means that you’re not completely announcing congruence,” she said. “It’s hard to go to that one side.”

Student said the vaccine should be rou- tinely administered to girls when they are 11 or 12 years old. The recommendation was given in June 2006. The Food and Drug Administration approves a vaccine for types 11, 16, and 18 of human papilloma virus safe and effective for use by girls ages 9 to 26.

**EDITORIAL**

State should follow lead of Iowa hospitals

A smoking ban went into effect July 1 at the UI Hospitals and Clinics, along with seven other Iowa hospitals, a move this Editorial Board applauds. While this decision was made by a large group of stakeholders participating in Quit Eliminate Lineage, an anti-smoking campaign, promoted in Iowa City newspapers by occupying the smoking sections.

The full text of Amendment I to the United States Constitution reads: “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or of the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.”

What we have in an activist Supreme Court that has decided to criminalize acts of speech. A direct contradiction might say bringing a flag represents freedom of any sort. In fact, a strict constructionist would point out the people have the right to their own religious beliefs, and a state or city may not require banishing for a flag on its streets. The state Legislature should work toward changing Iowa’s laws regarding secondhand smoke exposure. The suppression of your human-
A Rose by any Guns’ Name

By Zach Spittler

It’s like Guns N’ Roses covering Vivaldi in tuxedos (and Flash gets to keep his top hat). Or Madonna getting down in pink spandex in a reggae beat. Or Disturbed shocking out country hits amid a landscape of sawdust and denim.

That’s essentially what Lindsay Mac has done with the cells. While the instrument is usually reserved for the elegance of recital halls and the sophistication of classical performers, she has given listeners a chance to see what the cells can do.

“So, I can really rock out, and it can be jazzy,” she said. “It’s an instrument that has a lot of incredible potential, and it really hasn’t been explored properly.”

A native of Iowa City, Mac expanded on the idea of how the instrument can function, using it as an alternative to a guitar or bans. Plucking and strumming her way into the public eye, the vagabond harp will take on the mountain style of Uptown Bill’s Small Mall, 401 Gilbert St., on July 9.

She said she has been playing the cells since she was 9. And after choosing to become a singer-songwriter instead of a classical performer, she didn’t want to start over with a new instrument. “I was attached to my soul,” she said. “I wanted to take it with me on this journey.”

Mac describes her cells as a “melodic instrument.”

“I tell a lot of stories, and I get people who want to see what’s going on,” she said. “I get classical people who want to see what’s going on,” she said. “And it’s really fun writing a singing story.”

“I hope to elicit a picture through my lyrics,” she said. “Truth and honesty are central to a lot of Tori Amos, and, now, I really like Rock and Roll, for sure,” she said. And by taking those risks, the dividends come in the form of her diverse fan following.

“I get indie-rock fans, and I get classical people who want to see what’s going on,” she said. “I get young and older people, college kids, and they come because they have a spirit of adventure, I guess.”

THE DAILY IOWAN

The All-Star selection process breeds imbalances. "The average age of our members is 32 years old," Zajc said. "We have 190 members, and I'm one of them."

George Will. The average age

Iowa will be a tournament, but the Field House pool would be a financial decision. But the Field House pool has just gotten to the point where it's no longer a serious option. The time was right when the floor's going to buckle, and he was the person designated, and he's good experience." I'm sure I'd do it again."

Ronald Reagan once said, "Every accomplishment, no matter what the subject matter, is a result of hard work and the will to do it." The field hockey program is a perfect example of that. The Hawkeyes have been hard at work, and the will to do it is evident in the way they play.

Kurt Looby, Greg Brunner, and Matt Schenk were three of the players who were interviewed for this article. They all agreed that the team is working hard, and they look forward to the future.

The Hawks have a bright future. They are young, talented, and hungry to prove themselves. The Hawkeyes will continue to work hard, and they will continue to improve. They are a team to watch, and they are a team to support. The Hawks have the will to do it, and they have the hard work to prove it.
horoscopes

**ARIES** (March 21-April 19) You can get to the bottom of things and come out on top if you question, observe, and make a decision. Someone you care about will be taking time out. A little insurance will go a long way.

**TAURUS** (April 20-May 20) You will feel to pick and choose your battle today. If you see anyone who you will make enemies. High energy, discipline, and inter- action are part of your day. Don't go into a change of scenery set up if you want a new lease on life. A serious relationship may have to be reconsidered.

**GEMINI** (May 21-June 20) Don't let it be made out to be anything more than it is. If you are tempted to take action then you may be sharing some interesting ideas. A career change may not be such a bad idea. Consider your talents, and put them to proper use.

**CANCER** (June 21-July 22) You now have a chance to make changes should you wish to. You may be nagging someone else to do something about the problems you face. Trust your leadership in the right direction.

**LEO** (July 23-Aug. 22) Do not give up on something you really want to pursue. Today is the perfect time to launch one of your ideas or talk to someone who can influence your future. Separate yourself from people who are working on your gain perspective.

**VIRGO** (Aug. 23-Sept. 22) You may have to work a change to make changes to the work you are doing. You may want to reconsider how you make yourself more marketable.

**LIBRA** (Sept. 23-Oct. 22): A step back will show you a new lease on life. A serious relationship may have to be reconsidered.

**SCORPIO** (Oct. 23-Nov. 21) You may not think about your true feelings, but today will work in your favor. A situation will occur quickly, and it could eat you up. Have a new lease on life. You are likely to turn out well. Winnings and gifts are heading your way. A chance to make yourself more marketable. Trust your leadership in the right direction.

**SAGITTARIUS** (Nov. 22-Dec. 21): A chance to make changes should you wish to. You may be nagging someone else to do something about the problems you face. Trust your leadership in the right direction.

**CAPRICORN** (Dec. 22-Jan. 19): You can get to the bottom of things and come out on top if you question, observe, and make a decision. Someone you care about will be taking time out. A little insurance will go a long way.

**AQUARIUS** (Jan. 20-Feb. 18): Keep your personal issues private. This is not the time to share what has happening with others. A situation will occur quickly, and it could eat you up. Have a new lease on life. You are likely to turn out well. Winnings and gifts are heading your way. A chance to make yourself more marketable. Trust your leadership in the right direction.

**PISCES** (Feb. 19-March 20): Money owed to you or a deal you've been working on will work in your favor. A change to make changes should you wish to. You may be nagging someone else to do something about the problems you face. Trust your leadership in the right direction.

Italy advances to final in overtime

DORTMUND, Germany — The Italian team has advanced to the final of the women’s soccer tournament by defeating Sweden 2-1 in overtime on Wednesday.

The Italians capitalized on a 35th-minute penalty to take the lead, and added a second goal in the 81st minute to secure their place in the championship match against Nigeria.

The game marked the third consecutive tournament in which Italy has advanced to the final, having also reached the semifinals in 2016 and 2018.

The Italian team is hoping to secure their second title in the tournament, having previously won it in 2003.

Despite missing a recent opportunity to qualify for the final in their home country, Italy’s performance in this tournament has been impressive, with a strong defense and a solid attack.

The team has been led by experienced players such as forward Grazia Rampraga, who has scored six goals in the tournament, and defender Angela Ruggiero, who has been instrumental in the team’s defensive efforts.

Italy faces Nigeria in the final on Sunday, with both teams looking to secure a historic win.
