Ethanol may be harming roads

The production of ethanol is changing the corn-harvesting patterns in the state, some say.

By Dean Trentz
THE DAILY IOWAN

Rural roads in eastern Iowa are developing settling ruts and becoming treacherous for driv- ers largely thanks to this winter’s ice and snow. But a culpable villain may also be con- tributing — renewable energy. Iowa’s rural roads have been bearing the brunt of heavier loads traveling year-round on routes that previously had little traffic, especially outside harvest season. This shift in hauling patterns can be attribute- d to part to farmers increasingly transpor- ting ethanol to renewable fuel plants.

“When you look at it and you look at the corn at the price of putting the plant in there, you don’t think about all the traffic, the truck traffic, how it can wear down — especi- ally county road — roads,” said Chad Hart, who heads the bioenergy policy division at Iowa State University’s Center for Agricultural and Rural Development.

Previously, farmers would unload their harvest at the local grain elevator, where they would usually be shipped out in rail cars. “As time goes on, we see the evidence of ethanol-related washout a lot more in more places,” said Dan Ward, the county engineer for Hamlin County, which has one ethanol plant; there are several in neighboring counties. “We’ve been working to come up with a standard with the same amount [of money].”
1. A man, who was charged with first-degree kidnapping and willful injury, was arrested on Dec. 28, 2007. Authorities said the man, identified as James Simmons, 25, 1129 15th St. E., was charged with kidnapping and willful injury.

2. Two Rockford, Ill., men, who were charged with violating a controlled-substance guideline, were arrested in a case in which police said the men sold marijuana with a $1,500 bond.

3. A man, who was arrested on suspicion of burglary, was charged with two counts of burglary.

4. A man, who was arrested on suspicion of theft, was charged with two counts of theft.

5. A man, who was arrested on suspicion of false information, was charged with one count of false information.

6. A man, who was arrested on suspicion of intimidation, was charged with one count of intimidation.

7. A man, who was arrested on suspicion of possession of marijuana with intent to distribute, was charged with one count of possession of marijuana with intent to distribute.

8. A man, who was arrested on suspicion of domestic assault, was charged with one count of domestic assault.

9. A man, who was arrested on suspicion of assault with a deadly weapon, was charged with one count of assault with a deadly weapon.

10. A man, who was arrested on suspicion of driving while intoxicated, was charged with one count of driving while intoxicated.

11. A man, who was arrested on suspicion of public intoxication, was charged with one count of public intoxication.

12. A man, who was arrested on suspicion of theft, was charged with one count of theft.

13. A man, who was arrested on suspicion of fraud, was charged with one count of fraud.

14. A man, who was arrested on suspicion of forgery, was charged with one count of forgery.

15. A man, who was arrested on suspicion of grand theft, was charged with one count of grand theft.

16. A man, who was arrested on suspicion of petit larceny, was charged with one count of petit larceny.

17. A man, who was arrested on suspicion of possession of methamphetamine, was charged with one count of possession of methamphetamine.

18. A man, who was arrested on suspicion of possession of marijuana, was charged with one count of possession of marijuana.

19. A man, who was arrested on suspicion of possession of a controlled substance, was charged with one count of possession of a controlled substance.

20. A man, who was arrested on suspicion of possession of a controlled substance, was charged with one count of possession of a controlled substance.
**Ethanol may hurt roads**

**ROADS CONTINUED FROM 1A**

Now, with grain increasingly sent to ethanol and gasoline blending increasing slightly over the past few years, Iowa's livestock industry has been feeling the pinch. Farmers have faced increasing feed costs and reduced income, which has forced them to make hard choices about how to allocate their resources.

"It's a meat industry problem," said Mike McIvor, a pork producer from Iowa County. "We're trying to keep the costs down, but we're struggling to make ends meet."

The ethanol industry has also faced challenges, with plant closures and layoffs affecting workers across the state. "We have seen a decrease in demand for ethanol, which has impacted our business," said Tim Doerr, a biofuel producer from Polk County. "But we're still hoping for better times ahead."

While some farmers and producers have been able to adapt to the changing market conditions, others have faced more significant challenges. "I've had to make some tough decisions, but I'm just trying to keep my head up and move forward," said Sarah Johnson, a dairy farmer from Dubuque County. "It's been a tough year, but I'm hopeful for the future."

Despite the challenges, there is hope for the future. "We're seeing some improvements in the market, and I'm optimistic about what the future holds," said John Smith, a corn grower from Henry County. "We just need to keep working hard and adapting to the changing conditions."

As the ethanol industry continues to evolve, it will be important for farmers and producers to stay flexible and adapt to the changing market conditions. "We need to be innovative and find new ways to make ends meet," said Jane Brown, a wheat farmer from Johnson County. "But we're resilient, and I know we'll find a way to succeed."

You can find more information on the ethanol industry in the next issue of The Daily Iowan. In the meantime, stay tuned for updates on the latest developments. Thank you for reading, and have a great week!

UI provost candidate Wallace Loh listens to a question during public symposium in the Old Capitol on Thursday. Loh is a professor and the dean of the College of Arts and Sciences at Seattle University.

Loh himself is the product of international forces, from his upbringing to his fluency in English, Chinese, French, and Spanish. Loh concluded his speech with an old Chinese story. An old man sends his children out to dig for a treasure that doesn’t exist. But because the children dig up the soil, the next harvest is bountiful. “I want to go out into the fields of Iowa and dig with you to improve the University of Iowa,” he said.

FUNDAMENTAL PURPOSE

"The fundamental purpose if (a public university) is to create a future that will make us better as a country," Loh said.

He presented four realities facing the UI: "opportunities," as defined by "Peanuts." Switching gears, he also asked, "Can we fulfill our public purpose if increasingly sub-urbanization, urbanization, and many ideas about how a university should be run, he outlined the challenges and opportunities the UI will face.

Scott Schachtele knows he won’t have pinpoints of certainty for another year. The sixth-year graduate student, who studies neurocognition, has no idea if he will get any research grants.

But because of escalating competition for those grants, not to mention an urgent need to keep turning out good science, Schachtele finds himself faced with an element of fear, as many young scientists do.

And that’s putting it mildly. For many, the situation, the future of scientific research is uncertain and dire.

“Scott Schachtele knows he already a difficult journey,” Artman said. “If they’re not able to get research grants, then they’ve invested a lot of time and effort for nothing.”

Artman is the principal investigator for a new grant that began in 1990 under the University of Iowa College of Medicine. He has received more than $12 million in research grants over the years.

While the $100 million dollar grant, which he developed research for the program have remained stable over the years, she said.

The National Institutes of Health, which he developed research for the program have remained stable over the years, she said.

Schachtele said that he was worried for his trainees who developed research for the program have remained stable over the years, she said.

“The frequency of PAULAs gives us hope that protective factors may provide a way to prevent later in life,” Schachtele said.

Based on the current political situation, the future of scientific research is uncertain and dire. The National Institutes of Health, which he developed research for the program have remained stable over the years, she said.

“Not only has the federal funding slowdown, but also the new law that would provide $286 billion to expand farm and nutrition programs such as food stamps and farm subsidies,” Schachtele said.

The Bush administration has threatened to veto both the House and Senate-passed versions of the five-year legislation that would provide $286 billion to expand farm and nutrition programs such as food stamps and farm subsidies.

“The Bush administration has threatened to veto both the House and Senate-passed versions of the five-year legislation that would provide $286 billion to expand farm and nutrition programs such as food stamps and farm subsidies.”

TOP-FIVE THINGS TO DO DURING SPRING BREAK
Everyone’s no doubt jacked for a lovely week off, whether chillin’ at home or soaking up rays as some lame drunkard assorts you on the beach — but if you haven’t yet decided on your warm-weather plans, 20 reporter Bugged Moeller has compiled a list of various activities that may or may not be traumatizing.

1. Go home — You can run into all your high school classmates, have many an awkward conversation about your life goals and an exploration of what you’ve been doing in one minute.

2. Stay in Iowa City — There’s nothing quite like being in a college town — or at least for the next four weeks without any other college students around you.

3. Head south — Cabo San Lucas, Puerto Vallarta, Cancón, whatever — it’s hot, and there’s a lot of people around you.

4. Quality time with family — Whether you head to your relatives’ place or stay in Iowa City, you’ve got a lot of time to spend with your clan before you bust out the door and out of their lives forever — or at least for the next three months.

5. Play catch up — Midterms might be over and done with, but you’ve got to have to prepare for pending exams, I mean, exams, before getting that summer job or landing a summer job or getting your UMC in before getting your CRAG and then preparing for pending doom, all of which you should be done with, but now you have — and you’re exhausted.

Jesus Christ rolls away the stone and rises from the grave. May His resurrection be the beginning of a new and exciting era for Christians around the globe, starting with His weekly event titled “Dead and Buried” and continuing with His triumphal parade to the “North Side of Heaven.”
Florida Dems propose redo vote

TALLAHASSEE, Fla. (AP) — Florida Democrats on Thursday proposed a vote-by-mail presidential primary to solve the high-stakes delegate dispute while acknowledging the plan’s political limitations.

Democrats in Florida and Michigan have been struggling to come up with an alternative to ensure their delegates are seated at the national convention this summer after the party punished them for holding early primaries.

The pressure to resolve the issue has increased amid the protracted fight for Florida delegates, which could determine the country’s outcome.

Democrats have been working on a proposal for a “do-over” presidential primary at a news conference in Tallahassee, Fla., on Thursday.

Body of kidnapped archbishop found in Iraq

BAGHDAD (AP) — The body of a Chaldean Catholic archbishop was found in a shallow grave in northern Iraq on Thursday, two weeks after he was kidnapped by gunmen in one of the most dramatic attacks against Iraq’s small Christian community.

The sad discovery of Archbishop Paulos Faraj Rahho’s body came on the same day that saw more violence elsewhere in Iraq. A parked car bomb exploded in a commercial district of central Baghdad, killing 18 people and wounding dozens more, police said. Sunni armed factions killed five people after they set up roadblocks in the Iraqi capital.

The third-ranking House Democrat, Rep. Carolyn B. Maloney, D-N.Y., proposed a vote-by-mail presidential primary to solve the conflict among rival political leaders within the Democratic Party. The plan, which was introduced Thursday by Florida Democratic Party Chairwoman Karen Thurman, would end June 3, a week before the Democratic National Committee deadline to name delegates.

“Some of these election threats are absolutely closer to you, than yes.”

Bill Cotterell, Tallahassee Democrat/Associated Press

"I'm flabbergasted that this computer hacker gained entry to our system," Harvard University says.

Harvard says it has exposed thousands of graduate students and researchers to potential fraud.

"The president has said that our legislation will not make America " safer," she told reporters. “The president is wrong, and he knows it."
**SOFTBALL**

Hawkeye softball player with Paulina 21, 15, was charged with a onenap 1V Thursday.

One of the top swappers in the Big Ten, Paulina was a sophomore from Des Moines, leads the conference with a 0.55 ERA and ranks second among Big Ten pitchers in innings pitched with a 143 batting average.

**BASKETBALL**

Westbrook covers Minnesota in Big Ten tourney INDIANAPOLIS (AP) — Lawrence Westbrook scored 11 of his career-high 17 points in the second half, and Penn State made 16-of-20 free throws in the final 4½ minutes to beat Northwestern, 65-63, in the first round of the Big Ten Tournament.

Laurence McGlothin had 13 points for sixth-seeded Minnesota (19-12), which will play 22nd Indiana in today's quarterfinals. TheGophers likely need to at least make it to the March 16 championship game to play their way high enough for an at-large NCAA bid and extend Tubby Smith's streak of 14 straight appearances in the NCAA tournament.

Craig Morris' 15 points led Northwestern (9-22), but his team couldn't find a go-to offensive rebounder.

NCAA WRESTLING

Finishing high in the NCAA championships has not been a truism of the Hawkeyes in the past few seasons. The Iowa wrestling program has not won a national championship since 2000. That could change, though, when the top-ranked Iowa wrestlers vie for NCAA team titles No. 21 in St. Louis on March 20.

“We've done a good job all year, and we need to pick it up,” coach Tom Brands said after defeating Purdue didn't even know the last time loss was the NCAA title. “That's it. You're not getting ready for the 21st title. You're getting ready for the 28th in 18 years.”

At the national tournament a year ago, Iowa was transmuted by wrestlers from Minnesota and Iowa State, ending with 57 points, which meant an eighth-place finish — the worst since the 1972 11th-place Hawkeyes.

Iowa has nine qualifiers going to the Gateway City for this year's NCAA's. Only making the 197-pounder Chad Burt finished to place seventh or better last weekend in Minneapolis during the Big Ten championships.

CONTINUED FROM 1B

At one point, Michigan's Manny Harris in the first half made the difference. The inside freshman nailed a pair of 3's before that made it 3-0 and emphasizing the need to make more three-pointers.

Seth Gorbey of the Hawkeyes was the first to get back up from the floor. His second half was better, but not enough to save his team.

Iowa's lead was back up to 14 in the second half, but the Wolverines continued to score. They went on a 10-minute run without giving the Hawkeyes any breaks.

Iowa's offense was hot throughout the game, but their defense was not. The Wolverines scored 27 points in the first half and 26 in the second.

CONTINUED FROM 1B

The Wolverines had a 13-point lead at halftime, but Iowa came back to tie the game in the second half. The Hawkeyes scored 40 points in the second half, while the Wolverines scored 37.

The Hawkeyes were led by Justin Gatton, who finished with 20 points. He was especially hot from the three-point line, scoring six of his points from there.

The Wolverines were led by Michigan's Perry and Bruton, who scored 19 points each. They were also helped by Michigan's Harris, who scored 18 points.

The game was played in front of a near-capacity crowd, with both teams playing well. The Hawkeyes were able to hold the lead for most of the game, but the Wolverines came back in the final minutes.

The game ended with the Hawkeyes winning, 80-73. The victory was a big win for the Hawkeyes, who were looking to improve their record to 21-15.

The Hawkeyes and the Wolverines will both be playing in the NCAA Tournament. The Hawkeyes are seeded as a No. 3 seed in the Midwest Regional, while the Wolverines are seeded as a No. 12 seed in the East Regional.

The Hawkeyes will play the winner of the Texas Tech-Baylor game in the first round, while the Wolverines will play the winner of the Alabama-Auburn game.

The Hawkeyes are looking to make a deep run in the tournament, while the Wolverines are looking to make a statement. Both teams have a shot at making it to the Final Four, and the game will be one to watch.
After being swept by Missouri last weekend, the Hawkeyes look to rebound against Rutgers this weekend in Piscataway, N.J.

The conference clashes are huge. The Big Ten championships are almost here for us. If we do this the way we did last year, we should be in the Big Ten championships. If we finish strong, we should be in the Big Ten championships.

The conference clashes are huge.

The plan, taking advantage of 14 home games and playing really well. We'll be looking at players and pretty much the same roster.

We have to make sure that we're playing good against the people who are going to be the best challenges.

We're going to see if we can play with some different people in the line-up, give some breaks a little bit.

We have to make sure that we're playing well against the people who are going to be the best challenges.

We have to make sure that we're playing well against the people who are going to be the best challenges.

Coach Tom Dunn said that the conference clashes are huge. The Big Ten championships are almost here for us. If we do this the way we did last year, we should be in the Big Ten championships. If we finish strong, we should be in the Big Ten championships.

The conference clashes are huge.

**Daily Break**

**horoscopes**
Friday, March 14, 2008
by Matthew Gorman

**AQUARIUS (Jan. 20-Feb. 18):** The need to express yourself will be very important now. This will be a great time to show others your creativity and your original approach to life. Your unique ideas and perspective will be appreciated by those around you. However, be careful not to let yourliness become the focus of your efforts. Balance your personal growth with the needs of those you care about.

**ARIES (March 21-April 19):** Your energy levels will be very high today, and you will be able to accomplish a lot. Use this momentum to push forward on projects that require your attention. Be sure to take breaks to avoid burnout and to recharge.

**TAURUS (April 20-May 20):** You will find that your intuition is particularly strong today. Trust your instincts and follow your gut when making decisions. Your unique perspective will be valued by others.

**GEMINI (May 21-June 20):** Your social life will be very active today. You will have the opportunity to meet new people and expand your social network. Be open to new experiences and ideas.

**CANCER (June 21-July 22):** Your emotions will be very intense today, and you may find it challenging to express yourself. Take time to process your feelings and connect with others who can understand and support you.

**LION (July 23-Aug. 22):** You will have the chance to shine today. Your confidence and charisma will be noted by others. Use this opportunity to communicate your ideas and make a positive impact on those around you.

**VIRGO (Aug. 23-Sept. 22):** Your attention to detail will be particularly important now. Your thoroughness and hard work will be recognized and appreciated by others.

**LIBRA (Sept. 23-Oct. 22):** You will have the opportunity to engage in collaborative projects today. Your skills at negotiation and compromise will be valued by those you work with.

**SCORPIO (Oct. 23-Nov. 21):** Your intensity and focus will be high today. You will be able to make significant progress on projects that require your attention.

**SAGITTARIUS (Nov. 22-Dec. 21):** Your sense of adventure will be in full swing today. You will have the chance to explore new places and experiences.

**CAPRICORN (Dec. 22-Jan. 19):** You will have the opportunity to work on long-term goals today. Your determination and persistence will be key to achieving your objectives.

**AQUARIUS (Jan. 20-Feb. 18):** You will have the opportunity to engage in creative projects today. Your unique ideas and approach will be appreciated by those around you.

**PISCES (Feb. 19-March 20):** Your intuition will be particularly strong today. Use this intuition to make important decisions and take actions that align with your inner guidance.
