**Prime Time finally underway**

Prime Time, the City Council's first overhaul of the Prime Time Light Rail kicks off at 7:30 a.m. at North Liberty, Sports 10.

**Some Johnson County roads are reopening; others, however, remain closed**

Iowa City:
- Iowa Avenue Bridge
- Monroe Trunk from Monroe to Morningside
- Meditation Street
- Market Street
- Market Street
- Kilwood Avenue S.
- S. Dubuque Street
- S. Clinton Street
- Highway 6
- Shady Grove
- Orchard Street
- Commercial Drive
- Commercial Court
- Farmer Road
- Butler Bridge (North Dubuque)
- Spruce Street Bridge
- South River Drive from Highway 9 to Monticello Boulevard
- First Avenue, Fifth Street and 12th Street
- Highway 6 (only one lane—each direction east of 9th Avenue)
- Fifth Street

Rural Johnson County:
- Black Hawk Avenue south of Black Diamond Road
- Black Hawk Avenue west of 455th Street S.W.
- 165th Street N.W. from Grimes Avenue to Falcon Road
- McIntyre Bridge Road
- 120th Street from North Liberty to Black Diamond Road
- Cottage Grove Road N.E.
- 120th Street from Iowa Avenue to East Road
- 120th Street from Iowa Avenue to Fairfield Road

Around 5 p.m. on Monday, water was barely flowing over the top of the Coralville Dam spillway. A park ranger estimated that only a quarter inch of water was still trickling over the dam.

**Water drops at spillway**

With water under the top of the spillway, Corps officials can control the amount being released.

The Iowa City City Council met Monday night to discuss the possibility of adding local restrictions to the current smoking ban. State law will automatically include all school grounds, including athletic enclosures and athletic fields, as well as any school vehicles and school-related buildings and areas, if the Council votes to enact such a ban.

Red Cross looks for cash

The Red Cross estimates the cost of flood relief in the Midwest to be more than $15 million. So far, it has only raised $8 million.

By Alayna Wilken

Jerry Peterson traveled all the way from North Carolina with the American Red Cross to volunteer in Iowa.

He is one of 1,599 Red Cross volunteer deployed to the Hawkeye State to aid flood victims of flooding.

Peterson said he plans to be here until helping at the Johnson County Fairgrounds, until his services are needed elsewhere.

If you lower and fewer families living at the shelter, he said, the Red Cross can open to focus on other states and facilities needs.

While the Johnson County Fairgrounds are being used as a shelter, the Red Cross offered to volunteer in Iowa.

Peterson said he plans to stay here, helping at the Johnson County Fairgrounds, until his services are needed elsewhere.

If you lower and fewer families living at the shelter, he said, the Red Cross can open to focus on other states and facilities needs.

But even public donations are not enough to cover the costs of flood relief and damage to the Midwest. The Red Cross, Simmons said, estimates that cost to be more than $15 million in Iowa and surrounding states. So far, it has only raised $8 million.

The reason for the shortfall, the Red Cross has had to borrow to keep up with Mother Nature. The same method was used when Hurricane Katrina struck, Simmons said. There shouldn't be any trouble with raising money to pay back the loans and the Red Cross is working hard to repay the loans.

**Dorm to stay closed**

“The worries are all going to be around for a long time to come,” he said. “We are mostly worried about the mechanics of things going back up to speed.” He joked that, on June 10, the water level in the dorm had finally receded to the 100-year flood level.

In 1993, it took three and a half months to get the Mayflower running again, but the damage was all located in the geodes and not in the first floor, said John Castle, the Corps’ assistant director of residence life. “It’s a whole different game for us with the first floor being flooded,” she said. “Assuming that Mayflower and Terrell Mill regain the 100-year flood before the spring semester is put ting on the cards for before residents return.”

Mayflower houses more than 1,000 students a year. This year, all assignments to the dorm have not been given out but housing will need to be found for approximately 600 students, with Parklawn Residence Hall likely to house some of them. Letters will be sent out notifying would-be Mayflower residents.

“We may relocate the entire International Crossroads Liv ing-Learning Community to Parklawn,” said Van Oot, the director of University Housing, noting that returning students will be given priority for students in the dorm’s single rooms. “We do know that things are going to take a lot of rain for that to happen,” he said. But he warned that even if people move some of their sandbags, they ought to keep them on-site and ready to put back into place.

The university also plans to leave its sandbag barriers in place for a few more weeks, he said. “The more we leave them in place, the more rain we can take,” he said. “We can’t get floodwaters down below flood stage until they get down to a level the city deems appropriate, he said.

The Corps plans to operate in the same manner as before the flood to maintain the water level, he said, but excessive rain could cause another overflow.

“We will try to prevent what we eat, and we are prepared for more if it comes,” Fournier said. “The Corps will likely conduct meetings in the future to discuss how the situation was handled and what changes can be made to ease future flooding,” he said. “The flood fight is not nearly over yet,” he said.

**Officials remember ‘93**

*CONTINUED FROM 1*

The water stayed at a similar level until finally receding to its highest level of 6 feet above flood stage on Aug. 10. Though the river receded after that, it did not fall below flood stage until Sept. 10.

John Castle, the Corps’ director of the Reservoir operations manager, said it would take until early July to drain all of the water in the reservoir. They would like to drain to spillway later this summer.

Iowa City’s parks, cemeteries, playgrounds and that sort of thing, he said. “It would take some extraordinary events for the Corps to get back over our barriers,” he said.

**Down the Rabbit Hole... and Go West!**

*FREE* PERFORMANCE OPEN TO ALL! *The University of Iowa and Iowa Summer Rep are pleased to offer as a Gift to the Community, a FREE preview of the comedy, WONDER OF THE WORLD, Wednesday, June 25, 8 pm, at West High School. Seating is first come, first served. Let’s all laugh together and celebrate Iowa’s remarkable sense of community.*

**Spillway mark reached**

The Army of Corps engineers measured a water level of 712 feet on Monday at the Coralville Dam, according to a 11 p.m. update. Water was still pouring over the spillway early in the day, but the reduced level will now allow the dam’s managers more control over the flow.

An expanded gorge at the Coralville Reservoir could reveal fossils of many animals.

**Council weighs smoking bans**

With councilors in disagreement, they delayed the decision on smoking in the Ped Mall.

**Councilors Connie Champion and Mike O’Donnell had some skepticism about the inhibiting smoking in the Ped Mall before it would be produced.**

“My concern about making a decision that it will drive people on to the next block,” she said. “We don’t want to think about the reperc u sions.”

Councilor Mike O’Donnell shared Champion’s misgivings, but Councilor Mike Wright disagreed.

“I would like to see us out law it in the Ped Mall,” he said. “I think it’s a good way of fighting crime.”

Given the lack of agreement on the council about how to proceed, Dilkes suggested waiting a period of time to see what effect the smoking ban in the Ped Mall has on the bars.

Both Councilors Rosie Willbern andctions committee chairwoman, was appalled at the suggestion to make a decision about smoking in the Ped Mall.

“As an overall matter I would probably side with the wait-and-see approach, but I am open to some of the more obvious restrictions around playgrounds and that sort of thing,” she noted, noting that he thought a ban on smoking throughout Ped Mall would be ‘draconian.’

Councilors also discussed options for smoking policies in Iowa City’s parks, cemeteries, playgrounds and that sort of thing, he said. “I make rulings just to make rules,” Champion said.

Both Councilors Willbern and Dilkes said the responsibility falls primarily to the state’s Department of Public Health. However, she said, local lawyers and officials can also be involved.

“A police officer could issue a citation against an individual,” she said.
Editorial
An incredible disaster met by more incredible people

It is important to pause for a moment and reflect on the generous outpouring of community involvement as the extent of the damage caused by the historic floods that swept through the area is determined. The overwhelming response of individuals and businesses in our community's time of need is indicative of Iowa's work ethic and compassion. Without the magnanimous effort on the part of the community, the damage inflicted could have been far worse.

It would have been easy to gape at the unprecedented floodwaters we've never seen before. The overwhelming response of individuals and businesses in our community is indicative of Iowa's work ethic and compassion. Without the magnanimous effort on the part of the community, the damage inflicted could have been far worse.

Without the magnanimous effort on the part of the community, the damage inflicted could have been far worse.

The idea has been under discussion for close to two years and could be approved by the Administration and Congress this year. But if they can't get the name of the river right, we'll have to wait until next year. It would have been easy to gape at the unprecedented floodwaters we've never seen before. George Carlin mourned as counterculture hero.

By Keith St. Clair

LOS ANGELES — Seven words you can never say on television. Some People Are Stupid. Stupid People. I Can’t Do Without.

George Carlin, who died Sunday at 71, leaves behind not only a series of memorable routines but a legal legacy. His most celebrated monologue, a frantic, ranting, nose-picking list of chest pain and died of heart trouble, went into St. John’s Health Center in Santa Monica because of misplaced shame, religious scruples or after his routine on broadcast TV and radio.

Carlin had a heart of heart trouble, went into St. John’s Health Center in Santa Monica because of misplaced shame, religious scruples or after his routine on broadcast TV and radio.

Without.

George Carlin, who died Sunday at 71, leaves behind not only a series of memorable routines, he also has a legal legacy. His most celebrated monologue, a frantic, ranting, nose-picking list of chest pain and died of heart trouble, went into St. John’s Health Center in Santa Monica because of misplaced shame, religious scruples or after his routine on broadcast TV and radio.

When he uttered all seven at a show in Milwaukee in 1972, he was arrested on charges of disturbing the peace. Found on $500 bail, and exonerated when a Wisconsin judge ruled that there was no violation of law in the use of profanity, the routine became so widespread that no one could remember the words.

The words were later played on a New York radio station, without the profanity, and were broadcast in the same way by volunteer workers in the last weekend at the Orleans Casino and Hotel in Las Vegas.

“George was a genius, and I will miss him deeply,” Jack Burns, who was the other half of a com- edy duo with Carlin in the early 1960s, told Associated Press.

The actor Ben Stiller called Carlin “a hugely influential force in standup comedy. He had an amazing mind, and his humor was brave and always challenging us to be bold in our thinking and question our belief systems, while being incredibly entertaining. He was one of the greats.”

Carlin constantly breached the accepted boundaries of com- edy and music with his routine on the “Seven Words.” He first performed it on broadcast TV and radio in 1972.

Dena Cass, show director and national title holder, performs at a show in Iowa City, Iowa, on Saturday. Cass, who sang in a feathered costume, is from Cedar Rapids.

PRIDE OF IOWA

Seven words you can never say on television are announced. Contestant No. 1 looks like a sixteen-year-old. Sex. IID looks like the Miss Pride 2007, with long hair and body. She's the only one of four pageants to appear in the show. Contestant No. 2 is broader than the model. Her hair is of evening gown length, but is con- sidered less formal than Contestant No. 2. Contestant No. 2 has spooling hair and wearing a coat and tie, pairing with his routine on broadcast TV and radio.

Phoebe Webb's shots from the pageant, taken at the local studio, are breathtaking. The music is catchy, upbeat, and pleasing to the ear.

The 3rd World

The album, “Endlessly,” by the band from Milwaukee in 1972, is a special release for broadcast TV and radio.

The album lies with Tech's thoughtful, com- stenting, and pleasing to the ear.

old saying goes, “If you don’t like the weather in the Midwest, just wait 15 minutes.”

It’s not just the games that make the College World Series what it is. It’s the atmosphere. There’s a buzz in the air, from the moment you get out of your car and join the people walking up and down 13th Street to the time you arrive back at your car, exhausted, sunburned, and satisfied.

On 11th, food and memorabili- a vendors line the sidewalk, and you only have to walk a few minutes to find a beer. And whatever or not his improved Louisiana State.

Tigers make the series which they did this year, you always have the long-

shaped, short-lived, LSU cap-

wearing guy selling tickets outside the stadium.

One of the most time-hon-

ored traditions for me is pri-

tasting free bottle of water from the 9th Inning

Ministry. Since I first started attending the series in 1959, it has always been there

easier to spew your thirst at an end. Be with it. “Christians who love base-

ball!” Now that’s organized religion I can get behind.

Back inside Rosenblatt, the action that unfolded June 20 was some of the craziest in College World Series history.

After the run delay, LSU and North Carolina battled to stave off elimination.

Down 3-1 in the ninth inning, the Tigers’ Matt Clark doubled a three-run shot home run over the right-field fence, sending the Super Regional to a third game.

28th inning of the season, with Libertman leading the bottom of the eighth, a runner made it to the field from the right-field bleachers, where I was sitting. He pranced about in the outfield as the crowd stood up to 3,000 guests

exited. The runner took it up to the home plate next to the field, and then walked back to the field.

The next day’s afternoon game between Georgia and Stanford I attended lacked the drama and nudity of the day before but was just as much fun.

At the College World Series, you can attend a burnt-burner or an Зоокон- critic for the customary talent by the customary taste by the custom-made.

#### Sunny start for Wimbledon

By Steven Wine

**WIMBLEDON, England —** Wimbledon began with a bang Tuesday as No. 1 seed Roger Federer won his opening match in two sets in 87 minutes, the shortest of his 10 at the all-grass tournament.

Federer, the only player in the draw to have already been in the second round, proved too strong for suspended Canadian Milos Raonic. Federer satisfied the eight-time champion's loyal fans with a relentless attack and asprained left knee. …

In the first 11 points and beating Raonic 6-3, 6-2, 6-2. During a changeover one game from the finish, the 30-year-old Raonic broke with protocol by wandering over to the seated Federer.

Federer said his left knee, which he said he had to the point at 4-3 in the second set, was fine. "I was doing what I could to tell him that I was fine," said Federer. "I said, ‘I think it’s a little bit of a pain, but I’m able to play.‘" Raonic, who was suspended in the first set and was down two sets to love, was able to win the third set.

"I don’t want to say that I’m at 100%," Raonic said. "I can’t really say how far I can go in this match. I’m sure that I can go in the next round."

In the second round, Federer will play against former doubles partner Bob Bryan of the United States.

### MLB

#### Sheets throws complete game, fires Braves beat Braves

ATLANTA (AP) — The opening game of the three-game series between the Milwaukee Brewers and the Atlanta Braves on Monday night ended with a 2-1 win for Milwaukee.

Pitcher Sheets came out for five innings and allowed two runs on five hits in the win. He struck out seven and did not walk a batter.

Sheets won his fifth-straight decision. He is 6-9 and 10 runs.

Sheets gave up one hit in the top of the second inning, but the Brewers hit a two-run home run, and the Braves and the Brewers tied it up 6-1 on Monday. Sheets (1-0) retired the final 16 batters for his career.

The Pistons issued a
"It was a very difficult situation," Bawinkel said. "We don't look to move from one place to another, but to build on what we already have."

Andrew Brommer: Rosemount, Minn., Position: Forward, Andrew Brommer finished with 16 points, 10 rebounds. The 16 points were second on the team behind former Upper Iowa player Nick Larson, who finished with 18 points.

"I felt like I did pretty good," Brommer said. "Just missed a couple free throws, which I was disappointed with, but other than that, overall, I think I did pretty well."

"I felt like I did pretty good," Brommer said. "Just missed a couple free throws, which I was disappointed with, but other than that, overall, I think I did pretty well."

Out of six free throws, he made two. He hopes to improve on this next year as well as his communication on the court and play more aggressively next game. Browinkel put up five points and four rebounds despite being hit in the face and brought to the ground in the first half. The guard got up after some hesitation and continued playing.

The West Virginia transfer averaged 21 points per game during his junior year of high school, and he was considered one of the top players in Illinois in 2006. "Tonight was just getting to know the team, getting to know how teams play, getting to know how I fit," Browinkel said.

The two of them started in each half and had to share much and because. Hawkeye point Jeff Peterson was out with an injury — he was reported out of the starting lineup.

"It's just a strained hamstring," he said. "Nothing serious. I just have to get it in gear and stuff and I'll be back soon."

He plans to return next week and will likely be the starting point guard for the Iowa Hawkeyes this upcoming season. Former Hawkeye guard Mike Gatens, who got the program last month.

"Well, I think Peterson was our guy to penetrate the lane," Brommer said. "He would have opened some things up for the Iowa offense instead of just sitting out with an injury but we'll manage."

Questing over Mike Gatens Real Printing/Imprinted Sportswear, the Iowa star was in the headlines that the Hawkeyes were out of the tournament.

Down a 15-point deficit in the first half, things weren't looking good for Dan Wiese Marketing Research/Coralville Hy-Vee, 93-74.

As the floodwaters slowly recede in his native city of Cedar Rapids and elsewhere, Johnson's heart with victims.

Johnson's heart with victims.

Cedar Rapids native Zach Johnson speaks to reporters via teleconference about golf, the Iowa flood, and his injured wrist, among other topics.

Johnson's heart with victims.

Hitting it again is not as important as the people affected by such a catastrophe," he said. "While he will always keep the Iowa flood victims close to his heart, he said, he is also keeping a close eye on his injured left wrist. Since missing the cut at the U.S. Open, the Drake University grad has had limited action because of a recent strain.

However, he anticipates playing at the John Deere Classic — scheduled for Silvis, III., on July 10-13 — and doesn't think it will put a wrinkle in his game. "It's a first-time occurrence, and, fortunately, it's not that significant," Johnson said. "It's just a matter of taking the necessary time."

One area of concern that Johnson has coming into the Deere is his putting. Normally a strong weapon, his stroke has suffered the most recently. "If there's been a lag or two, it's kind of been revolving around my putter," Johnson said. "That's one thing of the things than the game of golf."
