UI Student Government will kick off the school year today.

By KATHRYN STENSON
kathryn-stinson@iowa.edu

UI Student Government members will discus the three terms for the Iowa City City Council at the first meeting of the year tonight.

Sara Kyle, Schwart and Whitney Carson will present a piece of legislation on the potential enlargement of the IMU at 1 p.m. meeting in the IMU.

The legislation will call for an endorsement from UISG, as well as plans to host a forum for the three candidates. The endorsement was hoped to encourage UI students to participate in local government elections and help students to recognize that three UI students are running.

Officials expect the meeting to be short, with few items on the agenda.

It’s a very beautiful beginning of the year, as we are not expecting to have a large amount of legislation to present or pass,” said UISG President Michael Currie. “It will be our shortest meeting of the year.”

The meeting will begin with new legislation announcing the selection of nominations for members of the varsity legislative commission, the Student Assembly, the Student Senate, and the Student Judicial Court. After the nominations are approved by the Student Senate, senators will vote on legislation for supplemental funding for priority-need student organizations, the smallest student groups.

University Housing’s new recycling program will not include East Side residence halls this year.

**BREAKING NEWS**

**Black Iowa City Councilman>Councilman Greg Smith was charged Sunday with public intoxication.**

Smith, 24, 21 N. Dodge St., was charged Sunday with public intoxication.

While some East Side residence halls have each had recycling programs for years, the idea of adding recycling to student dorms was received sometime this week.

Gregory Jackson, a freshman resident and Hillcrest coordinator, said he and other Hillcrest residents have already brought in recycling bins and are looking forward to the new program.

Meghan Rager, a freshman resident and Hillcrest resident, said she and other Hillcrest residents have already brought in recycling bins and are looking forward to the new program.

The new recycling program won’t be implemented until the new semester, according to the city’s public works director, Dan Ranegar. Meanwhile, the city is waiting for expanded recycling programs to be implemented in dorm rooms.

“We don’t want to just throw it out,” Rager said.

Hillcrest coordinator Ben Parkes said the four of them are trying to make the recycling initiative work until the new system comes in.

“I don’t know what we have in place right now,” said Parkes. “But about the West Side residence halls, we’re planning on taking a systematic approach to encourage recycling efforts within the building and with the containers.”

Prior to this recycling program, students in dorm rooms were responsible for their own recycling efforts. At the end of the year, University Housing officials will assess how successful the expanded recycling efforts have been.

The City Council decided to consider legalizing urban chickens after extensive public opinion.

The Iowa City City Council will take up the issue of urban chickens at its Tuesday night meeting.

Councilors said they will consider the amended resolution to the Department of Housing and Inspection Services, the group that is on the verge of regulating urban chickens.

City ordinance does not currently regulate the presence of chickens in any residential area. While some residents have expressed general support of the idea, not all city officials would like to see such chickens remain living in Iowa City.

“Don’t want to encourage hens, but I like chickens,” said Mayor Raymon Buckley.

The Iowa City City Council will take up the issue of urban chickens on Tuesday night.

Councilor Dan Nall and councilor and Mike Wright made it clear during the council meeting they see positive aspects of having chickens for the community.

Mayor Raymon Buckley said he is not interested in having chickens in his area, but he is concerned about the possibility of all residents wanting to have chickens.

For a complete list of the amendments to the resolution, contact the city’s public works director, Dan Ranegar.

Animal Services dealt with a temporary location since the floods of 2008, which affected its ability to take care of Iowa City animals, officials said.

“Urban chickens” have been an issue of debate for Iowa City residents for years. Some residents support the idea and want to keep chickens in their area, while others remain with none. Mayflower’s problem with the containers.

Applying for expanded recycling programs, Mayor Arnee Barnes said that in the past, students have organized their own recycling bins and transported cans and bottles to recycling facilities.

“We have seen all floors in all dorms and in all buildings,” said Arnee Barnes, adding that there is still an ongoing issue of sorting. We need resources to make it happen. Other than that we literally throw the items in the waste, there is nothing we can do.”
Inside job suspected in Yale student’s slaying

By PAT EATON-ROBB

NEW HAVEN, Conn. — Clues increasingly point to an inside job as police searched Monday for more news about a late trip to his lab Sunday by Annie Le, a Yale graduate student and Connecticut native whose body was found stuffed inside a wall five days after she vanished from a heavily secured lab building accessible only to university employees.

Police on Monday sought to calm fears on the Ivy League campus, saying the death of 24-year-old Annie Le was a targeted act but would not say why anyone would want to kill the young woman just days before she was to be married.

“We're not believing it’s a random act,” said officer Joe Avery, a police spokesman. No one else is in danger, he said, though he would not provide details other than to say that police believe no other students were involved.

Avery also denied broadcast reports that police had a suspect in custody.

Yale officials said the building where Le worked would reopen under increased security. Still, some students worried about their safety.

“I'm not walking at night by myself anymore,” said Alondra Nunez, 21, of Jamaica. “It could happen to anyone, any- time, anywhere.”

Michael Vashchenkov, 21, of New York, said he did not realize Le was going to make a late trip to his lab Sunday in a different building. “It felt very different than how I usually felt,” he said.

Twenty-year-old Muneeb Sultan and his brother, 23-year-old Husain Sultan, said they're not surprised that there's a murderer where she worked.

“We're not believing it’s a random act,” said Sultan, a psychology student.

“Terrorism, politics — it’s a frightening idea that there’s a murderer walking around on campus,” said Sultan, a chemistry student.

Police found Le’s body about 5 a.m. Sunday, the day she was to marry Columbia University grad student Jonathan Widawsky, livingly referred to on her Facebook page as “my best friend.” The couple met as undergraduates at the University of Rochester and were eagerly planning their wedding on Long Island.

Police have said Widawsky is not a suspect and helped detectives in their investigation.

The building where the body was found is part of the university medical school campus about a mile from Yale’s main cam- pus. It is accessible to Yale personnel with identification cards. Some 75 video surveillance cameras monitor all doorways.

The body was found in the basement in the wall chase — a deep recess where utilities and cables run between floors. The basement houses rodents, mostly mice, used for scientific testing by multiple Yale researchers, said Robert Alpern, dean of the Yale University School of Medicine.

Le was part of a research team headed by her faculty adviser, Anton Bennett. According to its website, the Bennett Laboratory was involved in enzyme research that could have implications in cancer dis- orders and muscular dystro- phy, the disease from which Le suffers.

As the sun rose Monday on the candlelight vigil in New Haven, Conn., on Monday, Powers is the roommate of Annie Le, whose body was found buried in a wall in the high-security laboratory building where she worked.

It's simple: Extend Medicare to all Americans

By GEORGE McCOYER

For many years, a handful of dedicated political leaders have been trying to pass comprehensive health care reform. Over the course of recent decades, a host of government officials have been back as President Clinton and President Obama have sought a means to make health care more affordable and more accessible. The most recent effort — the passage of the Affordable Care Act — restated the original proposal that every American — not just those who had health insurance — could a have a semblance of health care. Unfortunately, the system continues to evolve, and the most recent proposal states that every other individual has access to health care. The problem is that the Affordable Care Act does not go far enough. If we wish to make comprehensive health care available to all Americans, we must see that our political leaders extend Medicare to all Americans. Those of us over 65 who have Medicare are in a position to show the younger generation how to achieve comprehensive health care. If we wish to achieve comprehensive health care for all Americans, we must pass what is known as Medicare for All. The health care system is broken, and we need a new one. Medicare has a proven track record. It works, and it is affordable. If we wish to extend it to younger Americans, we must extend Medicare to all Americans. Removing the payments for services that the insurance companies would no longer cover would prevent the tax increase necessary to cover all Americans. We know that Medicare has worked well for half a century for those of us over 65. Does it work? Medicare has been successful in covering all the services that we need. It is currently the largest insurer in the country, and it covers more than 50 million people. Medicare is the only option that covers all the services that we need. Medicare is the only option that can cover all the services that we need. If Medicare needs a few modifications in order to serve all Americans, we can make such adjustments now. It is time to make the necessary adjustments. We need to continue to extend it to younger Americans. We need to make sure that Medicare covers all the services that we need. We need to make sure that Medicare covers all the services that we need. We need to make sure that Medicare covers all the services that we need. We need to make sure that Medicare covers all the services that we need.

From Russia with literature

By TOMMY MORGAN JR.

Four Russian writers, visiting the area through the International Writing Program, will be participating in this month’s Love Light Books Lights event at 7 p.m. Monday in Schindler Fine Arts Center, room 158.

The readings will take place in honor of IWP’s new publication, Love Light Books: Lights, 158: 2015, an anthology of 2015 short stories written in English by five Russian authors. A reading from each will be followed by an opportunity to share your thoughts and ask questions of the authors.

The writers arrived on Sept. 5 as part of the Open World Program. The program’s website states that its goal is to “enhance understanding and capability in the areas of mutual interest between the United States and Russia and to promote the Unity and the Belarusian state.”

As part of their visit, the writers met with UI IWP students, faculty and administration to discuss their works and the Russian literature. The writers will meet with UI students before participating in the international literature class.

Admission Free

For some, this is the first time their literary work has been translated into English. For others, it is an opportunity to translate from English into Russian, French, and Ukrainian, and a selection of her poetry will be read at Pygmae Lights.

The Resistance, post Amelin and fiction writer Masha Deriy — the latter translating from poetry into English — present a distinctly different voice.

Amelin, who has lived and worked in historic and contemporary Russia for more than three years, is one of the two language-translation projects working on a translation of works from Russian into English.

The Russian language is heavily acrobatic, she said. “You can’t change [the accent], otherwise you change the meaning.” Amelin is a master himself who specializes in converting Latin and ancient Greek poetry into Russian. As a result, he said, people who try to translate these lines have become incapable of being consistent. If they want to be consistent, they must find a way to distort the meaning. It gets used by all those groups to describe themselves, since it’s an exclusive way of saying that they’re the best. But Muse’s tunes continue to generate enthusiastic crowds, although with a slightly different purpose.

Uttering the ‘E’ Word

By TOMMY MORGAN JR.

It’s a great name, but also ponder pseudo-epic. But Muse’s tunes continue to generate enthusiastic crowds, although with a slightly different purpose.

FILED 2015

Thankful to proliferation of the web to access anything, whether or not the object in question deserves such a grandiloquent description. This misuse, “epic” has become a word abused. But, oddly, it is the only adequate way to describe the sprawling opus that is Muse’s The Resistance. Clocking in at around 65 minutes for only 11 songs, The Resistance doesn’t contain a single tune shorter than 3:36. Despite recent overuse of the word, “epic” still means what it used to mean — at least, from a literary perspective — it signifies the very big and beautiful, but the end-ings still feel like little filler — on an album on which such fine empty moments are rare.

Muse — The Resistance "E" word

Crashes kill IC man in Wisconsin
An Iowa City man was killed in Wisconsin after his motorcycle crashed on Sept. 12, according to the Iowa County Sheriff’s Department.

David Ryan, 39, was driving a 2008 Triumph motorcycle in Gays Mills, Wis., when his brakes locked up around 1:55 p.m. after rounding a sharp curve on a 2009 Triumph motorcycle in the Wisconsin Department.

He was pronounced dead at the Gays Mills ambulance.

Two other Illinois men had fatal wrecks in Wisconsin; both were wearing their hel- mets.

Bill Klahn throws a medicine ball and runs before beginning his workout at the 17th World Transplant Games in Australia and received three silver medals.

IC resident swims back to live

When Exx onMobil employees, their receiving spouses, as well as relatives and directors of the company make a gift to the UI Foundation, Exx onMobil expresses appreciation for the money to the UI area designated by the donor.

Klahn, 52, didn’t ask for a liver transplant.

Klahn said.

“...It was really hard for me to meet her mother because I was consumed with guilt,” Klahn said as tears welled in his eyes. “I am alive, and her daughter...”

It was one of the hardest things I ever did, but now I see my second mom. I call her on Mother’s Day.

On his computer, Klahn keeps pictures of his “second mom” presenting him with medals after a swim meet. After cooking back tears, he noted that he gave them right back to her and asked her to keep them for his donor’s three children.

It wasn’t about winning or losing.

Botox nation growing

The number of plastic surgeries are up locally and nationwide.

By SAM LANE

Two recent reports have confirmed that the number of plastic surgeries is increasing, with some experts predicting that the trend will continue.

Botox treatments are among the most popular procedures, with patients seeking to reduce wrinkles and fine lines. Other procedures include rhinoplasty, liposuction, and facelifts.

Despite tough economic times, people are turning to plastic surgery as a form of self-care, according to Ulrich Hospitals and Clinics spokesman.

“People are coming into the office who never expected to look for a job,” said Ulrich.

The hospital’s data showed that the number of procedures performed in the last quarter increased by 10 percent compared to the same period last year.

The increase is due to a variety of factors, including the aging population and a growing desire for a more youthful appearance.

“Patients are looking for ways to improve their appearance and stay competitive in the job market,” said Ulrich.

The hospital’s data also showed that more men are seeking plastic surgery, with the number of male patients increasing by 20 percent.

Botox treatments are particularly popular among men, with many seeking to improve their facial features and reduce the appearance of fine lines.

“Botox is a great way for men to look younger and more confident,” said Ulrich.

However, some experts warn that patients should be cautious about choosing the right surgeon and that they should discuss their options with their primary care physician.

“Botox is not a substitute for a healthy lifestyle and regular exercise,” said Dr. John Smith, a plastic surgeon.

Despite the increase in plastic surgery, the hospital’s data also showed that some procedures, such as facelifts, are declining in popularity.

“Facelifts are becoming less common as people are turning to non-surgical options, such as injectable fillers and laser treatments,” said Ulrich.

The increase is due to a variety of factors, including the aging population and a growing desire for a more youthful appearance.

“Patients are looking for ways to improve their appearance and stay competitive in the job market,” said Ulrich.

The hospital’s data also showed that more men are seeking plastic surgery, with the number of male patients increasing by 20 percent.

Botox treatments are particularly popular among men, with many seeking to improve their facial features and reduce the appearance of fine lines.

“Botox is a great way for men to look younger and more confident,” said Ulrich.

However, some experts warn that patients should be cautious about choosing the right surgeon and that they should discuss their options with their primary care physician.

“Botox is not a substitute for a healthy lifestyle and regular exercise,” said Dr. John Smith, a plastic surgeon.

Despite the increase in plastic surgery, the hospital’s data also showed that some procedures, such as facelifts, are declining in popularity.

“Facelifts are becoming less common as people are turning to non-surgical options, such as injectable fillers and laser treatments,” said Ulrich.

Overall, the hospital’s data showed that the number of procedures performed in the last quarter increased by 10 percent compared to the same period last year.

The increase is due to a variety of factors, including the aging population and a growing desire for a more youthful appearance.

FOOTBALL

CONTINUED FROM 1B

significant not just because of the team's 11-1 finish, but also because of the support the team had from fans. The team finished in the middle of the pack. "It's really one of the most special times of the year," he said. "If you can be a key to becoming the starting quarterback next season, you'll be happy to help us mentally in the next one."

Mark Hawkins said the team didn't start the tournament with a bang, but the team was proud of their performance. "It was almost like we were still in practice mode in the first round, and it took a little while for them to get it going," he said. "Some of it is experience, and some of it is the speed of the greens after the practice round," he said.

The team didn't get beaten by 14 other teams, so they will have to work harder to improve on being mentally ready to compete and hosting our potential. The team needs to be patient. "I think that just motivates us even more to prepare and work harder to reach those expectations in our next tournament," Coach said. "We definitely have the talent and skills to be one of the top teams in our conference. We just have to believe in our potential and play to our potential."

Senior Alison Cavanaugh also remains optimistic. "Some of our practices aren't the best, so we have to do a better job of making putts. That means that you're in position, 'she said. "That's not how we did it last season's opener. We had a tough one in which the offense struggled to convert key plays until the final moments. Perhaps that big moment is coming for us."

"That's not how we drew it up, but I'll take it," Brady said. "We've been trying to improve our patience, and we're doing a better job of ball control."

"I like the way he is handling himself, and he is really coming on the front of the situation," Coach said. "We have the same high expectations, but their ability to make par from any hole is what makes us different."
The Yankees beat the Angels, 5-3. New York Yankee pitcher Mariano Rivera throws out Los Angeles Angels of Anaheim’s Chone Figgins in the eighth inning at Yankee Stadium.

The Angels, who began the season as the favorites to win the AL West with 17 to play, are in third place in the AL West with 217 — two more than the second-place Rangers. The Rangers have driven in the tying and go-ahead runs, but didn’t score to take the lead.

Figgins’ RBI grounder gave the Angels a 2-1 lead in the fifth, which they took into the bottom of the inning.

New York Had an 8-5 lead at the end of 7 1/2 innings, and the Angels scored twice in the eighth-plus-inning rally to make it 9-7.

The Angels, who began the season as the favorites to win the AL West with 17 to play, are in third place in the AL West with 217 — two more than the second-place Rangers. The Rangers have driven in the tying and go-ahead runs, but didn’t score to take the lead.

Top Tips For Finding a Job In A Tough Economy

While recent news headlines are indicating a downturn in the job market, hundreds of employers are counting on The University of Iowa to supply them with many young opportunities for undergraduates, so be sure to take advantage of the services of Pomerantz Career Center throughout the year and after your graduation. Staff from the office also have hundreds of employers ready to create new opportunities for tomorrow. Last year, your visits were made with over 500 existing and potential employers.

We want to help you be as successful as possible with your ongoing job search.

Keep the following in mind while conducting a career search:

- Don’t get caught up in titles or company names. Be sure to read the job description thoroughly and think about the organization and see if it is a good fit for you. And because it’s a company or job title you’ve never heard of doesn’t mean it isn’t a good job.
- Review your own experiences. Do you see that you are adding other experiences to your resume that you can use more effectively? If you haven’t already, volunteer, join a student organization and find an internship.
- Keep your personal network updated. If you have been interviewing in one or two geographic areas expand your search area. This will give you more opportunities and options!
- Be critical of your resume. Make sure you have illustrated your “selling points” well through your resume. If you need help, bring your resume to a Peer Adviser or Career Adviser at Pomerantz Career Center.
- Look outside your major. If you find an opportunity that you are interested in and qualified for that is not in your major, don’t let that hold you back! Many people work in areas that don’t match their major, or work in areas that they had interests in outside of the classroom.
- Don’t worry about what others think: This job is for you, not your friend, your mom or your brother. Chose a job that you think you will enjoy.
- Your first job doesn’t have to be your DREAM job. The most important thing is that you find a job that will help you move in the direction you want to go in your career. You don’t need to land your dream job right away, if you find a job that gives you experience in your chosen field that you can (be a “go for it!”
- Work hard. Start early. Be prepared. Be prepared to conduct your job search by doing research, having a firm resume and cover letter and being organized. The earlier you start, the better because there are more jobs to choose from. But you must work hard and you won’t just land a job at your first try. If you don’t already have a U.S Employment Tax account (online recruiting systems), get one. It is a great place to start.
- Thank you outside the box. Be creative as not what you are searching for, but how you are searching. Have you covered all the bases in your search? Online, search, national/international networking, networking through families, friends and family. Use all of your resources.
- Sell yourself – as an else will. Modesty has its place, but that place isn’t your resume or while interviewing. Be confident in your experiences and abilities as well as what makes you unique, and be sure to let each organization know how you can be an asset to them.
- Listen to the media – not too far too close. Keep in mind that media reports can be generalizations and exaggerations at times. What may be true for a job market one location may not be true for another. Don’t get discouraged and be patient!

For more information, visit www.careers.uiowa.edu, or call 319-335-1023.
Interviewing - Common Sense Things That Can Help Or Hurt You

1. Be on time; plan to arrive 10-15 minutes early.
2. Know the interviewer’s name and how to pronounce it. If you don’t know, ask the receptionist.
3. Bring extra copies of your resume. Also bring a copy of your transcripts, a list of references, and pen and paper for jotting down information after the interview.
4. Pay attention to your posture, eye contact, and other non-verbal.
5. Think “twist” not “consent.” If you think “twist” you are concentrating on your qualifications, what you can offer the company, and what makes you qualified. If you think “consent” you are concentrating more on how you look, how nervous you are, or if your hair looks good.
6. Dress appropriately and professionally; a business suit is appropriate for most interviews. Make sure your hair and nails are neat and clean. Polish your shoes. And wear little or no perfume/cologne. Jewelry should be conservative.
7. Be prepared for some personal questions and be able to talk about the experiences and knowledge you have. Look over typical interviewing questions and think about how you will answer them. Do a mock interview at Peterson Career Center.
8. Be sure you understand the questions. If not, ask for clarification.
9. Emphasize the positive and use examples to back up your statements.
10. Research the company ahead of time. Know what their product or service is, who they serve, and who their competitors are.
11. Don’t interrupt or be rude.
12. Let the interviewer bring up the subject of salary. This may not occur until after an offer is made. However, be prepared with an answer for the question, “What salary are you expecting?”
13. Emphasize what you can do for the organization.
14. Never slight a former employer, teacher, or institution. If there were problems with previous experiences, try to make your answers positive.
15. If you catch yourself making an error, correct it. Don’t try to cover up.
17. BE YOURSELF! You don’t want to get hired on the basis of something you are not.

For more information on interviewing from dress to questions to ask, and questions you may be asked, visit http://www.careers.uiowa.edu/guide.html.
Fall Job & Internship Fair, How To Make It Work For You!

Be Prepared – Getting Ready For The Fair

- Read the list of employers participating in the Fall Fair. They can be found at: http://www.careers.uiowa.edu/fair/fall09.html and you may be prompted by the Placement Career Center to pick up a hard copy of guide booklet one week before the event. Circle the companies you are interested in interviewing with. You will be more productive if you identify in advance the employers you want to meet.
- Research the organizations that interest you. Review their websites and/or the Placement Library (Placement Career Center, Suite C09). This will help you be more informed of the organizations when you speak with them.
- Write down questions to ask representatives from your targeted organizations.
- Have your resume available during walk-in hours. Monday-Friday 9-11 a.m. or 1-3 p.m. to schedule an appointment with a Career Adviser.
- Once you resume is complete, you can submit it to employers through UI Employment Expo. Register at: https://www.careerinfocafe.com/iowa/online. Or log on to “OneCareer Interviews,” “Qualifed Solicitations” to request interviews with employers who are interviewing the day after your fair day. Other employers may also schedule interviews when they talk with you during the fair.

The Day of The Fair

- Dress professionally or business casual. Professional dress includes a suit or dress. Business casual can include business casual attire.
- Bring your Student ID for check-in and copies of your resume to hand-out to employers.
- Check in at the Student Registration Table inside of the Main Lounge, Iowa Memorial Union. Wear a name tag that indicates your major and graduation date. Employers like to know with whom they are speaking.
- Plan to visit several booths throughout the day. Hundreds of students attend and you may need to spend time waiting in line. Plan for your own breaks.
- Tips for finding employers: use the map that will be provided to you during check-in. Employer name and locations will be indicated. balloons will also indicate which employers have available internships (the gold balloons that say “Internships”).

Talking With Employers

- With your targeted company/organizations first. You will notice if you talk to too many. Gather company contacts when you can. Don’t expect to receive private time with every employer. Take it in informational format and a lot of people are trying to be hired. Be patient and allow your employer to enter into your booth.
- Pick up materials from each employer you visit. This will help you make a decision about pursuing employment with this employer.
- Tell the company/organization about yourself.
- Ask the representative questions.
- Leave your resume.
- Since you are not looking for a job or internship right now, gathering information about potential employers is also beneficial. Walk around and talk informally with companies to get a feel for potential employers. You may be interested in hearing more about and gather pamphlets and business cards that you can use for contacts later.

When The Fair Is Over

- Write thank you notes to each representative you spoke with.
- Continue to research potential employers.
- Attend career fairs offered by the Placement Career Center to learn more.
- Information on preparing for an interview and other aspects of the job search process can be found on our website at: http://www.careers.uiowa.edu/students

Researching Companies and Organizations

One of the most important things you can do before searching for a job or internship is to research organizations that you may be interested in. This will help you to list more companies to interview with and keep you from interviewing with companies that may not be a good fit for you. The Placement Career Center has developed a worksheet to help you organize your company research. The worksheet is available online at http://www.careers.uiowa.edu/iowalanceresearch.

Below are some ideas to help you in your organizational research:

- Tip: The organization’s name is the first piece of information you are aware of. Look at names, job descriptions, department/staff newsletter, and special reports.
- Real personalized journals and business-oriented newspaper reports related to career criteria in your career area.
- Check the Music Library for reference books such as BD&H, Bradford, Standard & Poor’s Register, and Moody’s Manuals.
- Don’t forget that people already involved in the career area can be a great resource, make sure if you talk to someone that you participate in the information they give you. Always ask if the information is “on the record.”
- Interview with “people” or “job” surveys to help find a variety of web resources.
- Related professional or trade associations, etc., can be good sources of information.
- Looking for a company who likes and hires UI graduates?

The Placement Career Center keeps a list of companies that hire UI students and alumni at http://www.careers.uiowa.edu/iowalanceresearch.

The Placement Career Center has developed a worksheet to help you in your organizational research.

Networking Made Easy!

Use these tips and suggestions to make the most of your time!

Contact:
- Go where the people are. Don’t wait for networking to happen, make it happen.
- Be visible. As part of a group, organization, or community, be sure to participate. Contacts need to see you face-to-face and hear your message. Contact information is key.
- Find the best basic and personal level when meeting out organizations and groups to associate and network.
- First impression last a life time so make sure your first impression is appropriate.
- Always network the day before the event. Take time to learn all you can, more than you think and you will be surprised at the results.
- Move! Don’t forget it’s important for you to physically move around when you are on a networking.

Engage:
- Go out! The first 30 seconds of a conversation with a stranger is the reason, and it will give you the opportunity that matter, the reason they engage and who they really are.

Engage:
- Go out! The first 30 seconds of a conversation with a stranger is the reason, and it will give you the opportunity to learn more about them, the idea, interest, and culture. Companies help "staged" contact.
- Think back to the way you’ve been asked to identify: “What are you saying interesting that is obvious? questions? "How can I be involved with this idea?" This line makes your ideas easier to understand. Can help continue with open-ended questions.
- The people that meet the test is the best listener. Anyone will speak to you for an hour if you are not speaking for yourself.
- How to identify good conversation topics. Ask a question, be with a question, try to meet that you will speak about. Do you know about this idea? They can help continue with open-ended questions.
