Monday's evening of cold wind was the best wind to cut the area of those pesky insects making their way into our ears, mouth, and nose of unsuspecting humans.

"There grows me out," said UI freshman Kasey Heaton as she sat outside Schaefer Hall, a popular hangout for the birds. "One smashed against my earshot and left a stain.""I can’t rest in repose, for fear of suffering the same fate," the city of Iowa's Curfew ordinance until December.

Tufts bans sex in roommate’s presence

By RUTHLESS CONNERS

BOSTON — Sex in a Tufts University dorm room is frowned upon, but make sure you have your roommate’s permission first.

The semester has begun and dorm rooms are abuzz with sexual activity while a roommate sleeps. According to Kim Thurer, a Tufts alumnus and former student, students who have complaints in the past have been told that “if it’s really your respect and personal boundaries that are at stake, there’s a question of how roommates utilized their space.”

Fly virus delayed

Because of a delayed shipment, the second batch of H1N1 vaccine will be conducted in phases, said the representative for the University of Iowa. The first phase focuses on exposing anyone who works, learns, or travels in the UI’s main campus.

The second phase, beginning in mid-October, will be available to everyone on campus who wants it. The representative added that the UI’s Phase 2 is set to arrive as well as any other Phase 2 that other institutions may have.

No Tales behind bars

To make sure students are not asked want to be their success, the representative said that Phase 2 will be conducted on the program’s second phase. However, this does not mean that students will be asked if they are doing things in a room with or without a roommate.

Man charged with 3rd OWI

A man from Wisconsin was charged with driving while resisting or eluding a police officer.

A woman charged in crack bust

An Iowa City woman was arrested after allegedly selling crack cocaine to a person serving a warrant on July 1 with forgery by check/doctor’s order.

Woman and man charged with crack drug

 Council delays curfew discussion

COUNCIL DELAYS CURFEW DISCUSSION

“We can find ways for this to work,” council member Doug Pearson said at the meeting. “We can find ways to make this work.”

The city council’s discussion over the curfew was called into question when a council member, Doug Pearson, suggested that the city council could find a way to make the curfew work.

“People in your neighborhood have asked for this,” he told residents at the meeting.

After alleged violent activities in southeastern Iowa City, residents proposed a curfew ordinance to the council. The council held a special session on Sept. 10 and decided to move forward with the ordinance.

The council voted 4-3 in favor of the ordinance on Sept. 15 after an emotional discussion.

Conversely, the council voted 5-2 in favor of the ordinance on Sept. 15. A council member, Matt Hayek, opposed the idea.

He said it would be wise for the council to consider the impact the curfew would have on residents.

Questions still remain in Deng death

In the weeks following the July 4th death of Deng, many have raised issues regarding the legitimacy of his death and whether it was a result of natural causes. The Iowa Attorney General's Office released its final report on Sept. 25, determining that the death of the former leader of the People's Republic of China was a death by suicide. The report states that Deng was found in his apartment on the morning of his death, with a self-inflicted stab wound to the chest. The report findings were based on an autopsy, medical examination, and investigations into the circumstances surrounding his death.

LETTERS TO THE EDITOR

To the Editor of the Daily Iowan:

“Should I build a new dorm?”

No way! They dear the money. The repairs are out of the bond. If they build this dorm, the bond money should be used for something more important.

- marge

When I was filling out my bond form, as an incoming freshman, my mind raced to the many dorms that are runned, then built, then torn down, then rebuilt, then torn down again, all in the name of money and efficiency.

- Michael S. Davis

Obama channeling Cheney on detention policy

By BENJAMIN MITTE

President Obama’s decision to shut down the Guantanamo Bay detention camp is an opportunity for helping in establishing a more humane national security approach for the continued detention of terrorists. It is a hopeful first step in the fight for a future in which detainees are treated with dignity and respect. This is a victory for a long-time campaigner in the fight for human rights and against civil liberty. It represents a virtual victory in a campaign fought in the United States and around the world. It is a victory for those who fought the “war on terror” and the “war on democracy.” It is a victory for a cause that has been important for many years.

The only point in Obama’s defense is that he has no political activists who would have the same position as he. He would have to be willing to take on a large and difficult change in policy without the support of his political base. But he would have the support of a large and difficult change in policy without the support of his political base. But he would have to be willing to take on a large and difficult change in policy without the support of his political base. But he would have to be willing to take on a large and difficult change in policy without the support of his political base. Margaret Atwood's newest work, The Year of the Flood, weaves a tapestry of a postapocalyptic future.

By TOMMY MORGAN JR.
The Year of the Flood, the latest installment in Margaret Atwood's series, portrays a world that has been destroyed by a chemical flood and survivors of what is referred to as the Waterflood, the same apocalyptic catastrophe that took place at the end of Atwood's masterwork, Oryx and Crake. In The Year of the Flood, the story centers on a survivor of what is referred to as the Waterflood, the same apocalyptic catastrophe that took place at the end of Atwood's masterwork, Oryx and Crake.

Atwood's characters come far younger age than they normally develop. Atwood reveals a chaotic and brutal world — except, of course, for the ancient warriors fighting for retribution. Instead, Toby and Ren relates the condemned in their fight for a future that, when viewed through the looking glass of today, is not far from reality.

Atwood's depiction of the unique, this book is rather dry.

value for the sake of the reader.

The story contained in Deep Dark Secret is a page that is needed to talk because it is so simple, so obvious, that one almost wonders why one has never said it before. The prose of the book, on the other hand, results in a rather dry description of obsessive love (in stark contrast to Oryx and Crake's narration of Jimmy's love affair with the adjudicator Iren.) Instead, Toby and Ren use is to illustrate an unconscious humanity and compassion. Atwood paints a picture of human connection, beyond touch and physicality, against a backdrop of human survival. It is through these means that the reader can feel the relation of the conditioned in the viewer.

The Year of the Flood, the final chapter of the book, is one of the last pages of the book. The year 2009 when the book was published, not too short of a time to the end of the novel. Atwood's depiction of the world — except, of course, for the ancient warriors fighting for retribution. Instead, Toby and Ren relates the condemned in their fight for a future that, when viewed through the looking glass of today, is not far from reality.

value for the sake of the reader.

Imagine sitting in Prairie Lights Books listening to Kurt Vonnegut read the first chapter of *Slaughterhouse-Five*. His slow, measured speech would begin: “All this happened, more or less ...” Soon, bibliophiles will be able to see what a day in the life of Vonnegut — and other famous writers from the Iowa Writers’ Workshop — might have been like. A new project by graduate students and faculty from numerous UI departments will use audio, video clips, maps, and photos from some favorite writers’ time in Iowa City to recreate scenes from their lives.

“We’re looking for ways to promote literature and writing in Iowa City,” said Jon Winet, the director of the UI Virtual Writing University. The free iPhone application will highlight places such as Vonnegut’s favorite bars, the church Flannery O’Connor attended, and countless other local places writers in the program frequented throughout its more than 70 years.

Lauren Haldeman, a content-developer for the application, said students, writers, and community members alike can use the application to learn more about the everyday lives of their favorite Workshop authors.

“It’s the very small moments of a person’s life that make them who they are,” she said.

Haldeman has combed through biographies and personal letters and scoured the web to find information from the authors’ lives pertaining to Iowa City.

The idea to develop an application came after the United Nations Educational, Scientific, and Cultural Organization named Iowa City a City of Literature in 2008.

Winet said he is excited about the opportunity to combine numerous forms of media in the application.

“We can focus some existing archives and form them into an accessible platform,” he said.

Joe Williams, a graduate fellow in the School of Library and Information Science, is developing and organizing the content for use on the iPhone and other mobile devices.

The free iPhone application will include:

- Where famous Workshop authors liked to hang out in Iowa City
- Novelists’ favorite Iowa City bars
- A baseball-card-style entry for each writer
- Photos and audio clips of the authors while in Iowa City

Winet said a preliminary version will be available for downloading before the end of the year, but he expects the content will continually be changing.

“The program will never be complete because some of the Workshop authors died,” he said. “And the cool thing about electronic publishing is that it doesn’t have to be published once.”

Haldeman said she is beginning to realize how interrelated the lives of many authors were.

“When you start to research one author, you find out many dimensions of others,” she said. “I’ve used a database of the Workshop authors, and while you may not find a lot of information, when you get into the relationship between two or more authors, you start to get a better sense of the whole.”
Not only is Herman responsible for the equipment of the club, but he also is the armorer for the University of Iowa fencing team. Every day, he spends an hour with an athlete or competition to make sure it meets specifications. ’It’s like scrutineering in another way, ’Herman said. ’I would like to go and see a photo slide show of the previous five training sessions. ’

For the previous five years, Herman has attended Southern Illinois University in Carbondale, where he fenced for four years. Upon his arrival, in 1974, he was asked by the director of Recreational Services, if there was any equipment that he could ask for the fencing team. “He has so much experience with procedure and useful for the team. ’

He has so much experience with procedure and how things are done because he has been with the national team for so long,” Voelz said. ’

He and Voelz traveled with the team to Beijing and Xi’an for the past two Olympics. ’

Hawkeye Club Fencing Club President Nick Buettin said Herman has a unique personality and is always willing to give advice. He even invites team members to his home to teach them armory. ’

We are very happy to have him because he is always willing to help us with a piece of equipment, and a lot of teams don’t have someone like that,’ Buettin said. ’

Team Vice President Luke Voelz said Herman’s experience has been very useful for the team. ’

“He has so much experience with procedure and how things are done because he has been with the national team for so long,” Voelz said.

After attending Southern Illinois, where he fenced for four years, the club armorer for the University of Iowa fencing team moved to Iowa City for graduate school.

Upon his arrival, in 1974, he found the Iowa fencing team had not been in existence for four years. He and his friend, Ron Herman, were both 16 years old. Hearing the news, her friend Herman asked Harry Ostrander, the director of Recreational Services, if there was any equipment on the floor of the Field House that he could ask for the team.

“I would like to go and see a photo slide show of the previous five training sessions,” Voelz said.

Recreational Services, if there was any equipment that he could ask for the fencing team. ”He has so much experience with procedure and useful for the team. ”

Oliver Home of the Red Spartan Hill Raiders ran the football during a flag-football match against the Pharm Team Thursday. The Raiders beat the Pharm, 33-20, earning a spot in the playoffs.

Every Monday during the four-week flag-football season, The Daily Iowan’s beat writers will select a handful of standout offenses, defenses, special teams and players during the week's competition.

**Blackout vs. Sigma Chi**

* Sigma Chi’s version was good.

* The team won 27-6 after the two-point conversion.

* Scotty Southard put the Sigmas up 14-0 early in the game.

* Nick Amato caught a deep pass early in the third quarter and gave Oliver Howe his first touchdown.

* The Sigmas had 112 total yards and ran the ball 22 times.

* Spartan adjustments to hold the defense had little success.

* The Sigmas had a point after the two-point conversion.

* DVD — Representing the Daily Iowan.

* Saying it may even be the key to getting a strong opening.

* “We've gone between putting pressure on, 'O' looks, and covering receivers,” he said. “And we thought, after missing a bus, came in to quarterback a two-week stretch. We haven't been able to give the offense a chance. Nor for the Red Spartans making a playoff run. They just got to stay consistent,” he said. “And watch the penalties... and the swearing.”

* Another O'Donnell screen pass turned into a long touchdown, giving the Red Spartans a 20-19 lead that was later increased to 26-19 after an extra point catch from Mike Shoolbred.

* Saturday faced off on a late touchdown catch in the last game of the regular season, giving the Red Spartans a 33-20 win.

* After missing a bus, came in for the remainder of the game.

* We completed passes, did the right things, improved our offensive line, said offensive coordinator Oliver Howe.

* “We've gone between putting pressure on, ‘O’ looks, and covering receivers,” he said. “And we thought, after missing a bus, came in to quarterback a two-week stretch. We haven't been able to give the offense a chance. Nor for the Red Spartans making a playoff run. They just got to stay consistent,” he said. “And watch the penalties... and the swearing.”

the ledge

Once upon a time, the sun and the moon played hide and seek through the clouds. They decided to create a special place where stars could be seen. Today, the ledge is a popular spot for stargazing and enjoying the beauty of the night sky.
