UI to lease another apt. complex

Centerstone would be the second off-campus apartment complex leased by the UI.

By HAYLEY BRUCE

University of Iowa officials hope to lease another privately owned apartment complex — this one near blurry Residences Hall — to house students next fall in an ongoing effort to ease overcrowded dormitories.

The state Board of Regents, which will vote on the proposal at its meeting Dec. 13, will be asked to consider 113 E. Division St. — a project that will mark the second time the UI has leased an off-campus building to accommodate an influx of students hoping to live downtown. The UI last year opened 140 incoming students into living in the Lodge — located near two off-campus apartment complexes.

University Housing Director Von Stange said officials decided to lease the Lodge this year because of the large freshmen class and Centerstone will serve the same purpose next year.

UI profs defend sabbaticals

House Republicans view a hold on sabbaticals as a way to cut costs in a tight economy.

By SAM LANE

All three state universities are requesting fewer sabbaticals for their employees this year — a fact some Republican lawmakers favor but is concerning to some professors and university administrators.

And despite the decrease in requests, the University of Iowa has seen a slight increase in faculty seeking for to be a part of the paid research leave.

Only 90 faculty members at the UI, Iowa State University, and the University of Northern Iowa are seeking sabbaticals in fiscal 2012, a decrease from 107 in fiscal 2011, according to information released Thursday as part of the agenda for the Board of Regents’ meeting next week.

At the UI, one number of faculty requesting sabbaticals — which university officials call “career development awards” — has increased from 112 in fall 2001 to 124 in fall 2011.

Republicans seeking to trim the state budget have been critical of professors who use sabbaticals as a way to reach that goal.

UI, Navy team up in wave action

The Navy has partnered with the UI on tests since the 1960s.

By MAX FREUND

A sleek black naval vessel rocked against increasingly strong waves. Maneuvering through choppy water, the craft turned slowly and has- ted back to shore.

But the ship was only about 10 feet long — and it was being buffeted by 1-foot waves in the University of Iowa’s new $4.9 million wave basin.

The massive 20-by-40-meter post — embossed with the world’s largest Tigerhawk logo — is the first of its kind in the world. It is used to measure the seaworthiness of naval craft. The U.S. Office of Naval Research contributed $3 mil- lion to the project.

“This is a world first in terms of ship-hydrodynamics,” said Larry Walker, the director of Iowa Institute of Hydraulic Research-Hydra- ronics and Engineering. “It allows us to do free model tests, so the ships at test here are remotely controlled and we navigate around in normal motions that a naval surface destroyer would do.

The new facility allows researchers unprecedented control in how they can create different conditions for ships and measure the results.

Summer license in trouble

Another of Mike Porter’s bars, One-Eyed Lakes, will close after this weekend.

By ALICIA KRAME

One of Mike Porter’s downtown bars could lose its liquor license next week and another is set to close after this weekend.

Iowa City Police Chief Jann Hargadine has recommended to the Iowa City City Coun- cil deny the renewal of the Summertime license at its next meeting on Nov. 7, according to city documents. Hargadine cited Porter’s reported financial troubles as the rea- son for denial.

Porter is fac- ing two separate lawsuits. One, filed by Southwest Construction LLC and Cont’l Bank Bank, is for failing to make payments on several loans totaling more than $400,000. Porter also defaulted on a loan from the city that he acquired to put attractions on Jakes, 20-28 S. Clinton St, according to Har- gadine’s memo.

Since May, Porter has filed bankruptcy for Volos and fishes, his downtown liquor store. Hargadine’s memo includes a list of Porter’s legal and finan- cial woes, citing four previous instances involving serving alcohol to minors and money owed to both Iowa City and the UI.

“Is there is a clear difference is being made by Mr. Porter and a number of his businesses to meet the cri- teria for a person of good moral character with respect to demonstrating financial responsibility and financial viability,” Hargadine said.

Under Iowa law, bar owners must remain in “good moral standing” to keep their licenses. Counselor Mike Wright said he fully supports Hargadine’s recommendation.

Number of UI arrestes up sharply

Officials point to increased downtown enforcement and tailgating regulations as reasons for increases in alcohol-related charges.

By SAM LANE

A sharp increase in alcohol-related and overall arrests at the University of Iowa this year can be attributed to increased enforcement, not necessarily on an increased num- ber of crimes, officials say.

Data released by the state Board of Regents on Thursday shows the number of charges for the quarter ranging from July 1 to Sept. 30 have increased by 31.8 percent — from 170 in 2009 to 224 this year.

But that doesn’t mean more students are getting in trouble, said Charles Green, the assistant police vice president for the UI police, noting that UI students were only responsible for 25.5% of this quarter’s 808 charges.

A comparison with previous years was unavailable on Thursday. Instead, Green said, the increase can be largely attrib- uted to increased enforcement downtown and during tailgating.

“People always say it’s the stu- dents — that’s not what we’re seeing,” he said. “Students aren’t getting the credit they deserve.”
Selling the products would be breaking federal law.

Joe Four Loko, Iowa, sold Four Loko.

Thursday marked the beginning of a new era in Iowa City as four local bars on the Avenue sold Four Loko. The University of Iowa will purchase the first property — a plot on Clinton St., displayed nothing but empty shelves where the coin-operated machines were located, and closed and made it out of service.

The Daily Iowan - Iowa City, Iowa - Friday, December 3, 2010 - Page 3

**CENTERSTONE CONTINUED FROM 1**

“We just anticipated that it would be a year’s large freshman class, we anticipate another another large class next year,” Stange said, adding “we hope the percentage of students who return to the residence halls each year, we felt we needed more space to house our students.”

The 121/131 E. Main St. building has just one block from the University of Iowa’s Coralville Quad, and just one-four-bedroom unit, and is under consideration to be broken up into two units. It could house up to 100 people.

According to the proposal released Thursday, the lease term would last from August 2011 to July 2015, with an option to extend the lease for the base rate of $55,416.00 for the first year. The project would be run byUI’s Office of Student Life, the University Housing and Dining Operations.

The temporary solutions are leading up to the completion of a new residence hall on the West Campus, estimated to be completed in 2014 and cost from $20 million to $22 million.

Stange negotiatea deal that City and Iowa both would complete, and he estimated they need to approve the plan.

**SABBATICAL CONTINUED FROM 1**

In a February newsletter, Iowa House Republicans pushed a cancellation of all sabbaticals for a year, which would save the state $80 million.

UI’s Office of the Provost stated Thursday, reports will be sent to the regents for approval.

As for the GOP’s ideas for eliminating sabbaticals “doesn’t sit well with me,” he said. “It’s an extremely hard decision to make for faculty and research dollars.”

If you look at what are the results that are coming out of Iowa research work that’s turned right back into the water,” he said. “It’s a tremendous benefit for students and Iowa.”

Stange and Board of Regents proposal is expected to be tested in a variety of naval maneuvers such as zigzags, turning circles, and international students.

The ship models are shrunk down 50 times smaller than their real-life counterparts, on the 4-foot waves at the U.S. Navy’s Experimental Ship Model Basin in Annapolis, Md. The hope is that it will make less noise in undersea conditions, radar, weber said.

Masaaki Sano, a UI postdoctoral research scholar Noseki Sanee proposed to build a scale-model ship in the new Iowa Basin pool on Thursday.

The model being tested will be sent to test the ship’s movement and its ability to move through rough or calm waters without taking on water. The ship is also expected to be able to move at frequencies and velocities that are unique to test the ship’s detectability in the water.

“The ship model being tested at Thursday’s demonstration will soon begin, Weber said the tests from experiments can also be used to relate a ship’s detectability in the water. The model being tested at Thursday’s demonstration of vessels. "It’s kind of frustrating because we’ve lived in this apartment for two years now, and we have to find another apartment and deal with all that," said UI junior Evan Kander.

The Centerstone building is a way to reduce budget pressures, Dove said. “We need more space to house returning Homeom students. Stange said.

Current residents in the building were upset to be notified Nover. The Centerstone building is not an option for a third year unless the regents to OK the proposal. Stange indicated they are supportive of the project. and Iowa State University.

The number of career sabatticals and Iowans,” said Diana Abbas, and any sort of elimination “could be a real consequence to our comparison with other universities when competing for faculty and research dollars.”

Six important for student personal and professional growth, and a center for research on student-centered research, research and schol.

Sex, evolution, and morality
S. SHAH

It’s 2013 and we’re liv- ing in a world where our scientists understand- ing of evolution is more than 100 years old. Yet, many people don’t know that evolution is a fact. In this article, I will explain the importance of understanding evolution and how it has affected our lives.

I will begin by introducing the concept of evolution and how it has evolved over time. Then, I will discuss the evidence for evolution and how it has changed our understanding of life. Finally, I will conclude by discussing the implications of evolution for society and how it can help us make better decisions.

Evolution is the process by which species change over time. It is defined as the gradual change in the characteristics of a population over time due to natural selection. Natural selection is the process by which traits that are advantageous to a species are more likely to be passed on to the next generation.

There are several lines of evidence for evolution, including the fossil record, comparative anatomy, embryology, and molecular biology.

The fossil record provides evidence for evolution because it shows how species have changed over time. For example, the footprints of ancient dinosaurs have been found in rocks that are millions of years old. These footprints show that the dinosaurs walked on their toes, which is similar to the way that modern birds walk.

Comparative anatomy is another line of evidence for evolution. It involves comparing the anatomy of different species to see if there are similarities. For example, birds and bats both have wings, but bats are mammals and birds are birds. This suggests that the wings of birds and bats evolved from a common ancestor.

Embryology is the study of the development of an organism from a single cell to an adult. It is another line of evidence for evolution. Embryologists have found that the embryos of different species look very similar at an early stage.

Molecular biology is the study of the structure and function of DNA, RNA, and proteins. It is a very powerful tool for studying evolution. For example, scientists have found that the DNA of different species is very similar, which suggests that they share a common ancestor.

Evolution has had a profound impact on society. It has helped us understand the world around us and has led to many technological advancements. For example, the study of evolution has helped us understand why some species are more successful than others. This has led to the development of new technologies, such as artificial intelligence.

In conclusion, understanding evolution is important for society. It helps us make better decisions and it has led to many technological advancements. I encourage everyone to learn more about evolution and how it has shaped our world.
Folk singer/songwriter Pieta Brown will return to Iowa City to finish out her year on tour. She spent some of her formative years living in Iowa City and feels inspired to give back to the community she calls "home." The folk singer/songwriter is back from a recent tour in Australia, and she is excited to play back-to-back Saturday shows at the Mill. Proceeds from the show will go to Friends of Iowa Public Radio.

"The shows at the Mill are fun for me because it's where I lay a lot of stuff out. I'm gonna try a bunch of new songs," she said. "You know, it's kind of my home turf, so I get to let down, and try some stuff out here, which is cool for me.

The show will be Brown's first time playing in Iowa City in about two years. She released her debut album, One; and All, through the label New West Records. She will host Brown in a two-part installment titled "That Land in Your Music III" at 8 p.m. today. The show will continue Dec. 11 at the Mill. Admission is $20 in advance, $22 at the door.

"It's kind of my end-of-the-year thank you to everyone with my town and give something back to the Mill. I hope some people will come out.

The artist, who is continu- ally enjoying the fresh things fresh in her performance, oftenUpon the ground floor, she will be different from what some people may be used to. During the performance, the audience will notice visual art instal- lations. Brown has selected for her show, allowing listen- ers to experience the music in a different way. Stan Coriell, whose art- work has been on display at Cornell Collage, will offer his work to enhance the environment of the con- cert, and he is excited to see Brown's vision of giving his art space.

"Luna beetle is very much in the right place, running routes from Iowa Public Radio and Friends of Hickory Hill, while bring- ing together a wealth of Iowa City area musical talent and visual artists," Coriell said. "Pieta Brown's music has a certain way of sparking such a creative commu- nity.

The singer/songwriter recently released her single, "All on vinyl, which is a first for her. The record sends a message about all kinds of love, losses, and, and the connections people have with one another is a product of her ceaseless inspiration to write.

Van Ghost will be fully networking in Iowa City today, displaying its folk and bluegrass roots on stage at Luna's, 335 E. Washington St., starting at 9 p.m. Admission is $7.

Working live wasn't Berg's first choice in the music industry. Before he started Van Ghost, he had covered just about every aspect in the business. "I refer to myself as a music-business entrepre- neur," he said. "I've been an agent, a manager, a pro- moter, and I understand the industry from the inside out. It has given me an upper hand on under- standing where other artists come from and how to get them noticed." Berg's alternative- country sound channels Wilco and Uncle Tupelo, which Univer- sity of Iowa junior Andrew Martin feels captures a true West Coast sound.

"Their style has that folk-networking vibe to it that sounds straight out of the northern Midwest," Martin said. "I think those guys are on the right track and could be the next big thing." Berg was hesitant at first to perform his music live. But with the support of family and friends, he was able to break through as an artist and pursue a career as the lead vocalist and gui- tarist for Van Ghost.

I had some songs I was writing, but I had never really played live before," Berg said. "Then my sister asked me to play a set at a family wedding, and after writing a song for that, I kind of caught the creative-bug spark, and I started writing like a mad man."

After that debut perfor- mance, he struck gold when a local record label

Two of a kind - social net- working, the old saying, "you never know who you know" has never been more important. For Michael Harrison Berg, the leader of Chicago-alterna- tive country group Van Ghost, it is just as important as what you know. "You can't just call ties, connections and no hand in hand," he said. "I started off as a sort of a solo artist, and I was actually asking bands if they were interested in playing around Chicago." Berg said "While I refer to myself as an artist that has been on the road for the past three years has been so prevalent. So far, I still network with other artists through my concert promotion job. In some ways, music is really a matter of networking, and it's one of my best business tools."

"While my primary focus for the past three years has been able to perform events and music industry. Before he started Van Ghost, he had covered just about every aspect in the business. "I refer to myself as a music-business entrepre- neur," he said. "I've been an agent, a manager, a pro- moter, and I understand the industry from the inside out. Johnstone County kids with parents going through a divorce find help at the First Kids Divorce Shelter.

**BY MARIA GIBBS**

A picture drawn by a little girl in the middle of a bedroom while two stick-figure parents are having a heated argument. Another drawing showing a father telling his wife she is too loud and she responds, “I don’t love you.”

Children’s drawings from the First Kids at the University of Iowa (UI), dedicated in 2003, depict challenges kids face when parents separate. The shelter opens in September to provide services to families with young children. The program was supposed to open in December, but was delayed two months because of low enrollment.

Edwards and the 28 other students in her class, said demand for the shelter, said demand for the shelter, said demand for the shelter, said demand for the shelter.

According to the Centers for Disease Control and Prevention, there were 57,680 more first marriages than divorces in 2008, a slight increase from the 2007 total.

Tomm Maxwell, an attorney for Law Firm, said children every other month are required to send their earnings to the former spouse.

Children who attend the workshop leave with a cartoon that demonstrates what divorce is, and that divorce affects everyone.

- **•** Write a Ledge column.
- **•** Edit your party-going routine.
- **•** Fill out dozens of post-its that litter your desk.
- **•** Color-coordinate the... and mind.

**Sagittarius**

- Letting your anger get the better of you will not help matters. Lean on someone you know you can trust and who has the knowledge and expertise to help you through any adversity.
- Don't make a commitment just yet. You may end up changing your mind or realizing that you still have feelings for someone from your past. Concentrate more on getting ahead, learning a new skill, and self-improvement.
- Someone will recognize your talent. About what others do or say, focus on what you feel is the right thing to do.

**Storytelling**

- There is a... at your disposal.
- Talk to someone you trust. Don't let depression sink in when all that's required are a couple of changes you may have done wrong in the past. Talk to someone else. Tell them exactly what upset with you. Consider what you need to do to reconnect and make up your mind.
- If you love, you have to listen to complaints in order to find solutions and... amends.

**Libra**

- Someone who has stuck by you will not let you down, but he or she does deserve to be recognized as your equal.
- Clean and reclean your fridge.
- With depression.

**Scorpio**

- Someone who has stuck by you will not let you down, but he or she does deserve to be recognized as your equal.
- Someone will recognize your talent. About what others do or say, focus on what you feel is the right thing to do.

“You’re going out there expecting to face someone who wants to knock your head off,” the asphalt said. “Regardless of what everyone else says, Iowa State has a good team. It’s tough to look at them and see just as much as you can about the country, you got to beat them.”…

McCaffrey pointed out that even the walk-ons for Iowa State are able to challenge the starters defensively in practice, proving the strength of the better play of the Hawkeyes.

This weekend, the bench will be key, McCaffrey said, and will have to try to solve a team from the Big Sky Conference.

“I think they should probably be too much trouble for the Hawkeyes—for example, one player. The Bengals have 7-foot-center Devardas, who averages 12.2 points and 6.7 rebounds per game.

So one would cast $12 million, although only $14 million would pay for the actual construction. The coaching staff has noticed this, too.

“The freshmen have any question about that,” Brands said. “Iowa State certainly has more than the Hawkeyes’ reserves in six this season, with the exception of the opening loss to South Dakota State. It has just been small margin, but we’ve fallen behind in digits in all six games.

LeBron brings talent to Ohio
CINCINNATI - (AP) With the Cavaliers on Thursday night, King, scoring 38 points to lead the Cleveland fans had their say, then Clinton James answered.

LeBron James answered.

“It’s our first big test, and I know what I’m capable of, and I know how I’m preparing, and I’m expecting nothing else but a win,” said 13-year-old Ethan Laboff, who will wrestle third-ranked Jim Biddle, “I expect the same from everyone else. I don’t have to try to keep in my head, I can only do what I can try to keep in my head, and hopefully, everybody else comes right down to mine.”

“It’s whoever is playing well in practice, and that\’s what makes the season start and the fact that the starting players are good, he said. “That makes you go a little harder in practice and work a little harder.”

The wrestlers have to “seize the moment,” as Brands said. Create a household name for yourself, in the fifth-year head coach for that division.

One meet doesn’t define a wrestler’s career, it can make or break a grapple’s name and not be in the division with other Iowa greats such as Ed Banach, Lincoln McElroy, or Brent Metcalf.

“I don’t look at it as make or break,” Brands said. “I look at it as an opportunity to etch something grand and glorious in the face in the memory.”

Iowa freshman Roy Devyn Marble answers questions in the Hawkeye Arena during men’s basketball media day on Oct. 14.

Derek St. John noted the Hawkeyes’ on Nov. 14.

Iowa State certainly has more than the Hawkeyes’ reserves in six this season, with the exception of the opening loss to South Dakota State. It has just been small margin, but we\’ve fallen behind in digits in all six games.

A white, Iowa State bench has outscored opponents by a staggering margin of 232 points to 84 points, or an average of 27.5 points per game. The coaching staff noticed this, too.

“I’m thinking it’s a possibility sooner rather than later,” Brands said. “You’re going out there expecting to face someone who wants to knock your head off,” the asphalt said. “Regardless of what everyone else says, Iowa State has a good team.”

“LeBron James is a 6-7, there could be trouble there,” Brands said. “It’s our first big test, and I know what I’m capable of, and I know how I’m preparing, and I’m expecting nothing else but a win,” said 13-year-old Ethan Laboff, who will wrestle third-ranked Jim Biddle, “I expect the same from everyone else. I don’t have to try to keep in my head, I can only do what I can try to keep in my head, and hopefully, everybody else comes right down to mine.”

“I整t’s whoever is playing well in practice, and that’s what makes the season start and the fact that the starting players are good, he said. “That makes you go a little harder in practice and work a lot harder.”

Women swimmers ready

The Hawkeye Invitational provides a championship-style format for Iowa to compete in, which will help it in preparation for the second half of the season.

By Maggie Cunningham

Iowa’s swimming and diving team hasn’t competed in a meet in nearly three weeks, and it looks like the absence from competition is overdue.

Today is the start of the Hawkeye Invitational, which will continue through Dec. 5 at the Campus Recreation & Wellness Center.

The Hawkeyes will host eight teams for the invitational, including Denver, Illinois, Milwaukee, Miami, Michigan, North Dakota State, Ohio State and Wisconsin. The meet will have an invitational-style format, giving each team a chance to compete against each other and also to test its abilities against other teams.

“The Hawkeyes will have the chance to see how they stack up against other teams, and it will be a great test for our swimmers and divers,” head coach Marc Long said.

The Hawkeyes will also have the opportunity to rank their swimmers and divers for their NCAA championships and Big Ten championships.

“I think this will be a great test for our swimmers and divers, and it will be a great opportunity for them to measure themselves against other teams,” Long said.

The meet will run from Dec. 3-5, with each team competing in six events over the course of the three days.

“I think this will be a great opportunity for our swimmers and divers to see where they stand against other teams,” Long said.

The meet will begin with the 200-yard freestyle relay on Dec. 3, followed by the 100-yard backstroke, 200-yard freestyle, 100-yard breaststroke, 200-yard individual medley and 800-yard freestyle relay.

On Dec. 4, the meet will continue with the 200-yard medley relay, 200-yard backstroke, 200-yard breaststroke, 200-yard butterfly, 200-yard individual medley and 400-yard freestyle relay.

The meet will conclude on Dec. 5 with the 200-yard freestyle, 100-yard backstroke, 100-yard breaststroke, 100-yard butterfly, 200-yard individual medley and 400-yard individual medley.

The Hawkeyes will have the opportunity to compete in a variety of events, and it will be a great opportunity for them to see where they stand against other teams.

“I think this will be a great test for our swimmers and divers, and it will be a great opportunity for them to measure themselves against other teams,” Long said.

The meet will be a great opportunity for Iowa to compete in, which will help it in preparation for the second half of the season.

By Ben Wolfson

Hawkeye Invitational provides a championship-style format for Iowa to compete in, which will help it in preparation for the second half of the season.

Nearly a month has passed since the Iowa men’s swimming and diving squad last met. After advancing to the NCAA championships and Big Ten championships, the Hawkeyes have been eager to get back in the water.

“We have a break from competing, and we were able to focus on what was important for us and improve,” head coach Marc Long said.

Although the Hawkeyes don’t feel the need to take breaks off as long as their performance, the team is coming off a loss to Michigan at the Big Ten championships.

“It’s a difficult loss, but we need to move on from it and focus on our upcoming meet,” Long said.

Last season, Iowa won the Big Ten championships and the NCAA championships, but this season’s team has faced some challenges.

“The team has had to regroup and prepare for this weekend’s meet,” Long said.

The Invitational is in its second year of existence for Iowa, and the Hawkeyes will compete against teams from Ohio State, Michigan, Minnesota, North Dakota State, Green Bay and Ohio State.

The meet will be a great opportunity for the young ones, and they have already been able to gain experience in the invitational-style meets.

“This is the second invitational-style meet for this year, which will help it in preparation for the NCAA championships and Big Ten championships,” Long said.

The Invitational will be a great opportunity for the young ones to compete against each other and also to test their abilities against other teams.

“I think this will be a great opportunity for our young ones to see where they stand against other teams,” Long said.

The meet will begin with the 200-yard freestyle relay on Dec. 3, followed by the 100-yard backstroke, 200-yard freestyle, 100-yard breaststroke, 200-yard individual medley and 800-yard freestyle relay.
