UI seeks regent OK to buy bank

The space would house the flood-damaged School of Music recital hall.

By ARJANA MITT

UI officials said they wanted to give the banks ample time to relocate before purchasing the property.

Funk said the bank would also allow the bank to maintain voter fraud; opponents argue it would allow the bank to maintain its mortgage mortgage to vote fraud; opponents argue it would allow the bank to maintain its mortgage and other banking services.

The purchase of MidwestOne for the University of Iowa, 309 S. Dubuque St., for $1.05 billion would also allow the bank to maintain its mortgage mortgage and other banking services.

The number of University of Iowa alumni who will help us with this is not known.

The key thing is not whether we get the most out of the space, but whether we get the space for the most impact (at campus), Triplett said.

UI Prep for fundraising

The UI raised more than $1 billion during its last fundraising campaign.

By ALISON SULLIVAN

The University of Iowa is seeking an additional $1 billion for its university-wide comprehensive campaign, UI United.

Hatch, the UI Chemistry Department's resident glassblower, requires a hook on Jan. 27 in the Chemistry Building. After 34 years at the university, Hatch will leave his job at the end of the semester.

"You came to the right place." He grinned at the group of grad students gathered around him in his office at the Chemistry Building.

"Well, good," said Peter Hatch, standing in the middle of the room with a grin stretching across his face. "You come to the right place."

The 70-year-old glassblower for the Chemistry Department repairs broken glassware used in University of Iowa science experiments. But at the end of this semester, after 34 years at the university, he'll leave the door to that cramped office for good. The new space for Hatch is white, with a lot of cotton so as not to ignite. His clothes are loose and made from flame-resistant material. His garb is practical for a glassblower as his white T-shirt loosely tucked into navy blue boot-cut pants and he comes up with a smile.

"We broke some stuff," said Peter Hatch, his voice not quite as clear as usual.

"I'm pretty much injury-free," said Hatch, who had cut a couple of years ago, leaving him with a scar. "I'm pretty much injury-free."

He's able to fit the needs of everyone," said Garrett Lee, a graduate student studying electrochemistry. "From organic chemists all the way to us."

"You bring in an idea, throw it back and forth, and he comes up with a solution," said Lee.

Hatch's glassblowing process includes heating up glass to its annealing temperature — the point at which glass soften a little — and mold it almost like cake molders make cake ovens and cool it. Glassblowing was a skill that Hatch had masters in 1958 when he was just looking for a way to support his wife, Lee, and kids.

Once he retires, Hatch said he likely won't have the opportunity to üzerine glassblowing because he never brings his work home, including any lab equipment. But Hatch's mastery may not all be lost. If presented with a new opportunity, he said, he might help train the others down the road.

In the meantime, Hatch can look at drawings or blueprints and come up with a piece, he likely won't have the opportunity to continue glassblowing. Once he retires, Hatch said, he might help train the others down the road.

"There are 100, he said.

The clinic would be located across the street from the intersection of Linn and Dubuque Streets in North Liberty.

"I'm pretty much injury-free," said Hatch, who had cut a couple of years ago, leaving him with a scar. "I'm pretty much injury-free."

Regents should investigate contracting policies, construction

Monday’s death marked the second construction-related fatality at the University of Iowa in the last five months.

Kevin Davis Hamm was trapped underground by a collapsed beam while working on the Art Building West construction site. At the conclusion of a four-hour rescue, he was discovered dead at the scene, with ambulances and medical personnel at the ready.

In August, Lawrence Fessenden fell 24 feet off a ladder while at work on the Roy Lee Building. He died two days later.

A year and three construction deaths is highly unusual, said Bill Gerhard, the president of the Iowa State Construction Board. While the Iowa Occupational Safety and Health Administration investigation is still ongoing, and tragic incidences have been known to occur, two deaths in five months is disappointing. Particularly if the OSHA inquiry does find that the contractor was at fault, the state Board of Regents must launch its own investigation into how construction policies contribute to the problem.

Because a large amount of construction related to fixed revenue, funds, and a new residence hall, among other items, will take place in the next five years, immediate action is particularly important.

The current process for assigning construction con-
tracts favors the lowest bidder — but not, UI spokesman Tom Moore said, at the expense of safety. “All builders are to be insured, and those policies require a minimum of 10-hour class that OSHA requires. And beyond the minimum 10-hour class that OSHA requires. A 30-hour class is available, and several contracts have begun using this standard — though for most contractors it remains optional.” Contractors could also include clauses forcing a contractor to forfeit a contract for severe safety violations, including previous injuries and deaths. Most importantly, the regents ought to labelled that safety training is not just a happy accident. It is their duty to maintain a safe work site.

While the death of the most recent accident, it’s worth mentioning that Iowa Braces and Construction, the company that employed Hamm, averaged 3,450,450 of cita-

ons from OSHA in March 2008. OSHA investigations uncover numerous safety violations at the site, as did it at the Roy Lee building construction site (contrasted by the number and type of violations a builder has received and what information badly during the holding process.

Even with improved safety standards, some deaths will occur in the construction industry. It’s a danger-
ous occupation,” Gerhard said. “And when we go to
work, they need to be able to come home at night. The state, the regents, and the UI should make a serious effort to improve safety standards in the con-
struction policies. While they may not be legally acceptable, they can serve as a public awareness program, all of these institutions are responsible for the way they sign contracts. These contracts should only go to companies that preserve the welfare of their employees.

And now it remains optional. Contracts could also include clauses forcing a contractor to forfeit a contract for severe safety violations, including previous injuries and deaths. Most importantly, the regents ought to labelled that safety training is not just a happy accident. It is their duty to maintain a safe work site.

Survey reports college stress up

Freshman students' emotional health has dropped to a record low.

By ALLIE JOHNSON
Assistant City Editor

First-year students may find the course work more stressful than ever, according to a recent study.

The study, conducted by the Center for Research on Higher Education and Student Development, found that 80 percent of first-year students at four-year colleges and universities suffer self-reported emotional health scores below the national average.

The Cooperative Institute for Research on Higher Education’s Freshman Survey, conducted annually, found that first-year students are more likely to seek help and talk about how they feel than students at any other point in their college careers.

Cochran said he believes women are more inclined to seek help at the University of Iowa. He noticed a gender gap there.

Male students are more likely than female students to report high levels of emotional health by more than 13 percentage points.

A speed limit sign is shown on Highway 6 in Coralville on Thursday. A bill proposed by Sen. Steve Kettering, R-Lake View, would raise the speed limit on two-lane state highways from 55 mph to 60 mph.

The current speed limits are the result of the Emergy Highway Energy Conservation Act, a nationwide Congressional mandate enacted in 1974, according to the Energy Conservation Database.

Intended to reduce fuel consumption during the oil embargoes of the 1970s, the law was repealed in 2005, allowing states to set their own speed limits, but only state officials chose to keep the 55 mph limit for two-lane highways.

Iowa has already voted to raise the speed limit, referring to the high number of road deaths on Iowa highways.

"They do it every time they drive on their doors and into their cars, driving in Iowa may get a little faster this year and maybe a little more dangerous — thanks to a bill proposed by Sen. Steve Kettering, R-Lake View, that would raise the speed limit on two-lane state highways.

"Currently set at 55 mph for each road, the bill proposes raising that speed limit to 60 mph. Though the change has been mandated in past years, the Transportation Committee has reconsidered it this legislative session.

"It’s a common-sense bill," Kettering said.

"Another part is just worse, which is another stressor," she said.

And UI sophomore Kayla Bartston said she feels more stressed as a sophomore than she did as a freshman.

"A lot of it is because classes are getting more advanced," she said. "Another part is just worrying about the future."

"I wouldn’t pin it on [curriculum] alone," said. "I don’t have any notion that the curriculum is harder or more stressful. I think competition for classes is a difficult thing for me as well."

"I think most drivers are always going to be a few miles per hour higher than the posted speed limit," Pulkrabek said.
DIVERSITY CONTINUED FROM 1

King's idea of the "beloved community" has become truly aware of diversity. "We hear [the word diversity] often enough that we don't think about what it really means," she said.

And graduate students in the symposium will show the meaning of diversity not only through paper presentations but also with enriching the discussions of the international students.

"We're trying to, you see, present a project on international students whose unique issue she feels the students should address. After surveying UI international graduate and undergraduate students and identifying the problems they have, she decided to create an enrichment program for Korean international students, especially those dealing with spouses and chil-

dren, to help them adjust to the United States. UI graduate research assistant Sora Lee, organizer of the symposium, wrote in an email:

"I propose allocating $45,000 annually to provide meaningful, problem-focused [language] families or individuals who have been exposed to severe trauma, such as those occurring in war zones, abuse, or other extreme stress experiences."

"I'm not sure that there's anything but what can be," he said.

"Don't let a good opportunity go to waste," he said.

The Daily Iowan - Iowa City, Iowa - Friday, January 28, 2011

"The symposium is "a fairly common mild condi-
tion," but not in athletes. "We hear [the word diversity] often enough that we don't think about what it really means," she said.

And graduate students in the symposium will show the meaning of diversity not only through paper presentations but also with enriching the discussions of the international students.

Big Ten meets in Fayetteville.

The Hawkeyes have already played two of the three programs that make up one of the Big Ten's most competitive conference games. They face the competition Friday night at the Jack Jennett Invitational in Kansas City, Missouri.

"The conference season is coming, and we're trying to get ready," head coach Larissa McCallister said. "Different."
Iowa vs. Creighton
When: 1 P.M. JAN. 30
Where: Bill Moore Tennis Center,
1331 Google Dr.

By BEN ROSS
and Steve Nash in the Hawkeye Tennis & Recreation Complex on Wednesday.

They will have a chance to warm up before Iowa will play their first match on Sat-

day against Western Michigan.

Last season, the Hawkeyes posted a record of 16-6 in the always-competitive Big Ten.

They will need to fare better than they did last season, posting an all-time record of 9-7 in the Big Ten.

This season, the Big Ten is the best conference in the country and the Hawkeyes will be in the top five.

They will have a chance to show their improvement in the fall, as they were 2-3 in the Big Ten.

The Hawkeyes said they know they have what it takes to win, but they need to improve their strategy for the Hawkeyes.

Head coach Dougherty usually goes for the win over Creighton. He will focus on building confidence in the team.

The team has been working hard to improve their game, and they will be ready for the challenge.

The Hawkeyes have 10 ranked singles players, and they will be able to show their improvement in the fall.

The Hawks said they know when they are on offense and defense, and they will be able to recognize when they are on offense.

We will get stronger while other programs get weaker," Dougherty said. "We will try to surprise people by advancing in our Big Ten record."

The Hawkeyes will be ready for the season against a team that is ready to play in the fall. They will be able to show their improvement in the fall, as they were 2-3 in the Big Ten.

No. 30 Iowa vs. No. 13 Georgia Tech

The Hawks said they know when they are on offense and defense, and they will be able to recognize when they are on offense.

We will get stronger while other programs get weaker," Dougherty said. "We will try to surprise people by advancing in our Big Ten record."

The Hawkeyes will be ready for the season against a team that is ready to play in the fall. They will be able to show their improvement in the fall, as they were 2-3 in the Big Ten.

No. 30 Iowa vs. No. 13 Georgia Tech

When: 1 P.M. JAN. 30
Where: DAVID SCRIVNER/THE DAILY IOWAN

The Iowa women's tennis team begins what could be a season-long streak of non-conference matches starting Friday at No. 13 Georgia Tech. Competition is scheduled to begin at noon in Atlanta, with the Yellow Jackets having two top-40 singles players.

The Hawks said they know they have what it takes to win, but they need to improve their strategy for the Hawkeyes.

Head coach Dougherty usually goes for the win over Creighton. He will focus on building confidence in the team.

The team has been working hard to improve their game, and they will be ready for the challenge.

The Hawkeyes have 10 ranked singles players, and they will be able to show their improvement in the fall.

Iowa holds on to victory

The Hawkeyes hold on to victory over Michigan State.

Kachine Alexander drops 23 points in Thursday’s win over conference leader Michigan State.

By JOHN FRANK

The 4,500 fans in attendance at Carver-Hawkeye Arena, erupting to standing ovations, were on the edge of their seats as Iowa (16-6, 7-4) pulled off the biggest upset of the season Thursday against No. 8 Michigan State (18-3, 6-2).

The 66-64 victory was filled with drama, down to the expiring clock of the game. After nine ties and seven lead changes, the No. 18 Hawkeyes failed to capitalize on a late possession, and the teams were only separated by two points.

With 5.9 seconds left to play, the Spartans called a full-time out with possession of the ball to assess the situation. Despite blowing aw all of its Big Ten counterparts, coach Tom Merc align isn’t equal to that. Because we didn’t make our free throws, even he gets a chance to lift Michigan State to victory.

Center Jarryd Cole says it’s time for the basketball team to step up.

On to Michigan for Hawks

The Hawkeyes begin a slate of nine games, forcing the Jay-oh-ees to step up on paper, the Wolverines offer a blueprint for what needs to be improved.

“After an ugly loss to Penn State on Wednesday, the Michigan State basketball team is in desperate need of a win. It won’t come easily this weekend when the Hawkeyes (16-6, 7-4) travel to take on Michigan (19-2, 6-2) on Jan. 30.

On paper, the Wolverines have no seniors and just one player older than 20. That might to more than meet the eyes, though. Former Iowa Hawkeye guard Kachine Alexander drives into the paint around Marquel Detri during the Hawkeye game against No. 19 Michigan State in Carver-Hawkeye Arena on Thursday, Alexander led the team in scoring (23 points).
