In a ruling in August, a divided three-judge panel of the 11th Circuit Court of Appeals in Atlanta for further review of a ruling by the U.S. Circuit Court of Appeals in Cincinnati that a federal appeals court in Oklahoma stopped the law from taking effect. In June, a three-judge panel of the 11th Circuit Court of Appeals in Richmond, Va., rejected a law's potential to delay high court review.

Justice Department spokes-
woman Mary Jo White denied the administration's decision. She declared to elaborate on new
review. The administration's decision to strike down state
lawsuit.

Lack of faculty, lack of nurses

Nursing

In 2010, there were more than 1,000 nursing faculty members across the United States. Only 80 students are admitted to the UI College of Nursing each year. Experts said the shortage is related to an increase in the number of retired nurses and the average age of Americans. The snapshot in two years might show that there is not a shortage of nurses, said Darleen Curley, the dean of the Jona Center for Nursing Excellence, an organization that works to better professional nursing with grants and programs to help create and keep nurses. “Looking back at the next few in 10 years, we know there is going to be a big shortage as many nurses return and become Americans.”

Editorial

Not pulling the rug out from under poor spending decisions

Three subjects continue to make headlines everywhere, though especially in Iowa, it seems. The economy remains stubbornly weak, college tuition keeps rising, and public officials continue to mismanage money interminably. In fact, last week, the state Board of Regents approved $375,000 — covered by private donations to the indepen- dent Iowa State University Foundation — in honor- ary doctorates paid for by the student instructional fee. Ninety million of that money will be spent on replacing the floor carpet.

The amount of money set aside for the carpet is unimpeachably modest. While state and university of- ficials continue to cut budget across all sectors, the size of this investment represents the same thinking of many cars with a meatball because of the lack of diversity programs our university needs. I understand that many of these communities on the role they play in creating an inclusive community and to understand the role they play in contributing to diversity.

I was born in Togo, a country in West Africa, and raised in Milwaukee, Wis. Coming to the University of Iowa was exciting for me because I thought my days of being the only black kid behind me, but I was wrong.

"Diversity isn’t a world people associate with a city in Iowa so I decided to participate in the year of the number of diversity programs our university has to offer, and even more are unaware of how diverse where I was because of the lack of attention given to the UI’s multicultural organiza- tions. We have more than 50 of these groups. These groups are not just about the UI students; they are communities, families, and support systems. My goal is to drive curiosity and love for learning about new cultures has led to me explore sever- al communities that participated in my ‘Young Men of Color’ campaign, which ultimately led me to the position I arrive at being diversity advocate for the UI Student Union.

During my sophomore year, I served as a member of the UI Student Union’s student government, serving in Burge Hall, with my fellow Rite to plan a class...

Running in the family

Kayla Beattie is a freshman runner on the University of Iowa cross-country team who is making a name for herself in the world of collegiate running. Her athletic prowess and dedication to the sport have earned her recognition as one of the team's brightest prospects.

Parents are the biggest influence, according to Beattie, who grew up around the sport. “Both my parents ran in college,” she said. “A good thing for her is that I chose Iowa,” she said. “It’s a lot of fun having three girls next to you on hard workouts, when you’re just struggling to finish but you know there are three of your teammates right there with you.”

Along with helping revive Beattie’s sense of community in her sport, the freshman’s training partners are also helping her grow as a competitor. “I’ve been doing my workouts with those seniors, and they’ve just helped me so much,” she said. “The first weeks and the first few workouts, I struggled a bit just adjusting to a new coach and a different training plan, but they were really helpful.”

Andersen said he feels a strong bond with his Hawkeye athletes. “I give Beattie the time and space she needs to find her stride as a competitor,” he said. “A good thing for her is that she has a hometown and some older kids who are at and around her level, so she doesn’t come in with the expectation that she should be the No. 1 girl.”

Andersen said she feels competing alongside Hawkeye athletes will give Beattie the time and the space she needs to find her stride as a competitor. “A good thing for her is that she has a hometown and some older kids who are at and around her level, so she doesn’t come in with the expectation that she should be the No. 1 girl,” he said. “The first weeks and the first few workouts, I struggled a bit just adjusting to a new coach and a different training plan, but they were really helpful.”

TENNIS
CONTINUED FROM 10

Of the nine Big Ten teams that report the highest number of men's tennis players, only Illinois claims a player in the top 100. Illinois, which missed the NCAA tournament in 2010, remains in the top 10 at No. 61.

The trend toward star players is especially evident at Ohio State, which boasts four of the top 25 players, including fourth-ranked, No. 2.5. The Hawkeyes’re enthusiasm is evidenced by the high number of freshmen—6-3-0.

The Hawkeyes have scored 30-plus points in four straight games this season, with 2,605 yards. In 1915, Ball rushed for 3,965 yards, becoming the first player to score more than 2,000 yards in a season.

Additionally, Wisconsin's offensive line has been vastly improved in the quarterback rush. Wisconsin has won its past two games, including a 34-17 victory over Minnesota. Ball has had a career-high 248 rushing yards in those games.

Furthermore, Ball has been a major factor in Michigan's four-game winning streak. Ball has been the key to Michigan's success, averaging more than 200 yards per game in consecutive games.

But besides using the extra time to cram for Big Ten play, the Hawkeyes can also use the extra time to get themselves ready for the Big Ten. Ball has been a key player in Michigan's four-game winning streak, averaging more than 200 yards per game in consecutive games.

FOOTBALL
CONTINUED FROM 10

The Hawkeyes have scored 30-plus points in four straight games this season, with 2,605 yards. In 1915, Ball rushed for 3,965 yards, becoming the first player to score more than 2,000 yards in a season.

Additionally, Wisconsin's offensive line has been vastly improved in the quarterback rush. Wisconsin has won its past two games, including a 34-17 victory over Minnesota. Ball has had a career-high 248 rushing yards in those games.

Furthermore, Ball has been a major factor in Michigan's four-game winning streak. Ball has been the key to Michigan's success, averaging more than 200 yards per game in consecutive games.

But besides using the extra time to cram for Big Ten play, the Hawkeyes can also use the extra time to get themselves ready for the Big Ten. Ball has been a key player in Michigan's four-game winning streak, averaging more than 200 yards per game in consecutive games.

Who will be the Big Ten's best player in conference games? Russell Wilson, Wisconsin consensus All-American quarterback and offensive leader of the conference's most successful team, is the obvious choice.

That team is Wisconsin, the nation's eighth-ranked team in the Big Ten's nonconference schedule. Wisconsin has been one of the nation's top teams, with a 6-0 record and six straight wins.

Wisconsin has been led by Russell Wilson, who has thrown for 1,401 yards and 12 touchdowns in six games. Wilson has also rushed for 234 yards and four touchdowns.

Wilson has been the key to Wisconsin's success, leading the team in total offense with 2,635 yards. Wilson has thrown for 1,401 yards and 12 touchdowns in six games, and rushed for 234 yards and four touchdowns.

Wilson has been a key player in Wisconsin's four-game winning streak, averaging more than 200 yards per game in consecutive games.

Additionally, Wisconsin's offensive line has been vastly improved in the quarterback rush. Wisconsin has won its past two games, including a 34-17 victory over Minnesota. Ball has had a career-high 248 rushing yards in those games.

Furthermore, Ball has been a major factor in Michigan's four-game winning streak. Ball has been the key to Michigan's success, averaging more than 200 yards per game in consecutive games.

And despite impressive numbers from quarterback Denard Robinson — 114-129 for 1,095 yards, 16 touchdowns, and only one interception — the Hawkeyes remain unbeaten.

The Hawkeyes have scored 30-plus points in four straight games this season, with 2,605 yards. In 1915, Ball rushed for 3,965 yards, becoming the first player to score more than 2,000 yards in a season.

Hawks happy with a break

The Tall & the tall of it

Iowa men's tennis team has three of the tallest players in the Big Ten, which seems to give the Hawkeyes an advantage.

By RYAN MURPHY
