Couple gives $5 million to UI

Two University of Iowa alumni have given the school $5 million to support academics and football. The university announced on Monday, Curt and Carol Lane are natives of Atlantic, Iowa, currently living in Omaha. Their gift will be separated into three categories. The Lanes will donate $1 million for scholarships for the Hawkeyes. The remaining $2 million of the gift will be used to support the university's football scholarship fund, in honor of the Lanes' son who in 2009 and January 2010, they died in a car accident.

PROFESSORS: Jim Jackson and Colby Glassing stress the importance of preparedness and education in the Medical Education & Research Facility to speak to a crowd of more than 250 about investing in brain research. Gingrich came to the University of Iowa’s Medical Education & Research Facility to speak to a crowd of more than 250 about investing in brain research.

The UI senior is the president of the UI Engineers Without Borders, a group that aids people in developing nations.

By ASHKA ELWATI

University of Iowa senior Luke Smith is an engineering major who spends most of his time in the lab in the Seamans Center, as seen on Tuesday. Smith is the president of the UI Engineers Without Borders, an international program allowing engineers to implement design in developing nations.

“Luke has family significantly influenced his heart to always encourage volunteer work,” said his mother Janet.

“My parents implement these values. We would do trips in the U.S. when we went to an Indian reservation and helped build a storage center. We went to the Appalachians and helped build homes there,” said Smith.

“For Thanksgiving, we always served food to those in need,” said Smith.

“One Christmas they gave us $20 and said, ‘Now you can help someone else.’”

In the 1990s, Smith’s older sister was diagnosed with a rare kidney disorder called Alport syndrome. Finally, parents — UI art academic adviser Lynn Lonning and endocrinology professor Richard Smith — founded the Rodale organization in 1997.

“Nobody in City knows anybody else with this disease, and yet the Iowa City community has embraced us on developing a cure and a treatment for this disease and partnered with us all the way since 1997,” Richard Smith said.

When offered a breath test again, Matiyabo blew .046.

GINGRICH CONTINUED FROM 1A

and the regent universities will have to provide more proof that there is a need for more state appropriations. Is this an unfair call? How much proof have universities given state lawmakers? Mason: No I think they are absolutely entitled to and should be asking those kinds of questions. We’re happy to give them any and all information that they that they have to have. I do hope that we can demonstrate that we are worthy of such. Despite the fact that we continue to grow and we are a healthy institution, at least on the academic side and the GEP side of things, we haven’t seen that part of the institution grow at all for the last several years. It would be great if they would look at us carefully, appreciate the fact that we have the regents and university board. I think it’s the UI’s turn to recommend students for their system. And we can be even stronger, even better and continue to provide high quality education students have to come to appreciate and we are proud to deliver.

I think we have done a pretty good job with the state fiscal committee when it visited here last month, showing (the members) some of the details and the data on efficiencies that we have realized during the budget downturn, the way we are managing operations, cutting down on administrative costs to make sure that we continue to have the lowest administrative cost among our peers, and making strategic investments in what students need to get the best education we can possibly offer them.

So we’ll continue to do that. We’ll continue to answer any questions they might have about how we spend our money and how we spend our time. I hope that in the end, they will see that in fact we are a bargain, especially for students in Iowa.

DI: Looking back at the recent Virginia Tech alert, which had a faster alert time, has the UI ever considered other programs?

Mason: I will be very interested in having our folks look at Virginia Tech’s system, because it seemed to work very quickly and very efficiently and making sure that if that’s a good choice for us, let’s look at it seriously and let’s make sure that we can see what the pros and cons are going to forward of maybe changing our system to be more like their system.

DI: In the past, UI/UG students have advocated for an undergraduate position on the Board of Regents, have you heard and further commentary on the subject and what benefits would that bring?

Mason: I believe when Gov. [Chet] Smith’s term is up I think it’s the UI’s turn to recommend students for serving on the Board of Regents, so at some point in the not too distant future we may have the opportunity to place a student on the board.

A letter to Professor Stephen Bloom

Dear Professor Bloom,

My name is Alex Johnson. I am the President of the UI School of Journalism and Media Communication, and Iowaire student resident since my birth in 1995. I am writing to find out if there is a way to reply to your slanted favor. Furthermore, you greatly value in mind that I have taught your jour- nalism students, so it recruits a material. They will be chosen for print publication when they are deemed to be well-written and to forward public discussion. R

I am writing to you because I am biased and in love with Iowa. I do think it’s a great place, and I am strongly about journalistic integrity, which your article completely lacks. You even give the values in mind that I am going to be very careful in discussing your article. I believe you have more to offer than the sources of De Moos and Cedar Rapids, ignoring their trustworthiness and represented by the metropolitan areas. I am a great appreciative-journalist who have tried to be provide both figures, so as to not point out the numbers in your slanted favor. Further, I believe that the great generalize the apparatus. The suburb is a kind of backbone of the month.Iowa. They are also just as important, as well. When the suburb comes to your Iowa, there must be a great decrease, you do not show employment numbers, and you use your own “quotes” that are representativ- es of the population of the suburb. Such ideas like the smell of your black shoes.

Learning leadership

Inani

Inani initiated the first competitive Bollywood fusion team in the state of Iowa.

By KRISTEN EAST

Inani has tried hard every year to make Iowa City come alive. After graduating this month, Inani said her next big project as an entrepreneur will be starting her own business. “I want to kind of learn how to combine what I love with the business side,” she said. “I love food, I love music. So why not combine the two?”

But being adventurous with her taste in fusion food was not Inani’s biggest accomplishment during her four years at the University of Iowa.

Inani, 22, is a senior double majoring in economics and international studies and a double minor in women’s, gender, and sexuality studies — said holding two leadership positions was the most fulfilling part of her college experience.

These two leadership roles involved coordinating a Bollywood dance team as chief justice of the U.S. Student Judicial Court. Inani, a UI student organization Inani started during her freshman year, was the first competitive Bollywood fusion team to form in the state of Iowa.

The dance team included 10 members of Indian and Bollywood background.

“[Bollywood dancing] is something I just fell in love with. I was very young at family functions. If there are a few things non-competitive, we hope to have it doing just routine going on and compete as well in the future,” Inani said.

The team went on to compete in two competitions during its first year, performing at many events, including Dance Marathon and Relay for Life.

“Starting Anandi has been the most professionally fulfilling thing I’ve done in my college career,” she said. “It’s kind of my baby.”

She added that she is looking forward to the future because “it’s something I hope to come

We met a lady who was making some people feel that simply aren’t true and this was a great way to help them feel better about the issue of health. I have never seen any evidence of the idea that masturbation during the day or drinking less water before bed helps to decrease fluids before bed. What I do know is that they are interested in the idea that they can improve their health by doing these things.”

Graduating senior Tanvi inani has served as chief justice of the U.S. Student Judicial Court since she was a junior. Inani also headed the first Bollywood fusion team in the state. (The Daily Iowan/Adam Wesley)

Lisa Bluder’s team.
“I know there was just one true center on the team last year,” she said. “It’s more this year than we did last year,” she said. “It’s really a two-day trip.”
She said head coach Kirk Ferentz and the football team will arrive in Arizona seven days before the game to prepare.
“They go there and they prepare; the coach
likes to prepare them just as they prepare for any other game,” Mason said. “So they’ve a working set of activities they all participate in, in prepa-
rations for every game.” (Ferentz) puts them through that same rou-
tine.
Last year’s savings are proof of what the school can accomplish this year, according to Bluder.
“We’d like to obviously have our best games to date,” she said.
Johnson helped ease the transition from prep basketball to Divi-
sion-I.
Both have said Morgan Johnson helped ease their transitions from prep basketball to Divi-
sion-I.
“Morgan Johnson has been really helpful,” Doolittle said. “I think this was a cat-
ylyst for the rest of the season,” Doolittle said.
They have that time around the freshness of Doolittle and Virginia Johnson.
“I think this is a catalyst for the rest of the season,” Doolittle said.

Hawkeye freshman Annemie Smith practices throwing the hammer on Nov. 15 at the Cretzmeyer Track.

Smith, a native of George, South Africa, has a realistic chance to represent her country in upcoming events.

For more news...

The sport has become popular, "I like to listen to music, it's very nice," Smith said.

"If you have more news, I encourage you to look into the Internet to find videos on YouTube. She took to the Internet to find videos on hammer throwing," Smith said.

"I like to listen to music, it's very nice," Smith said.

For me to learn when I see someone doing it," she said. "It's easier when you actually prefer teaching yourself."

For Smith, though, the obsession originates at a more aesthetic level. "I think of a dancer or a ballerina." Smith said.

The Internet has helped people discover hammer throwing," he said.

"You're picking up this hunk of metal and hurling it almost the distance of a football,... with the grace of a dancer or a ballerina," Smith said. For Smith, though, the obsession originated at a more aesthetic level.

Hammering home the lessons

By JAN MARTIN

Iowa athletics officials always look at ways to save money and spend efficiently. This year’s $1.8 million payout is identical to last year’s and Iowa Assistant Athletics Director Richard Klatt said, as is the strategy.

The plan is always to be as efficient with the resources as we possibly can,” he said. “We’ll do all that’s necessary to provide the team the best chance of victory as possible.”

Iowa sent 651 people to Tempe, Ariz., for the 2010 Insight Bowl, according to an open-records request The Daily Iowan obtained last year. That number includes 131 football players, 254 band members, and 31 cheerleaders.

The freshman’s steps also seem forceful in contrast to the apparent daintiness of the 240-pound men throwing beside her. And then, there’s her neck.

“The first thing that moves [when I start my throw] is my head,” Smith said. “I’m not supposed to do that. Coach even made a joke that he’s going to bring a neck brace to practice.”

Smith’s throws feel coarse compared with the others three Hawkeye tossing that day, but her hammer is going nearly as far as those of the two men in the rotation — although they use a heavier weight.

In spite of the technical shortcomings, though, she could become Iowa’s best hammer thrower ever. And in a sport with little recognition, a competitor from a country with little history in the sport has the potential to be the next big thrower in the Big Ten.

The plan is always to be as efficient with the resources as we possibly can,” he said. “We’ll do all that’s necessary to provide the team the best chance of victory as possible.”

Iowa sent 651 people to Tempe, Ariz., for the 2010 Insight Bowl, according to an open-records request The Daily Iowan obtained last year. That number includes 131 football players, 254 band members, and 31 cheerleaders.

The freshman’s steps also seem forceful in contrast to the apparent daintiness of the 240-pound men throwing beside her. And then, there’s her neck.

“The first thing that moves [when I start my throw] is my head,” Smith said. “I’m not supposed to do that. Coach even made a joke that he’s going to bring a neck brace to practice.”

Smith’s throws feel coarse compared with the others three Hawkeye tossing that day, but her hammer is going nearly as far as those of the two men in the rotation — although they use a heavier weight.

In spite of the technical shortcomings, though, she could become Iowa’s best hammer thrower ever. And in a sport with little recognition, a competitor from a country with little history in the sport has the potential to be the next big thrower in the Big Ten.

By JORDYN REILAND

Iowa athletic officials said the department always looks at ways to save money and spend efficiently. This year’s $1.8 million payout is identical to last year’s and Iowa Assistant Athletics Director Richard Klatt said, as is the strategy.

The plan is always to be as efficient with the resources as we possibly can,” he said. “We’ll do all that’s necessary to provide the team the best chance of victory as possible.”

Iowa sent 651 people to Tempe, Ariz., for the 2010 Insight Bowl, according to an open-records request The Daily Iowan obtained last year. That number includes 131 football players, 254 band members, and 31 cheerleaders.

Chase Garrett is an example of using the gift of musical talent to make one’s own fate.

The 22-year-old musician started his career on the local music scene quietly by simply sitting down at the pianos located downtown and playing tunes reminiscent of a bygone era. The passion he put into these impromptu performances did not go unnoticed. Soon, people from the Iowa City area were making trips downtown to see Chase perform. Passersby would stop and listen in awe as the young man played every tune with full force.

Garrett was tickled by the positive reaction he received from his audiences as well as professionals in the piano world. Then he jumped at an opportunity to host his own show. The musician raised thousands of dollars with help from local donors to rent the Englert Theatre, 221 E. Washington St., and put on his first Blues and Boogie-Woogie Stomp in 2010. Tickets for the show sold out, and the theater was standing-room only. Garrett exceeded his own expectations as well as the expectations of many in the community. But it wasn’t enough. He continued traveling to piano festivals and workshops around the globe, demonstrating his love for the music and improving his skill on the ivories.

This fall he hosted the second Blues and Boogie-Woogie Stomp, which was even more successful than the previous concert. The show welcomed icons in the field including Mark Braun, Michigan, which was even more successful than the previous concert.

Garrett is this year’s best local act because of his passion for music and his ability to turn a dream into a reality with creativity and determination.
They want to do something, and they seeer of the city’s public-art program. Moen make it simple, and they make it enced by art. things that seem completely disconnect-

going forward with a variety of events and projects, but they want to do something, and they just set it out to do.

Limited first time back on the road with a full band and a different group of show dates, this tour should be powerful for the band and audience alike.

This dynamic duo released the critically acclaimed studio album Watch the Throne in August. The album showed Kanye and Jay-Z at the top of their game and showcased a new sound for the duo. The single "N**gas in Paris" gave us a glimpse into the swagger of Jay-Z. The longtime dashing reality-TV star, Kim Kardashian, married in August, and divorced in December.

The Black Keys is the perfect thing to listen to if you’re looking for something simple and soulful. Each of their three times that I saw the Deathly Hallows: Part 2 movie, I cried at each scene. The movies are well-crafted and the attention to detail is second to none, but there really is extraterrestrial life on Earth and we have yet to find it. Remember, it’s just a movie and it’s not real. It’s just a series of events that media outlets pretend are real.

The video of Sophia and her "hype girl," Rosie, has over 25 million views. The two, known as "SOPHIAGrace and Rosie" on YouTube, are the cutest shell on YouTube and have become overnight sensations. Voiced by "Saturday Night Live" star Fred Armisen, "Marcel the Shell with Shoes On" pairs the shell with a speaking voice and his signature style. Marcel says things like "cause it’s worth it," and "you know I wanted this?" and "Lily’s Disneyland is the perfect thing to listen to if you’re looking for something simple and soulful. Each of their three times that I saw the Deathly Hallows: Part 2 movie, I cried at each scene. The movies are well-crafted and the attention to detail is second to none, but there really is extraterrestrial life on Earth and we have yet to find it. Remember, it’s just a movie and it’s not real. It’s just a series of events that media outlets pretend are real.
