Iowa City's softball, golf, and tennis teams performed over the weekend. The newly inducted East Side Recycling Center project cost Iowa City $3.28 million. IC welcomes recycling center. One Iowa City official said the East Side Recycling Center project cost Iowa City $3.28 million. By CHASTITY DILLARD dailyiowan.com

Danial Hammner said recycling is important for her children's future. "I think it's important for the environment to conserve the Earth's resources." Hammner said that recycling the surface area is important to kids, because they've got the rest of their lives and their children's lives to look at what we have," she said in Turner Hall on Thursday, May 3.

Hammer was one of roughly 40 community members who gathered at the new facility's unveiling ceremony on Saturday, which was Earth Day. City officials collaborated on the one-year project with the Iowa Valley Habitat for Humanity and its ReStore organization. The facility is complemented by many operations including an environmental-education center, the Iowa Valley Habitat for Humanity and its ReStore organization. The recycling center is the first in the state of Iowa to provide such extensive services to the community, said Kumi Morita, Iowa City's architecture-service coordinator. "That's really the goal of the site, to be an educational facility as well as to have landfill diversion . . . she said.

The project began in 2009 but was pushed back following the flood. The center cost the city $1.26 million and was fully funded by landfill tipping fees—revenue collected when people drop off materials. "If we can raise revenue, we can sell the land," said Janel Hanmer, the city's recycling coordinator.

"It's really the size of an average home, and we have a little 2,000 square feet," she said. "It sets an example and shows to the community about how we should think about using public facilities and using public land for public use because it comes," Mayor Matt Hayek said during the ceremony.

Hayek said the facility will provide an array of opportunities for community involvement, including partnerships with the school system and full-service recycling services.

Safe Ride, Tobin said. “Nic and I are in the talks to make sure that’s ready to go.”

Now the former UISG president, Higgins said he’s confident the new executives will carry on programs he and Caplin, the former vice president, started during their terms.

While he were worked to develop the (Safe Ride) program,” he said, “the new UISG officials will be the ones to administer and execute the program.

And to the idea that they are up to speed on, and I think they will be able to hit the ground running and implement it in the fall.”

Caplin said she was proud of the Safe Ride program coming out of his term as vice president.

It seems just like yesteryear that Brittany and I were on the other side, he said. “I’m very excited to see what the I Party will accomplish during its term.”

Higgins said he was proud to pass leadership on to Pettiboom and Tobin.

Caplin said she appreciates Pettiboom and Tobin’s attention to working on smaller factors, such as student fees.

“Student leaders, we have the greatest challenge ahead of ourselves — representing the student body,” Jordan said. “Environmental education — it really needs to permeate everything that we do,” she said. “Because if we don’t take care of the environment, nothing else is going to matter at some point.”

Caplin said she was proud of the Safe Ride program coming out of his term as vice president.

“We unfortunately something that couldn’t get started this year, but it’s in the perfect position to get started next year,” she said. “It was something that I started on right away after (Higgins and I) were inaugurated.”

Over the summer, Tobin said, she and Pettiboom will also begin to develop a system for students to rent i-Clickers.

At the inauguration, held in the press box of Kinnick Stadium, Pottebaum said looks forward to his term in office.

“I look forward to the coming year as well as the accomplishments and education that will come with it. As student leaders, we have the greatest challenge ahead of ourselves — representing the student body,” Jordan said. “Environmental education — it really needs to permeate everything that we do,” she said. “Because if we don’t take care of the environment, nothing else is going to matter at some point.”
Orientation policies his earlier study had revealed to be unprofessional and disrespectful. However, that historical fact distracts from the far more tantalizing truth that today's 60'smuggles grew up in an era when Had the highest college graduation rate in the world. That is no longer the case. Education is not only a pillar of the American dream and a source of American economic prosperity but to lose sight of that fact. Having spent a year in a high school works as an example. If it is not only if we possibly if we adequately educate children, we can expect to have a better educated population. This requires putting into practice those education policies that will help improve student performance. But giving teachers the right tools to achieve the best results is a prerequisite for improving student performance in the long run. Finally, there is a need for state and local governments to invest in the improving the quality of education which may lead to increased economic development.

Opposition writers may be sending via e-mail to reflect the majority opinion of the board of education. The state Legislature has moved closer to passing legislation that would increase the minimum number of hours of instruction students would be required to attend. Opponents warn that the dollar costs of keeping schools open longer are too high. The House of Representatives will be considering a bill that would increase the number of hours of instruction. Letter

Your turn

University of Iowa.

UI junior

The UI student body has been long working on promoting a team of dentists and hygienists who work closely with their academic and professional peers to provide the highest quality care for our patients.

UI professor of dentistry

The UI School of Dentistry is committed to providing excellence in dental education, research, and patient care. Our mission is to prepare highly skilled and compassionate professionals who will lead the way in advancing our understanding of oral health and disease.

UI School of Dentistry

Private support has made possible the significant advances in our academic experiences and the high-quality clinical care we provide. It is through the generosity of our donors that we are able to attract the finest students and faculty and provide a cutting-edge education that prepares our graduates for successful careers in dentistry.

UI School of Dentistry

Supporting the University of Iowa College of Dentistry is essential to our mission of advancing knowledge and improving the health of our communities. Your gift will make a difference in the lives of our students and patients. Thank you for your support.

Iowa Engineers for a Sustainable Future, or IESF, has begun work on a project to build the first net-zero-energy home in Iowa. The roughly $48 million project to predict is the construction of a house that will be energy efficient, according to University of Iowa Habitat for Humanity Executive Director Mark Patton. However, he said, the extra expenditures will provide significant savings for the homeowner in the long run.

“My guess is that the entire item package will be (in) 30 to 15 years, but the life of the house is probably over 20 years, so there’s actually a payback there,” he said. “The behavior of the consumer tremendously affects the savings.”

Patton said the home will also include an energy-monitoring feature that constantly reports the amount of energy consumption in the home. This feature will do the same thing that you do when you’re energy-conscious, according to Patton. He said that over the past three years, the program has installed extra meters to monitor and use. That’s the result of the energy-efficient home. Patton said, “If I can get the energy out, we can do something.”

whipped Metcalf to his back in both the first and third periods in a 5-0, 1-4, 6-0 victory Metcalf said that first bout was "all (Frayer) wanted."

"He set the pace," the former Hawkeye said. "And that's why I lost."

Metcalf had more control in the second match. He scored the match's first take down but ultimately lost the first period in a push-out with just seven seconds left. He won the second period with a late takedown of his own, sending the match to a decision third period. Metcalf fell to an early deficit of a 1-point move by Frayer before rallying with two late take-downs. The last take-down came as time expired to tie the score. But Frayer's two points had come on a single move. He became an Olympian.

"The whistle blew; the crowd was going crazy," Frayer said in describing the match's closing seconds. "I thought, Did I give an extra point somewhere that I didn't know about? But I knew in my head that I could give up a take-down and just not a t. And he would have had to break me down, somehow."

Frayer spent nine months as an assistant coach at Iowa while Metcalf was a Hawkeye wrestler. Metcalf spoke fairly coldly about his relationship with his brief former assistant before their match, calling it "pretty toxic." He said Frayer hadn't taught him anything he still uses today. A hearing Frayer remembered his practice room battles with Metcalf and gave his own subtle barb at all the fans talk about what had been the Hawkeye's undefeated record in Carver-Hawkeye Arena.

"They say he was undefeated in here," the former Oklahoma wrestler said. "I can say that I beat him." Metcalf was unmanned in that wrestling room.

Metcalf struggled to hold back tears in a post-match press conference. He said Frayer is good deliberately and that he wasn't able to get to his opponent's legs and finish.

"I appreciate all the sup- port of the fans that came out, and I hope they contin- ued to support freestyle wrestling," Metcalf said, his voice quavering. "I hope the fans can start bringing home more gold."

And then, the press con- ference was over and he was the light against the tears. Brent Metcalf lost.

COMMENTARY CONTINUED FROM 10

Glenn Garrison, a 38-year-old Greco-Roman wrestler, lost in the third- place match of the 66-kilogram bracket. He sat down in the middle of the mat and slowly pulled off his shoes. He placed them in the corner of the mat and returned to the corner to sit. He is a traditional symbol mark- ing retirement from com- petitive wrestling.

"I embraced my coach and two or three men and said good-bye," another wrestler said in the center of the mat, united and alone. Henry Cejudo was a child of impoverished Mexican immigrants but also of wrestling. At 20 years old, he became the youngest Ameri- can to win an Olympic gold medal in wrestling.

He retired after the 2008 Olympics but came out of retirement to try to earn a second Olympic berth. Why? His mother was tan- gled up in citizenship issues and couldn't travel to Beijing to see him wrap an American flag around his shoulders with a gold medal under his belt for the first time in 41 years.

But he lost in the semi- finals. He, too, out down in the center of the mat and had his shoes pulled off by a man in a Vans-red Adidas. He then threw up his hair, then quickly threw the shoes into the stands of Carver-Hawkeye Arena to a standing ovation.

"Cael said in describing the emotion in this sport."

"I didn't know about? But I knew in my head that I could give up a take-down and just not a t. And he would have had to break me down, somehow."

**TALKED ABOUT**

A form hammering was just another disappointing — and possibly season-ending — injury for Iowa hurler Jordan Mullen. The Atlantic, Iowa, native suffered the injury in the 21st at the All-American Invitational in Lincoln, Neb., and he was forced out of action for the third time in as many starts. He started the year as a freshman and his right quadriceps last season. The junior has not appeared in a Big Ten game since the 2008 season. He’s hoping to return this weekend.

A serious injury hasn’t kept Jordan Mullen down.

By TOM NASHON
