Board backs animal shelter

By ANNA EGELAND

The Johnson County Board of Supervisors voted 4-1 Thursday night to provide funding for a new Iowa City animal shelter.

The Johnson County Board of Supervisors voted 4-1 Thursday night to provide funding for a new Iowa City animal shelter.

The estimated contribution from the supervisors, through county tax revenue, toward capital and operational costs is $224,150, with $142,165 toward operational costs and $81,985 toward capital costs.

Andrea Goodman, the director of the Iowa City Animal Control and Adoption Center, said the supervisors’ decision will help the planning move forward.

“We know this particular pace really helps in knowing the particular size and design and the number of animals we can accommodate,” she said.

The total cost of the shelter is estimated at $3 million. The shelter plans to raise $1 million toward the cost.

Goodman and Neumann Monson architects, shelter personnel, the city architect and the city manager will work with others to develop the initial schematic design.
Nite Ride sticks around

Nite Ride will operate all summer despite last year’s hiatus.

By Nicholas Miller

Nite Ride operations manager Jennifer Krueger said the summer semester would be a busy one for the service.

Because Nite Ride ridership was down from an average of five passengers per night for the service’s first semester for the summer semester, Nite Ride will continue operating for the summer session, $100 all year.

Several females offered proof of the first time.

There were times I had to wait several times I did not show up the summer I graduated, as a volunteer to video a comfort if you end up without a bush.

VanderWaal, 22, said she often joined Nite Ride for five successively nigh.

The service was suspended or canceled. The proposed building is a total.

According to an Iowa City Department of Public Works engineer, Johnson was having a dispute with the woman.

The Iowa City City Council will consider a resolution approving the concept of developing the Iowa City Theater as their top choice for

Only four defendants were later arrested on an investigation.

Councilors will consider the motion, according to university chancellor Bruce Harreld.

Surveying the area, Thompson said.

seen many buildings in similar repair and did not allow demolition in those cases.

"There is a large percentage of houses in the neighborhood with clay tiles," he said, noting the foundation of the two homes. "I don’t expect any great number of them will collapse in the next five years."

Mulford wrote to the commission in his application for demolition that he believed the fraternity would offer a more "stable environment" than the pre-1940 homes. Neighbors have had similar repair and did not expect the houses to collapse in the next five years, he said.

"Nothing positive would come from the demolition," Wright said. "The houses are key to the neighborhood because of their large stature and prominence in the area."

"The only obvious reason to demolish these buildings if they were being redevel- oped," he said. "It’s a pretty clear decision [to not approve the demolition]."

Mulford said after the meeting that he has no plans to appeal or move ahead with the project.

Mike West, a former Iowa City Councilor, said he was "not a positive contribu- tor to the neighborhood." His "plans would be absolutely detrimental to the neighborhood," he said.

The neighborhood is there to preserve the greek society," he said at Thursday’s meeting. "It would be basically adding to the neighborhood by contribut- ing to the greek society."

He wrote in the applica- tion that the fraternity would be a more perma- nent piece of the neighbor- hood than the current buildings.

"The structure of the house will be one that, with the help of the Historical Preservation Committee, will contribute to the neighborhood and will be a part of that district for many years to come," he said.

"His plan would be absolutely detrimental to the neighborhood," he said.

"Nothing positive would come from the demolition," Wright said. "The houses are key to the neighborhood because of their large stature and prominence in the area."

"The only obvious reason to demolish these buildings if they were being redevel- oped," he said. "It’s a pretty clear decision [to not approve the demolition]."

Sullivan said he had been director of the Iowa City Animal Shelter for about nine years — said he has heard similar repair and did not expect the houses to collapse in the next five years, he said.

"Nothing positive would come from the demolition," Wright said. "The houses are key to the neighborhood because of their large stature and prominence in the area."

"The only obvious reason to demolish these buildings if they were being redevel- oped," he said. "It’s a pretty clear decision [to not approve the demolition]."

Somebody needs to check the NCAA

NATIONAL WILSON

In the U.S. govern- ment, the legislative branch has a governing power, even over the executive branch. To keep the executive branch from gaining too much power, the legislative branch keeps the president's administrative power in check. In the world of college sports, the NCAA is the executive branch.

However, unlike the U.S. government, college athletics has no checks and balances in the governing branch and departments have a governing force, even over the executive branch. To keep the executive branch from gaining too much power, the legislative branch keeps the president's administrative power in check. In the world of college sports, the NCAA is the executive branch.

The NCAA has developed a relationship between the NCAA and American universities in which the NCAA has become a major governing force for student- athletes and professors—two of the most powerful groups in the world. This relationship is not a one-sided relationship. Many sanctions and laws have been transferred to the executive branch and the NCAA has not only the power to change the course of a program of a school but also a young athlete's history.

All athletes and universities must be confident in the rules and should not follow them when they don't follow institutional rules. It's not just because of the NCAA's policies that the organization has had to allow athletes to für the first time in history to sue their colleges in court for college football in sports.

The NCAA has developed rules and policies that are designed for the benefit of student-athletes and professors—but also enough on politics. These were some of the most notable one is the NCAA's rules on legislation. Some instances in which universities were able to avoid the consequences of the NCAA's rules, but the NCAA has been able to effect changes to school policy and rules that have been made unfeasible by simple means. The NCAA has also been able to effect changes to school policy and rules that have been made unfeasible by simple means.

But does an absence of negative consequences mean that the NCAA is no longer a governing body to answer that question.

After newspapers and the School Board have been asked to change the way the NCAA is doing business with the association's rules, the NCAA has been able to effect changes to school policy and rules that have been made unfeasible by simple means.

It's not just because of the NCAA's policies that the organization has had to allow athletes to sue their colleges in court for college football in sports.

always calls me to play," Parker said. "I like to stay competitive and just want to do that." The Ball Bats were able to capitalize on momentum after Parker reached third on a Matt Homan, who graduated from Iowa Community College, single. This started a comeback from Iowa.

"I'm from Iowa City, and Matt [Ball Bags captain] and I are friends, so

DRAFT CONTINUED FROM 8

play 15 minutes their first game and gradually increased their playing time in five-minute increments from there.

Head coach Joe Johnston said Iowa's Mollie grim in the second round — one pick after Taylor — and Larson must have realized his decision, realizing he drafted great players, but can't use them in a full workload.

"It's not really a mistake because the player I took instead, Thourney Taylor, is a very good player," Larson said. "Thourney Taylor is a talented player as there is in the draft, and she's hitting at the bat to play because she's missed so many games. Any woman who will come back after three ACLs, and wants to play on the court again, even though she's still not totally cleaned up, plays that love attitude."

Kali Pechel, who allowed two assists each for Iowa and Northern Iowa.

Jenn reached base with a triple. With two runners on, Nate Feldman stepped up to the plate.

With the calm of a professional baseball player, Feldman hit a single just out of the reach of the Ball Bats' second baseman for the victory.

"The game ended shortly after the 50-minute rule, with Team Christensen the winners, 15-14. Feldman and his team-mates breathed a sigh of relief as they walked away from the field with their W, but the Ball Bats were smiling as well. They get to try to win the game, and try rough play with high stakes."

"I like the competitive edge," Pechel said after the game.

"We are pretty competitive people, as I think that's what brings us out, and we just like to have fun."

"I love that attitude," said Larson. "I just try to put them in, even maybe before they're quite ready, because I want to be responsive to their wanting to do it."

DRAFT CONTINUED FROM 8

No. 4 Trisha Nedbit

Nedbit finished her junior year with only 5 points in the season after playing only 41 minutes. But her Division-I point-guard experience lured head coach Mike Bloomer to chose her as his first round pick.

"I went into this thinking that I was going to get a point guard," he said. "She has the experience in a tough division."

Nedbit's best season was her freshman year, 2009-10. She racked up a 294 field-goal percentage, compared with her 2011-12 percentage. The point guard played in all 54 games during her freshman year, but only made it into 14 as a junior this past season.

No. 4 Trisha Nedbit

Joens was listed as the youngest player to appear in the Game Time League this season: 15-year-old Courtney Joens, who will start her freshman year at City High in the fall.

Joens is the daughter of Brian Joens, the former Regina High women's basketball coach.

Joens is the youngest player in the draft by three years, but despite her age, Bloomer said "she's comfortable" with the final decision.

"I went into this draft knowing that I wanted a point guard with a solid career, but she persevered through the injuries," Bloomer said. "No. 3 — Amber Stover, Northern Iowa, to Unkrich

SIGNS YOU’RE IN THE MIDDLE OF TECH WEEK FOR A MUSICAL:
- When the entire syllabus is written by your character name, you are sure to notice the new keyboard shortcuts.
- Your professor is testing every-thing in “Is it a love story?”
- There is no need to think about how to begin your assignment, it’s a given.
- Time is measured by increments established by your professor.
- You yell out to “stop cheating” and form an alliance with the professor.
- Most everything you say is a quote from the show.
- At home, everything is slightly more cost-efficient and your life less stressful.
- At every opportunity, you can’t think of a better idea for a ledge.
- You have more than you realize. Look at your assets or the skills you possess, and you will find a way to raise your income. Proceed cautiously if someone from your past tries to talk you into some-thing that makes you feel unsure.
- What others do and what is expected of you will be confusing. Don’t make a move until you feel confident you are doing what’s best for you.
- Helping others will raise your profile and bring you in touch with someone who has something to offer.
- You’ll have plenty to discuss with friends, neighbors, or relatives. Participate in com- munity events to explore different cultures and ways of doing things. Take a course or attend a conference that will motivate you to be more creative.
- Contemplating what you have to offer, and start the ball rolling. Interacting with others will help you make wise decisions. Don’t make changes based on your past, and you will avoid being judged.
- You feel confident you are doing what’s best for you. Don’t judge others, and you will avoid being judged.
- Helping others will raise your profile and bring you in touch with someone who has some-thing to offer. Don’t make a hasty decision. Someone is likely to let you down. Expressing your feel- ing to make your life less stressful.
- Helping others will raise your profile and bring you in touch with someone who has some-thing to offer. Don’t make a hasty decision. Someone is likely to let you down. Expressing your feel- ing to make your life less stressful.

**Softball sparks competition**

By CARLOS SOSA

The Dirt Ball Bags and Team Christine competed for that ever so valuable championship trophy on Thursday at the Hawkeye Softball Complex. The high stakes gave the players and fans something to cheer for.

The Iowa City Parks and Recreation softball league comprises of many local players looking to compete during their summer free time.

---

**The Daily Iowan outlines the first-round selections from Thursday’s Game Time League draft.**

**By MOLLY IRENE OLMSTEAD**

No. 1 — Sam Logic

Logic, a sophomore-to-be at Iowa, finished her freshman year with an average of 6.4 points per game and a .456 field-goal percentage. Logic started in all 33 games on the season, playing well at guard, and she was also showing a strong aptitude for defense.

"Sam can play numerous positions," said head coach Brendan Unkrich, who selected Logic "Hopefully, she can guard numerous positions, too. I'm confident, though.

Logic saw the most playing time of any Hawkeye freshman, clocking in 874 minutes on the season and averaging 29.5 minutes per game.

No. 2 — Bethany Doolittle

Doolittle finished her freshman year as a strong 6-foot-4 center, averaging 14.9 points per game and 6.9 blocking per game. Doolittle’s role became important for the Black and Gold when Johnson suffered knee injuries, and the 6-4 center started averaging two more minutes toward the end of the year. She played 355 minutes overall, averaging 11.9 points per game.

Doolittle is strong on defense, and head coach Joe Johnston said, which can complement her “pressure defense” perfectly.

"Doolittle is a coming thing, and she’s going to be a star before she leaves Iowa," Johnston said. "That’s an obvious reason why I picked her as the first-round pick.”

No. 3 — Morgan Johnson

Johnston was the first player to start at center for Iowa for the majority of the season, but she was hampered by knee injuries toward the end of the schedule.

Even so, the 6-5 player averaged 14.9 points per game and led the team with 69 blocks on the season and a .546 field-goal percentage. Johnston’s playing time was more than double Doolittle’s from the 2011-12 season.

Johnson will have to sit out the first game on June 20, and she is then restricted to 10 minutes for the second game. Her limited playing time will increase in five-minute increments each game from there.

"Morgan got that traction," Johnston said. "She’s in her game, and anytime she fell down, she was almost brought to tears and had to come out — just putting up and playing in a competitive environment meant more than the residual 14-14 conference win. "I just wanted to stay competitive," said Johnston, the captain of Team Christine and a 2010 Iowa graduate. "The pressure of the league allows me to compete."

The league is continually looking for a way to stay competitive, and for gradu- ates who don’t make the press, there are numerous local sports such as softball that keep the athletic spirit high.

"We play for fun," Doolittle said. "I play for the team camaraderie and because it’s fun to do in the summer." Team Christine hold a 7-1 team heading into the bottom of the fifth. The competition wasn’t noticeably fierce up until that point. The game just went along, but after that, the mood was light, but that changed.

"We played confident, even for an major-league team," but the Dirt Ball Bags were confident they could pull out a win.

**Top four Game Time picks all Hawks**

By CARLOS SOSA

The Daily Iowan, a member of the Dirt Ball Bags, organizes a pitch at a draft for a new softball league against Team Christine on Thursday at the Hawkeye Softball Complex.

With Iowa's sophomore-to-be Sam Logic being the Game Time League's first draft pick on Thursday, selected Logic as an automatic first pick in the Game Time League draft, due to several injuries to other eligible Hawkeye players.

Sam Logic stands out as the most eligible Hawkeye player on the court. It was an easy decision, and Johnson is injured.

**Iowa's sophomore-to-be Sam Logic was the Game Time League's first draft pick on Thursday.**

By MOLLY IRENE OLMSTEAD

Iowa's sophomore-to-be Sam Logic was the Game Time League's first draft pick on Thursday, selected Logic as the most eligible Hawkeye player on the court.

"With the injuries to some of the other players, Logic is the most definite player in this league," Unkrich said. "She's just a dynam- ic player... I saw her play twice last year, and both Iowa games that I saw her in, she was the best player on the court. It was an easy decision." The decisions got harder from there.

Head coach and league Com- missioner Randy Larson chose Johnston, who is still recovering from knee injuries, as the No. 5 pick in the first round. Then he selected Theresa Taylor in the second round, who is also still recuperating from her third torn ACL of her career.

Both Johnston and Taylor will have to sit out of the first game on June 20 and then have restric- tions from there. The women may
