A revitalized Iowa Riverfront may be coming sooner than expected.

The Iowa City City Council will vote on whether to proceed with a particular design group for the Burlington Street Bridge and dam. The group submitted a proposal for the Burlington Street dam, which the city hopes to modify for safety improvements, riverbank stabilization, fish passage, and recreational opportunities.

A dam is a "low-head" dam, also called a weir. Iowa Natural Resources encourages dam owners to remove debris, along with victims, in recirculating currents before they enter the water. It involves the construction of a new dam in addition to developing recreational areas for swimming, kayaking, and other water activities, as well as creating an area for fish to pass through.

Steve Long, the Iowa City community development coordinator, said the combination of recreational facilities and fishing areas makes sense for the proposal.

"The two complement each other," he said. "The design would create areas where fish would congregate and improve their habitat, and in the same area there may be a jetty for fishing." The design and engineering plans will include public input and acquiring construction documents, and officials project it to take about 18 months, with a similar amount of time allotted for the construction.

Long hopes more people will use the river after the project is completed. "Whether walking, biking, paddling, or fishing, [this proposal] is about offering the river after the project is completed. It's an exciting element of community attraction in itself." She said more people are drawn to the river after the project is completed. "More people are drawn to the river after the project is completed. It's an exciting element of community attraction in itself."

Tom Brownlow, the city administrator at the Charles City Chamber of Commerce, said "Before we joked that the park was an underutilized river, and we're hoping for lots of input." Ginger Williams, the tourism coordinator at the Charles City Chamber of Commerce, said "We see traffic at local restaurants, gas stations, and other businesses around the area. The Charles City Chamber of Commerce has been well-received by the city. It's been profitable for the city."

The cost for the consultation is $380,441, which the city plans to pay for primarily with grants. The city has applied for and received grants from the Environmental Protection Agency, Iowa Great Places Program, and the Iowa Natural Resources Low-Head Dam Safety Program. Iowa City has authorized up to $49,000 in city funds for the project.

Several other cities in Iowa have undergone dam modifications, including Charles City, which transformed its dam to a whitewater rafting area and surrounding park. The Charles City Riverfront Park opened in July 2011, and it has been open year round since then. Since it opened year round since then, it's been profitable for the park. "The park wasn't used as much during the drought, but activity is usually high." The park was open year round since then. Since it opened year round since then, it's been profitable for the park. "The park wasn't used as much during the drought, but activity is usually high."

The city staff recommended the council work with a Denver design group.

Gender ID change hailed

The University of Iowa added a third option for gender identification as well as an optional sexual orientation question on application materials.

By Stacey Morray

Yet again, the University of Iowa distinguished itself with a first. As of Dec. 1, students applying to the University of Iowa are able to mark transgendered as an option under gender identification. Applicants will also have the option to identify with the lesbian, bisexual, gay, transgender, and questioning community. The university has been at the forefront for LGBTQ+ students as well as faculty, said Molly Talley, the communications director for the UI. The UI is the first public institution in the United States to ask students questions regarding sexual orientation and gender identity — a move to make students feel more comfortable and safer in the classroom.

"I hope this enables the students to feel more content," said Georgina Dodge, the chief diversity officer. "It initiates a conversation with students that we identify with."

Leadership changes at Belin-Blank Center

By BRIANNA JETT

Although the new year will bring a name change to the University of Iowa’s Belin-Blank International Center for Gifted Education and Talent Development, life will continue as usual for most of the center.

Nicholas Colangelo will step down from his job as director of the center, and Susan Assouline, the associate director, will become the new director effective Jan. 1.

“It feels like it’s time,” Colangelo said. “It’s been a number of years, and I wanted to make sure I stepped down in a way that would make a very smooth transition.”

Assouline worked at the center for 22 years.

“I am really proud about it,” she said. “I feel ready.”

The Belin-Blank Center works with an international gifted community, with students, teachers, students, and parents. The students have not yet entered their college years. The center was officially founded in 1984, and it will celebrate its 25th anniversary in July.

Since its inception, the center has raised roughly $41 million and worked with 200,000 students and 40,000 teachers, students, and parents.

“Belin-Blank is an amazing place, and it’s been a lot of fun,” Colangelo said. “To make sure the transition goes off without a hitch, he will remain on staff for another year as a full-time faculty member.”

Assouline has completed her master’s and a doctorate as director. She couldn’t be happier to have her as the new director,” he said. “I have a ton of confidence in her.”

The center’s faculty and staff agree, and they believe that the transition is a natural change.

“We’re going to have a greater sense of continuity than change,” said Laurie Croft, an administrator for professional development.

Assouline hopes to continue the work the Belin-Blank Center has succeeded with.

“I am going to continue our legacy of high levels of energy, enthusiasm, and optimism for serving gifted students,” she said. “Assouline sees more growth on the horizon.”

“I want to see growth in our clinic services for twice-exceptional students, who have diagnoses of STEM with the state of Iowa STEM initiative, and enhancing our presence on the international front,” she said. “We’re hoping to reach the very next milestone for programs at the center.”

Even though the director of the center is changing, Assouline believes there will not be huge changes to the center just because she has a new title.

“There will be new things that will happen, but it won’t be because a name change happened,” she said.

colangelo said.

“The survey is a snapshot at one point in time,” she said. “A lot of students are still in their college years. The center was officially founded in 1984, and it will celebrate its 25th anniversary in July.”

The university offers a variety of programs to help students develop including a personal health assessment, life-coaching and access to the Campus Recreation & Wellness Center. Undergraduate students at the Rec Center.

“There is a ‘tremendous amount of energy, enthusiasm, and optimism for serving gifted students,’” she said. “I couldn’t be happier being a part of this.”

Mason should be concerned

A reader writes:...
"I salute, admire, and think about those people who played a role in making this happen," he said.

"Institutional changes like that are very difficult to accomplish," the UI should be proud of its accomplishment," he said.

Roudabush deferred all comments to Moore.

The University of Iowa has offered transportation for patients to and from Iowa City since 1913, when the Legislature first appropriated public funds for each service.

UI health-care beneficiaries are all assigned to one of eight designated health-care centers throughout the state to allow for access to health care closest to home. All IowaCare patients, however, reserve the option of receiving care at the UIHC.

Moore said UI Health Care leaders discussed options you may choose to make sure that critical-care patients can get where they need to go.

"There is more to be done," he said. "There are some things we have to work on alternatives. It's not that we're mad at the patients. We want to work with them, too. We want to find a way to fund transportation for critical-care patients.

"We should look at the inadequate funding for IowaCare itself, but I do think we will need to revisit the transportation challenges for all of Iowa," he said.

However, Sen. Bob Dvorsky, D-Coralville, said the plan would want to discuss transportation options.

"Our track record hasn't been very good in the past," he said. "It's unfortunate that the patients won't have transportation, but it's one of those situations where UI officials are letting everyone know who was going to be affected by it and what their resources are. It's unfortunate, but they did the best job they could.

The UI's newest transportation

"We only have anecdotal numbers," Dodge said this is a "fabulous opportunity to use the information to provide resources.

"I salute, admire, and think about those people who played a role in making this happen," he said.

"Institutional changes like that are very difficult to accomplish," the UI should be proud of its accomplishment,

A spring break of students pitching in

University of Iowa for Center Student Involvement and Leadership prepares to go south.

By CASSIDY RILEY

For many students, spring break means sun bathing and spending time with friends. For 15 students at the University of Iowa, this spring break will mean working their sleeves up to help those in need.

"All of what we do here is about helping people stay medically adhered," she said.

"I think they're going to make a difference in their work but also in their personal lives," he said. "I think they're going to keep those students engaged."
A look at the fall semester that was

The Daily Iowan reports the top news events from the fall in Iowa City and at the University of Iowa.

Iowa City, UI draw stumpers in election campaigns

The University of Iowa is hosting several election season events, with over a dozen candidates making campaign appearances in Iowa City.

Johnson County auditor allegedly overspends budget on new technology

The Johnson County Auditor's Office has been accused of overspending on new technology, with reports of a $62,580 purchase of new laptops.

Regents approve tuition freeze for in-state undergraduate students

The University of Iowa's regents have approved a tuition freeze for undergraduate students for the 2013-14 academic year.

UI student who assaulted cop remains a felon

The University of Iowa student who was accused of assaulting a police officer has been convicted and sentenced to 60 days in jail.

Mason working without a contract

UI President Bruce Harreld has been working without a contract since 2013, according to reports.

Sigma Alpha Epsilon UI chapter removed from campus

The Sigma Alpha Epsilon fraternity chapter at the University of Iowa has been removed from the campus for violating hazing regulations.

Flood recovery updates

While the recovery efforts are ongoing, the University of Iowa continues to work on flood recovery initiatives.

The level of care you expect. In an environment you might not.

HUNGRY?
It’s not just another game to win — there’s a little extra when you’re playing in-state teams.”

“In Iowa head coach Fran McCaffery’s mind, there was only one aspect — fouls and missed shots — that doomed the Hawkeyes that day. And because of that, the Hawkeyes (8-2) will have the chance to be better when they line up against Northern Iowa in the Big Four Classic in Waco, Texas, on Saturday. The four-team event features a matchup of mid-major programs, Iowa State and Drake will meet in the late game.

“UNI has got a lot of weapons,” McCaffery said. “They’ve substantially more athletic than I think anybody gives them credit for; their guards shot 3s, and their guards can shoot 3s, and their bigs can really do better things.”

Emotional letdowns are always possible following big victories such as the Hawkeyes’ triumph over the Cyclones, but McCaffery isn’t worried.

“There was plenty of time between games, and that’s what the Big Ten is. He said. “Two, three days later, you better be ready because, if you’re not, you’re going to get your rear pinned back.”

McCabe finished last December’s meeting with 2 points, was called for a questionable technical foul, and ultimately found out. It contributed to what became a night-marish day overall in Cedar Falls for the Black and Gold. This year through the location has shifted, so has the power between the two programs. It’s McCaffery who can shoot 3s and his Hawkeyes’ triumph over the Panthers (6-3) can live up to that name because of that.”

Even with her success, Stevenson believes she’s on equal footing with the rest of her teammates and keeps a taste-of-mindfulness in a very individualized sport. Stevenson, along with sophomoreEmma Stevenson, who she believes has hit her peak as a Gymnast, was announced on Monday to the All-Championship team for 9.875 floor performance at the Big Ten meet. Stevenson was a good athlete, but I never thought I’d be a gymnast. She is the most consistent gymnast that we have,” said McCaffery. “When I got called, I was shocked. It’s not how I think anybody gives them credit for; their guards shot 3s, and their guards can shoot 3s, and their bigs can really do better things.

“Even with her success, Stevenson believes she’s on equal footing with the rest of her teammates and keeps a taste-of-mindfulness in a very individualized sport. Stevenson, along with sophomores Emma Wilms, who was named to the Big Ten Gymnasts in Watch List, which was released Wednesday. "I always knew that I was a good athlete, but I never thought I’d be the athlete where people know her name,” Stevenson said. "You, people know who I am more. It’s really a good feeling, it’s really a good feeling, and I really hope that I can live up to that name and really do better things this year."
Tennessee stops losing

BY STEVE MEGARGEE
Associated Press

KNOXVILLE, Tenn. — True Volunteer belief.

Tennessee did not afford a third-straight home setback, so he had to remember his Volunteers provided that faith.

Golden scored 25 points and sparked an 11-1 run that closed out a 5-4 victory over No. 23 Wichita

State on Thursday night, a win that called the Volunteers' two-game losing streak and handed the Shockers their first loss of the season.

“I told the guys it was a must-win tonight for the game,” Golden said. “I knew it was a must-win.”

In its last two games, Tennessee had lost 77-76 to Georgetown in the SEC/Big East Challenge on Nov. 30 and 46-45 at Vanderbilt on Dec. 2. The Volunteers failed to score 40 points once during those losses, and the Volunteers introduced the 1965-66 season with a 58-49 loss to Auburn on Jan. 15, 1997. Tennessee’s (5-4) knew how important it was to build confidence before entering SEC Conference competition.

Wichita State, which moved into the Top 25 two weeks ago, did not play well as it needed another quality win to prove itself — it opened their eyes to just the college experience, the schools, the conferences, the teams and what to expect.

“We need a win like this,” Golden said.

Iowa's Anton Gryshayev ends his routine on the rings during the Black and Gold intrasquad meet in the Field House on Oct. 10. The men's gymnastics team features 20 members. The team outside the gym as diversity can benefit the team.

“People have to figure out what to do or what your country, and the world for that matter, to recruit all over the world around them is diversity to propel their progress in practice. There’s a huge amount of peer teaching and development — that goes on within this group,” Reive said. “The more ideas and thought processes that we can bring in, the better the team is going to be.”

Although gymnastics showcases some of the world’s most physical and athletic sports, it is as much a mental sport as it is a physical one. Visualisation, technique, and routines are the essentials to any successful routine.

“I've never been a believer in the mental aspect of sports, but I've always been a believer in the physical aspect,” he said. “Having a way that adheres to the coaching philosophies in gymnastics team, is as big of a believer in the mental aspect of sports, but I’ve always been a believer in the physical aspect, “

“By Ryan Probasco

Gymnastics revel in diversity

Tennessee’s Anton Gryshayev ends his routine on the rings during the Black and Gold intrasquad meet in the Field House on Oct. 10. The men's gymnastics team features 20 members. The team outside the gym as diversity can benefit the team.

“It’s huge to have people from different parts of the world,” Reive said. “There’s a lot of diversity that brings diversity because the world for that matter. To recruit all over the world around them is diversity to propel their progress in practice. There’s a huge amount of peer teaching and development — that goes on within this group,” Reive said. “The more ideas and thought processes that we can bring in, the better the team is going to be.”

Some of the diversity seen on the team comes clearly. Gymnastics has certain "hubs" around the country, with top-tier talent in those hubs, Reive is a physical one.

“The more ideas and thought processes that we can bring in, the better the team is going to be.”

“It’s huge to have people from different parts of the world,” Reive said. “There’s a lot of diversity that brings diversity because the world for that matter. To recruit all over the world around them is diversity to propel their progress in practice. There’s a huge amount of peer teaching and development — that goes on within this group,” Reive said. “The more ideas and thought processes that we can bring in, the better the team is going to be.”

Some of the diversity seen on the team comes clearly. Gymnastics has certain "hubs" around the country, with top-tier talent in those hubs, Reive is a physical one.

“The more ideas and thought processes that we can bring in, the better the team is going to be.”

Hawks set to face Drake

The Iowa women's basketball team (7-3) will travel to Des Moines on Sunday to face off against the Drake Bulldogs (3-5).

The game will bring back memories for many Hawkeye fans, as the Bulldogs are one of the few teams who have bested the Hawkeyes in their last two seasons against Drake.

"It's definitely still in my mind," McFarland said. "I don't believe that you're over -

The Hawks will look to continue their recent success as they prepare for the Grapple at the Garden this weekend. The event will feature some of the top wrestlers in the NCAA, including Ohio State's Logan Stieber.

"I've got Bucknell and Hofstra, noon Dec. 16

Iowa vs. Hofstra, 10 a.m. Dec. 16 and Iowa vs.

Iowa vs. Drake, 2 p.m. Dec. 16

Iowa (7-3) at Drake (3-5)

When: Dec. 16 Where: Des Moines

Steve Bluder set to lead

Emma Stevenson cites her mentality as one of the key differences between the gymnasts as she and one of the coaches who led the Hawkeyes in 1990s. Stevenson was a key part of the program during the Drake Bulldogs (3-5) era - the 1990s - and led the Bulldogs to three NCAA appearances.

"I believe that being able to compete in the Big Ten and the NCAA championships is one of the key differences between the programs," she said.

"We have a very strong tradition of excellence at Iowa, and that's something that we want to continue to build on in the future."
