Shutdown affects Guard

BY JAKE MCCULLY jmcullen@dailyiowan.com

The Iowa National Guard has furloughed 116 employees because of the ongoing partial government shutdown, and while the layoffs are temporary, there is no telling when the workers will be allowed to return.

All government functions deemed “non-essential” were suspended on Oct. 1, and they will remain so until a bipartisan agreement can be reached by sparring Republicans and Democrats over the national budget.

The new furloughed National Guard employees stand as just one example of state workers currently affected.

While more than 1,000 Iowa National Guard employees were originally sent home Oct. 1, a ruling by the Department of Justice about the Pay Our Military Act signed into law Oct. 7 means that those affected by this round of furloughs are full-time skilled tradesmen, such as plumbers, carpenters, electricians, and while the layoffs are temporary, there is no telling when the workers will be allowed to return.

One local woman, working in her Coralville boutique, has spent the past year working to help women return to a feeling of normalcy.

For Cheryl Scholtz, a certified mastectomy fitter, helping women feel confident again has become her passion.

She is the manager of Décolle- tage Perfect Fit Boutique, a fitting store for post-surgical garments, brafit forms, bras, and apparel for comfort during breast-cancer treat- ment and recovery.

“I’m glad to be here to help them through their journey,” she said. “We want her to be that same confident person that she was before this ever happened.”

Scholtz’s first patient made her realize how important this is for women with breast cancer.

“We got a bra that fit her and we got a breast form that made her look exactly like her other side,” she said. “She looked in that mirror and her shoulders went back, her head came up, and a smile came on her face, and her eyes got bright, and I thought, you know what, I just did something really, really good for that woman. And I knew right then — that’s what I’m supposed to be doing.”

Since opening on Oct. 15, 2012, Schlote’s first patient made her return to normalcy.

And so, the store celebrates its one-year anniversary today. (The Daily Iowan/Emily Burds)
Palin to visit Iowa

Former Alaska Gov. Sarah Palin will visit Davenport on Wednesday, according to her Facebook page.

The exact time and location of the event were not available Wednesday morning.

Palin spoke at an Oct. 10 event in Des Moines: 

“I’m so excited to see Jari and her family. I’m sure she will have fun seeing the beauty of Iowa and the wonderful people of Iowa,” Palin’s Facebook page says.

Incumbent praises River Landing project

One Coralville City Council candidate said moving forward with the Iowa River Landing will reduce the city’s debt.

By REBECCA MORRISON

As debate continues over the state of Coralville’s debt, one City Council incumbent hopes to dispel rumors about the city managing its financial obligations.

First-term Coralville City Councilor Bill Hoeft wants to move forward with the Iowa River Landing project to help the city pay its debt.

“I’m trying to let people know the facts about a lot of myths about transparency,” Hoeft said.

Hoeft, an incumbent candidate for Coralville’s City Council, believes the River Landing business will thrive with more traffic in the area.

Still, one local real estate agent, not in agreement with Hoeft’s platform, isn’t sold on the city’s current debt problems.

“I think he’s right on the Iowa River Landing to pay off debt,” said Anh Diep, the owner of diep & the owner of anh diep.

Hoeft said it’s not a crisis; we are making progress.

“I’m 100 percent in agreement with Hoeft’s platform,” said Mitch McConnell and Republican leader Mitch McConnell.

The government would be given flexibility in adjusting to reduced funding, according to McConnell.

McConnell also voiced concerns about whether there were too many business incentives to relocate to Iowa.

Despite evident backroom quarrels, he maintained responsibility and Taxation have cried improper actions.

Responsible Growth & Taxation have cried improper actions.

McConnell also voiced concerns about the city’s debt.

McConnell also voiced concerns about whether individuals seek- ing coverage would be subject to a $63 fee imposed on companies by the health-care law known as Obamacare for every employee-sponsored plan.

The two sides were also discussing a requirement that individuals seek- ing coverage would be subject to a $63 fee imposed on companies by the health-care law known as Obamacare for every employee-sponsored plan.

C

on sidering how much the media and pol-

icians have been talking about the na-

tional debt over the past year, you'd think the American public would be pretty well

informed about the issue.

If anything, however, the public is clueless about what's going on with the debt. A

new poll by Business Insider found that

77 percent of Americans don't know what

the federal budget deficit is. If that deficit had

grown by one percent per year, it would be

the size of the economy.

The gov't — the abbre-

ivation seems appropriate

for something as important

as the national debt — is the

most special sort of abbrevia-

tion. It's often used to mean

something important. In this

case, it's really important.

As the Office of Management and Budget

said in August, America is 'in a world-risk

situation, which hasn't prevented

the government from doing

the things it needs to do,'

which is a pretty accurate description of

what's been going on with the federal debt.

In 2013, these tax breaks accounted for $1.13

trillion in federal expenditures. This

amounted to about $3,900 per year for

each American. While this may not seem

like much, it's still a significant amount

of money. These tax breaks are

more than just a giveaway to

wealthy people. They are

also a huge source of

political influence.

### NATION

**NSA combs through contact lists**

WASHINGTON — The National Security Agency has been collecting millions of contact lists from personal email and instant messaging accounts around the world — including those of Americans — in efforts to decipher who is communicating links to terrorists or other criminals, according to a consultant who fled the United States and who was instrumental in establishing the Patriot Act.

The Washington Post reported late Tuesday that the agency has amassed a database of thousands of email addresses belonging to criminals and others through global trade, and that the NSA also collects about a half million email accounts each day, which are then passed on to the FinCEN for analysis.

The Post quoted the consultant as saying that the NSA is collecting contact lists that go back more than 20 years in a “massive government program” that involves reading contact lists of people who are not U.S. citizens or permanent residents. Under the Patriot Act, the NSA is allowed to collect contact lists of people who are not U.S. citizens or permanent residents for national security purposes.

The Post said that the consultant is not sure how the NSA collects the contact lists or how it does so, but he said that the agency is collecting contact lists that are “relevant” to national security and that the agency has been collecting contact lists since the early 1980s.

The consultant said that he has passed on about 60,000 contact lists to the government and that the agency has been paid $5,000 for each list.

### CORNLAND ELECTION

**Hopeful stresses fiscal responsibility**

One Coralville business owner will run for Coralville City Council with hopes of taking the city’s financial crisis into his own hands.

David Petsel, 57, has opted to run for Coralville City Council because he is concerned about the city’s financial situation. Petsel, the owner of the Iowa City-based Assur Property Management, is running for the Performing Arts, which manages student apartments and commercial properties.

According to him, the inexperience of the council and its members is hindering the city’s progress. Petsel, whose business focuses on fiscal responsibility, is running for the Performing Arts to show members of the council that they need to be smarter with their money.

### David Petsel

David Petsel, a former employee of the National Security Agency, has decided to run for Coralville City Council because he is concerned about the city’s financial situation.

Petsel is running for the Performing Arts, which manages student apartments and commercial properties. He is running for the Performing Arts to show members of the council that they need to be smarter with their money.

### Diversity Seed Grant

**Seed Grant**

The Diversity Seed Grant program supports projects and programs with an innovative impact in improving the diversity of the student body, faculty, and staff of the University of Iowa.

The program is open to all University of Iowa faculty, staff, and students who are interested in diversity and inclusion.

**Eligibility**

Applicants must be currently enrolled at the University of Iowa and must be a current University of Iowa student, faculty, or staff member.

**Proposed Deadline**

October 21, 2013

**More Information**

E-mail: diversityseedgrant@uiowa.edu

Phone: 319-335-2286

**Grant recipients can receive up to $1000!**
I'm an undecided voter (part 2 of 2):

I'm ardently opposed to Obamacare, BUT, I also think Facebook has given big enough.

I don't support building a wall along the border (to help blow cool air into the United States).

I'm with Marx in believing that “The last capitalist will hang shall be the one who sold us the rope,” BUT, I also know that lowering刑罚 and assisted suicide, decreasing the prison population will lead us to a better destination.

I believe in anarchy, BUT, I'm also in favor of some form of government. I believe we should hold on to the skills in order to realize this vision.

If the facts don't fit the theory, change the facts. — Albert Einstein

Field hockey

DI: "I really loved the field, it's a really small world. Cross-country, track and field and everything. "Not just with hockey — with school, and friends, and everything."

Box score

Former Earny Award winner and three-time NCAA All-American Aubrey Coleman shared similar sentiments.

Game to dominate opponents is no surprise. A majority of this team's backs have been some of the country's best in recent history. But Gordon isn't the only talented back — he's flanked by veterans with more than 3,000 yards between them.

Interceptions thrown — Doug Gradison (Michigan), 10 (Tied in NCAA)

Gardner, by comparison, has thrown just 12 interceptions this season. He's also completed 222 passes this season, which gives Indiana a 15.56 fumble-recov-

ery rate for this season.

That's the big difference here. Gardner has only had one turnover in each of the last two games and six in the first six games. Michigan has nine in those six games. Gardner's 5.69 fumble rate is the worst in the country for a quarterback with at least 100 attempts.

Four turnovers during the past two games compared with Gardner's one interception during the same period is a recipe for disaster. Michigan shouldn't win with that kind of statistics, but it's done the job, and it still has the opportunity to win.

Michigan has thrown three interceptions for every two touchdowns, which is a recipe for disaster. Michigan has thrown more interceptions than touchdowns in nine of its 11 games, including seven of the last eight.

Interceptions thrown — Doug Gradison (Michigan), 10 (Tied in NCAA)

It's a recipe for disaster, and it's a recipe for Michigan to not win.

Four turnovers during the past two games compared with Gardner's one interception during the same period is a recipe for disaster. Michigan shouldn't win with that kind of statistics, but it's done the job, and it still has the opportunity to win.

Like mother, like daughter

When Wendy Watro chose to play field hockey at Iowa in the late-1970s and ear-
ly 80s, she unknowingly laid the founda-
tion for a special bond to be created. More
than 30 years later, the bond was exhibited
when her daughter, Sara, made the com-
decision.

The elder Watro began her freshman
career at Iowa in 1979, when the field-hockey
program was very different from what it is
today. Under head coach Rudolph Davidsen,
the team’s home was Hubbard Park for the
two years of her playing career. During
her junior and senior seasons, field hockey
played on the tar in Kinnick.

“Hayden Fry was really, really good
about letting us play,” Wendy Watro said.
“Although we practiced at 3:15 in the
morning, stuff like that. But we were just
lucky that we could play on Kinnick and
had a much better surface to play on.”

That surface paid dividends for the
Hawkeyes — who won Big Ten titles in
1990 and ’91. Over those two seasons, Iowa
posted 44 wins, including a 26-5-1 mark in
Wendy Watro’s senior campaign.

Despite her mother’s history in the sport, it
was a challenge getting Sara Watro to
change from one pitch to another growing up.
She played travel soccer and did not want
to give up the sport for field hockey.

“I would always make statements like
‘You want to play field hockey? I’m taking
Wendy Watro’s wish was granted when
a group of her daughter’s friends began to
play the sport around the time Sara was
in seventh grade.

Officially, the Watros are the descend-
ded for the junior, who earned all-conference hon-
ors in her senior year at Methacton High
School in Eagleville, Pa.

Because her father, Jim Watro, graduated
from Penn State, Sara Watro was exposed
to the conference. Being
the Big Ten’s best running game, averaging
209.2 yards per contest. In Wisconsin’s 15-14
win over No. 19 Northwestern, both Gordon and
sophomore James White broke the century mark
combined for 2 touchdowns.

That Wisconsin (+4, 2-6) uses the ground
the conference. Being
