Facility nears completion

The new Pappajohn Biomedical Discovery Building is on schedule and under budget.

By LIK ABERHOLDT
Associate editor

The latest building to dawn the University of Iowa’s Health Sciences Campus, reaching 31 stories high, will include a floor dedicated to diabetes research, high-end MEH equipment, and a café serving Java House coffee.

The Pappajohn Biomedical Discovery Building is set to be completed on June 16, and officials said the facility is projected to be beneficial to the UI, researchers, and patients.

“This building is a final piece of modernization that was started almost 15 years ago,” said Ili Lahaerts, the Facilities Management director of Planning, Design, and Construction. “It allows this noted college to excel not just because of the people … but also due to its top-notch facilities.”

The nearly $126 million facility is $7 million under the budget initially approved by the state Board of Regents, said Jim Henderson, an assistant dean of Medicine Administration. A competitive bidding climate allowed for a higher budget to be created, he said, enabling the project to be completed under the original estimate.

“We were just happy to get the case resolved,” said Jim Hayes, the estate law faculty member. “Completing a building of this magnitude on schedule at the end of the semester. A substantially completed date is May 17. A final completion date is June 16. The project will be more than $40 million. The chosen design creates the best balance between cost and benefit,” Counselor Haun Mims said.

City officials approved design parameters for the Gateway Project.

The Iowa City City Council moved forward on design parameters for the Iowa City Gateway Project at a Tuesday evening meeting.

The project will:
- Raise Dubuque Street to the level of a 100-year flood plus 1 foot
- Redesign the Park Road bridge in a through-arch style
- Raise the height of the bridge to a 200-year flood plus 1 foot

The Iowa City Gateway Project Design Approved

The Iowa City City Council approved the design parameters for the Iowa City Gateway Project at a Tuesday evening meeting.

The project will:
- Raise Dubuque Street to the level of a 100-year flood plus 1 foot
- Redesign the Park Road bridge in a through-arch style
- Raise the height of the bridge to a 200-year flood plus 1 foot

The project was approved by a 6-0 vote, with Councilor Terry Dickens absent.

“I think when you look at the difference in the cost, the difference in the environmental impact … to me that’s giving us the best bang for our buck,” she said. “That is the best balance, and doing any more than that, we’re doing more damage than it’s worth.”

The Iowa City City Council moved forward on design parameters for the Gateway Project at Tuesday’s meeting, taking an important step in a project more than five years in the making.

The project was approved by a 6-0 vote, with Councilor Terry Dickens absent.

“The vote this evening represents an important step forward,” Mayor Matt Hannigan said. “But this is also a key step in another area, that’s the Gateway Project. The city has over $40 million of work to complete.”

The approved design will elevate a portion of Dubuque Street to the height of a 100-year plus 1 foot and redesign the Park Road bridge to the height of a 200-year plus 1 foot, with a through-arch design. “The total cost out of the project will be more than $40 million,” Councilor Susan Mims said.

The chosen design creates the best balance between cost and benefit,” Counselor Haun Mims said.

UIHC settles malpractice suit

The University of Iowa Hospitals and Clinics have settled a medical-malpractice suit.

A group of University of Hospitals and Clinics doctors has paid $150,000 to settle a medical-malpractice suit.

Baldus, a former faculty member at the UI College of Law, was known for his research on racial discrimination in the law.

The lawsuit claimed Doctors Rounding was under the supervision of a doctor who was not a UIHC employee.

Pushing leadership for women

Iowa leadership program inspires to perceive. By MEAGAN DEPP

As the state Legislature begins in chambers in which fewer than 25 percent of legislators are women, Iowa N.E.W. Leadership Program is reiterating necessity of every seven years, the group focuses on bringing women into leadership positions with robust experiences throughout Iowa Women’s Action and Resource Center in pushing for applications to assist in identifying potential women into leadership roles of all sorts, and it uses the lack of women in the workforce as a reminder.

Iowa N.E.W. Leadership program was first created by the Center for American Women and Politics at Rutgers University in 1991. The N.E.W. network includes 17 colleges and universities around the country that may be nominated for the program on unit. They serve to help women in all areas send in applications for the program as well as apps are due on Feb. 1.

The program is held by Women’s Resource of Action Center, aiming to be accepting of the University of Iowa in 2007. Amended in 2007, the Iowa N.E.W. program coordinator, was amended to include a real confidence boost for women wanting leadership roles.

Women more than men need that boost,” Dvorsky said.

For five days, at least one day dedicated to workshop with business leaders and elected officials while learning skills such as negotiation, public relations, strategic communication, relationship building and conflict and collaboration.

Dvorsky, the former board of the Iowa Democratic Party and a former member of Iowa N.E.W. was asked by a keynote speaker at the program.

Young women leadership has always been an internet of minds, so I’ll watch the program with respect for a few years,” Dvorsky said.

Dvorsky spoke about young women get experience on the panel, as so many programs in the community and in academia.

The program is nonpartisan, and women in industry to welcome, regardless of political affiliation. “It’s really not political training,” Dvorsky said.

“Women have a lot to offer in leadership positions,” Dvorsky said.

After coming in last in the competition by business in a recent study groups such as N.E.W. Leadership Work to help more women become involved in leadership positions. Iowa N.E.W. is one of four states that has never sent a woman to Congress,” Dvorsky said.

“The year’s project will revolve around what women attending the program.

Women more than men need that boost,” Dvorsky said.

Dvorsky said that N.E.W. Leadership is “very important on the diversity of our program.

Each year, she said, the group focuses on “a political action project” in which women attend a workshop, mix with more panels and present a testimony or for against the panel. This year’s panel will revolve around women’s experience at the program.

Rep. Billy Stutsman, Breaburn, said some young women have a hard time getting into leadership positions because there is a lack of support in those positions.

“Women don’t always think of themselves in those positions,” Dvorsky said.

“I think women have a lot to offer in leadership positions,” Dvorsky said.

Dvorsky said most sectors want to train women for leadership positions because there is a lack of women in leadership positions in various areas.

Say hello to better, not to death on Mars

While we may like to pretend otherwise, education is far from "the great equalizer" or "the dream of an open education," as the dreary report of an education reformer Horace Mann. Rather, education in the United States has historically been a bifurcated institution, as skyrocketing tuition rates have pushed low-income students out of the university system in favor of their affluent counterparts. It's no secret, that in today's America, positive economic outcomes are highly dependent on the completion of some type of higher education. With that in mind, it is important to consider how continuing to cut off access to higher education for low-income students isn't inevitably leading to higher levels of income inequality, which is incredibly disheartening, considering that income inequality is at levels not seen since the 1920s, according to researchers at the University of California-Berkeley.

In the midst of the mostly negative news coming out on this front, however, is a small little success story at the University of Iowa, which plans to launch its first free Massive Open Online Course next month. Indeed, the university is following in the footsteps of educators Ed Folsom and Christopher Merrell, who have already had success in teaching at this level in Iowa City, Johnson County, and the state of Iowa.

The Mars One team plans to test the 24 people selected from the current pool, as well as at least 24 additional people, to whom they will be exposed to the rigors of life in the vacuum of space. This means that the people on the mission will likely have unique experiences. The Mars One team plans to test 24 people beyond the current pool, in order to see if any of them are capable of surviving in the rigors of life in an unpredictable environment.

The team will be testing these people beyond the current pool, in order to see if any of them are capable of surviving in the rigors of life in an unpredictable environment.

In 2014, we launched the collaborative mission to Mars. This is the future of human exploration and it will impact the future of our society.

I personally think that the future of human exploration and it will impact the future of our society.

In 2014, we launched the collaborative mission to Mars. This is the future of human exploration and it will impact the future of our society.

The University of Iowa police will give the UI community the chance to follow them — #onTwitter.

As many Iowa law-enforcement officials continue to reach into the social-networking world, the UI police have increased their communication to community members through social networking.

"It’s a great way to communicate with not only our student population, but also our staff and faculty on campus," said Chuck Green, the assistant vice president for the UI police. "We know that the technology they rely on is their cell phone, not their computer, laptop, or newspapers. We are trying to find people where we know they will be located."

This evening, the department will kick-off its first-ever "tweet-along." It will begin at 5 p.m. and will include an inside look at the average police officer's nightly shift.

Recently, the dispatchers have been using major social networks such as Facebook and Twitter to communicate with students, faculty, and staff at the UI about weather, traffic alerts, and important information about happenings on campus.

Officer Oleta McKenna, one of the coordinators for the event, said UI police dispatcher Tom Nixon will ride with an officer during his shift while live-tweeting about a typical night for officers.

"We are hoping it becomes a better tool that we are using this source," McKenna said. "We hope it will show the university community what we do to promote and sustain safety to keep our community safe."

Brian Ekdale, a UI assistant professor of journalism, said even though social media can be a convenient way to transfer information to the public quickly and efficiently, there are some potential ethical issues that could occur.

Lt. Aaron Chapin of the University of Wisconsin police said the department has conducted numerous tweet-alongs. Ethical issues are taken very seriously, and the department aims to protect the identity of people involved.

"We would not release something on Twitter that we wouldn’t release with a press release," Chapin said. "We try very hard to make sure that people who are involved, up to the point it is released as public record." Chapin said the tweet-alongs have been very successful, generating more than 200 followers.

"We have been working to up our social-media game lately," Nixos said. "This enables us to show the wider community what the officers are doing and why we are doing it."

Lt. Aaron Chapin of the University of Wisconsin police said the department has conducted numerous tweet-alongs. Ethical issues are taken very seriously, and the department aims to protect the identity of people involved.

Chapin said the tweet-alongs have been very successful, generating more than 200 followers.

UI Police Tweet-along

While social media use continues to rise within Iowa police departments, the University of Iowa Police Department will now join law enforcement forces from across the nation for a tweet-along.

On Twitter, the department will take questions from the public and respond to them. Green said this is a new way for law enforcement agencies to communicate with the public.

Nixon introduced the idea to the department. He said that if law enforcement can use social media to communicate with the public, the community will feel safer.

"We have been working to up our social-media game lately," Nixos said. "This enables us to show the wider community what the officers are doing and why we are doing it."

Lt. Aaron Chapin of the University of Wisconsin police said the department has conducted numerous tweet-alongs. Ethical issues are taken very seriously, and the department aims to protect the identity of people involved.

"We would not release something on Twitter that we wouldn’t release with a press release," Chapin said. "We try very hard to make sure that people who are involved, up to the point it is released as public record." Chapin said the tweet-alongs have been very successful, generating more than 200 followers.

He said he saw other departments in Wisconsin and Texas participate in tweet-alongs as well.

"We want students and staff to know that we are available to them as a resource, and we are here to serve them," Green said. "This is a way to provide immediate in- formation to residents that has institutional or campus-wide impact on our community."

C'ville creates arts panel

Corvallis will set up a Commission of the Arts, which will work with the Corvallis City Council and the Corvallis Public Library.

**By Alison Keim**

After three years of full-scale performance, meetings, and public and private events at the Corvallis Arts Commission for the Performing Arts, city officials are looking to take the next step in motivating cultural expansion. The arts community will get a chance to participate in the next steps.

The city council has decided to create a Corvallis Arts Commission, which will work with the arts community to further improve the performing arts program. The commission supports not only the Center for the Performing Arts, but the arts in general for Corvallis," said Ben Gillig, the president of the Corvallis Parks and Recreation District.

The city started accepting applications this past month and will continue until Feb. 21. Three applicants must be Corvallis residents, but residents from the greater Johnson County Area could fill the two open positions.

With the panel, Corvallis will be able to maximize the facility and maintain the quality programming that critics and audience members like. "This will be an opportunity to guide policy, give feedback, be able to support the arts, and bring new ideas to the city of Corvallis, Gillig said. "Increasing involvement in this program is doable and committed to the arts is beneficial," said Ben Gillig, the president of the Coralville City Council.

"If we have the arts in our community, it will make the city and the residents much more well-rounded. "Now that we have a facility to do this programming — μusic, dance, and everything else that goes on that stage — it is important to have a group of informed commission members to have them oversee," he said.

The volunteer panel will meet around once a month to discuss ideas, expansions, as well as other details for further developing the arts in Corvallis. City officials said the ideal member of the commission is an arts panelist who is highly knowledgeable and committed to expanding the arts. "We want to maximize the use of that beautiful facility, and having a group of people who have some sort of expertise of the arts is beneficial," Gillig said.

**CELEBRATION OF EXCELLENCE AND AWARDS**

**Among Women:** Committee is accepting nominations for the 2012-2013 Distinguished Achievement Awards.

The Distinguished Achievement Awards are given to a UI student and faculty member who has distinguished himself/herself and the University by her or his record achievement in a professional or service capacity within the University. The awardees are given annually individual PIN awards, which provide arts panelists, in addition to other honoraria. Their contributions demonstrate leadership, innovation, and/or subject matter expertise.

For a nomination form or for more information, please contact M.Woodhams at the Biology blanket Center, 600 BISH, or e-mail at HYPERLINK "mailto:jwoody@uiowa.edu" jwoody@uiowa.edu

Nominations due by Friday, February 7, 2014

To be awarded at the Celebration of Excellence And Achievements: Among Women, Tuesday, April 10, 2014

3:00 pm, Second Floor Ballrooms, Iowa Memorial Union.

**EDITOR WANTED**

An aggressive, talented individual is sought as editor of the Daily Iowan. Iowa City's largest news organization, with an enrollment of more than 100,000 students, an editorial budget exceeding $50,000 and a circulation in excess of 5,000. The student newspaper is the fastest growing in the country. It wants an experienced editor in chief who is highly knowledgeable and committed to expanding the arts.

The volunteers will meet around once a month to discuss ideas, expansions, as well as other details for further developing the arts in Corvallis.

"Now that we have a facility to do this programming — μusic, dance, and everything else that goes on that stage — it is important to have a group of informed commission members to have them oversee," he said.

The volunteer panel will meet around once a month to discuss ideas, expansions, as well as other details for further developing the arts in Corvallis. City officials said the ideal member of the commission is an arts panelist who is highly knowledgeable and committed to expanding the arts. "We want to maximize the use of that beautiful facility, and having a group of people who have some sort of expertise of the arts is beneficial," Gillig said.

"This will be an opportunity to guide policy, give feedback, be able to support the arts, and bring new ideas to the city of Corvallis, Gillig said. "Increasing involvement in this program is doable and committed to the arts is beneficial," said Ben Gillig, the president of the Coralville City Council.
they’re in the national championship picture. Last year, they’ve underrated in over the years. So that Sweet 16 may be enough.

Both teams are coming off spectacular wins — Nebraska defeated the University of Wisconsin in Madison and Minnesota after trailing Wisconsin and Iowa with its triumph against the Hawkeyes. The Gophers, hitting 9-of-20 rights of Iowa,” Mallett said. "The defense. We had a lot to do with that. The seniors are definitely a big, usually by a 12-point margin. The Hawkeyes defeated Minnesota, 78-71, won 82-65 when it traveled to Iowa City on Jan. 12, and defeated Wisconsin, 78-71, on Jan. 10. The team defeated Ohio State, 81-74, on Jan. 1. Iowa guard Josh Oglesby said. "Going into Minnesota — they’re going to be another good test for us. We just have to prepare like usually do. Going into Wisconsin is a tough place to win … It’s the Big Ten.”

"I try to do more and have more fun,” Ramsey said. “It’s just what drives a little bit of interest, I like interacting with the crowd, interacting with people. I like being around coaches. I’m not just one who’s going to not acknowledge them. I also want to have and walk away.”

"I think this is a huge win for us, especially after Minnesota did what they did to Ohio State. (Michigan) beat some good teams; they’re a terrific ball club,” Oglesby said. "Going into Wisconsin — they just beat Iowa. They’re going to be another good test for us. So just have to prepare like usual do. Going into Wisconsin is a tough place to win … It’s the Big Ten.”

Iowa guard Josh Oglesby agrees. ‘I think this is a huge win for us, especially after Minnesota did what they did to Ohio State. (Michigan) beat some good teams; they’re a terrific ball club,” Oglesby said. "Going into Wisconsin — they just beat Iowa. They’re going to be another good test for us. **Iowa heads to Michigan ranked in the top 10**

By BEN ROSS

Iowa has proven itself to be a team capable of scoring points in numerous categories. This is Grilli’s third such award in the last two weeks.

Iowa diver Abby Grilli has been named the Diver of the Week, conference officials said.

It may seem as if the team may be struggling with conference losses, but this is the best team Iowa has fielded during that stretch.

Now that Ohio State has more or less defeated the Big Ten by losing its last four conference games, Iowa has the chance to get its biggest conference win of the season against No. 21 Michigan (13-5, 5-0). The Hawkeyes have nine times out of the last 10 contests at the Crisler Center, which the Wolverines call home, but this is the best team Iowa has faced during that stretch, though.

The Maize and Blue had a shaky start to the season, losing games against Iowa State, DePaul, and Arkansas. But Michigan now boasts a squeaky clean conference record, its biggest win coming on Jan. 18 when it trounced Wisconsin in the secretly important win over the Badgers.

Michigan is finding a way to win without senior point guard Sam McGuffey, who has been sidelined for the rest of the season following back surgery. Nik Stauskas averages 18 points and 4 assists for a game in Michigan, and he has a career-high 23 at Wisconsin. Stauskas is one of the most important if Iowa wants to build on its current No. 10 ranking in the AP poll.

The last time Iowa played in Ann Arbor featured a 95-67 thrashing, in which the Hawkeyes

The Iowa women’s basketball team has had its share of triumphs and losses through six games of the Big Ten season, and it has a split record of 3-3 to show for it.

Despite Doolittle’s 25 points on an extremely efficient 8-of-15 scoring, it wasn’t enough. Doolittle frequently uses her speed to cut the floor for Iowa, but could not get in position to score points at any level.

Despite Doolittle’s 25 points on an extremely efficient 8-of-15 scoring, it wasn’t enough.

One of the most impressive accomplishments of this storyline has been Doolittle’s frequent outlet passes, which led to a 3-for-3 showing, as the junior has the most height on the team, and her time at power forward increased her scoring range, stretching the floor for Iowa and bringing in double digit-scoring every game. She also contributed 8 assists to+, 2 steals, and 2 blocks.
