A groundbreaking began the process of building a new elementary school on Tuesday. The elementary school is expected to open in the fall of 2015.

By ALEX HANAFAN

After months of planning, South Elementary took a step forward. Elementary students from Grant Wood, 1930 Lakeside Drive, and Twain, 1355 Deforest Ave., joined Mayor Matt Hayek, 1335 Hayek Street, and Interim Superintendent Marilyn King-Hayek, 1502 University School Rd., for the groundbreaking ceremony Tuesday afternoon.

The elementary school is expected to open in the fall of 2015. The building will be located on the east side of Sycamore Street. It will have 66,856 square feet and contain a double-sized gymnasium for grades K-5. The double-sized gymnasium resembles the one at Wood Elementary. Officials believed that size gym would help benefit families as well as the community.

“The gym will bring families together as well as host meetings for the Iowa City community,” Hayek said.

South Elementary will be one of three new elementary schools and one new high school. The new school will be built because the district has become overcrowded. Last year, a report indicated that the district’s enrollment had increased by 1,852 students in the past ten years. More than 20 percent of students in the School District don’t attend the schools closest to their homes.

The district’s attendance area development has been designed to restructure the areas the district’s schools pull from to provide a more balanced socioeconomic surrounding as well as lessen the overcrowding of students.

South Elementary will have a capacity of up to 500 students and will be the first school to open for the 2015 academic year. “This is the first new elementary school built in Iowa City in more than 20 years and the first east of the river in more than 40 years,” Hayek said.

The project will cost roughly $11.2 million to complete. Hayek said this area of Iowa City community, “For the next few months, it’ll be on the front burner until the great,” Lyness said. "It’s still in process; there are still a lot of things,“ Miller said.

Local courts go digital

By MICHAEL KADRIE

Paper record keeping is a thing of the past for the Johnson County courts as they embrace digital storage in a move toward environmentally conscious ways.

A federal judge opened the door Aug. 17 in Johnson County will be entirely paperless, the Iowa City Press-Citizen reported. All court files will be available 24 hours a day, 7 days a week to the concerned parties and authorities. The shift is part of a four-year, ongoing, coun-

ty-wide initiative across Iowa to use electronic data management systems. Filing such court documents as depositions, restraining orders, and verdicts electronically will cut costs for the coun-

ty and the jury as well. It’s not just about saving paper, either. "It’s about being paperless, the county will save storage space," said Mickey Miller, a grants and communications specialist for Johnson County. However, any new system implement-

e on this scale is bound to encounter a couple problems, such as a learning curve for employees.

"It’s still in process; there are still a lot of issues," Miller said. One common issue in the system before June 17 will be filed both electronically and physically and that case is closed, which, County Attorney Jessica Lyness said, was one of the most difficult aspects of the transition.

Lyness said the next couple of weeks will be busy as employees adapt to the new system.

"For the past few years, this system has been used in the great," Lyness said. "It’s still in process; there are still a lot of things," Miller said.

Downtown corner still vacant

By PAUL OSBERY

The ball is now in the university’s court after the Iowa City City Council approved the deadline covering a potentially valuable plot of land.

The property is located on the intersection of Burlington and Clinton streets, and developers are now waiting for University of Iowa to make a decision on whether it is interested in pursuing the location.

The extension means, we will get sit back and wait," said Kevin Bingham, a partner of Bingham AIA, which is a con-

struction specialist that designed the master plan for downtown and Riv-

erfront Crossings.

A proposed building would be a high-rise, which fits in with the master plan for downtown and Riv-

erfront Crossings. All plans and designs are put on hold for the moment, Bingham said. At last week’s City Council meet-

ing, members voted 7-0 to sustain

She said the southern area is expecting enormous growth, with more than 17,000 acres of new residential housing and an estimated of 20,000 new residents before 2019.

In addition to a new school, Hansk said the city is investing approximately $3 million to improve Emerson Street and another $1 million in cleanup flood Island Road. The roads are parallel to each other and will serve as feeder to the new school.

Superintendent Steve Murley said the Lehman family — a local family living in the area — donated two of their acres equivalent to $700,000. He noted that although it may not seem large in scale, it helped keep the project "right on track."

"We are certainly appreciative of their generosity," Murley said.

School Board Presidentolly Hollecher, who was al

noted that the investigation process. Law documents are being rewritten and historic markers have to be established before the next phase of investigation begins.

"Any projects that include federal funding support will often include stringent requirements for any finds discovered on the project site," Rod Lohns, the director of planning, design, and construction for UI Facilities Management, wrote in an email.

Sorting through legal documents and associated measures that must be taken are two reasons the second round of digging won’t begin until September.

With the park being closed, some students must use the open field during summer, and create that had been planned to be held at Hubbard Park have been moved. Whittaker said after the work is completed, local residents will be able to see another aspect of the city’s history.

whittaker said that he expects work to uncover more documents in Hubbard Park in the future.

"The historic records show that this was a neighborhod," Whittaker said, noting that he believes a large number of houses formerly occupied the block.

In the flood of 1951, the site was covered in a layer of soil, Whittaker said.

The city has previously reported.

American Indian artifacts, such as arrowheads dating back to 3,000 B.C.E. have also been discovered, the DJ has previously reported.

Soccer players know the heat

With questions about the heat at the World Cup taking place in Brazil, some have expressed concern about the health of players and how well they can perform in the heat. During the United States' recent draw against Portugal, officials called for the first ever water break in World Cup history because of the high temperatures. When examining intense forms of exercise, such as soccer, that are played in high temperatures, it is important to look at the two effects of elevated body temperature: hyperthermia and dehydration.

Hyperthermia reduces the body's ability to maintain metabolic contractions for longer lengths of time. Dehydration can occur very quickly in a hot environment, and athletes suffering from dehydration quickly lose endurance and become exhausted much faster.

Flaring in hot conditions not only affects players physically, it can also influence their performance mentally, causing players to make simple mistakes. This is especially true if players haven't had any previous experience with playing in hot conditions.

Despite the competition, Iowa female field hockey athletes are embracing the heat.

**HOROSCOPES**

**ARIES (March 21-April 19)** You think it's time to do it all. Fat" attitude will help as long as you don't expect anyone to keep up with you. Offering to do extra will just put you in a good position when it comes to advancements that are highlighted.

**TAURUS (April 20-May 20)** Keep your plans out in the open. You don't want anyone to accuse you of withholding information. Ask questions if someone is looking for a handout or offering a phony sales pitch. Keep anyone using emotional manipulation at arm's length.

**GEMINI (May 21-June 20)** You are likely to face delusional situations. Listen carefully, and ask questions if you think you are being misled. Offer practical and honest answers. A stalemate will develop if you aren't willing to compromise. Emotions will be difficult to control.

**CANCER (June 21-July 22)** Don't make decisions based on hearsay. Go directly to the source, and ask questions to find out exactly what's going on. Investigating something you would like to pursue before you sign up to do so. Preparation will save you emotionally and financially.

**LEO (July 23-Aug. 22)** Take action, and let everyone see how efficient you are. Your charm and diplomatic way of dealing with controversy will win you points at home and at work. Offer physical and intellectual help, but be cautious about promising financial assistance.

**VIRGO (Aug. 23-Sept. 22)** Prepare to face opposition. Listen, observe, and question if you feel confident you have enough information to make an intelligent decision. Don't let someone using relentless emotional blackmail coerce you into making a premature or poor choice.

**LIBRA (Sept. 23-Oct. 22)** You can wheel and deal along the way. Travel and romance are highlighted. Hunting for the right thing at the right time, you will overcome any confusion you face and changes that will help you understand and circumvent setbacks. By doing the right thing at the right time, you will overcome any confusion you face along the way.

**SCORPIO (Oct. 23-Nov. 21)** Don't waste time. You can make monumental changes that will help you understand and circumvent setbacks. By doing the right thing at the right time, you will overcome any confusion you face along the way. These measures are highlighted.

**SAGITTARIUS (Nov. 22-Dec. 21)** The game of life is won. Your enthusiasm, high-energy approach will capture interest personally and professionally, but don't make claims that you won't be able to deliver. Focus on ensuring you are living a balanced life. Your confidence will be strengthened, capricorn (Dec. 22-Jan. 19) Stick close to home, and avoid making changes that could be unpromising. Keep the simple and your expenditures moderate. A challenge may tempt you, but caution is necessary to ensure you are not being duped.

**AQUARIUS (Jan. 20-Feb. 18)** Your determination will help you understand and circumvent setbacks. By doing the right thing at the right time, you will overcome any confusion you face along the way.

**PISCES (Feb. 19-March 20)** May be forced to take action when it comes to something you are being offered. An inter- ested situation will be resolved with deception. Protect your heart as well as your assets. Someone will try to covertly see into doing something you shouldn't do.

**Iowa men’s swimming schedule released**

Iowa men’s swimming and diving coach Mark Lewand announced Tuesday that the team will host the Big Ten Zone Meet and the NCAA Zone Meet, and both championship events will take place in Iowa City since 1927, when it was last held in the Hawkeye State. Iowa will host the Big Ten championship in 2013.

**The Big Ten championships will take place from May 23-26, and the NCAA Zone Meet will be held May 25-26 at the Campus Recreation & Wellness Center.**

**Triple threat continues to impress observers**

Incoming Hawkeye freshman Josh Silverstein continues to draw comparisons to the 1975 All-American Junior Clay Court National Qualifier. "What qualified the exceptional Boys 18s National Team, one of the top junior tennis talent in America, to qualify for the association’s National Championships," the association's tournament director asked.

"Silverstein was second in the Boys 18s National Team," the tournament director wrote. "Qualifier and won a straight set victory over Ben Becker. Currently ranked No. 1, Silverstein was in the opportunity to provide a big upset. Anticipate it. He will force the issue in the quarterfinals over No. 1 seed Daniel Kerzman. Dethroning the champion of last year’s National Championships, Silverstein has the small edge in the semifinals. In the International Tennis Federation’s World Junior Team,” the tournament director wrote. "Facing off against four of the best junior players in the country." — by Nick Steffen

Lessons learned in Game Time play

By WILL MCDAVID

After the Game Time Basketball League’s summer debut, coaches and players alike readily themselves for today’s game, the wins and losses of the previous week providing valuable lessons.

For coach Clark Anderson’s team, a 20-point blowout victory over opposing player Malina Dixon in last week’s game was a reminder of how crucial guard time is — even at the point of the lineup. “We had that matchup problem with Dixon. She’s just that kind of kid that has her way out there,” Anderson said. “It definitely would have helped to have her there.”

While her squad’s last game was overshadowed by Logan’s absence, her return to the lineup gives Anderson’s team a sense of continuity optimism for the final game of the fall strength.

By DANNY PAYNE

The Big Ten presidents and chancellors weighed in on the O’Bannon trial Tuesday by the University of Iowa President and head of Big Ten Council of President’sChancellors, Sally Mason, the council just put forth a four-point plan outlining its stance.

```
Ed O’Bannon v. NCAA is a court case in which a group of former and current football and men’s basketball players, headed by former UC Santa Barbara player Ed O’Bannon, aimed to receive compensation for the NCAA’s use of their names, images, and likenesses. They claim the NCAA raises violations in their game.
```

They council’s first point was that the 14 universities in the league will guarantee four years of scholarship. Regardless if the student-athlete completes the semester or not, the scholarship is still valid. The second point was that scholarships are lifetime guaranteed. This means that if a player leaves before their four years are up, they can come back and finish their degrees at any time.

```
The council members said they want to provide better and consistent medical insurance for student-athletes.
```

The final goal is to cover the full cost of tuition, not only part of it. This means to cover the full cost, as defined by the federal government, which is designed to pay for all aspects of college tuition. While Big Ten Commissioner Jim Delany is not a member of the council, he said he agrees with the four points and would like to move onto the next steps to getting them implemented.

As the Big Ten Network Thursday “The devil is often in the details, but I think there is a lot of momentum to not only change the outcome for 21st-century student-athletes but also affect the narrative.”

**GAME TIME LEAGUE**

Lessons learned in Game Time play

By WILL MCDAVID

```
```

After the Game Time Basketball League’s summer debut, coaches and players alike readily themselves for today’s game, the wins and losses of the previous week providing valuable lessons.

For coach Clark Anderson’s team, a 20-point blowout victory over opposing player Malina Dixon in last week’s game was a reminder of how crucial guard time is — even at the point of the lineup. “We had that matchup problem with Dixon. She’s just that kind of kid that has her way out there,” Anderson said. “It definitely would have helped to have her there.”

While her squad’s last game was overshadowed by Logan’s absence, her return to the lineup gives Anderson’s team a sense of continuity optimism for the final game of the fall strength.

```
```

"Obviously, having Sam is going to make a big difference," he said. “We’ve just got to play to each other’s strengths and keep playing hard.”
```

To opposing coach Randy Larson, some things are in flux and what his team can achieve when Dixon was out. "I really felt like Melissa had to be the person that got it going for us," Larson said. "I really encouraged her to be aggressive (she’s just natural)" really well. She’s got such a great, quick release that she doesn’t need much room to get open.”
```

Through Anderson’s efforts to subside Dixon was ultimately unsuccessful, his defensive strategy proved Larson with helpful information, allowing him to interpret the lessons of last week’s game as a means of anticipating schemes engineered to contain his top scorer.
```
