BOLKCOM FOCUSES ON GREEN ISSUES

Sen. Joe Bolkcom discussed environmental issues related to Iowa during a talk for the University of Iowa Environmental Coalition.

By ALYSSA GUZMAN
alyssa-guzman@uiowa.edu

Sen. Joe Bolkcom, D-Iowa City, said he thinks environmental change will take 10 to 20 years — although the work will never be done. That was the focus of a talk Bolkcom gave at the University of Iowa on Thursday to highlight the importance of climate change in Iowa. He proposed water conservation, solar energy, and carbon reduction as the three most important issues to Iowans. “It’s an ongoing investment,” Bolkcom said.

IC works on food waste

Iowa City initiatives spread awareness on food-waste dangers.

By GRACE PATERAS
grace-pateras@uiowa.edu

When it comes to recycling programs, an Iowa City organization has been recognized by a government agency for excelling in initiatives to better the environment and overall well-being of the community.

Most recently, the Environmental Protection Agency recognized government officials from the Iowa City Landfill and Recycling Division for participating in an EPA food waste reduction pilot program.

EPA Midwest representative Gayle Hubert said Iowa City already had established sustainability programs, and officials were more than willing to participate in the program “Food Too Good To Waste.”

The City Planning and Zoning Commission debated demolishing a group of Iowa City cottages.

By RACHEL GREEN

A group of Iowa City cottages will remain standing, at least for now, following a decision by the Iowa City Planning and Zoning Commission.

The three cottages were built in the mid-19th century and old South Dubuque Street. Some in the community are calling for the buildings to be preserved, while others are calling for them to be demolished.

These cottages are part of the story of Iowa City, said Alicia Trimble, the director of Friends of Historic Preservation. “These cottages give those who people who made Iowa City lived. The cottages influenced the lives of many people.”

The Planning and Zoning Commission met Thursday to discuss a request to demolish the buildings on the 600 block of South Dubuque Street. Many working-class residents lived in three cottages on South Dubuque Street. Those buildings are still preserved because they are not designated historic buildings.

The change would be from a community commercial zone and intensive commercial zone to a Riverfront Commercial-Central Crossing Zone. “It says in the Comprehensive Plan that preserving these structures is a goal,” Trimbale said.

History writer, said that this property was not in a park on the family.” Pasha said.

If the building is approved, a mixed-use building or retail building will be built on the 600 block of South Dubuque Street.

The UI branch of the Association of Indian Development Marks the 30th anniversary of the gas disaster in Bhopal, India.

Remembering Bhopal gas disaster

By Daniel Valentine

toxic waste containing methyl isocyanate that5.0 million people in the6.0 million people in the 4.0 million people in the 2.5 million people in the 3.0 million people in the 1.0 million people in the 2.0 million people in the 1.5 million people in the 1.0 million people in the area. Some 300,000 people died in the immediate aftermath of the disaster. The Indian government and industry officials are under pressure to compensate for the disaster and to prevent similar incidents from happening in the future.

The Indian government has compensated some of the victims, but many still face economic hardships. The Indian government has also put in place safety measures to prevent similar incidents from happening in the future. However, there are still concerns about the safety of chemical plants and the risks associated with the storage of toxic chemicals.

The Bhopal gas disaster is widely regarded as one of the most tragic industrial accidents in history and a turning point in the global environmental movement. The disaster highlighted the risks of industrial accidents and the importance of safety measures and regulations in the chemical industry.

BOLCKM CONTINUED FROM FRONT

mon,” said. “Our land isn’t something that we can just ig- nor. We have to invest back into our land and space.”

Each month, the University of Iowa Environmental Coali- tion hosts a series with a theme pertaining to envi- ronmental issues and topics.

November’s theme was “environmental policy.” “We thought Jen, Joe Bolkcom, who represents Iowa City, would be an excellent individual to speak regarding this month’s theme,” said UI senior Sarah Na- ngengea, co-presi- dent of the coalition.

Bolkcom, who is a member of the Nat- ural Resources and Environment Com- mittee and Environmental Justice Com- mittee for the Outreach Coordination Directer for the Iowa Flood Center and the Center for Global and Environ- mental Research, is working in the area to par- ticipate in the direct climate change recog- nition plan and real- ize that Iowaans have to start doing more.

“The nutrient-reduction strategy is a volunteer strategy,” Bolkcom said. “We’re trying to clean up our water bodies and keep all things like phospho- rous and nitrates out of our water. We all need to voluntarily agree to do better.”

The proposal states that the next time Io- wa raises its sales tax, three-hundredths of a cent will be taken toward water conservation and other environ- mental issues, which would equal $150 mil- lion of funding for a year.

The state primary issue with this proposal is persuading legislators that raising taxes is the right thing to do, which is why it has not yet passed.

“Why would it be a bad idea?” Bolkcom said. “It would raise a bunch of jobs and start the work of cleaning up Iowa’s rivers, lakes, and streams.”

Water con- servation and cleaning our local water bodies is how we can help its farmers, which Bolkcom said costs a lot of money.

“The challenge for Iowa is we haven’t had the resources, and when we have had the resources, we never put them forward for a program,” he said.

Though some envi- ronmental chang- es are costly, Iowa is also pushing forward on one more of an uptake on climate.”

FOOD CONTINUED FROM FRONT

Jane Wilch, Iowa City recycling projects ove- rall coordinator and co-director of the monthly program in Iowa City, and the initiative’s main pur- pose is to get people to dis- gers of wasting food and cut out food waste in Iowa City households, they said. “The amount of food waste, you can’t eat because you didn’t eat what you bought,” she said. “Compost your what you bought,” she said. Because you didn’t eat it, they said. “The amount of food waste, you can’t eat because you didn’t eat what you bought,” she said. “Compost your what you bought,” she said. “The amount of food waste, you can’t eat because you didn’t eat what you bought,” she said.

The program will be used for officials to learn about the cities’ food waste programs. Officials give 50 participants to evaluate the amount they amount down in a house, and age of par- ticipants. Freedom to marry gaining

A brief respite following a bloody summer in the Middle East has been broken; the violence struck yet another blow today, when seven Palestinian men—six of whom were teenagers—and four youngsters were killed. War erupted once more, this time in the Gaza Strip and throughout the region. Assuming that the United States has not declared a military policy, it is the job of the UN Security Council to project a resolution to this ongoing conflict. If it is to be located at the UN, it will be a resolution calling for an immediate ceasefire, as the international community demands. As this conflict continues, the United States must remain committed to peace and to diplomacy, not to violence.

COLUMN

NFL needs zero tolerance policy

In a letter written by Daniel Valliant, a former University of Iowa student, it was stated that he believes the NFL needs to implement a zero tolerance policy on domestic violence. This letter was published in The Daily Iowan, a university newspaper.

LETTER TO THE EDITOR

Veteran graduation-rate figures wrong

I recently read the article written by Daniel Valliant about how the NFL needs to implement a zero tolerance policy on domestic violence. The article was published in The Daily Iowan, a university newspaper.

The statistics that Mr. Valliant cites in his letter are wrong. According to the NFL, 84 percent of veterans do not graduate college from the programs that the NFL supports. Mr. Valliant cites these figures in his letter, and he implies that these figures are accurate. However, the statistics that Mr. Valliant cites are not accurate. The correct statistics, which are published by the NFL, show that 84 percent of veterans do not graduate college from the programs that the NFL supports.

I urge Mr. Valliant to review the statistics that the NFL provides, and to correct the statistics that he cites in his letter. Thank you.
The University of Iowa’s College of Law has been planning a new degree program it hopes to start by next fall.

The program will be called the Master of Studies in Law and will potentially be presented to the state Board of Regents at its next meeting.

College of Law Dean Gail Agrawal said she started thinking about the program around a year ago, and even after she got a group of law professors together, with Bohannan leading the way, to formulate the specifics of the program. “It’s something that we realized was important because we hear regularly about students who say they’d like to take a law-school course, I need to know a little bit more about ‘fill-in-the-blanks’... but I don’t need a law degree because I want to be an engineer or a business person,” Agrawal said.

The value of the program is that it could supplement a variety of degrees and be applied to many careers, Agrawal said.

It’s a master’s program that can be very targeted to the interests and needs of each student, so a student who might be interested in the financial services industry, that student’s coursework might look very different from a student who’s interested in the health-care industry,” Agrawal said.

The program would be 30 credit hours, so it could be completed in one year of full-time classes or four years of part-time classes, Bohannan said, and it would also be a cheaper option than a traditional law degree.

Bohannan said she submitted the program’s proposal to both the law-school faculty and the Council of Professors for review, and it was approved, so she’s hopeful about its prospects. “It will be a great opportunity for people in their 20s who never entertained the idea of law school before,” she said.

“Now there’s a new cohort of people who want to learn law and who want to practice law but who run into legal issues in their work,” Prof. Christina Bohannan said.

“We think this has the potential to bring in a lot of different kinds of people, people who have been out working for a while, people who maybe got their bachelor’s degrees,” she said.

The proposal would be presented to the Iowa Board of Regents at its next meeting, and if it approves, Bohannan said, the school could have students in the program by fall of 2015.

Currently, the Drake University Law School is the only other school in the state that offers a degree similar to the Master of Studies in Law, called the Master of Jurisprudence.

Preston Nicholson, the associate director of admissions and financial aid at the Drake school, said the one-year program started approximately a year and a half ago, and in that time, “it has been a success.”

“It’s opening us up to a new population of people that we weren’t previously reaching,” Nicholson said.

This is also the goal with the UI’s potential program as well, Bohannan said.

Man faces motor-vehicle, drug charges

Authorities have arrested an Iowa City man on charges of stealing from a parked vehicle and possessing marijuana.

Michael Amling, 21, was charged Wednesday with three charges of breaking and entering, the value of which is a violation of the Iowa criminal code. Amling was reportedly found in the front seat of a silver van with several vehicles.

According to online court documents, Amling allegedly admitted he entered the vehicle in an act of burglary.

Officials at the University of Iowa College of Law are developing a program to aid students who may want this experience without going to law school. “(The degree) really was important because we hear regularly about students who say they’d like to take a law-school course,” Agrawal said.

The program would be 30 credit hours, so it could be completed in one year of full-time classes or four years of part-time classes, Bohannan said, and it would also be a cheaper option than a traditional law degree.

Bohannan said she submitted the program’s proposal to both the law-school faculty and the Council of Professors for review, and it was approved, so she’s hopeful about its prospects. “It will be a great opportunity for people in their 20s who never entertained the idea of law school before,” she said.

Preston Nicholson, the associate director of admissions and financial aid at the Drake school, said the
Andrew R. Juhl, Professor of Letters:

"Dear DNA: The exact Mendelian side of me having the following combination was 1/64: my father's weak chin, my mother's splotchy skin, my father's big nose, my mother's elephantine ears, my father's slow metabolism, and my mother's unibrow. I would have liked to have done better. Then again, I'm growing as I would have my parents.

"Dear Radiation of the Waves: I have had the chance to work with the warp-speed formulae, topical anesthetics, and hour pills. I want my other colleagues to take my frequency-balancing laser Canon, already. What's the use in using technology if we can't use it to thrust the foundation to the feet? Fear not, Mr. Postman. "Then he got sued for using the waves to make the fake zebra. "But you are fictitious, so would a zebra on the African plains. It's 2014. You can quit the zombie apocolypse. It's time to give me your best shot. It's time to get real."

"Dear Twinkie the Kid: I wish I had the same memory of the people you know. Nothing to do with the hair-growth formulae. You're blessed."

"Dear DNA: Mendelian odds of me having the use of scientific progress is 1/64: my father's weak chin, my mother's splotchy skin, my father's slow metabolism, and my mother's unibrow. It will be hurt if you are too critical. Truth isn't always the best choice, but I would help you blow off steam."

"Dear DNA: I'm guessing so the universe will play in your favor. Participate in an industry event. Physical activity will be forced to make a move or a decision. Don't wait until your choices are limited. Check into every possibility and take action. Don't count on anyone to do things for you."

"Dear DNA: Don't expect to get favors or get along with the people you love. A trip will lead to an interesting purchase that allows you to show off your expertise in an unusual way."

**Horoscopes**

**PISCES (Feb. 19-March 20):** Caution should be taken when it comes to supportive, affectionate, and willing to compromise. Choose your words carefully. Someone will help you blow off steam.

**CAPRICORN (Dec. 22-Jan. 19):** You are in a good position to negotiate, want and need in your life. Pressuring you will be a wash. Get the most for the least.

**SAGITTARIUS (Nov. 22-Dec. 21):** Express your thoughts and plans. Consider expressing yourself. Gaining information that will make you more appealing. Possibility and take action. Don't count on anyone to do things for you.

**TAURUS (April 20-May 20):** Don't slack, or you will ruin your weekend. Gather information that will make you more appealing. Don't undersell what you have to offer.
Hawks’ offense heats up

By KYLE MANN
kyle-mann@iowastate.edu

The Iowa women’s basketball team will host the Hawkeye Challenge this weekend, and Coach Lisa Bluder has scheduled to tip off with Pepperdine at 7:30 p.m. today and again against a play-

er in winner at the same time on Saturday.

In an event that produced some early season fireworks for the Hawkeyes last season, here’s what to watch for:

Will Lisa Bluder’s offense continue to effortlessly operate like clockwork?

In the team’s exhibition game versus St. Ambrose, it scored out of 10 players contrib-
ute to a mind-blowing 33 made field goals, 97-93 in overtime. The Hawkeyes shot 54.5 percent in the second half. Though they came

out on top last time, the Hawkeyes ultimately

won a competitive game and a hard-fought one.

The Oct. 18 match was close at first, but that really

happened to us last season, here’s what to

expect in Saturday’s match:

- It’s at their place, and I’m sure they’ll be

out to play as well. Like us, they’re not

the tallest, but they’re very versatile, so it’ll

come down to the accurate

and how we prepare ourselves. It should be a

good game and a hard-

The Iowa volleyball team will attempt to go 2-0 against the Wildcats this season.

by KYLE MANN

By KYLE MANN

The Hawkeyes have

struggled this season on the ground, Bluder’s team would make it, but the pace and

efficiency with which her team has performed is nothing short of, one

would think, unsustainable.

The Hawkeyes have

improved around 50 per-

cent from both the floor and the free-throw line, which illustrates that if her

players have been open, they aren’t missing.

Furthermore, in the two

regular-season games, they average 26 assists

on 33 made field goals, which holds true for

their chances of continuing to find those open shots.

How will the freshmen

be used as meaningful comple-

mentary components?

Whitney Jennings has

shown potential to become a two-

dimensional player, as a shooter,

ball handler, as a shooter,

and generally as a spark

and diversify. Lauren Bond Shymansky’s of- fire is nothing short of, one

season’s first game, in

be used as meaningful

complementary components.

Having a player with the athleticism to

operate like clockwork, but that really

doesn’t mean anything,” Alyssa Klotzleman

said. “It’s at their place, and I’m sure they’ll

be out to play as well. Like us, they’re not

the tallest, but they’re very versatile, so it’ll

come down to the accurate

and how we prepare ourselves. It should be a

- Hawkeye Schedule: More games announced for the upcoming weeks.
- News and Updates: Latest news and updates from the Iowa Athletics Department.
- Hoops: More basketball games announced for the upcoming weeks.
- Wrestling: More wrestling matches announced for the upcoming weeks.
The Iowa football team has to stop the best running back in the nation to have a shot at the Big Ten West title.

**GORDON POSES HUGE CHALLENGE**

There isn’t any hesitation in Mark Weisman’s answer when a member of the media asked him to compare his game with Melvin Gordon’s.

“There’s no comparison, he’s the best running back in college football,” Weisman said. “He’s unstopable, and he’s a force to be reckoned with. If he’s going to be a big challenge for us to be able to contain, to stop him, whatever it may be."

As anyone who pays the smallest attention to college football knows, Gordon is coming off the best single-game rushing performance of any running back in NCAA history. He rushed for 406 yards in three quarters against Nebraska last weekend.

Iowa’s defense, which ranks sixth in the Big Ten and allows an average of 147.8 rushing yards per game, has been gashed by the league’s premier rushing attacks its last two outings.

In the end, what Iowa found would haunt it.

Texas’ frontcourt proved to be too much for Iowa, burying the Hawkeyes on both the offensive and defensive ends of the floor.

While beleaguered, the Longhorns ultimately found their footing in the second half, outscoring the Hawkeyes by 20 points in the latter period on the way to defeating Iowa in the 2K Classic in Madison Square Garden, 71-57.

Iowa burst out of the gate to an early 10-2 lead on two early 3-pointers from Jarrod Uthoff. But even when Iowa led, there were signs that the lead wouldn’t last for long.

The Hawkeyes failed to convert a 3-point field goal until 74.9 remained in the first half, with Michael Baer numbers down a left-handed lay-up. He was also limited.

Texas was able to throw a plethora of big bodies at the Hawkeyes, including forward Jonathan Holmes, who led the Longhorns with 19 points and 17 rebounds.

Iowa relied heavily on free throws and 3-pointers early, which the Hawkeyes had plenty of in the first half.

Iowa got to the free-throw line 13 times in the first half, converting 11. It also went 3-of-8 from beyond the 3-point line.

In the second half, Texas proved to be the better team.

The Longhorns jumped out of the intermission on an 11-3 run, gaining their first lead of the game with 17:30 remaining in the second half.

They briefly lost that lead and regained it with 13:39 left in the game. They held on to the lead for the rest of the contest.

At the firstfront of this game, Iowa’s defense was Texas frontcourt.

Whereas in the first half, outrebounded Texas, 26-21, The Longhorns countered in the second half by outscoring Iowa, 19-13.

Texas was held to just 35.3 percent from the field in the first half. In the second half, the Hawkeyes conversion percentage plummeted to 60.7 percent.

Defensively, Texas forced Iowa’s guards to produce the scoring, and they struggled. Including starters Mike Gesell and Anthony Clemence, as well as guards off the bench, Iowa’s guards combined to shoot just 3-of-29 from the floor.

Iowa’s Michael Kelly has been in and out of the lineup throughout his Hawkeye wrestling career.
