International-student numbers fluctuate

By ALEKSANDRA VUJICIC

We refer to the tenants of the South Dubuque Street cottages held a ‘memorial service’ this weekend for their shops.

A crowd of people gathered in front of the Moy Yat Yuan Twin Kung Fu Academy, 614 S. Dubuque St., on Dec. 13 to memorialize the building, along with two other cottages that may soon be demolished. The City Council voted 4-3 against a public hearing concerning the historical status of the cottages, which would have put a 60-day hold on demolitions.

Alex Tremble, the executive director of Friends of Historic Preservation, and the service on Dec. 13 was a way for people to share their memories of the cottages and hope for what will happen in the future.

"Everyone took an opportunity to talk about their feelings on the issue (and) what they thought the City Council was taking into ac-

International-student enrollment has fluctuated for undergraduate and graduate students.

By ALEKSANDRA VUJICIC

A rise in the number of students around the world seeking higher education has been seen in undergraduate programs at the University of Iowa, but graduate and professional enrollment experienced the opposite trend.

The UI’s undergraduate international-student population has grown significantly, with more than seven times as many enrolled since 2005. This year, there were 2,490 students enrolled, compared with 340 in 2005, according to data from the UI Office of International Students and Scholars. However, graduate and professional enrollment has fallen by around 13.7 percent.

In 2005, there were 1,755 enrolled, and this year that number fell to 1,510.

Several UI officials said the changing populations are a result of a few key factors. Lee Seedof, the senior associate director of International Student and Scholar Services, said the trend of increased numbers of undergraduates, especially from China, is pretty

"Cottages receive a service"
Blotter

Garry Ball, 25, 2040 Highway 6; E. Apt. 22, was charged Dec. 10 with misdemeanor assault with a knife.

Tyler Becker, 24, 452 Southgate Ave., was charged Dec. 11 with simple assault, armed assault and criminal trespass.

Kyle Comic, 28, 317 Padrick Circle, was charged Dec. 12 with criminal trespass.

Markow Fox, 18, 624 S. E. 12th St., was charged Dec. 11 with criminal trespass.

Vincent Fumei, 21, 302 16th St., was charged Dec. 14 with burglary.

With public intoxication.

Brittany Gunite, 16, North Liberty, was charged Dec. 12 with fourth-degree theft.

Robert Hart, 29, 1556 S. First St., was charged Dec. 11 with driving with a suspended license.

James Jackson, 23, Muscatine, was charged Dec. 12 with public intoxication.

Kevin Jefferson, 21, 1556 S. First St., was charged Dec. 15 with assault.

John Lawson, 44, Marion, was charged Dec. 15 with possession of marijuana and 18 counts of possession of drug paraphernalia.

John Milne, 20, 412 N. Gilbert St., was charged Sunday with simple assault.

Anthony Spurgeon, 17, 1131 Southgate Ave., was charged Dec. 13 with 18th-degree theft.

Raymond Sutton, 20, Coralville, was charged Dec. 15 with third-degree theft.

Tony White, 20, 920 Rampart Drive, was charged Dec. 13 with theft.

Blake Wright, 23, 3485 University Ave., was charged Dec. 12 with drug paraphernalia.

Zachary Ziemer, 20, 3600 E. North Avenue, was charged Dec. 11 with drug paraphernalia.

IT aids Haitian health care

By Michael Karp

Recent improvements to digital software that collects patient information by doctors at the University of Iowa Hospital Technology Service allows visitors to health care centers to better gather information on the Medical Iowa Home.

Doctors can now better track the progression of individuals and follow them after their regular absence.

This can mean the difference between life and death for some Haitians.

The technology was developed between September and December, and it is currently available to keep up with the clinic’s needs.

IT workers added parameters to meet their needs, and collected information regarding HIV in Haiti.

IT seems kind of daunting when you think of the amount of stuff that may change the world," said UI Clinical Associate Professor of Medicine Stephen Bower.

Yagla ended up joining IT support specialist Stephen Yagla at Buresh and said they only brought up the paper back 5 percent of the time.

"With the format they were using, they could only use to relegate all the data," Yagla said.

Upon his return, he began to collaborate with IT workers to streamline the process over their lunch breaks to avoid the problem.

They decided to use Apple's software to create a database system on iPad that it could be taken to people in three to five hours. Yagla noted that only students and the later became friends.

The system is made up of Windows and Apple.

"It’s amazing how powerful [TEBOW] or and how much it helps," Buresh said. He said the clinic uses it to set up meetings for patients in need of chronic care, as they can record trends, measure their efficiency, and provide information to their medical data.

This can aid the clinics to do even more with less time and costs.

"It’s crucial that we can turn ourselves and other everyone else that we also that are not meeting our time and costs," Buresh said.

Yagla, Fitzgerald, and Bowers continue to modify the software to improve and refine the handling of specific kinds of data.

"TEBOW has definitely changed the way we look at what we do and changed the way we look at people in IT," Buresh said.

"IT’scroft" and "special value," He added, "There is no way that one service will solve the problems of the world, but it is the kind of service that we can provide while we are still able to provide it.

"It’scroft" and "special value," He added, "There is no way that one service will solve the problems of the world, but it is the kind of service that we can provide while we are still able to provide it.

For the Graduate College of Education, 2014 marks the program’s 50th anniversary. To celebrate, researchers are preparing a special issue of the Journal of College Science Teaching, which will feature contributions from more than 300 authors.Helen Peck, a fourth-year UI grad student, said that the number of graduate students has increased significantly. "It’s not uncommon for us to have more than 100 graduate students in a single semester," she said. "And this semester, we expect to have more than 200 graduate students in total."

Puppy hell in Iowa

Iowa is home to 16 puppy mills, sparking controversy among local residents and authorities. puppy mills are known to cause suffering to their animals and have been a growing concern in the state of Iowa. The issue of puppy mills is not only a matter of animal welfare, but also of economic impact. puppy mills produce puppies for sale on the Internet or through brokers, who then sell the puppies to the general public. These puppy mills are usually very unsanitary and lack proper care for the animals. It is important for the state of Iowa to take action against puppy mills and ensure the well-being of the animals.
right in the Cy-Hawk series. Instead, Iowa’s young line科尔曼的命令，而继续在赛季开始前，新秀们也没有放松警惕。后防线的丹特·巴尼特，他正着眼20.5次 tackle，马丁内特在100米比赛中以10秒02的成绩领先，而他的前100米成绩是9秒62。

汤姆·伯恩斯说。他证明了这一点。

Prepping for conference gauntlet without nonconference foes

By RYAN RODRIGUEZ

Theaddition of Maryland and Rutgers to the Big Ten has added mounds of already-intense pressure on a conference that is among the best for women's basketball, and teams have prepared accordingly. Suddenly, teams have fewer nonconference games to use as preparation for Big Ten play, which will roll around toward mid-November, in Iowa. 'The same crap continues on,' Iowa forward Aaron White said, clearly frustrated.

But more than just scheduling tough opponents, coach Fran McCaffery has continually preached that the Hawkeyes have to prove what it takes to win.

"Our guys continue to prove it has been that way all season," McCaffery said when asked what he thought of the team's collapse last season. "It was just under seven minutes, the Cyclones all the momentum heading into the break with a 5-point lead. That's huge, but you can't let that dictate the whole second half," White said. "...I just felt like our energy level was zapped." Then the wheels fell off. Iowa State missed its first shot of the half, then made 10 straight. In just under seven minutes, the Cyclones turned a 5-point lead into a 25-point rout. Suddenly, Hawkeye fans were reminded of the team's collapse last season, a season full of poor second halves, in which 10 of Iowa's 13 losses occurred when the Cyclones were either winning or had the ball.

"Well, there are only a couple of things," head coach Fran McCaffery said when asked what he could do as a coach in those situations. "You've got to start pushing different buttons." So McCaffery pushed. He subbed in bench players, pressed the Cyclones full-court, trapped them in the half-court, and tried to get the ball in the paint on offense. But nothing worked. Iowa State shot 63.3 percent from the field in the second half, outscored the bigger Iowa team 39-37, got out to a 12-point lead.

In Iowa's 90-75 loss to Iowa State, its second-half struggles came back to bite Iowa again.
