The Sophomore Debate.

The second annual Sophomore debate between the Zetagathian and Irving Societies took place Tuesday evening in Irving Hall. The question, "Resolved, that Cabinet officers should have seats in Congress and a voice in its debate," was affirmed for the Irvings by N. R. Morrison, I. Petersberger, and G. N. Briggs, and denied for the Zets by H. W. Hanson, T. J. Fitzpatrick, and C. H. Van Law. The judges were J. L. Pickard, Professor Calvin and Professor Hayes.

After a violin solo by Professor Van Steenderen, the presiding officer, Professor Wilcox, introduced Mr. Morrison, the first speaker for the affirmative. After a few preliminary remarks as to the vast importance of the question, the speaker proceeded to his argument. He declared that under the present system the administrative and executive departments of our government are strangers, and that the administration had often been opposed by congress simply be-

cause the latter was ignorant in regard to the policy of the administration. This would be obviated if the cabinet officers could appear in the halls of congress and make explanations. The system proposed by the affirmative would instruct the public, remove the evils of the committee system, uncover any fraud in the executive department of our government, and increase the effectiveness of the government.

Mr. Hanson next took the floor for the negative. The affirmative must show the proposed change necessary. The negative held a change unnecessary because the present system has proved good in the past under most unfavorable conditions. In comparison with other governments ours is free from corruption; the American people are the most educated; we have slowness of legislation but this prevents precipitancy and guards against the tyranny of majorities. Objections to the proposed system are the confusion of the legislative and executive; too much power given to the executive.

Mr. Petersberger, the speaker following for the affirmative, said that the proposed system was simple, convenient and direct. The chasm now existing between the legislative and executive departments was not intended by the framers of the constitution. The proposed system will bridge this chasm. In the first session of congress we had 300 bills; in the last 10,000. Change of conditions demands such a change in the government as proposed by the affirmative. The cabinet officers would not take the initiative in legislation but would give information. This system would do away with the tampering of bills by committees which often defeats the purpose of the bill.

Mr. Fitzpatrick, the second speaker for the negative, presented the following objections to the proposed system: Opposition to the spirit of our government; cumbersome and expensive; the evils accompanying it would more than counterbalance its advantages. The President now has the entire direction of the military forces of the United States and controls a large part of the civil power. It would be dangerous to give him more influence. With the President's agents in congress we would have precipitancy of legislation if the President and congress agree, and no legislation if they disagree.

The third speaker for the affirmative, Mr. Briggs, believed that he who knows most of a certain subject is most competent to legislate thereon. In the case of the Behring Sea question the administration could not explain its policy sufficiently and so its treaty was rejected by an ignorant congress. Later the republic suffered from this. This speaker spent most of his time in considering the constitutionality of the proposed change.

C. H. Vanlaw closed for the negative. We can place no confidence in this proposed system by watching its workings in the countries of Europe. The cabinet officers being responsible to the President only would lead to tyranny. Congressmen can obtain their own information, and it would

be folly for congress to accept the influence of prejudiced men.

Mr. Hanson now followed with a five minute closing speech for the negative. Mr. Petersberger made the closing argument for the affirmative.

The argument was upheld well on both sides, every speaker showing thorough preparation. The Zets were superior probably in point of delivery. Mr. Petersberger's first speech was one of the finest of the evening, but in his five minute argument he showed too great haste.

After a vocal solo by Miss Williams the decision of the judges was announced unanimous in favor of the negative.

THE VIDETTE-REPORTER, Iowa City, Iowa.

Entered at the Iowa City Post Office as second class matter.

The game of last Wednesday gives to our University the silver bat, for which our base ball teams have been striving so eagerly for the past seasons. At present we have in our possession the championship cup and the silver bat, and there is no reason why we should not hold them for a greater part of the time so long as we remain a member of the present athletic association and base ball league. We have a much larger number of students from which to choose our teams than any college in the state and this certainly ought to give us a decided advantage.

On next Monday will occur the game between our ball team and the team of Michigan University. It is well known to many that Ann Arbor has a very strong team and a lively game is anticipated. We hope that the management will be encouraged by a good audience at this game. We would again call the attention of the management to the delapidated condition of the wire in front of the grand stand, which should be fixed before this game. Two persons were hurt by the ball flying into the grand stand at the last game on our home ground, and with but little expense this could be prevented.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. Michigan-Iowa-Chicago.

At the recent contest of the Northern Oratorical League, the representatives of the Oratorical Association of the University of Chicago were challenged by representatives of similar organizations at the University of Michigan and the State University of Iowa to joint debate at some time during the next college year. The Oratorical Association accepted the challenge at its meeting last night and two contests are assured. A quasi-challenge has also been received from the University of Wisconsin, and it is probable that a similar contest will be arranged with that institution.—*U. of C. Weekly.*

Trouble at Stanford.

The \$15,000,000 suit of the United States against Stanford University, which has recently been begun, threatens to affect disastrously the affairs of that institution. Stanford has an endowment of \$20,000,000, but much of this is in lands and real estate. The serious difficulty has been to secure funds for current expenses. For the past year the University has been enabled to continue only by the personal munificence of Mrs. Stanford, who has contributed very liberally from her personal income. The pressure of the present suit by the United States brings matters to a climax, and may cause the suspension of the University. Such a result would involve great loss to the cause of higher education, not only in the Pacific states, but throughout the country.—*U. of C. Weekly.*
