NO. 2

Foot Ball.

Considerable interest is manifested over the prospects of athletics for the coming year, and especially regarding foot ball. There can be no doubt that the popularity of the game is not waning, but owing to the bad management of financial affairs last year the practicability of continuing that branch of athletics seems in doubt. Considerable difference of opinion exists as to the blamable party in the management, but certainly, however it be thought, the Advisory Board cannot escape censure for their laxness in not rejecting men when elected to positions for which they were notoriously incompetent.

The Athletic Board last spring recommended to the Faculty that there be no foot ball this year. There the matter rested, the Faculty not taking action. As cause for this recommendation it was claimed that foot ball was not on a sound financial basis; at this time there was about \$300 outstanding debts on account of foot ball, and the Advisory Board failed to ratify the election of officers of the team. It seems to be the opinion of the Advisory Board that if this debt is discharged they can go ahead with the organization of the team.

The prospects for a team are good, made up of such old players as Steve Coldren, C. Coldren, Will Larrabee, Leighton, Hobbs, Hetzel, Moore, Iverson, besides plenty of new material. Those interested have been looking the matter up, and the chances for a team are very favorable as to finances, as over half of the existing debt is already assured by business men and students. We sincerely hope arrangements will be satisfactorily made, as all are interested in continuing the game.

John V. Crum.

Very few athletes have ever had a record equalling that of our champion and favorite, John V. Crum, more familiarly known as "Johnny." To those who knew him three years ago his work of the past year and a half appears still more marvelous.

At the first fall field meet, held in '92, Crum practically made his debut on the cinder track. Here he was defeated by McClusky in the 50 yard dash in 5 4-5 seconds, and in the 100 yard dash in 10 4-5 seconds.

At the home field meet, held May 6, 1893, Crum was again second to McClusky in the 50 yard dash, at 6 1-5 seconds, and in the 100 at 11 1/2 seconds, but won the 220 in 26 seconds from Clements, L. '93.

In the state meet held at Des Moines, June 2, 1893, Crum got third in the 50 yard dash, won in 5 4-5 seconds, third in the 100 yard dash, won in 10 1/2 seconds, and second in the 220 yard dash, won in 23 seconds.

It was not until the fall term of 1893 that Crum commenced winning his events, but since then he has had an almost unbroken series of victories. At the '93 fall field meet he won the 100 in 10 2-5 seconds, the 220 in 25 1/2 seconds, and the 220 hurdles in 35 1/2 seconds.

In the spring of '94, under the efficient training of "Dad" Moulton, Crum began to exhibit his superior

quality and to lower some of his records, his best marks being made at the state field meet, held at Iowa City, June 1st, the time of 10 1-5 seconds being made in the 100, and 23 seconds in the 220 yard dash. He also won three more points for S. U. I. in the 40 yard dash and the 220 yard hurdles, enabling S. U. I. to win the state championship cup.

In the fall of 1894 Crum continued his series of victories and added to his already large collection of gold and diamond medals, but it was not until last spring that we realized what a jewel we had in Crum, and it was only after he had made the hundred yards in 10 seconds flat, and the 220 in under 23 seconds, that we resolved to sacrifice all hopes of winning state field day and to send him east to compete with Harvard, Yale, Princeton, Pennsylvania and others of our equals, or afterwards inferiors, to see how fast "Johnny" could run. And we found out. We found that Crum is by far the fastest of all living college sprinters when he defeated Richards of Yale, and Ramsdell of Pennsylvania, in the hundred in 10 seconds flat, and in the 220 in 22 seconds flat. He repeated his performance among the western collegiate athletes at Chicago, on June 1st, winning in the same time in both events.

Here Crum's collegiate record ceased, as he graduated from our Law department the following week. His University friends still keep an interest in "Johnny," and the following victories may prove of interest, although many already know them:

On June 15th, Crum competed with the Chicago Athletic Association against the University of California, and defeated J. W. Scoggins in the hundred in 9 4-5 seconds, tying the world's amateur and professional records.

Here Crum's work for the summer ceased, and was not renewed until the middle of August, when he began training under H. S. Cornish, of the C. A. A., for the central championship of America. Here he had Stuart of St. Albans, and Maybury of Wisconsin again against him, and defeated Stuart in the hundred in 10 flat, and Maybury in 21 4-5 seconds in the 220 yard dash, making a new world's record for the 220 around a turn.

The following Monday he competed in the Labor Day games of the New Jersey Athletic Club, where he won both the hundred and 220, but wrenched his leg so that twice since he has been beaten by Wefers of the New York Athletic Club, the first time being to decide what two should represent the N. Y. A. C. against the London Athletic Association, and the second time being for the amateur championship of America. In no race, however, has Wefers bettered Crum's time, and it is uncertain, if Crum's condition be good in the contest to-day, who will succeed in defeating the Englishmen, but we trust and hope that good luck will remain as of old with "Our Johnny."

One of the interesting advance movements at the University is in the department of Psychology. During the past year Professor Patrick

was granted four rooms, that is, the whole lower floor of the brick building formerly used by the Homeopathic Medical Department, for a Psychological Laboratory. Already a considerable amount of apparatus has been secured for the experimental study of Psychology, and more will be added the coming year. Professor Patrick will have an assistant this year, and the man chosen for the place is Dr. J. A. Gilbert, of New Haven, Conn. Dr. Gilbert is a Ph. D. in Psychology, of Yale University, and during the last year has been assistant in the Yale Psychological Laboratory. He is a specialist in experimental work and has distinguished himself by his investigations, particularly in child-study. Under the direction of Dr. Gilbert and Professor Patrick a course in Experimental Psychology will be given the coming year in addition to the courses hitherto given.

Professor Wm. C. Wilcox, Professor of History, and Miss Mary Frances De Voll, at Glens Falls, N. Y., on July 1st. They will be "At Home" in Iowa City after October 1st.

Medical Department.

Ferguson, M. '98, is taking special work in science at Cornell this year.

George A. Fracker, C. '94, is attending a course of lectures in Physiology by Dr. Guthrie.

Professor J. C. Shrader is unable to be out yet, but is slowly recovering from his late illness.

W. S. Bailey and L. A. Miller, graduates of U. I. U., have entered the Medical Department.

Dr. J. G. Mueller, '95, visited with his parents part of last week. He enjoys a fine practice at Gilbertville, Ia.

Dr. W. D. Middleton at the Faculty meeting last Thursday was elected the new Dean of the Medical Department.

Professor W. D. Middleton was unable to attend the opening exercises of the Medical Department, being detained at Davenport to testify in a medico-legal case.

Dr. George, a recent graduate of Rush Medical College, Chicago, and a native of Persia, gave a very interesting address to Dr. Chase's therapeutics class last Thursday, on therapeutics of Persia.

We hope to keep up a good, newsy Medical Department in the VIDETTE this year, which can only be done by every member of the department taking an interest in the matter. News of general interest will be gladly accepted from any one.

Dr. W. R. Whiteis, '95, who continues as instructor in the Medical Department, spent the summer vacation studying in Leipsic, Germany. He also visited Berlin, Vienna, Prague, Buda Pesth, and other places of interest. Mrs. Whiteis remains in Germany to continue her studies during the coming year and will be rejoined by Dr. Whiteis next spring, who will return to Europe to pursue further studies in his chosen line of work.

The Medical Department opened last Wednesday afternoon with a large attendance. All members of the Fac-

ulty were present except Professors J. E. Shrader and W. D. Middleton. Professor E. W. Rockwood made the opening address. He spoke interestingly and in a scholarly manner about the fundamental medical sciences, comparing the medicine of the past with the present, and showing its rapid growth and importance.

There has just been issued from the press a new medical work entitled "The Elements of Surgical Pathology," by Dr. J. G. Gilchrist. The work is intended for a text book for the Senior class in his department. Dr. Gilchrist has added considerably to the literature of his profession, this being his tenth book.

Dr. E. E. Hale, Jr., has recently published a book entitled "Selections from the Poetry of Robert Herrick," the work on which was done while Dr. Hale was Professor of Literature here. In the preface mention is kindly made of the assistance rendered him by Dr. A. N. Currier in the recollection of the Latin poets who were Herrick's inspiration. The work will be one of great interest to students of sixteenth century literature, and shows the careful preparation which characterizes the Doctor in all his work.

Authorship is not confined to its professors. There are alumni who are making their records in the field of literature. Francis E. Nipher, Ph. B. 1870, and A. M. 1875, now Professor of Physics and Electrical Engineering at Washington University, St. Louis, Mo., has just presented to the general library his last work entitled "Electricity and Magnetism." The work is strictly mathematical in character, though adapted to the use of undergraduate students who are pursuing special studies along these lines. It will immediately take its place among the standard treatises used by electrical engineers, as the work is eminently practical in its scope.

Roland Reed, "The Politician."

Roland Reed will begin his engagement in "The Politician," at the Opera House next Tuesday evening. Mr. Reed continues to have large audiences throughout the country to laugh at his humorous work. The situations of the play are diverting, the action is consistent and the dialogue is bright and at times epigrammatic. Mr. Reed as "Limber" is right in his element. He displays the requisite dash, assurance and fertility of resources, and draws liberally from the abundant fund of humor and bubbling spirits that he possesses. The piece is entirely free from horse play, the audience passing from laugh to laugh, through nearly three hours, which owes its humor to a higher source and the most legitimate resources of the comedian. A strong character of the play is "Cleopatra Sturgen," a woman of the new dispensation. Miss Isadore Rush plays this part in a series of mannish gowns which are as becoming as her acting is piquant. The play is undoubtedly the best Mr. Reed has been seen in for years and is a remarkably clever satire upon modern politics.

THE VIDETTE REPORTER,
Iowa City, Iowa.

Entered at the Iowa City Post Office as second class matter.

The fact that there is a marked increase in the attendance at the University is one of the most encouraging features of the new year. Every effort has been successfully made to accommodate a large number of students, and it is gratifying to see so large a number here. The Freshman class now numbers one hundred and fifty, and will be increased considerably. It is not practicable to estimate the total enrollment yet, but it is evident that it will largely excel any former number. From appearances at least we judge that the University is no more fortunate in the number than in the character of her new students. The Freshman class is exceptionally well favored.

When it was decided last year to lengthen the course of study and raise the requirements for admission in the Medical Departments and Dental Department some fear was anticipated lest it would drive away from our University a large number of professional students who otherwise would have come here. From present indications, however, such does not seem to have been the case, as the attendance already in these departments indicates a decided increase over last year. At the time this change was made last year, the VIDETTE-REPORTER endorsed the idea and suggested that it believed it would be well if a similar change would be made in the Law Department so soon as it was deemed advisable to do so. In reply to our suggestion Chancellor McClain stated several reasons why it would not be best to make such changes in the Law Department at the present time, chief of which were that it would tend to decrease the attendance in our Law Department, and also that the Department was not supplied with sufficient financial support to make a three years course such as it

should be made, and that a two years course of thorough work is preferable to a three years course of work poorly done on account of a lack of necessary funds. The money objection to extending the Law course is certainly a valid one, and one which perhaps we had not carefully considered. When we see fit to increase our Law course to three years we want to be in a position to give it the same financial support which it receives at the present time and even better. As to raising the standard of admission we fail to see where anything but benefit could be derived from making requirements for admission at least equivalent to those of the Medical Department. It is true, as Chancellor McClain suggests, that the increased number of college graduates who enter the Law Department will tend to raise the scholarship to an extent which will discourage those who do not possess at least a good high school education from entering upon the course, but with some standard for admission for the other departments of the University and none for the Law Department, will there not be a tendency for the latter department to catch all those students who have a wild desire to get into a University before they are sufficiently prepared and are unable to meet the requirements for the other departments? As we stated last year, we have the most promising Law schools in the West, and one which promises to equal the best in the United States. It is equipped with as able a body of legal professors as can be found in any law school in the United States, and its library is unequalled in any institution west of the Mississippi. To keep pace with the rest of the University, however, our Law Department must be given such financial support as will warrant it in increasing the length of its course, and making such other changes as will prove beneficial to the character of the school. Such changes may have a tendency to decrease the attendance or they may not, it is difficult to determine without a test. In the case of the Medical and Dental Departments it does not seem to have had this effect, and perhaps it would not in the case of the Law. It certainly would have the effect of attracting to our Law school a class of students who take advantage each year of the more thorough course offered by eastern law schools.

Mass Meeting.

This evening at 7 o'clock, a mass meeting of the students of all departments will be held in the Y. M. C. A. auditorium to consider the advisability of having a foot ball team. Professor Loos will preside. Speeches will be made by the chairman, Judge Hayes and Judge Wade.

Notice.

Every man of '97 Hawkeye Board will please be present at Close Hall, Monday afternoon next, at 3:30.

Thursday afternoon.

Dr. Woods Hutchinson is now a
resident of Iowa City.

R. L. Dunlap spent Friday after-
noon at West Liberty.

J. F. Palmeter, ex-'97, goes to Chi-
cago University this year.

J. W. Hillyard, L. '95, has hung out
his shingle at Paulina, Ia.

The University south building was
re-roofed during the summer.

The Zetagathians and Hesperians
held a joint meeting Friday after-
noon.

F. W. Beckman will not be in the
University before the spring term at
least.

Shepard, '97, has been under the
weather for the past few days, but is
improving.

P. A. McMillan, '93, has the position
of first assistant in the Mason City
high school.

Nannie McKinley, ex-'95, has a
lucrative position in the Postville
high school.

Professor C. D. Jameson who has
recently been ill, has fortunately re-
covered, and is now in Tien Tsin,
China.

CALL ON BLOOM & MAYER FOR CLOTHING AND HATS.

Fred Irish has accepted a position to teach natural science in the Dubuque high school.

C. C. Stover, '93, has been elected principal of the Oskaloosa high school at \$100 per month.

Lulu Swisher will not be in the University this year, but will teach at her home in Cherokee, Ia.

Fred W. Neal, '92, L. '93, who is now comfortably located at Stuart, Iowa, was married last Wednesday to Miss Ollie Hasson.

C. H. Burton, of last year's Law class, is enjoying a good law and real estate business at Mason City.

J. W. Seaman, '95, returns to finish in law next June. E. W. Seaman will be back with '96 in a few days.

Roberta Holmes, '91, and Carrie Kimball, of the Janesville, Wis., high school, spent the summer in this city.

S. K. Stevenson, '93, has been re-nominated by the Republicans as County Superintendent of this county.

Owing to lack of space we are compelled to hold over an account of the Y. W. C. A.'s reception on Wednesday evening.

Mr. Doolittle, who was one of our able assistants in Mathematics last year, expects to pursue post-graduate work at the Chicago University.

Miss Clara Harvat will not be in the University this term. She has gone to Woonsocket, S. D., where she will remain several months.

Paul Bartsch, '96, spent Thursday and Friday at the Davenport Academy of Science, identifying cretaceous fossil leaves for the University botanical department.

We are all glad to welcome Professor Nutting back from his trip to England and Naples. He reports having enjoyed a fine feast in the libraries and laboratories abroad.

A. T. Sanford, '93, was in the city recently on his way westward, where he expects to locate as soon as he finds a suitable place. Mr. Sanford has completed two years' work at the Harvard Law school, and expects to receive his degree from that institution next spring.

Assistant Professor Houser, the only Iowa man who has been elected a member of the corporation of the very important institution, the Marine Biological Laboratory, at Wood's Hall, Mass., returns with an abundance of material, collected at great pains, for the use of the students in his department this year.

\$100 Reward. \$1.00.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & Co., Toledo, O. Sold by druggists, 75c.

**RICHMOND
Straight Cut No. 1
Cigarettes.**

CIGARETTE SMOKERS, who are willing to pay a little more than the price charged for the ordinary trade Cigarettes, will find THIS BRAND superior to all others.

These cigarettes are made from the brightest, most delicately flavored and highest cost Gold Leaf grown in Virginia. It is the Old and Original Brand of Straight Cut Cigarettes, and was brought out by us in the year 1875.

BEWARE OF IMITATIONS, and observe that the firm name as below is on every package.
