Prof. C. C. Nutting, Regent P. K. Ross, and Prof. A. F. Thorne, the architect Proudfoot who constituted a committee of the board of regents to visit eastern museums with the idea of securing ideas for Iowa’s new science hall have returned. The members of the committee declare that their trip was very profitable and that they have secured data which will be of great assistance in the construction of Iowa’s new science hall. The museums which were visited by the committee were: Field Columbian Museum Chicago; Carnegie Museum, Washington National Museum; The Museum of Comparative Zoology Harvard; Metropolitan Museum of Natural History New York City. The members of the committee were gone about ten days. One of the important details which the committee especially posted itself upon was the light question. The question of proper lighting is one of the utmost importance in the erection of a museum building and is one that is most often neglected. Prof. Nutting believes that this question will be well considered at the time the Iowa Museum will be built. In the west, Prof. Nutting made arrangements for securing a large amount of additional valuable material which is now in the new museum here. The other large museums of the country are already indebted to the Iowa Museum for services which the Iowa science professors have given them in expeditions and other scientific investigations. These obligations are to be paid in material for the new museum. The material cannot now be brought here because of the lack of room and the danger of fire but will be brought in as soon as the new building is ready. Much of the material will come from the national museum at Washington.

Seven new compound microscopes have been placed in the Zoological Laboratory.

Miss Madge Young has gone to the University of Oregon, Dr. A. M. Young, to recuperate.

Prof. A. A. Veblen will deliver lecture on the Rock Island railroad Thursday in Northwood and other Iowa towns.

W. H. Bremner, Iowa’s Farrar saint in athletics who is now city solicitor of Des Moines will be at the opening of the day’s work of the today’s republican convention of Polk county.

Off with your new clothes—They are set, the高等学校一Drama—Interest—Inu-terest, make this the closing spring season in touch with the rush provided in establishments. Hundreds of people in black tie in soap powder pieces display in our store. Come in and get your low prices.

IOW CITY, IOWA

SUBSCRIBERS NOTICE

The years subscription to the Iowan of $4.50 is due May 1 and should be settled at once. Remit by money order, or Chicago and New York's draft on H. M. Pratt, Manager.

A Gentle Knob

The Iowan does not believe in knocking, but it does believe that no harm can come from calling attention to the disinclination on the part of the students to lend their patronage to such entertainments as was given at the opera house last Saturday night by Henry Watterson. In most places the announcement that Henry Watterson was to speak would insure a packed house but it is a lamentable fact that those students who clubbed together to secure this date for Henry Watterson were compelled to go down into their pockets to the extent of almost $100 to make up the expense. And all of this in addition to the trouble they experienced. The money from the sale of tickets just covered one half of the expense of the venture.

What is the matter? Don't Iowa students appreciate the value of an opportunity to hear a popular lecturer on a popular subject? The faculty was well represented in the audience.

It is to be hoped that the auditorium which the university is soon to get will stimulate an interest in such things as popular lectures. Surely the students will feel a deeper interest in the same when given under the auspices of the university and in a university auditorium. In addition to this fact, lecturers will feel free to come under university auspices than under present conditions.

Newspaper correspondents in the various educational institutions are now busily engaged in telling of the promised strength of their baseball and track teams. The hard luck stories will be next in order.

When in doubt, start training.

The board of managers of Chicago are trying to sign Yost, the Michigan coach, as athletic director of the Indian school.

Much disappearance is being expressed by students and faculty of Nebraska over the location of a new physics building on the athletic field by the board of regents of the University.

At the University of Indiana, a prize of twenty-five dollars has been offered to the undergraduate doing the best newspaper work for the coming year. This covers the work done by students on the college daily.

Commencing Saturday night, Miss Sager will hold the College of Science and Assembly at the Armory. All are cordially invited. Music by Mahans and Ogro.

The continued success of the Powell Portfolio Co., in the east has hitherto limited its engagements to that territory. The present tour will however include a great deal of territory which the company has never visited. This excellent organization at popular prices will be the attraction here next Monday.

The only way to judge a play is by its ability to draw large audiences, and to please those who attend. This is the only true measure of success, whatever argument may be brought to the contrary. That the new play "A Millionaire Tramp" possesses these qualifications is proved by the large audiences which have attended every performance this season. It is not the relic of an old favorite traveling on its old reputation, but a new production now making its appearance.

"A Millionaire Tramp" comes to the Opera House next Thursday night, and in all probability, standing room only will be the rule with this splendid attraction.

Do you need a watch? See John Hands.

New Cravettes for spring wear at Bloom & Mayer's.

When You Arrive
You Are There

The Rock Island's New Chicago Terminal—the
La Salle Street Station—is the largest, handsomest,
most conveniently arranged and most centrally located
depot in Chicago. It is only half a block from the
Board of Trade and only a block and a half from the
Postoffice. All trains of all Chicago's elevated
railroads stop at its doors.

When you arrive in Chicago via the Rock Island
you are there—within easy walking distance of the
principal theatres, hotels and business establishments.

Rock Island trains for Chicago leave Iowa City
five times daily. Except Sunday 5 times. Sleepers. Re-
clining Chair cars. Dinner. Full information at this office
