PRACTICAL TEACHING

CLASS ORGANIZED FOR THIS PURPOSE

Professor Potter Gives Students A Chance To Do Active Work

The students of the university—rather, a part of them—are having a chance to show their abilities. Since the opening of the present semester, Professor F. H. Potter has had charge of two beginning classes at the Iowa City High school, which serve, in addition to, to afford practice for students in the university desiring to gain professional experience in teaching this subject. The plan is not wholly a new one, but in the past department, but is being carried on more extensively than in previous years.

The number of university students taking this work is seven, all of whom are either graduates or persons taking advanced work in this department. The two classes in this line, which comprise about ten pupils, and a few of these are assigned to each of the intending teachers for special study and personal instruction. Professor Potter does most of the regular instruction before the classes, using his own system, although each of the university students who are taking this special work is occasionally given an opportunity to show his skill along this line. This, however, is under the direct supervision of Professor Potter, so that errors which might otherwise be avoided are made.

The plan as a whole is proving very successful in every sense, and creditable in all respects; and although it will probably be impossible to extend this plan, in connection with the department of Latin, it will, however, be so arranged that the university students will be given an opportunity to fit to those who expect to teach this subject.

Sophomore Social

The sophomore social, which will be held tonight in the K. of P. Hall, promises to surpass all other social functions that the class has given. As in the last party that the class will give this year, all members should make it a point to be present, as it is not already made arrangements with some of the members of the class, come anyway.

A pamphlet has just been published under the direction of Professor Potter, containing several interesting articles on the various engineering societies which have been prominent in the state. The Iowa Society of Civil Engineers, the Iowa Society of Chemical Engineers, and the Iowa Society of Civil Engineers is given, up to the time when these societies were formed, and the organization is being kept up. A number of facts are given about the existing Iowa Engineering Society.

MIDDLE FOR HEROISM

MISS STEELE MAY BE HONORED BY CARNegie

Noted Financier Expected to Award Prize for Saving of a Life

Mr. George E. Linn is in receipt of a letter from the commission which has charge of the awarding of the Carnegie medals asking him for the particulars in what came near being a drowning accident. The accident occurred on the ninth of last December when Mr. Linn in company with a party from the library was, skating on the river above the dam. In going near to the open water of the wintry dam, Mr. Linn went through the ice into about twelve feet of water and although he is a good swimmer it is doubtful whether he would have been able to get away, had it not been for the presence of Miss Steele in reaching to him with a pole. As it was, he was of only short duration and was rapidly becoming helpless with cold. Miss Steele ran great risk of herself to venture out where the ice was little thicker than a heavy book cover.

The Carnegie commission in some way heard of Miss Steele's heroicism and there is little doubt that she will receive the valuable medal in the near future. Miss Steele recently resigned her position in the university where she was a member of a similar class to the state capital.

Miss Ogden is visiting her sister Miss Glenn Ogden for a few days.

Epillon Tau held a meeting yesterday afternoon.

De Germania met last night in Miss Call's room, hall of liberal arts.

Raymond C. Kraemer, L. A. W received a telegram this afternoon announcing his appointment at Annapolis.

A. B. Minar of Iowa Wesleyan, as visited in the city a few hours yesterday with Wayne Hemphill, general secretary of the Y. M. C. A.

Hon. Milton Remley addressed the Y.M.C.A. meeting Sunday, on the subject, "Should a Man's Helmet Be Life Lapse While in College?"

George D. Ryan has been elected professor of chemistry in the chemistry laboratory and storekeeper. Mr. Ryan is a 1904 graduate of Ohio Wesleyan.

Word was received Sunday by A. C. Stierker that J. A. Eaton of the department of chemistry has recently been elected to the Villa Park, New Jersey, of tuberculosis. Until a short time ago he had been employed by the American Bridge Co. as draughtsman. His family moved to Bridgeport Connecticut, about a year ago.

Gym Men Measured

TRAINER RULE INAPPROX-ATES NEW PLAN

Physical Description of Each Man Taking Athletics Recorded

Gymnasium Trainer Rule is making the gym work very popular, as is shown by the large number of men registered and the constancy with which the classes are attended. About 150 are registered for the work, the evening classes averaging about seventy-five and the afternoon about twenty. There is also a faculty class of about ten.

At present trainer Rule is engaged in taking the measurements of the gym men and others who wish to have their photographs taken by the photographic department in order to get records for the future. This record is made in connection with the department of physical education. In this connection Mr. Rule has given the students of the university a model of what the ideal body should be, and he has made the students of the university work to fit that model.

INSTRUCTORS WILL MEET

TEACHERS, OF CENTRAL WEST HOLD SESSION

Important Matters Discussed—MacLean Is Elected President

President MacLean returned yesterday from the meeting of the North Central Association of Colleges and Schools, of which organization he was elected president and chosen a member of a commission to de-

Iowa City and the steady growth of graduate work, the state university of the middle west was well brought out.

The topic of perhaps the most general interest, however, was that of special fields in high schools. On this subject Mr. Morrison, a prominent educator of the Lewis Institute, at Chicago, took opposite sides. Mr. Morrison is a member of a number of universities and organizations of a like type and he considers that it was necessary to establish, himself, that the same field, being by nature secret and exclusive, had no place in the high school; Mr. Lewis, on the contrary, contended that secret organizations should be permitted in secondary schools, that such should have a sponsor in the faculty. In the discussion which followed, President MacLean brought out the point that in high schools, where a majority of the students are not graduates of the best high schools in the central west.

there was also several less important matters brought up at the meeting which was the health of the students of the organization. The progress and growth of the association continued on page 4.

Editor To-day — R. A. CRAWFORD, Jr.

As stated elsewhere in the IOWAN, the North Central Asso-
ciation of Colleges and Secondary Schools has passed a resolu-
tion recommending that students more than twenty years old be barred from athletic contests in secondary schools.

The reason for the proposed change is found in the desire to give every high school athlete a fair show. The average age of the high school gradudate is eighteen; it follows that the average high school student is much younger than this. If, then, such a man is forced to compete with one who has attained his full physical powers, the result is evident. High school athletics, under such a system, is confined to the older men. The student of average age gets no chance.

The new plan would be, more-

AMUSEMENTS

It is not very often that the theater-goers of Iowa City have an opportunity of witnessing such a meritorious production as the well-known Russian melo-
drama "Her Sale", which will be put on at the Opera House next Tuesday evening. The play, which is excellently staged and presented by a company that has won the admiration and applause of the discriminating public, portrays life in the Czar's domains with wonderful vividness.

FOR SPRING
Iowa City, Iowa, July 30, 1916.

The University of Virginia has received a gift of $400,000 for a Y.M.C.A. building.

Owing to a disagreement with the faculty, the senior class of Massachusetts Agricultural College has voted to leave school.

At a recent meeting of the undergraduate students of the University of California, a proposal to establish an honor system in examinations was voted down.

The senior class of Stanford University has inaugurated the custom of placing flowers daily at the tomb of Mrs. Stanford. The privilege will be passed on to each senior class as its successor.

Professor T. N. Carver, of the Economics department of Harvard University, reviewing the recent Dartmouth-Brown debate in the current issue of The Nation, says in part: "One result of the debate was to show that form—that is, manner of presentation—is a most important factor in winning a debate; for an argument which is well presented seems more weighty—other things equal—than one which is poorly presented."

---

**FAMABELLA**

We don't believe there's a cigar on the market that has "taken hold" faster than the Famabella Havana Cigar, "The Perfecion of Blends." Its success has been due solely and entirely to the quality of the cigar itself, and to our way of handling our trade. There has never been any "hand wagon" advertising at the stores connected with Famabella's. They've won out strictly on merit and they're making a bigger hit every day, at The Clinton Street Smoke House.
